Interpretation and discussion

The three smaller sized postholes appear relatively uniform in shape & size, and were possibly part of the same structure. The last one appears larger, with two fills and could have been a pit for waste, possibly built by the same people as the postholes.

Interpretation

Skeleton no. 608604 deposited on grave cut [608603] and filled by deposit no. (608605). The skeleton was Truncated by excavator digger. The skeleton has a displaced vertebral column and the feet weren't placed on the cut, were on the ~~floor~~ redeposited chalk, which suggests that the grave collapsed on the southeast side and, not having enough space, they put the body under pressure.

Interpretation

608622 is most likely (due to lack of brow ridges) an adult female approx 5'6" tall. Out of over 100 burials this was the only one in which the left hand was deliberately placed on the left shoulder but no signs of anything being in it.

Interpretation and discussion

Fill was very Comfort. It was the fill for a grave burial, Contained a Skeleton (SK. 608659). + 2 small finds (1926 + 1927). There were Chalk lumps that formed betwen the bones of the skeleton - making excavation trickier.

Interpretation

INFANT BURIAL. BONES QUITE FRAGMENTED.
I THINK THE CHILD WAS PLACED ON ITS LEFT SIDE AS IF SLEEPING, THE RIGHT SCAPULAR, ON LARGE PIECE OF CHALK SUGGESTS THE POSITIONING. THE DECORATIVE VESSEL WOULD THEREFORE HAVE BEEN PLACED BEHIND THE LOWER LEGS/ FEET.

Interpretation and discussion

This is the cut of a small post hole which is very close to [608694] the cut of a large post hole forming a four poster (group 608688)
The way it is angled and its position it was most probably a supporting post for the large post. →

Interpretation and discussion

FILL OF GRAVE IRON AGE. HARDLY DISTURBED DUE TO PLOUGH. THAT IS WHY PROBABLY THERE WERE AS LITTLE AMOUNT OF DEPOSIT ALL THE POTTERY FOUND WERE LOCATED ON THE SEMICIRCULAR SIDE OF THE BURIAL CUT. MAYBE BECAUSE OF THE RESTS OF AN OFFERING. BACKFILLED ARBORATELY.
