Interpretation and discussion TRANSECT THROUGH N/S DITCH AT SW CORNER OF INITIAL STRIP. CONTAINED 2 FILLS, BOT THERE WAS NOTHING WITHIN THE FILLS OR PROFILE TO INDICATE RE-CUTS OR DIFFERENT PHASES.

FUNCTION OF DITCH IS PROBABLY AS A BOUNDARY, GIVEN ITS DIMENSIONS, BUT IT ALSO SERVED FOR DRAINAGE.

Excavated and date	N.J.O. 11-16.6.2020	Recorded and date	N.J.O 17.6.2020	Site check	CF	Post-ex check

Description

1. Upper fill of ditch transect [605003]
2. Khaki, friable, slightly clayey loam.
3. Frequent flints + small nodules of chalk incl one possible tipline; Occ Roots; Occ. Peat grit at interface with chalk natural; Rare snail shells; Rare small-medium pieces of flint
4. Diffuse
5. 3.70 x 2.00 x 0.75
6. Mattock, Shovel, Trowel
7. See [605003]
8. No samples taken, as ~~identical~~ one was taken from the identical context in the transect to the north.
9. Near the machined surface of this context, two articulated, partial lamb skeletons were identified and collected separately. Only one long bone was recovered, and three lower jaws, but part of only one cranium. No signs of ~~cuts~~ cuts for both deposition in plan or section.

Interpretation and discussion Backfill of Ditch Cut [605003]. Seemed to be a single fill during excavation and drawing, although a possible tipline was identified. Context possibly resulted from one operation, but presence of sheep skeletons in the top of the fill suggest that the truncated/ploughed out higher deposits may have had a more complicated story to tell. No evidence discovered for the presence of a bank on other side.

Interpretation and discussion

Base fill of ditch Cut [605005]. The fill most likely represents natural weathering / slumping of the ditch sides - due to frequency of natural chalk and stone inclusions - possibly caused by rain / wind - There is a slight possibility the fill represents a bank, however there is no clear slump.

Interpretation and discussion

Fill of [605005]. The fill appears to represent a phase of colluvial hillwash. Occasional pottery and one Fe Nail appear to have washed into the ditch cut with the colluvium. - Fill most likely built up gradually as loose material washed down the hillside during periods of wet / windy weather - Pottery indicates a Medieval date of Construction.

Interpretation and discussion

Secondary fill of ditch Cut [605005]. The fill most likely represents a phase of colluvial hillwash - possibly over a long period of time - occasional animal bone / articulated animal skeletons are found within the context which might indicate occasional events of deliberate deposition

Interpretation and discussion

[605013] is a grave cut, filled by SK 605014 and grave fill (605015). Flat base has been disturbed at the chest area of the skeleton, with all ribs and most of the pelvis damaged. This may indicate robbing activity. However, there was no real difference in fill in this area, so robbing likely happened in antiquity.

Interpretation and discussion

Extended and supine burial. Lower half relatively un damaged. However, entire upper torso, including all ribs, majority of vertebrae, majority of pelvis are missing.

Disturbance in the cut in this area may indicate grave robbing, and this area in particular may have had a brooch, belt or other precious items. No difference in the fill, however, suggests a historical origin to the robbing.

Interpretation and discussion

Fill of grave cut [605013]. Very common redeposited natural elements suggests an immediate backfill of surrounding material, consistent with a grave.

Interpretation

The Skeleton was located in grave Cut [605019] in a general Cluster of graves associated with the early Saxon period / Sub Roman 4th-6th Century AD. The Skeleton was found with an Fe belt buckle with no other grave goods. The individual shows signs of hard manual work / age as there is significant remodeling of the spine. The robust nature of the bones and general size indicate the grave belongs to a man - grave has been Cut too small - damage from the Plough has damaged the Cranium.

Interpretation and discussion

Cut of grave in area of numerous other graves. Has broadly the same orientation as [605036] + [605033]

Assumed to be contemporary with other burials of assumed AS date.

Cut is very shallow with disruption from a plow mark on the left side of the skeleton (W side).

Excavated and date	19/06/20 J.S	Recorded and date	22/06/20 J.S	Site check		Post-ex check

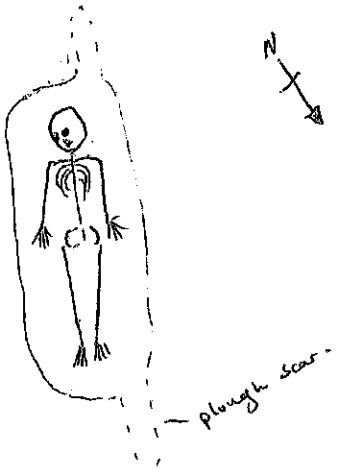
Sketches



Interpretation

- Individual appears to be adolescent to young adult in age - have M3 still erupting.
- Epiphyseal fusion has started though is not completed on all long bones
- very little dental attrition
- Likely between 15-20 years of age, though these indicators can extend to older individuals
- Sex: At this age it is inaccurate to sex due to absent morphological traits.

Interpretation and discussion PIT DEFINED MAINLY DUE TO THE PRESENCE OF FLINT NODDULES. THOUGHT TO BE A COVER FOR AN INTERMENT. COULD BE A LENS WITHIN [605044] BUT APPEARED TOO REGULAR

* More likely that this isn't a re-cut and that (605031) + (605032) are just fills of [605044] and the same as (605039)

Interpretation and discussion

A HEAVILY DAMAGED SKELETON WITHIN GRAVE [605033], STRUCK BY MULTIPLE PLOUGHS AS EVIDENCED IN SKETCH OF GRAVE + PLOUGH SCARS ON CONTEXT CONTINUATION SHEET.

WORN TEETH SUGGEST AN ADULT SKELETON, POTENTIALLY MIDDLE-AGED? DIFFICULT TO SEX AS SKULL + PELVIS DAMAGED.

THREE GRAVE GOODS PRESENT, 416, 417 + 418

CONT...

