Interpretation and discussion					
Feature of unknown use and derivation, but pre-dating post-holes. No artefacts were recovered from the fill. East and west edges were cut across natural, their faces in the natural; north and south were also cut into layered natural chalk. Unlikely to be natural tree-trunks, but possibility that it is geological.

Interpretation and discussion					
Fill of Small Circular pit [607737]. The fill contained a crushed pot that appears to have been placed upside down in the cut. The fill was 100% sampled. No burnt bone was recovered - suggesting it was not a cremation fill.

Interpretation and discussion Once rain has stopped and ground drained feat was revisited and upon further investigation feature consisted of two fills. When originally excavated this was during moderate showers hence was cautious not to over excavate as feature was easily disturbed when removing fill.

Interpretation and discussion. Possible post-hole cut containing backfill (607849). The quantity and unshaded nature of pottery sherds recovered from the fill may suggest that this is the base of a small pit, rather than a post-hole.

Interpretation and discussion					
Cut of small post hole Cut [607876]. The cut appears not to be part of a larger structure - although found in a general cluster of Iron Age pits and post holes. Iron Age pottery indicates c. I.A. date of construction.

Interpretation and discussion					
Fill of post hole Cut [607876]. Natural silting - large stones found in the fill might represent packing for a post-hole - disturbed possibly when a post was removed - Iron Age pottery appears to have been deliberately or incidentally worked into the cut.

Interpretation and discussion

Tree Throw, although from Section profile it seems feature may have been used as a post hole. Finds appear to indicate feature was also used to pack fire domestic refuse.

Interpretation and discussion					
Lower sill of small pit. could have accumulated through weathering if the pit was left open after use. no datable finds but pottery found in (607889) would suggest anglo-saxon date.					
Excavated and date	07/10/20 MD	Recorded and date	07/10/20 MD	Site check 19/10/20

Interpretation and discussion

SPREAD OF DISTURBANCE, PROBABLY FROM PLOUGHING, IN FAIRLY DISTURBED AREA. I RECORDED IT MAINLY BECAUSE I NEEDED A NUMBER FOR ~~RECOVERED~~ FINDS RECOVERED FROM THIS CONTEXT WHICH MAY HAVE BEEN PLOUGHED OUT OF GRAVE [607281]. ADJACENT TO A DEEP PLOUGH SCAR WHICH IS CURRENTLY UNNUMBERED, ALTHOUGH IT MAY BE NECESSARY TO NUMBER IT LATER.
