Interpretation and discussion																													
Lower fill of Holloway [606337] that is most likely, natural chalk from the set surface, washed into the feature. It is also coming from the NW of the feature which shows the direction water was flowing into the feature.

Interpretation and discussion		
Fill of a trackway, probably natural infilling, it seems that something similar to this fill is covering most of the feature so it is possible that is a possible remnant subsoil layer.

Interpretation and discussion THE POSTHOLES [606533], [606535], [606330], [606324], [606543] CAN BE CONSIDERED CONTEMPORARY TO EACH OTHER DUE TO THE PRESENCE OF LATE(?) IRON AGE BLACKWARE. THIS POT HAS WHITE INCLUSIONS (FLINTS?) ON ITS CORE & ABOVE THE SURFACE. A POSSIBLE LOGICAL ALIGNMENT COULD BE BETWEEN THE DOUBLE POST: "606324", [606326] AND THE POSTHOLES [606328], [606330] & [606332].					
avaled G.F.	Recorded and date	G.F.	Site sheet	Post-in sheet	
date	26.8.2020	1.9.2020	Cg		

FINVE RETRO

~~THIS ALIGNMENT IS COMPOSED BY POSTHOLES SIMILAR IN SHAPE AND DEPTH.~~
~~THE GENERAL IDEA IS THAT IN THESE~~

SOME OF THESE POSTHOLES HAVE AN EDGE PARTIALLY COLLAPSED
PROBABLY DUE TO THE DECAY OF THE POST. [606547], [606371].

THE IDEA IS THAT THESE POSTHOLE BELONGS TO AN AREA ACTIVE IN THE
LATE IRON AGE. PROBABLY ~~THESE~~ SOME OF THESE POST HOLES BELONG TO
STRUCTURES RELATED TO AGRICULTURAL ACTIVITIES.

Interpretation and discussion SMALL POST HOLE / 1 Fill / unable to confirm feat is related to existing feat with proximity. From section feat seem to also have been packed, hence reason to believe this is a post hole. Further more the dimensions also seem uniform.

Interpretation and discussion CUT / INTERFACE BETWEEN CREMATION VESSEL 1277 AND GRAVE BACKFILL (605390). NO FILL VISIBLE OUTSIDE THE ROUND-BASED VESSEL AS OBSERVED IN SECTION — IT WAS PLOUGH DAMAGED SO A BIT OF THE FILL FROM INSIDE THE VESSEL HAD MIXED INTO SURROUNDING SOIL — SAMPLED AS 964. EITHER THE CUT FOLLOWS THE SHAPE OF THE VESSEL SO CLOSELY IT JUST CANNOT BE SEEN, OR THE VESSEL WAS PLACED IN THE GRAVE AS										
Excavated and date AM 15/9	Recorded and date AM 16/9	Site check NB 22/9/20								

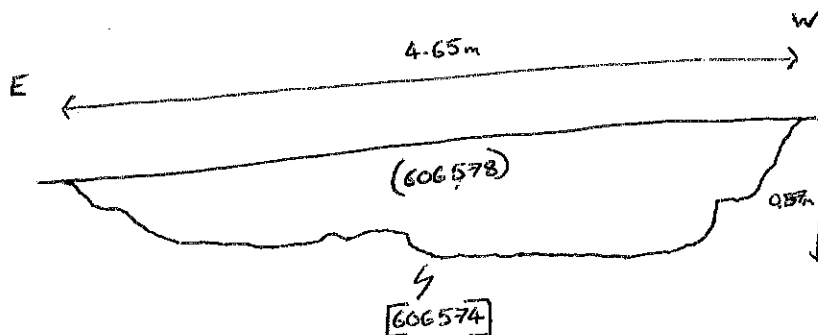

→ IT WAS BEING BACKFILLED AND THE FILL CONTINUED TO BE ADDED AROUND IT.

Interpretation and discussion																																						
Cut of possible drainage gully / holloway - located in an area of other holloways - further investigation needed to establish what the cut represents. The cut truncates another possible holloway see [606691], and an earlier phase of excavation / pitting see [606688], [606693], [606695] and [606697].

Interpretation and discussion Fill of possible pit Cut [606693]. The fill appears to be made up of weathered chalk and clayey silt that most likely washed into the cut. weathering most likely caused the sides of the cut to slump. No finds evidence to help date the pit's construction or to suggest the fill was deliberately backfilled.

Interpretation and discussion					
Fill of possible extraction pit Cut [606696]. The fill appears to have slumped / washed into the cut from the western edge of the cut. The fill appears to have been cut by two different liners indicating extraction / Pit cutting took place before drainage gullies & hollows were constructed.					
Excavated and date		Recorded and date		Site check

Interpretation and discussion					
Fill of a ditch. Because of the direction of filling in the ditch it is possible that it was either backfilled or part of the bank falling back in for natural causes.

Interpretation and discussion																													
Cut of posthole.																													
Quite steep slopes - though quite a narrow cut, contrasting with flat bottomed postholes in the area.																													
Possibly part of round structure - though this is not obvious.

Interpretation and discussion					
Quarry pit / extraction hollow [606820] the pit might represent an extraction quarry for clean chalk or flint nodules. Possibly Prehistoric in date - no dating evidence found to support a date of construction.

Interpretation and discussion (606822) IS THE LIGHT BROWN Fill OF Part NO2B [606821] - THIS FILLING WAS A DELIBERATE ACT AS A HAMMER STONE* WAS WITHIN THE FILL MATERIAL. PLACING THIS WITHIN THE FILL PROVIDES A POSSIBLE LINK TO THE REGULAR DEPOSITING OF DOMESTIC/PERSONAL GOODS WITHIN THE A STRUCTURE THATS BEING DISMANTLED. THIS PRACTICE WAS FIRST OBSERVED FROM STRUCTURES OF EARLY NEOLITHIC DATE IN CENTRAL ANATOLIA.

Interpretation and discussion						
Natural silting fill of quarry hollow [606820] - high energy fill - possible deliberate backfill although lack of pottery indicates the fill was most likely another phase of slumping / weathering and silting.

Interpretation and discussion Cut of a small pit. Use unknown but there was a small piece of slag on the fill. Possible related to some late medieval/ post medieval activities. It is also very likely that most of it has been eroded by either the nature of the slope or agricultural works.

Interpretation and discussion					
Fill of shallow linear / holloway cut [606950]. The fill appears to be a phase of gradual silting - however stones found in the cut might represent consolidation of the track - although this is not clear.

Description				
TWO CU CRUCIFORM BROOCHES ¹²⁰⁶ + ¹²⁰⁷ ACCOMPANIED SKELETON EITHER SIDE OF CHEST, BOTH HAVE SOME MARKING ON THE COPPER THAT MAY BE EVIDENCE OF GILDING. ONE SMALL COPPER LINK/RING WAS RESTING ON THE RIGHT RIBS OF THE SKELETON ¹²⁰⁸, ITS FUNCTION IS UNKNOWN BUT THE DIAMETER IS FAR TOO NARROW FOR A FINGER RING WHICH MAY SUGGEST CLOTHING ORNAMENTATION POTENTIALLY.