CONTEXT CONTINUATION SHEET

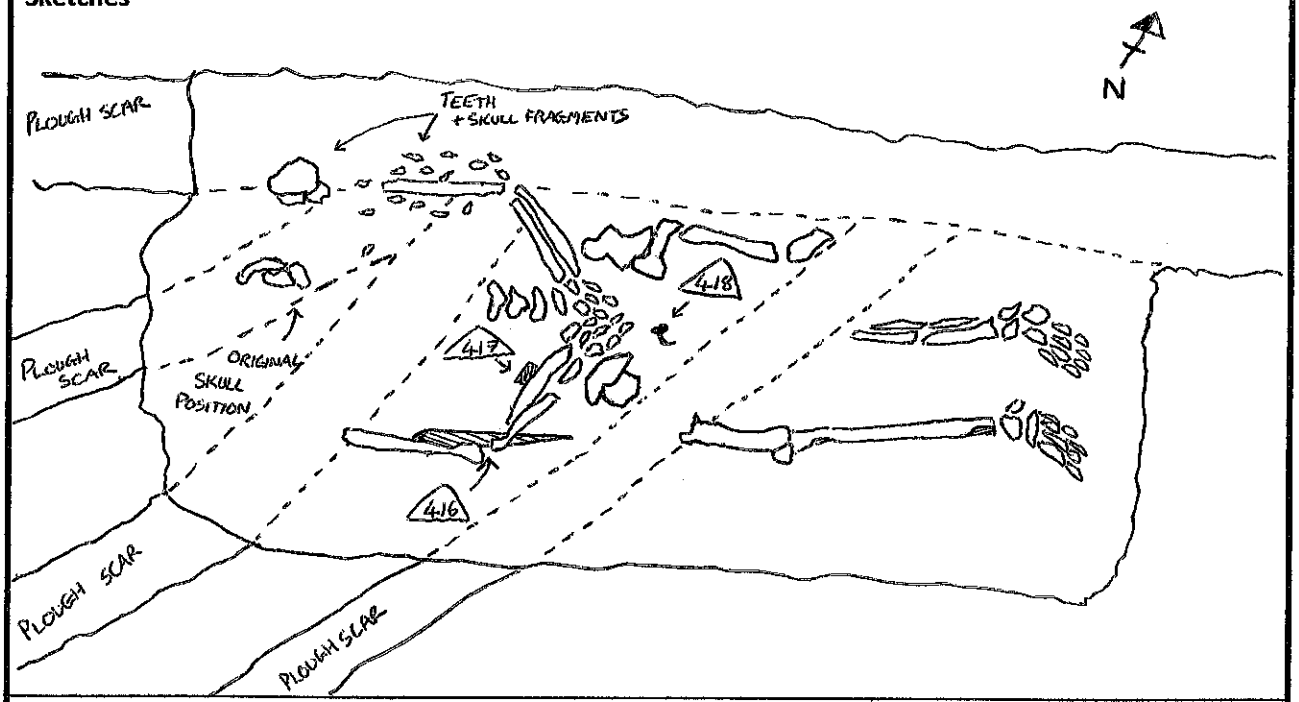
© 2016

Project Code HS2 C14	Sub-Division ICI9 ERHAR		Context number	605034

Description

GRAVE GOODS INCLUDED A BLADE (POTENTIALLY SHEATHED AND STRAPPED TO WAIST WITH THE BUCKLE), BUCKLE AND PIN / POTENTIAL NAIL 416. BLADE WAS LAID W TANG POINTING TOWARDS THE FEET, AND WAS UNDER THE RIGHT ARM. BUCKLE 417 WAS UNDER RIGHT FOREARM ALIGNED WITH WAIST. PIN/NAIL 418 WAS FOUND HIGHER UP IN FILL AND MAY HAVE BEEN USED TO FASTEN A BURIAL SHROUD IF ONE WAS PRESENT.

Sketches



Interpretation and supporting evidence

GRAVE + SKELETON SEEMS TO HAVE BEEN STRUCK BY PLOUGHS MULTIPLE TINES, AS EVIDENCED BY PLOUGH SCARS RUNNING ALONG IN LINES WHERE BONES HAVE BEEN DESTROYED. LEFT FEMUR CAN BE SEEN SHATTERED AND THE LEFT PELVIS DRAGGED OUT OF POSITION BY THE PLOUGH. SKULL AND MANDIBLE ALSO STRUCK AND TEETH HAVE BURST OUT TO INDICATE PLOUGHS WERE BEING DRAGGED DOWN-HILL TOWARDS NORTH.

Interpretation and discussion

Cut of Shallow NW-SE linear [605040]. The linear was excavated to establish the relationship between grave Cut [605019] and the linear [605040]. Grave Cut [605019] cuts [605040] See D# 239 - a full profile was not excavated - a longatudinal section of 0.74m was excavated. Feature most likely represents a Shallow gully. Possible drainage gully

Description

1) Fill of linear cut [605040]
2) The fill was composed of a dark brown clayey silt - MUDSTONE
3) Moderate to frequent small to medium chalk and sub-angular stone inclusions
4) Clear
5) The fill had a maximum thickness of 0.14m
6) Travel
7) Dry Conditions
8) Cut by grave cut [605019]

Interpretation and discussion

Fill of Shallow linear [605040]. Most likely gradual phase of natural infilling - possibly through colluvial - hillwash.
No finds to help date the cut. The fill was cut by grave cut [605019].

Interpretation and discussion Potential Sunken-Featured Building, although at small end of spectrum. Evidence for post-holes was limited ('A' included loose chalk fragments, but was disturbed by plough groove; 'B' was where the SFB cut earlier feature [605456]; 'C' + 'D' also poss. indentations in the chalk). None were particularly convincing. Stepped sides to N + E

Interpretation and discussion Top Backfill of SFB [605047]. The small amount of finds suggest it was not deliberately filled with domestic rubbish after use or that it was more intensive domestic activity. It may be a gradual accumulation, including rounded redeposited natural that had had time to erode (but see (605051)).

Interpretation and discussion SINGLE FILL OF PROBABLE POST HOLE. SEEMS TO BE NATURAL SILTING & EROSION FROM THE SURROUNDING NATURAL. COULD EQUALLY BE THE BASE OF A SHALLOW PIT, OF COURSE. THERE ARE OTHER SIMILAR FEATURES IN THE AREA (e.g. [605061]) BUT THEY DON'T READILY LINE UP TO MAKE ANYTHING NICE/OBVIOUSLY A STRUCTURE.

Interpretation and discussion

Cut of shallow posthole. Probably real cut - most likely represents the base of a posthole plough scar. Suggest that the feature survived from plough disturbance.

Interpretation and discussion SINGLE FILL OF V. SHALLOW POST HOLE / TRUNCATED PIT. PROBABLY NATURAL SILTING & EROSION FROM NATURAL AT EDGE. CONTAINED ONE CRUMB OF POT WHICH HELPED CEMENT IT AS A REAL FEATURE. ADMITTEDLY IT COULD HAVE BEEN PLOUGHED IN, BUT GIVEN THE LACK OF ADJACENT FEATURES WITH POT IN I DIDN'T THINK IT WAS VERY LIKELY.

Interpretation and discussion

Cut of V-Shaped enclosure / boundary ditch cut [605065] The ditch Cut was excavated to a length of 2m. The ditch most likely represents a medieval? enclosure boundary ditch - very few finds recovered from other Slots in the ditch - no finds recovered from [605065] - Wider Survey indicates the Cut most likely belongs to a large rectangular enclosure.

Interpretation and discussion

Base fill of V-Shaped ditch Cut [605065]. The fill most likely represents a phase of weathering - slumping of the ditch sides during the period the ditch was in use - caused by wind / rain ect. Most likely infilled gradually. The fill might also indicate the presence of a bank on the inner side / SE edge of the cut as the fill appears to have slumped from the SE edge.

too even. Pass one event of collapse?

Erosion fill? Recutting of bank?

Description ?SECOND FROM BASE (MLJ 4/8/20)

1) Secondary fill of ditch Cut [605065] located South of the northern L.O.E

2) The fill was composed of a greyish brown silt

3) Moderate to frequent amount of small to medium sub-angular stones and chalk

4) Clear

5) The fill had a maximum thickness of 0.29m and an extent of 1.12m

6) Mattock and Spade

7) Very hot conditions with dry ground conditions

Interpretation and discussion

Fill of V-shaped ditch Cut [605065]. The fill most likely represents a phase of gradual colluvial infilling - possibly mixed with weathered chalk from the sides of the ditch Cut.

Excavated and date	Recorded and date	Site check	Post-ex check

Interpretation and discussion

Secondary?? fill of V-shaped ditch Cut [605065]. The fill might represent a high intensity filling event possibly the erosion of the ditch side washed in from the SE edge of the Cut.

Redep. mat.

Interpretation and discussion GRAVE BACKFILL, WELL SORTED, MAINLY CONSOLIDATE SOIL & CHALK BECOMES LOOSE VOIDED CHALK NEAR BASE, BAND OF SILTING ON BASE. RANDOM BEADS SUGGEST THAT THE GRAVE IS A REUSE. STUDY OF BONES MAY SUGGEST A SECOND BODY MAY HAVE BEEN IN THE VICINITY
SMALL MAMMAL BONE FOUND AT FOOT OF GRAVE

Description

1) Cut of hollaway track on the norther edge of site north of burials

2) Linear

3) NW - SE

4) Gentle break of slope with irregular sloping sides and uneven base - might indicate wheel tracks.

5) The slot was excavated to a length of 2m the Cut had a maximum depth of 0.28m and a width of 5.10m <

6) The edge of the Cut is very diffused due to natural rooting processes

7) Fair conditions and dry ground conditions

8) -

Interpretation and discussion

Cut of Hollaway track [6050937. The Cut has most likely been the result of people walking and hollowing out a trackway over a long period of time - The Cut also indicates some evidence of wheel ruts although they're not obvious in slot [605093].

