Interpretation and discussion Shallow pit or rooting. Edges were diffuse, the base very irregular, artefacts were limited - all arguing against it being a pit. Some burnt or fired clay was encountered on or near the machined surface, but was very fragile and could not be clustered into a particular feature or artefact, suggesting that it was burnt rather than fired - perhaps from burning a tree root. All this material was retained in sample 1295.

CONTEXT CONTINUATION SHEET

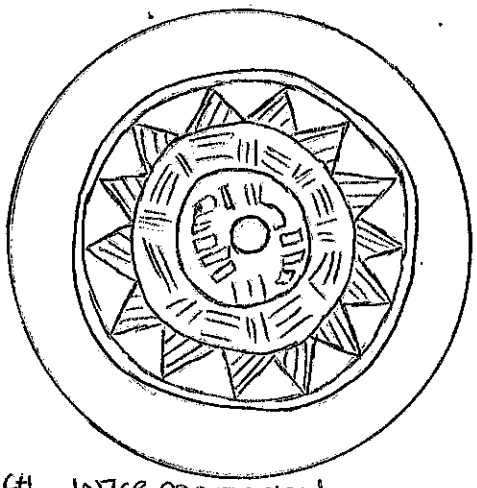
© 2016

Project Code	115ZC14 1C19 ELHAR	Sub-Division	115ZC14 1C19 ELHAR	Context number	SK 608048

Description LEFT SIDE OF PELVIS IS ALSO POORLY PRESERVED + VERY FRAGMENTED, COULD BE A RESULT OF PLOUGH DAMAGE TOO.

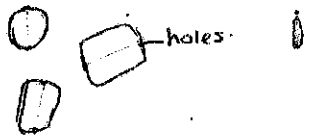
THIS INDIVIDUAL HAS BEEN BURIED LIKELY WEARING A PEPLOS-TYPE GARMENT. 2 Cu ALLOY (BRONZE) BROOCHES REMAIN, THEY BOTH ARE DECORATED/ ENGRAVED + HAVE GOLD/AU GILDING. A PIN ALSO WAS RECOVERED BETWEEN THE 2 BROOCHES RESTING ON THE VERTEBRAE. 56 AMBER BEADS WERE ALSO UNCOVERED, ALONG WITH A SMALL BRONZE 'HORSE-SHOE' SHAPED FITTING, BETWEEN THE BEADS.

Sketches



SKETCH INTERPRETATION OF RIGHT BROOCH 1484Δ.

NOT TO SCALE.



AMBER BEADS VARIED IN SIZE C. 0.5 - 10.5 MM. THEY WERE ROUNDED OR SUBROUNDED. ALL OF THE BEAD HOLES RAN THE LENGTH OF THE BEAD.

Interpretation and supporting evidence

THE BEADS SEEM TO START FROM JUST BELOW THE RIGHT BROOCH, AND WERE FOUND BETWEEN THE RIBS TO THE ULNA + RADIUS ON THE RIGHT SIDE + BACK AROUND + UP TOWARDS THE RIBS + VERTEBRAE TOWARDS THE LEFT SIDE OF THE BODY. IT IS LIKELY THAT SOME BEADS WOULD HAVE BEEN DISTURBED BY THE PLOUGH. AN FE ARRANGEMENT WAS ALSO UNCOVERED BY THE RIGHT FOOT TOO.

