Interpretation and discussion					
Linear feature continues in plan into the LOE (roughly from eval trench).					
The amount of tightly packed stones in the fill (138) could indicate a surface (ex. pathway/road). Edges difficult to see due to the clay of the fill being so close to natural. Fill could extend into furrow to E.					
* Extension of about 45 cm was made to explore depth of All (photos 130-132).					
A band of ephemeral natural was discovered just below fill which was also contained					
Excavated and date 18/4/2021		Recorded and date 21/4/2021		Site check	
				Post-ex check	

large amount of stone & gravel (like 138) but was a much more silty clay and ~~had~~ had an orange colour w. specks of blue/grey tint. Conclusion made that this layer is natural
w/ins just on top of the sterile clay ~~the~~ natural.

Interpretation and discussion														
* Fill has heavy amounts of stone/pebble inclusions (>50% of fill) = some manganese. Possibility that fill continues into furrow to the E, difficult to see clear edges due to clay being so similar to natural. The heavy stone inclusions being so tightly packed could indicate the top part of a surface.

Interpretation and discussion																																
1 st fill of ditch [146], so it's the most modern fill of this ditch. The fill, close to the sides of the ditch, is mixed with natural, and in the S side is over the fill 148. In this fill a lot of fragments of Roman pottery was found, between them 8 rims of different piece, some bases, and the almost complete base of a bowl were found.

Interpretation and discussion Cut of linear ditch running east to west. This slot [152] was dug in order to catch terminus seen on pre-exc plan, however the ditch does not terminate here and instead runs at least to being cut by SE-NW furrow and likely into the western site LOE

Interpretation and discussion					
Cut of possible terminus within a curvilinear. Very shallow and vague edge of fill. Possibly truncated away at some point. Lines/edges of curvilinear is very ephemeral (as are some of the pit/posthole shaped features around it). Could've been part of a roundhouse structure but has been way too much truncated resulting in shallow features.