Interpretation and discussion

Fill of Holloway track slot [605093]. Most likely represents a phase of gradual colluvium build up - possibly after the holloway had been abandoned.
Pottery from fill (605094) is not very identifiable - might indicate Iron Age - Med - CBM and Fe find FH 419 indicate a later date - however the trackway was most likely in use for a very long period of time before it was eventually filled completely.

Interpretation and discussion LARGE SUB-RECTANGULAR FEATURE CUT BY GRAVED [605100] [605099]. LIKELY TOO LARGE IN LENGTH TO BE A GRAVE ITSELF. WAS SUGGESTED IT COULD BE A DISMEMBERMENT EVENT BUT CUT IS QUITE REGULAR AND NOTHING IN BACKFILL TO SUGGEST ANY DISTURBANCE. SEEMS TO BE A NATURAL FEATURE. EITHER CONCAVE DIRTY AND BASE IRREGULAR.

Interpretation and discussion

This feature was excavated to investigate what appeared to be a corner of a ditch enclosure. On investigation it was found not to be the case and that the ditch running NW-SE actually terminated at that point as it met a trackway / [605305] small ditch running SW-NE [605103] possible wheel rut on SE edge of square bottomed plough mark

Interpretation and discussion

Fill of Holloway slot cut [605135] - Fill appears to be washed in from southern side of slope (coming down hill)
Similar material appears on NE edge though far less.

Excavated and date	Recorded and date	Site check	Post-ex check
30/06/20 J.S	01/07/20 J.S	MW 10/07/20.

Interpretation and discussion

Fill of Holloway track slot [605135] - likely a gradual phase of colluvium build up - possibly after misuse.

Possibility of derived from pot sherds

Interpretation and discussion Upper fill of cut [605138], truncated by [605143] and possibly by [605141] (destroyed by [605143]). Deposit was well sorted and pure - it was probably deposited naturally and gradually as a hillwash deposited by water action. This would imply a long gap between deposit of trench [605138] and the cutting of the ditches [605141] + [605143]

Interpretation and discussion EARLIER N/S DITCH, LARGELY DESTROYED BY LATER RECUT. IT IS A REMOTE POSSIBILITY THAT [605141] IS CONTEMPORARY WITH SUNKEN WAY [605138]. MORE LIKELY IS THAT [605141] CUT BACKFILL (605140) OF THE SUNKEN WAY AND CONSEQUENTLY ERODED MUCH MORE QUICKLY. IT CLOGGED UP AND NEEDED RE-CUTTING AS [605143]. THE WESTERN EDGE WHERE IT CUTS THE NATURAL CHALK MAY BE ORIGINAL TO [605141] AND RE-USED IN [605143]. LATER (7/2020) EXCAVATION HAS CHANGED THE INTERPRETATION TO A SINGLE DITCH CUT, SEE [605251-4].

Interpretation and discussion Basal "Scrub" in ditch cut [605143] produced by erosion from sides of ditch cut. After excavation of the transect to the south ([605251]), this is seen as identical to (605254) and is interpreted as erosion-derived fill in a single ditch cut. The distinction from (605142) is because there is a greater inclusion of material from the backfill of the earlier trackway/roadway to the east. See 605251–254 for a revised interpretation as a single ditch cut.

Interpretation and discussion Upper fill of final ~~of~~ N/S ditch re-cut [605143]. Appears to be a natural, slow backfill although the eastern concentration of chalk frags may derive from a bank formed from upcast of earlier ditch fill (605142) or natural chalk.

See 605251-254 for a revised interpretation as a single ditch cut

Interpretation

Skeleton 147 in an NE-SW orientated inhumation. Initial observations show this to be a female of approximately 20 years of age. Appears to be little ~~evi~~ alteration of ceremony as some belongings were found underneath the ~~body~~ femur in the left and no grave goods were found. Also NE-SW orientation is different to the E-W orientation of graves surrounding.

Description

1) Fill of Hollaway slot [605093] north of site.

2) The fill was composed of a dark brown silt.
3) Moderate - frequent amount of small chalk and stone inclusions.

4) Clear
5) 2m x 5.70m x 0.28m depth
6) Spade and Trowel
7) Fair / mixed conditions with dry ground conditions

Interpretation and discussion

Fill of Hollaway slot Cut [605093]. The fill appears to have washed into the cut from the SW side of the hollaway - downhill - Natural silting possible a more intense phase of infilling.

Excavated and date	DJG 1/07/2020	Recorded and date	DJG 1/07/2020	Site check	4/8/20	Post-ex check

Interpretation and discussion Grave Cut. Large by comparison with skeleton (1.62 m) and deep by comparison with other nearby graves. This, in combination with the rich assemblage of grave goods, suggests a high status individual

Sketches

Interpretation

The skeleton was located in grave in a general cluster of graves from Late Roman - Early Saxon periods.

There were no grave goods or datable materials. The individual is likely between 1-2 yrs old of indeterminant sex. - very little of the post-cranial skeleton has survived likely as a result of thin cortical bone and possible disturbance - due to lack of surviving bone - Overall P. Cranial sample taken.

Interpretation and discussion

Grave fill

- Possible indication of disturbance on SW edge
- Fill relatively uniform
- More redeposited chalk in the fill towards the base of the grave.

Interpretation and discussion Backfill of Grave Cut [605164]. The proportion of redeposited Chalk would have made it very heavy and may account for the poor survival of the Rib-Cage, Spine and Feet. The small number of finds (apart from exceptional (605182)) and their residual nature suggest that the grave was backfilled soon after deposition of the burial.

Sample 328: Tubs 1+2 = Top of Context; Tubs 3+4 = Base, just above Skeleton

Interpretation and discussion

CUT OF CREM. BURIAL. CUT CONTAINED 1x FILL & RF#590 (CREMATION VESSEL) WHICH ITSELF CONTAINED 1x FILL. POTTERY INDICATES SAXON DATE. FIRST CREM. EXC. ON SITE BUT OTHERS ARE EXPECTED. CREM. BUSSERS EARLY SAXON RATHER THAN LATE.

Interpretation and discussion

CUT OF A HOLLOW WAY, THERE WAS SOME EVIDENCE OF TWO [illegible] PARALLEL LINES OF STAINING WHEN FIRST EXCAVATED THAT SUGGESTED THE POSSIBLE AREA THAT CART WHEELS MAY HAVE RAN; UNFORTUNATELY THESE WERE LOST DUE TO A STORM + HEAVY RAIN ON THE WEEKEND. [illegible] RELATIONSHIP WITH THE CIRCULAR PIT-LIKE FEATURE ON THE SLOT'S NORTH-EASTERN SIDE, THE PIT IS CUT BY THE HOLLOW WAY.

Interpretation and discussion

Likely a non-feature, line of irregular bioturbation which happens to have possible cremation Urn RF 0652, albeit obliterated by ploughing.

Interpretation and discussion

Cut of a sub circular pit with a single fill. Pit contained possible Urn RF 0653, likely filled by (605196) taken as sample SO333.

Pit was not recut to place urn, likely intended as a place to deposit the Urn

NOT TO SCALE.