Date and initial	13/10/20	Site check	RB 21-10-20	Post-ex check		Accession number

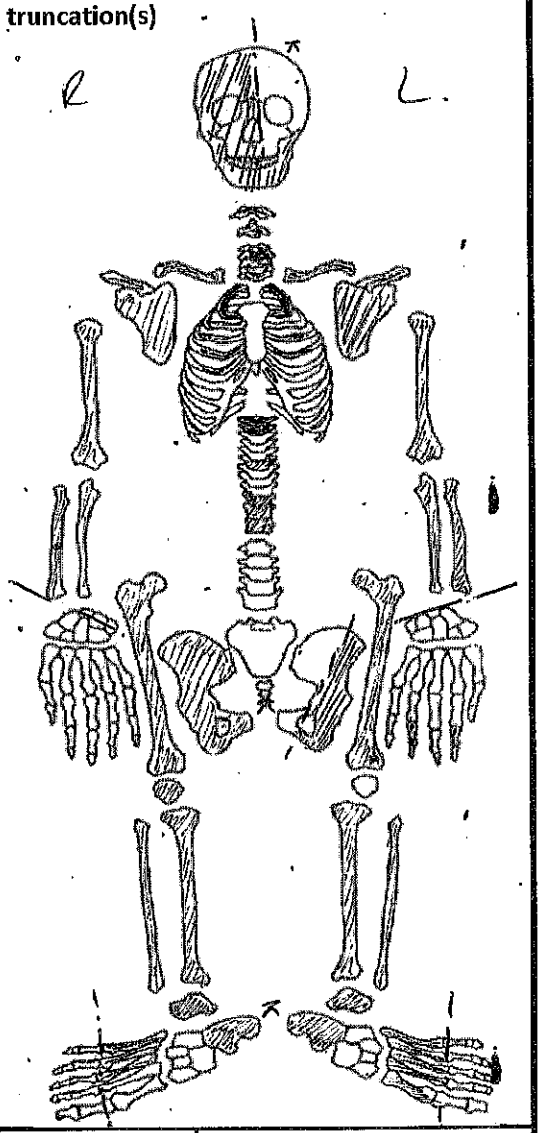
Shade bones present and show extent of truncation(s)



Interpretation

SINGULAR INDIVIDUAL, SUPINE POSITION INHUMATION. POSSIBLE ADOLESCENT. SIGNIFICANT PLOUGH DAMAGE TO SKULL/ CRANIUM, VERTEBRAE + RIBS. NO EVIDENCE OF HAND BONES. BOTTOM OF GRAVE LIKELY CUT BY LATER FIELD DRAIN, REMOVING TOE TIPS + SOME TARSALS. BONES PRESERVATION IS SIGNIFICANTLY POOR + SOFT / FLAKEY... (SEE CONTINUATION SHEET)

Interpretation and discussion

BURNT? POT OF UNKNOWN date in poor condition. THE SAME Found in [608092] + [608094], it seems reasonable to relate said ~~POST~~ POST Holes. All the post holes in this Area curve gradually From NE Heading SW then South, then South West before disappearing. Apparently ENCLOSING SOMETHING IN THE EAST END OF SITE.

Interpretation and discussion Basal fill of post-hole [608126]. The amount of chalk inclusions in contrast to (608128), strongly suggests that it represents packing material of redeposited natural around post-pipe fill (608128)

Excavated and date	NJO 12.10.2020	Recorded and date	NJO 13.10.2020	Site check		Post-ex check

Interpretation and discussion Backfill of pit [608129], largely comprising sherds and sealing ?cremation layer (608167). Sherds are unabraded and of one fabric, indicating a single vessel containing a cremation. A single sherd of bone underlay (608167) suggesting that the pot was upright when deposited and subsequently destroyed by ploughing

Interpretation and discussion

Cut of post hole, possibly they were originally 2 different cut, but there is no difference in the fill so it may also be just a result of rooting

Recorded FG 10.10 Entered FG 14.10 Checked LP 21.10.20

Interpretation and discussion

TRUNCATED POSTHOLE AT THE EAST OF AREA 30. THIS POSTHOLE LIES ON THE PERIPHERY OF A LARGE GROUP OF POSTHOLES, HOWEVER, THERE APPEARS NOT TO BE ANY STRUCTURAL ASSOCIATION OBVIOUS AT THIS TIME. 1X SHERD OF POT WAS RECOVERED FROM (608208). (608207) IS REDEPOSITED NATURAL CHALK AND MAY HAVE BEEN FORMED WHEN THE ORIGINAL POST WAS REMOVED. THIS DOES NOT APPEAR TO BE POST PACKING.

Interpretation and discussion

(608207) REPRESENTS A DEPOSIT OF REDEPOSITED CHALK AT THE BASE AND SW EDGE OF POSTHOLE [608206]. THIS DOES NOT APPEAR TO BE POST PACKING, BUT IS MORE LIKELY TO BE THE RESULT OF EROSION EITHER DURING REMOVAL OF POST OR SHORTLY AFTER.

