Interpretation and discussion THIS IS A BANANA SHAPED, CURVI-LINEAR PIT. AND WAS LIKELY FORMED BY A LARGE SECONDARY OR FEEDER ROOT OF A NOW ABSENT TREE. THE BASE OF THE FEATURE HAS IRREGULAR PATCHES OF SOIL DIFFERENT FROM THE GRAVELLY NATURAL WHICH ARE PROBABLY THE RESULT OF TERTIARY ROOTS BRANCHING OUT FROM THE FEEDER ROOT.

Interpretation and discussion					
Fill of ditch terminus. No finds. Inclusions throughout the fill. Likely natural silt. Inconsistency of shape and natural inclusions could imply this is actually a natural disturbance.

Interpretation and discussion Cut of ditch terminates cut of ditch. Continued northwest as [260] and likely terminates as being somehow before [239] as it is not visible in the plan. Ditch part of structure. Recut by overlying [326]. Terminates less than a metre beyond [260] to the west. Deep, steep sided could be for water retention of possibly large beam slots.

Interpretation and discussion					
Pit / Feature appears to have 3 fills (271) + (273) appear to be archaologically as both fills had few pieces of charcoal and pottery. (272) seems to be an abandonment layer. Hence primary function seems to be used as a back fill and reused over time for depositing of domestic waste. Unable to spot date pottery as fragments were heavily burnt / charred.					
Excavated 15.1.21 IMP and date 18.1.21 RIG		Recorded 18.1.21 RIG and date 19.1.21		Site check

Interpretation and discussion 2 nd Fill for (270) seems to be an an abandonment layer. No archaeology present, feature does appear to have a profile like that of (116) and (226) but smaller in size. It may be possible these features were excavated for gravel or sand and backfilled later or simply abandoned.																																
Excavated 15.1.21 IMP and date 18.1.21 RUG		Recorded 19.1.21 and date RUG		Site check

Interpretation and discussion that POSS Pit with remains of a post hole, pit may have been remains of packing for post, hence 2 fills. Unable to spot date due to condition of pottery, although it has been said site is iron age feature, also has a continuation of [144] + [187] a gully that cuts a number of features in the vicinity, however this is not perceivable in the section.