Interpretation

SKELETON OF A YOUNG ADULT FOUND WITHIN GRAVE [605197]. SKULL HAD BEEN SHATTERED BY A PLOUGH (PRESUMABLY), AS A PLOUGH SCAR RAN DIRECTLY THROUGH ON EITHER EDGE OF THE GRAVE CUT. SKELETONS PRESERVATION WAS ALSO BAD, ONLY THE LONG BONES, A FEW FRAGMENTED RIBS AND PARTS OF THE PELVIS SURVIVED AND WERE FRAGILE. (CONT)

CONTEXT CONTINUATION SHEET

© 2016

Project Code HS2	Sub-Division 1C19 ERHAR		Context number (605198)

Description

SF 672

SKELETON HAD TWO GRAVE GOODS, AN FE SPEARHEAD (DISCOVERED WHEN MACHINE-STRIPPING THE AREA) AND A BELT WITH FE AND CU FITTINGS, SF. 674 → 677 THAT HELD AN FE BLADE SF. 673 TO THE BACK. THE BELT SEEMS TO HAVE BEEN WORN BY INDIVIDUAL AT THE TIME OF BURIAL AS ONE OF THE SMALL CU BELT FITTINGS WERE FOUND ON THE BACK OF A RIB WHEN LIFTING THE SKELETON. THE BELT ITSELF SEEMS TO HAVE BEEN MADE OF AN ORGANIC MATERIAL (LEATHER?) THAT HAS SUBSEQUENTLY ROTTED AWAY AND ONLY LEFT THE VARIOUS FE AND CU FITTINGS IN SITU. A DETAILED SCALE PLAN OF THIS CAN BE SEEN AS DRAWING 297, WITH SEPERATE ELEMENTS OF THE FITTINGS LABELLED ALSO. THE BUCKLE OF THE BELT EXISTS (SF 674 - 1) AND SEEMS TO HAVE BEEN ATTACHED TO FE PLATES,

Sketches

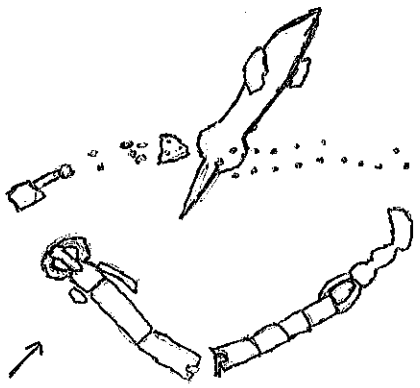
TYPES OF CU FITTINGS IDENTIFIED

① - HOOP-SHAPE. ② - RING.

Ω OR Ω

③ - DOUBLE HOOP.

677 - 9



ROUGH SKETCH OF BELT

FE SPEARHEAD SKETCH

672

NOT TO SCALE

Interpretation and supporting evidence

(SF 674 - 2 → 7) ONE OF WHICH, (SF 674 - 4) THAT HAS A CU PIN ORNAMENT STILL ATTACHED. THIS FE PLATED SEGMENT IS THEN ATTACHED BY A LINK TO A SOLID FE FITTING THAT IS DIFFICULT TO DISCERN, (SF. 674 - 8). THE BELT THEN HAS MANY SMALL CU FITTINGS THAT SEEM TO FORM THE PART OF THE BELT WORN AROUND THE BACK; THESE FITTINGS LOOK TO HAVE RAN IN TWO PARALLEL LINES, ONE UPPER AND ONER BELOW, ON THE ORGANIC MATERIAL OF THE BELT; THEY SEEM TO HAVE HAD A FEW DIFFERENT TYPES AS SHOWN IN SKETCH ABOVE, (SF 677 - 1 → 21). THE FE BLADE SEEMS TO HAVE BEEN ATTACHED TO THIS PART OF THE BELT, BUT MOST LIKELY THROUGH SOME KIND OF ORGANIC MEANS, (SF. 673). THE FINAL BELT SEGMENTS ARE THE TIP OF THE BELT WITH AN FE FIXTURE (SF. 676), AND AN FE FITTING THAT WAS HEAVILY FRAGMENTED ON DISCOVERY, SF. 675.

Interpretation and discussion

FILL OF GRAVE [605197]; MOSTLY CONSISTING OF MEDIUM CHALK STONES AND SILTY CLAY FILL BETWEEN THEM, IT IS LIKELY THE SAME MATERIAL REMOVED FROM THE GRAVE CUT THAT HAS BEEN REDEPOSITED TO FILL THE GRAVE. SCALE PLAN OF ~~BELT~~ BELT WAS CREATED TO GIVE MORE INFORMATION ON THE FIND, (SEE (605198)).

Interpretation

JUVENILE SKELETON PLACED IN SHALLOW GRAVE (605222)
THE ORIENTATION OF THE GRAVE IS E-W , WITH HEAD ON W SIDE
SKULL POSITIONED ON ITS LEFT SIDE, THE SKELETON WAS PLACED CLOSER TO THE LEFT SIDE OF THE GRAVE (SOUTH)
SUPINE POSITION WITH LEFT HAND PLACED UNDER PELVIS, LEGS SLIGHTLY BENT TOWARDS LEFT SIDE (SOUTH) OF GRAVE,
LEFT TIBIA AND FIBULA SURVIVED IN VERY FRAGMENTED STATE ~5%
RIGHT HAND SURVIVED IN FRAGMENTS, CLOSE TO S EDGE OF GRAVE

Sketches

Interpretation

- Juvenile buried in Early Anglo-Saxon / Late Roman cemetery - Likely 6-8 yrs old.
- Indeterminate sex (due to age)
- In a different position to first cluster of graves. - similar to (605370), (605282) with flexed legs :- POSSIBLE DIFFERENT PHASE OF CEMETERY
- Iron found in similar position to the body as (605240) - Between ribs and lower left arm.

Interpretation and discussion FINAL RE-CUT OF MAJOR N/S DITCH SEEN WITHIN TRANSECT. SINGLE CUT OF DEEP, WIDE N/S FIELD BOUNDARY / DRAINAGE DITCH. EARLIER INTERPRETATION OF THIS TRANSECT TO THE N (605138-145) IDENTIFIED DIFFERENT PHASES OF DITCH CUT. THIS IS NOW ATTRIBUTED TO DIFFERENT PHASES OR TYPES OF BACKFILL (605253+254) WITHIN A SINGLE DITCH CUT AND BETTER FITS THE EVIDENCE FROM MORE SOUTHERLY TRANSECTS THROUGH THIS DITCH, ALL OF WHICH SAW A SINGLE CUT, ALTHOUGH DUG BY DIFFERENT INDIVIDUALS

Interpretation and discussion Part of Backfill of Ditch Cut [605251]. The difference between this context and (605254) is likely to be the result of erosion of backfill (605299) of the sunken trackway to the east. Since the excavation of (605164) the interpretation of multiple cuts has been abandoned in favour of multiple backfills within a single ditch cut

Interpretation and discussion BASAL FILL ("SCRUB") OF DITCH CUT [605251] RESULTING FROM EROSION OF THE NATURAL CHALK WHICH THE CHANNEL IS CUT THROUGH. SAME AS (605142) IN THE TRANSECT TO THE NORTH, BUT BOTH ARE NOW INTERPRETED AS THE BASAL FILL OF A SINGLE DITCH CUT, RATHER THAN REPRESENTING THE FILL OF AN EARLY CUT.

Interpretation and discussion

Grouping of 5 postholes in a square, with a central post - ~~Most~~ North most cluster of burials (that are closest to the Southern LOE)
Post hole ends are not uniform
Possibility of being a mortuary structure associated with the cemeteries.
Similar examples found in early Anglo-Saxon cemeteries.

Excavated and date	21/07/2020 J.S	Recorded and date	22/07/2020 J.S	Site check		Post-ex check

Interpretation and discussion

CUT FOR SAXON GRAVE, PERHAPS OF LESS WEALTH THAN NEARBY EXAMPLES AS GRAVE GOODS VERY LIMITED, NO OBVIOUS SIGNS OF INTRUSION, BUT LACK OF GOODS + broken pot distributed in backfill could be indicative of some robbing in ANTIQUITY

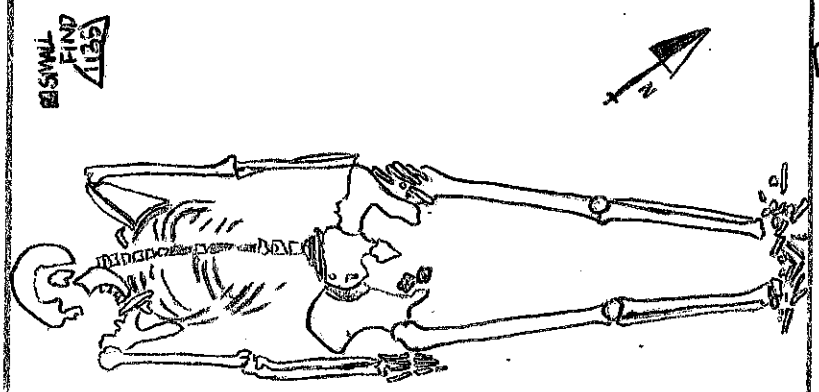
Sketches



Interpretation

WELL PRESERVED BUT LITTLE TO GO ON IN TERMS OF GRAVE GOODS - ONLY A BELT BUCKLE + POTTERY SHERDS. THE POT MAY HAVE BEEN INCLUDED IN THE BACKFILL AS THE SHERDS WERE DISTRIBUTED ~~FREE~~ AROUND THE ENTIRETY OF THE GRAVE. POSSIBLY A WOMAN, NO OBVIOUS MALE TRAITS BUT FURTHER ASSESSMENT REQUIRED, BONES FUSED SUGGESTING ADULT BUT AGE UNKNOWN.