Interpretation and discussion

POST HOLE WITH A SINGLE FILL (608218). LOCATED IN THE CLUSTER OF POST HOLES IN THE SE AREA OF THE SITE. FEW FRAGMENTS OF A. BONE WERE FOUND, SAME AS IN NEARBY PH [607906] SO MAYBE THEY ARE RELATED. QUITE A LOT OF STONES WITH IN DEPOSIT, SO THEY MIGHT BE COLLAPSED PACKING, BUT ONLY SIGN OF ONE FILL

Excavated and date	Recorded and date	Site check	Post-ex check

Interpretation and discussion Darker brown upper fill of post-hole [608280]. It also contained smaller inclusions of chalk. Interpreted as post-pipe fill/post shadow. No structural traces of a post survived. Visible evidence could not determine whether the post was removed or rotted in situ.

Interpretation

BODY LAYED SUPINE IN GRAVE WITH TWO BROOCHS, ONE RING AND 24 BEADS. TOP OF CRANIUM (& TOP JAW) ROLLED TO THE LEFT DURING DECOMPOSITION HANDS LAYED ON LEG (NOT ON PELVIS) AS DURING DECOMPOSITION THEY FOUND THEMSELVES WEDGED BETWEEN LEG & PELVIS. FEET BONE POSITIONING ARE WORSE OF ALL AS THE MUST OF BEEN DISTURBED.

Interpretation and discussion Pit / 1 Fill / Pottery Suggest feature maybe Neolithic Large Stone quartz left insitu for Section and Photo and to be 100% to retrieve find Reason being this type of stone is very uncommon on present Site and must have been deposited in feature for a particular yet unknown purpose. Supervisor BEN removed finds a disposed of it no reason given when ask where reply was ambigious and flippant.

Interpretation and discussion CUT OF NE – SW LINEAR FEATURE, RUNNING PARALLEL TO ANOTHER, SIMILAR ONE. ~~[illegible]~~ (SEE LOCATION SKETCH ON PLAN SHEET) DOESN'T APPEAR ON THIS PRE-EX OR IN THE EVALUATION TRENCH BECAUSE IT HAPPENS TO RUN ON THE EXACT ALIGNMENT OF THE EVAL TRENCH AND PROBABLY GOT MISSED BECAUSE OF THIS.

Interpretation and discussion FILL OF POSSIBLE CONTINUATION OF LINEAR FEATURE. NOT PHYSICALLY CONTINUOUS, BUT IT'S SO SHALLOW THAT SLIGHT VARIATIONS IN DEPTH OF THE FEATURE OR THE MACHINED LEVEL COULD OBLITERATE IT ENTIRELY.

Interpretation and discussion

[608367] REPRESENTS A POSTHOLE CUTTING THROUGH RINGDITCH [608401]. THIS WAS NOT VISIBLE CUTTING THROUGH UPPER FILL (608403) AND WAS ONLY VISIBLE CUTTING THROUGH LOWER FILL (608402). NEVERTHELESS, FOR STRATIGRAPHIC INTEGRITY, IT HAS BEEN RECORDED AS CUTTING UPPER FILL (608403). NO OBVIOUS STRUCTURAL RELATIONSHIP WITH ANY OTHER POST HOLES. NO POST PACKING. NO FINDS.

Interpretation and discussion Sole backfill of post/stake-hole cut [608372]. No discrimination between post shadow/post pipe fill and packing was observed, although the profile of the cut suggests that the post/stake had been located on the eastern side of the feature.

Description

1. INHUMATION
2. EGW / ANE
3. SUPINE
4. —
5. 1.62
6. 1589 – 1770. Metal finds marked on adjacent skeleton plan. Beads are on attached continuation sketch plan.
7. Presence of micro / nano-beads meant that the soil in the chest area on the right side + spine was 100% sampled.

Differential survival meant that left ulnar and the right ulnar, spine, left pelvis and left hand were very partial in their survival.

Right hand adjacent to right pelvis. Left hand may have been with left pelvis (one bone survived) + left radius + ulna had become separated. Upper spine did not survive.

