

## Summary

**Site name:** Western Extension of Hillhead Quarry, Uffculme, Devon

**Grid reference:** ST 0578 1351

**Site activity:** Archaeological excavation

**Date and duration of project:** 14th August to 23rd September 2019

**Project manager:** Agata Socha-Paskiewicz

**Site supervisor:** Andrew Weale

**Site code:** HQU 16/46

**Area of site:** *c.* 9.9ha

**Summary of results:** The fieldwork has revealed a modest volume of cut features with a number of ditches and gullies recorded along with several pits. Few of the features are well dated, but some are clearly of Post-medieval date. A few struck lithics are of prehistoric date, but are probably residual finds. One pit, however contained prehistoric pottery but it was unclear if this was of Neolithic or possibly later Iron Age date.

**Location of Archive:** The archive and artefacts will be deposited with Albert Memorial Museum & Art Gallery, Exeter with accession code RAM:19/21 in due course.