Interpretation

The Skeleton most likely represents a young male - 3rd molars have yet to emerge and bones in the legs, arms fingers and toes have yet to fuse completly ?? The individual was buried with a spear SF # 934 and knife SF # 935 which might indicate the man was Saxon / or buried in a germanic way - most likely dating to the late 5th Century AD - one glass bead and a Cu alloy fitting SF933 and SF936 were also found.

Interpretation and discussion

Grave backfill of grave cut [605290]. The back fill was composed of re-deposited chalk and ? top soil ?? indicating the grave cut was backfilled with the same earth extracted to make the cut. The fill contained small finds 933-936 associated with skeleton 605291.

Interpretation and discussion

Cut of trackway running NE – SW which shows strong evidence of rutting on SE edge and could have possibly be dug out by a small ditch on NW side, but unclear. There is a possibility that they are not wheel ruts but a square bottomed plough mark.

Interpretation and discussion

Initial fill of small ditch filled with redeposited natural – lots of large pieces of chalk.

It should be considered that one possibly for this fill was to strengthen that side of a trackway which had been eroded which is why there is no evidence of wheel ruts

Description

1) Cut of E-W grave Cut located on the western edge of site
2) Sub-rectangular
3) E-W
4) The Cut had steep vertical sides which had a sharp break of slope and break at the base - Flat slightly uneven base
5) 2.40m x 1.19 x 0.70m depth
6) Clear
7) Dry - excavated under cover of a tent - warm dry conditions

Interpretation and discussion

E-W grave Cut of SK 605307. The Cut was 0.70m deep which is relatively deep in comparison with other grave Cuts in the same general area - although not uncommon

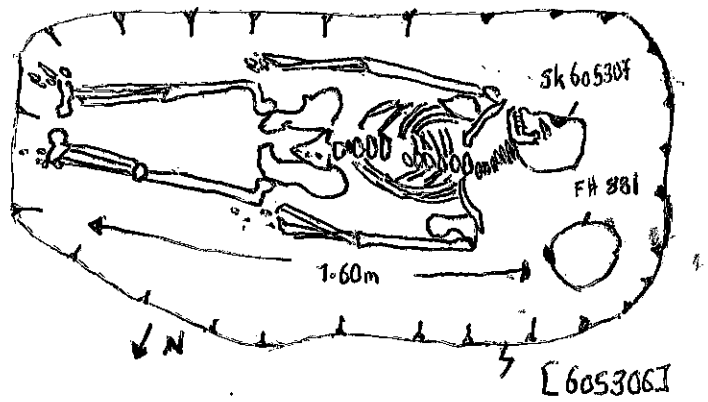
Sketches



Interpretation

The Skeleton most likely represents the body of a young man? as third molars have erupted The Skeleton was buried with a Copper and wood vessel see F# 881 - no other grave goods were recorded - burials associated with Sk 605307 see Sk 605310 have an abundance of grave goods that indicate both Late Roman and Saxon burial practices most likely dates to transition Period Late 4th - 5th Century

Interpretation and discussion

Grave backfill of grave Cut [605306]. The fill appears to be a mixture of top soil and large fragments of re-deposited natural from the initial process of digging the grave Cut.

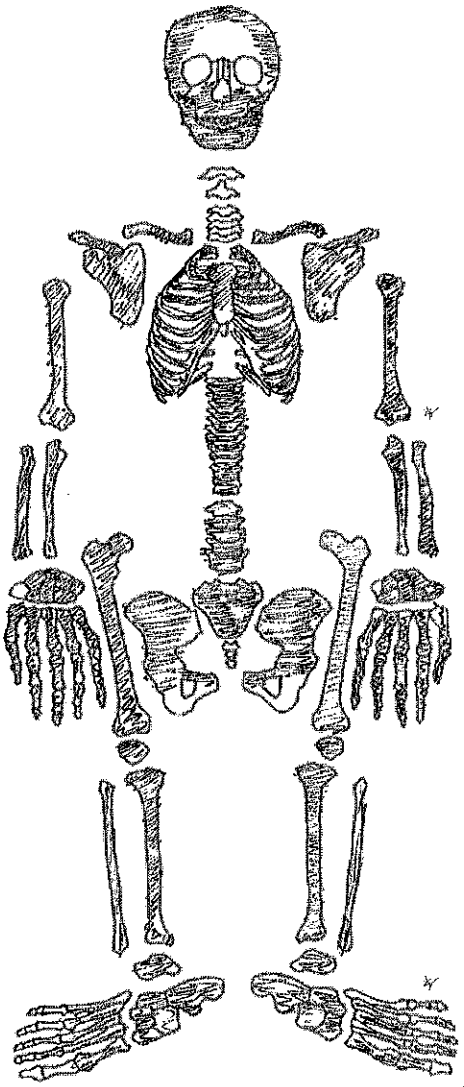
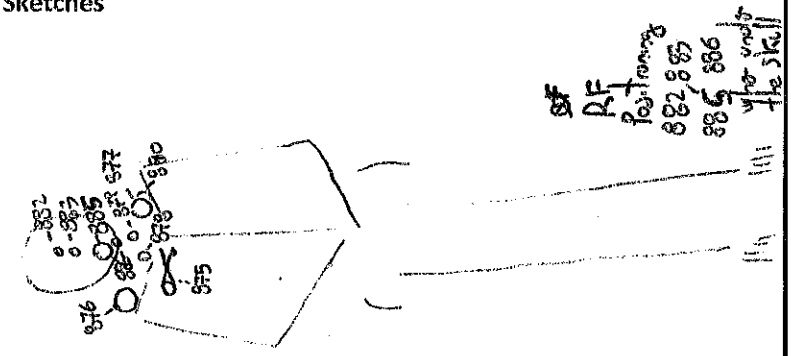
Shade bones present and show extent of truncation(s)



Sketches



Interpretation

Burial of a probably female individual, age 25-35. The toiletry set has a roman influence so maybe it was buried in a moment when the Saxon fashion started to begin, but the person was still attached to roman tradition.

Interpretation and discussion

CUT OF GRAVE CONTAINING INFANT SKELETON SK 605318 AND SINGLE FILL (605320)
THE BURIAL WAS LOCATED IN CLOSE PROXIMITY TO TWO INFANT BURIALS - SK 605313 TO SW SIDE AND SK 605315 TO NE SIDE. THERE WAS A Cu ALLOY BRACELET ON LOWER LEFT ARM 884 WHICH WAS DISTURBED
THE SKELETON WAS PLACED ON A C. 5cm LAYER OF BACKFILL AND WAS PROBABLY DISTURBED BY ROOTING, BIOTURBATION, WORM-HOLES AND BURROWING. LEFT RADIUS AND ULNA WERE SEPARATED BY CHUNKS OF CHALK NEAR THE LOCATION OF THE BRACELET

Excavated and date 23/7/20 WA	Recorded and date 24/7/20 WA	Site check CG 29/7/20	Post-ex check

Interpretation and discussion

DELIBERATE BACKFILL OF GRAVE [605319].

IT APPEARED THAT THE GRAVE WAS CUT, THEN PARTIALLY FILLED CREATING SORT OF A PLATFORM ON WHICH THE BODY WAS PLACED AND THEN THE REST OF BACKFILL WAS PLACED ON TOP OF IT. THE FILL WAS @ LOOSE IN PLACES, ESP. NEAR THE LEGS, PROBABLY CAUSED BY BIOTURBATION AND BURROWING.