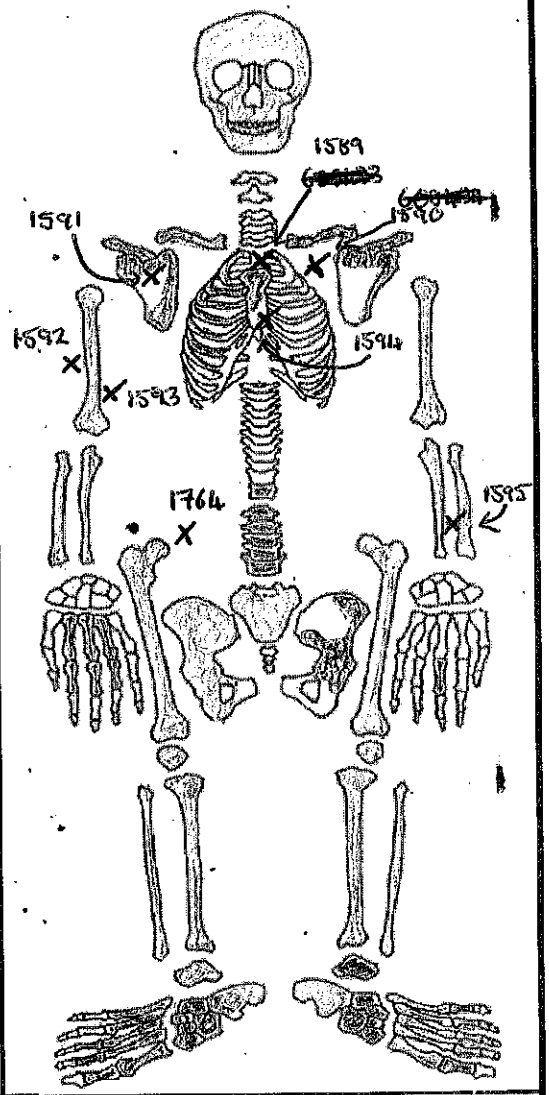
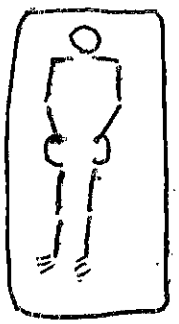
Shade bones present and show extent of truncation(s)



Sketches



Interpretation

Adult, ?female burial. Notable for disc brooch on right breast + square-headed brooch on left breast, spindle whorl by right arm, 0.19m long cu alloy pin on chest + 178 beads, of which 76 were amber and of identical rhomboid form. The beads (incl. microscopic examples) were concentrated on the right side between breast and top part of femur. Few were found to the left. A sketch of their locations is attached.

Interpretation and discussion Grave fill within cut [608431]. Unusual in being divisible into three discrete sub-components: a = redeposited topsoil along the edges of the cut, b = redeposited natural chalk covering the corpse, and c = probably a product of breakdown of soft tissue. Redeposited sherds and worked flint occurred evenly through a – c. A line of charcoal was evident c 2cm in from the western edge of the cut and was recorded and sampled (see sample 1426). The nature of the basal fill around the skeleton made cleaning of beads for photography very difficult

Interpretation and discussion

SINGLE FILL OF POSTHOLE, A FAIRLY GOOD ONE, BUT DISCOVERED VERY LATE ON. EVERYTHING HAD BEEN UNCOVERED, SO YOU'LL HAVE TO LOOK AT THE GPS FOR LOCATION.

PHOTOGRAPH HAS FILL N°. RATHER THAN CUT N°. ON BOARD.

Interpretation and discussion

Cut of shrub hole. Could be interpreted as two separate features but fill was identical in both sides and - based on the irregularity of the shape in plan + proximity to hedgeline - it's more than likely they are both root holes from the same shrub/tree.

Interpretation and discussion CUT OF POSS CREMATION DUE TO PROXIMITY TO CREMATION [6084G5] + CHARCOAL~~FLECKS~~ FILL (UNLIKE OTHER PHS IN AREA) FEATURE MAY BE A CREMATION, HOWEVER IT LACKS A URN LIKE CREMATIONS [6084G8, 6084G5] + DOES NOT OBVIOUSLY CONTAIN BURNT BONE. POTENTIAL FOR FEATURE TO THEN ALSO BE A PH OR CE SMUDGE HOWEVER IRREGULARITY OF CUT MAKES FEATURE SOMEWHAT AMBIGUOUS, DESPITE 100% BEING IT