Interpretation and discussion

Cut of posthole [605321] - Part of a 5 post structure near spread of burials.

Shallow cut in comparison to the others, apart from [605327]

Possibly a mortuary structure - similar examples found in early Anglo-Saxon cemeteries.

Interpretation and discussion NATURAL FEATURE. CUT BY GRAVE [605315] IN FACT THIS FEATURE WAS VISIBLE IN PLAN AND LOGICED TO BE GRAVE [605315] WHICH WAS LESS DISTINCT. HOWEVER AS SK (605314) WAS IN THIS AND THIS FEATURE WAS DEEPER, THE GRAVE MUST HAVE BEEN CUT LATER. BECAUSE THIS FEATURE WAS IDENTIFIED FIRST, NO SECTION WAS ESTABLISHED BETWEEN IT AND SUCCEEDING GRAVE. ONLY PLANLE DRAWN.

Sketches

[605349]

Interpretation

Adult Skeleton - the bones appear to indicate some taphonic change in the bone especially affecting the left arm - [possibly post depositional]. The molars appear to be heavily worn - distal and proximal (radial) ends of the bones have not survived well. The individual appear to have been buried in some kind of shroud of with a pillow as the shoulder blades are squeezed up into the cranium - Possibly female [sex] - although not clear.

Description

1) Located in grave Cut [605349]

2) The fill was composed of a dark clayey loamey silt (dark blackish brown)

3) The fill contained a moderate amount of re-dep chalk - angular stone and sub rounded / rounded stone inclusions and moderate amounts of Roman / Saxon pottery.

4) Clear

5) 0.94m x 2.10m x 0.47m thickness

6) Trowel, hand shovel

8) Very dry ground conditions, warm humid weather

Interpretation and discussion

Grave backfill of grave Cut [605349]. Most likely represents an event of deliberate backfilling - mixture of redeposited chalk and loam indicates the grave was backfilled with the same earth extracted from the grave cut. Dark staining directly surrounding the body / Sk 605350 might indicate the presence of an organic shroud /

Sketches

Interpretation

5th/6th Century male, mid 30's burial. Probably originally positioned with spear running diagonally across body from top left to bottom right. Left arm probably rested over spear shaft originally before organic mat. decayed and it slumped to the side before slumping under pelvis which has collapsed outwards some fingers from left hand present on top of pelvis. Right arm has also slumped inwards as seen by position of the humerus. Cu Alloy tweezers look more Roman like which combined with spear + knife suggests Early Saxon

Interpretation

THE individual has very pronounced lateral supracondylar ridges, indicating well developed arm muscles. There is also a healed oblique fracture to the left radius. It is unclear what sex the skeleton is due to extensive skull & pelvis damage. The pair of brooches at the shoulders are more commonly associated with females of this time which may give an indication however. Among the skull fragments are worn-down molars which n.o.

Interpretation

THE individual has very pronounced Lateral supracondylar ridges, indicating well developed arm muscles. There is also a healed oblique fracture to the left radius. It is unclear what sex the skeleton is due to extensive skull & pelvis damage. The pair of brooches at the shoulders are more commonly associated with females or this time which may give an indication however. Among the skull fragments are worn-down molars which p.t.o.

should indicate the age of the individual. Aside from that, the person is Roughly 5' tall. Post-burial the grave has been disturbed by plowing, with a scar extending from the right of the skull, through the shoulder and thorax, and grazing the right forearm, which is crooked across the body.

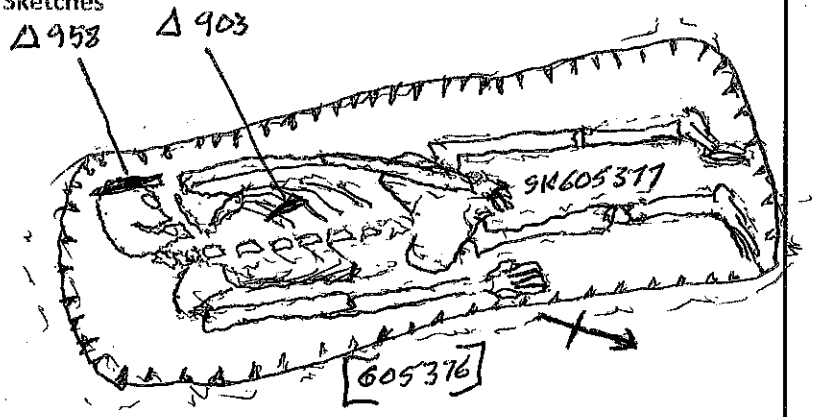
Sketches



Interpretation

INHUMATION OF POOR PRESERVATION WITH SOME GRAVE GOODS. SIMILAR GOODS (KNIFE, BEAD, BUCKLE) TO OTHER INHUMATIONS BUT (AS OF 21/8) ONLY GRAVE WITH CHIP-CUT BROOCHES (BRASS GILDED) GIVEN LACK OF TORSO, ~~OTHER~~ ARMS + PELVIS GRAVE MAY HAVE BEEN ROBBED. PRACTICE SEEN ELSEWHERE ON SITE. HIGH LEVEL OF ROOTING, INSECT NEST, + REDEP NATURAL AROUND THIS POTENTIALLY ROBBED AREA. ALSO DISTURBED AT SURFACE LEVEL BY PLOUGH SEE AT

Sketches

Interpretation

SINGLE BURIAL OF ADULT IN EXTENDED SUPINE POSITION. GRAVE ALIGNED ROUGHLY NE-SW. BODY WELL PRESERVED & UNDISTURBED. GRAVE UNUSUALLY DEEP COMPARED TO MOST IN AREA. SKULL SUTURES NOT FUSED, SUGGESTING YOUNGER INDIVIDUAL. TWO SIMPLE COPPER ALLOY DISC BROOCHES ON SHOULDERS SUGGEST CLOTHED BURIAL. ONLY OTHER GRAVE GOOD IS POLISHED AMBER PENDANT ON CHEST

Interpretation and discussion

FILL OF GRAVE CUT [605394]. CONSISTS OF BACKFILLED CHALK & SILTY CLAY. FILL APPEARS UNDISTURBED, ALTHOUGH A SUPERFICIAL PLOUGHSCAR CUTS THE SURFACE. SHERDS OF A COARSE FABRIC POTTERY OF UNKNOWN DATE WERE FOUND MIXED THROUGHT THE FILL AT ALL DEPTHS ABOVE THE BURIAL ITSELF.

Sketches

Interpretation

Adult male, possibly mid-30's based on wear of teeth + fused skull. Prominent brow. Glass vessel is Kempton type, early Saxon period. Interesting that there is aprox. 0.10 - 0.20m of backfill directly beneath the skeleton, suggesting grave was cut + backfilled before the body was placed. Abdomen (ribs + vertebrae + scapula) missing - probably as a result of water pooling in the middle of the grave where it is slightly deeper.

Sketches

Interpretation

Believed male supine inhumation orientated SW. The cut appeared quiet shallow at feet but maybe due to x2 plough cuts running parrallel across grave. Grave goods were a (A) Shield boss (1551) on anterior of left ulnar + radius and associated fittings 1552 + 1555 on anterior of pubis and 1553/4 left of skeleton (B) Fe Buckle posterior Left lumbar vertebrae + (C) Fe. Knife posterior of left ilium (Cont.)

CONTEXT CONTINUATION SHEET

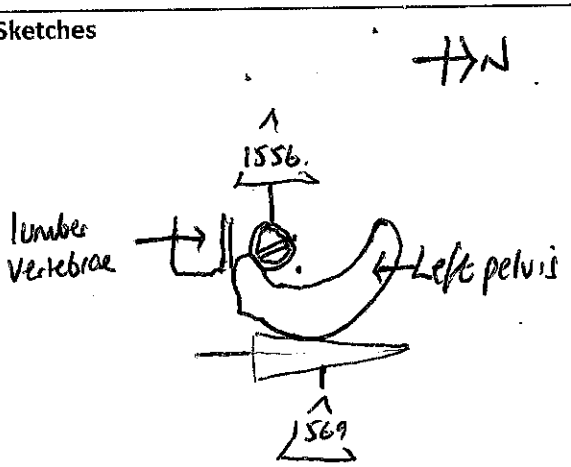
© 2016

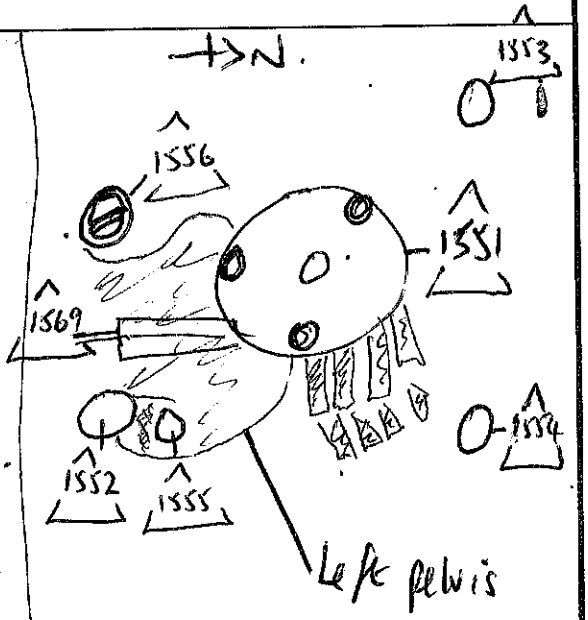
Project Code H82C14	Sub-Division 1C19	ERHAR	Context number	(605410) Skeleton (605411) fill

Description (7) The fill ~~wasn~~ (605411) was largely made up of fist size chuncks of chalk rather than regular backfill as seen in juvenile burial (605407). ~~that could be indicative of something.~~ Working shots of the fill were recorded on camera SD # 5143-46 but ~~some~~ photo ID incorrectly shown as (605493)

(6C) The knifes blade point tip was pointing North whilst the tang was facing south in the small of the back.

Sketches





Interpretation and supporting evidence

The chunky chalk fill may be indicative of some form of grave marker but the original depth was likely deeper than its current context so could also be just the backfill from the grave cut ~~backfill~~

Interpretation and discussion Only fill of grave cut [605409] that contained skeleton (605410). Fill was largely made up of fist sized chalk chunks that may be indicative of a grave marker but depth of grave likely greater than present context (so could be the original backfill material - working images Camera 50 # 5143-6 may assist.

Sketches

Interpretation

~~Lot of~~ Burial of a possible adult woman. The skeleton shows traces of animal disturbance to the hand (left especially) scattered around. All the bone are quite fragile and the cranium flattened. The only grave goods was a copper-alloy and wood bucket placed on the left shoulder. The body was placed almost diagonal on the grave maybe for positioning possible grave goods in the ~~right~~ W side of grave.

Interpretation and discussion

GRAVE CUT FOR THE SKELETON 605417. THE GRAVE DIMENSIONS SEEMS TO BE QUITE LARGE AS FOR THE LENGTH OF THE SKELETON (1.38m), SO THE THE GRAVE ITSELF MIGHT NOT BE DUG INTENTIONALLY FOR THAT PERSON. GRAVE DATED [redacted] SAXON.

Excavated and date	MG 28/08/19	Recorded and date	MG 31/09/20	Site check	[illegible] 7.9.20	Post-ex check

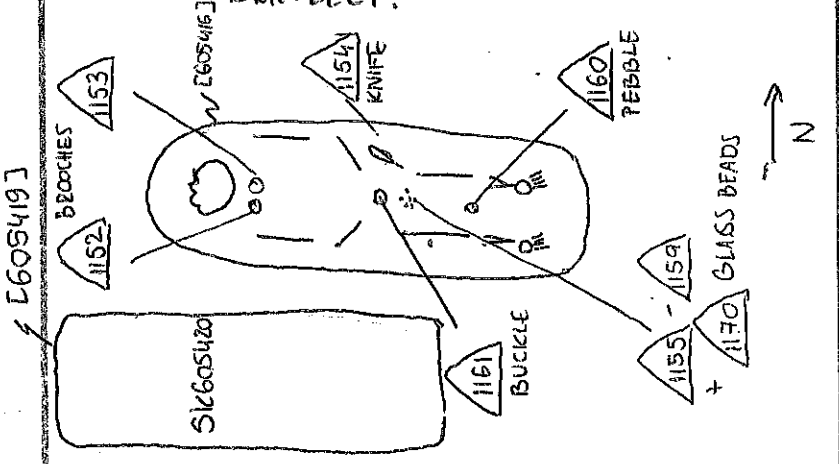
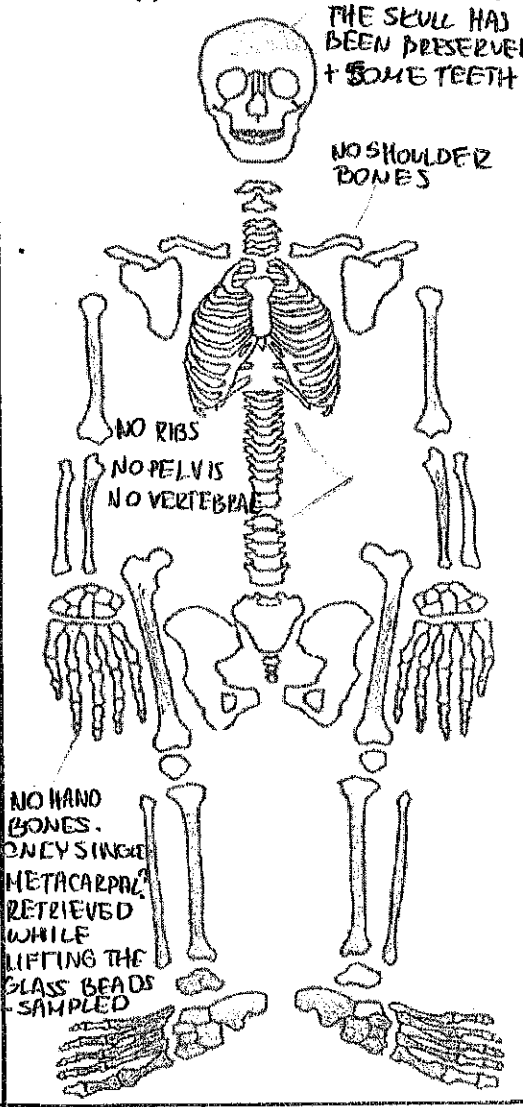
Sketches



Shade bones present and show extent of truncation(s)



Interpretation SKELETON NOT WELL PRESERVED AND POSSIBLY TRUNCATED BY PLOUGHING (IN THE PELVIS AND KNEE AREA) - ONLY ONE PLOUGH SCAR VISIBLE ON THE SIDE OF THE GRAVE CUT. BURIED NOT VERY DEEP (APPROX. 0.2 m), WHICH PROBABLY CONDUCED TO SOME DISTURBANCE. THE GRAVE INVENTORY OF TWO MATCH BROOCHES AT THE SHOULDERS, BUCKLE AND SMALL KNIFE AT THE WAIST AS WELL AS GLASS BEADS, SUGGESTS WOMEN ALTHOUGH BONES ARE SMALL AND MOST OF EPIPHYSIS ARE NOT PRESENTED, SO POSSIBLY IS A JUVENILE GIRL. POSSIBLY RELATED TO THE SK 605420, AS THEY WERE BURIED NEXT TO EACH OTHER WITH W-E ORIENTATION AND SUPINE POSITION

Interpretation

Skeleton well preserved besides RIB CHEST AREA (RIBS + vertebrae missing). SPEAR HEAD IN SW CORNER, BELT BUCKLE + CLASP ON WAIST. Possible bag holding TWEEZERS/NAIL CLIPPERS & ADJACENT + FINALLY KNIFE. SOME EPIDHYSIS JUST SHY OF FULLY FUSED - YOUNG ADULT. SPEAR SUGGESTS MAN, OTHERS could INDICATE WOMAN. MAYBE RELATION TO ADJACENT SKELL (605417). both buried SAME WAY + CLOSE PROXIMITY, knives IN both very similar. LEGS IN this one crossed which may be significant + has not been seen in other graves here.

Interpretation and discussion

CUT OF LARGE PREHISTORIC DITCH OF UNKNOWN FUNCTION. SECTION 5 LIKELY NEAR THE TERMINAL OF THIS EARLIER DITCH, AS ONLY THE SMALL RE-CUT [605442] CONTINUES NORTHWARDS. FEATURE MOST PROB. HAD A BANK DUE TO THE LARGE AMOUNTS OF CHALK BACKFILL. WOULD HAVE BEEN EVIDENT IN LANDSCAPE FOR SIGNIFICANT PERIOD OF TIME UNTIL RECUT BY [605444]

Excavated and date	CF 3/8/20	Recorded and date	CF 3/8/20	Site check	CF	Post-ex check

Interpretation and discussion TRACK WAY / HOLLOW WAY THAT APPEARS TO ENTER AN ENCLOSURE / DITCH SYSTEM WHICH HAS A NUMBER OF BURIALS INCLUDING CREMATIONS. ERLO FEATURE MAY HAVE BEEN LOCATED ON WHAT WAS ONCE PRIVATE LAND / SACRED SPACE. USED NOT ON A REGULAR BUT RATHER PERIODICALLY FROM PRE-ROMAN C.55 BC - TO MIDDLE AGES C.1200

P.T.O

Excavated and date	29.7.20 RIG 5.8.20	Recorded and date	5.8.20 RIG	Site check	PC 25.08.20	Post-ex check	

NO CONTINUETION SHEETS LOCATED

IN retrospect having excavated previous SLOTS along the trackway one pattern has emerged, THAT IS GLAZED POTTERY WAS LOCATED NEAR THE TOP OF VARIOUS FILLS (605064) while Pre Roman POTTERY OR POTTERY BEFORE 55. BC WAS LOCATED near the BOTTOM OF FILLS, along different SLOTS. WHILE more experience staff on site have inferred that some POTTERY TO BE PREHISTORIC There IS also a possibility Some POTTERY WAS PRODUCED BY EARLY SAXONS OR ANGLO-SAXONS.

Interpretation and discussion

Fill of Shallow pit Cut [605481] - the fill appears very similar to the natural - possibly indicates the fill was either gradually infilled by natural weathering - lack of pottery / any finds support this - however could represent an event of backfilling - unclear due to lack of tip lines

* SEE CONTINUATION SHEET.

[redacted]

CONTEXT CONTINUATION SHEET

© 2016

Project Code	[redacted] M52	Sub-Division	IC19/ ERMAN		Context number	605566

Description

NOTE: ([redacted]) IN DITCHES TO SW THIS COULD BE JUST A RECUT TO LOWER DITCH. HOWEVER IT IS MUCH WIDER - IT WOULD APPEAR TO FOLLOW THE WIDTH OF NE-SW HOLLOWAY INSTEAD. i.e. FOLLOWING EXISTING ALIGNMENT) [redacted] RECUT PHYSICAL OR STRATIGRAPHIC THUS FEATURE (THE HOLLOWAY) THOUGH AS THERE IS NO RELATIONSHIP BETWEEN NE-SW HOLLOWAY & LOWER DITCH ([redacted]) THIS RE-CUT IS STRATIGRAPHICALLY ABOVE BOTH NE-SW HOLLOWAY + LOWER DITCH, ONLY. — NO OTHER STRATIGRAPHIC RELATIONSHIPS CAN BE DRAWN. [redacted]

Sketches

Interpretation and supporting evidence

(*, ..CONT FROM 605566...) BEING THE CUT FOR THIS RECUT INSTEAD. AS HOLLOWAY NOT SEEN AT NE SIDE OF INTERVENTION TO SW, IT MAY BE THE SAME TRAIL, THEREFORE IT WAS DECIDED MORE LIKELY THAT THESE TWO DEPOSITS (605566 + 605570) ARE BOTH FILLS OF DITCH RE-CUT AND NOT SEPARATE FEATURES. NE EDGE OF FEATURE NOT CLEARLY VISIBLE IN PLAN SO SURVEYED WITH UNCERTAIN EDGE.

THIS FEATURE ALSO SEEN IN SECTION TO OVERLIE V. SHALLOW FILL OF NE-SW DITCH [605571]. WHILST ONLY A VERY SMALL AMOUNT VISIBLE IN SECTION THIS IS THE SAME FILL THOUGH AS SEEN TO BOTH NE + SW AND THEREFORE THIS IS LIKELY TO CUT EARLIER FEATURE (+ NOT JUST BE A DEEPER FILL)

DESPITE THIS FEATURE DROPPING LOWER INTO DITCH THAN SEEN IMMEDIATELY TO NE + SW.

Interpretation and discussion CUT OF NE–SW DITCH [60SS71].

DITCH IS SEEN IN MULTIPLE SLOTS TO BOTH NE & SW, BEING CUT ABOVE BY DITCH RE-CUT – AND THIS SLOT APPEARS TO BE SAME (DIFFICULT TO BE SURE IN V. SMALL SLOT) BEING CUT BY RE-CUT [60SS66]. DITCH SEEMS CHARACTERISED BY ITS STRONG FILL AS OPPOSED TO SOFTER RE-CUT ABOVE, WHICH IS ALSO MUCH WIDER THAN LOWER DITCH IN SLOTS TO SW AND THOUGH ACTUALLY THIS ONE ALSO – IT CANNOT BE DISCOUNTED COMPLETELY THAT THE RECUT IS SAME FEATURE (SEE UPDATE FILE), WHICH MARKERS TOWARDS BASE – UNLIKELY AS THIS SOUTH WESTERN NOT APPARENT IN MOST SLOTS NEAR LOR.

Interpretation and discussion

Two individual ploughs, both lumped together into one cut number. Cuts linear [605581]. First thought to be wheel cuts, upon investigation more resembles a heavy plough, such as a Gubsaiter.

Excavated and date	MS 7/8/20	Recorded and date	10/8/20	Site check	10/8/20 MJ	Post-ex check

Interpretation and discussion

Cut of Linear running NE-SW, cut by two ploughs (numbered together as [605581]) Shallow and wide, unlikely to be drainage due to chalk natural. Possible field boundary

Interpretation and discussion [605610]

Potential recut of linear / NE-Section (DP 0350) shows a seperate, lower fill to anything extending to the SW of it. May indicate a cleaning of the linear which wasnt necessary further up the hill, resulting in a seperate lower fill.

Interpretation and discussion

Fill of [605585], which is a potential recut of linear [605610]. Fill is a slump of natural, likely soon after cut was made. This fill is present through the linear extending NE, but not extending SW, suggesting that this is due to a localised event, such as clearing

Interpretation and discussion PIT

DISTRUCTION PIT, BECAUSE IT IS KEY HOLE IN SHAPE WITH POSSIBLE STOKE HOLE FACING EAST, CUT LINED WITH (605993) WHICH APPEARS TO BE LIKE CHALK THAT HAS CO_2 RELEASED THROUGH HEAT PRODUCING A LIME PASTE. TREE THROW IS ALSO SUGGEST BUT THE CONFINEMENT OF THE ROOTS IN A SMALL AREA WOULD BE BAD FOR TREE GROWTH.

Interpretation and discussion LINEAR TERMINAL

DUE TO THE ROUNDED NOT TAPERED N.W END SUGGEST A TERMINAL

HEAVILY TRUNCATED

COULD ALSO BE AN AREA OF HILLWASH SCREENING POSTHOLE [605596] AS A TERMINUS FOR LINEAR WASHED INTO A DEPRESSION

WAS FOUND AT [605839].

Excavated and date	Recorded and date	Site check	Post-ex check
[illegible]	[illegible] 17/8/20	GMM 26/10
