Interpretation and discussion Cut of pit with 3 fills, 1 of them looks a delivered backfill from the excavation of other pit or ditch, maybe at W of this pit, so that fill appears at W part and bottom. For its size, the original use maybe it was for the extraction of clay, and when was abandoned, was filled with delivered backfills. After, its last fill was cut by the ditch [399], with N-S orientation, and after by the ditch [398] with

Interpretation and discussion Base fill of cut [396] - Contained large amounts of pottery sherds & 1 intact base of a dish (?) that was registered as SF no. 33 (as seen in E facing section on drawing 123). Fill was very soft, dark & organic w. pottery sitting on the interface between (410) & (411). Colour & texture of fill probably due to alluvial activity & resulting processes.

Interpretation and discussion Tertiary fill of ditch [397]. Probably the original cut for the interface of cut [396]. Color, shape & texture implies gleying/alluvial activity/resilting processes in the fill after the cut was made for [396]. This could explain the amounts of pottery found both in (411) & (410) - that perhaps these deposits of pottery seeped into (411) as part of the gleying.

Interpretation and discussion																													
Cut of gully [425] has one fill & one spread cutting fill. Cut's west facing section truncated by spread, east facing section appears undisturbed, so recorded for clarity. * gully cuts spread (427) which made edges unclear as geological spread covers natural to undetermined depth.

fill of gully [425]. Edges were clear on E.F.S, however W.F.S. is less clear due to gully cutting geological spread (427). The spread covers natural; no exact edge of natural/spread was not investigated at this time. similar spreads can be seen across the site & is not an anomaly.

Interpretation and discussion VISIBLE AS AN INDISTINCT SPLODGE ON THE SURFACE ADJACENT TO A POSSIBLE RIGHT-ANGLED LINEAR CORNER (YET TO BE EXCAVATED), AND CUT THROUGH BY A LONG GULLY [490] AND A SHORTER PARALLEL LINEAR [494] WHICH MAY BE A PLOUGH-SCAR. THIS FEATURE MAY BE A SMALL PIT BUT NO FINDS WERE TURNED UP.

CUT OF DITCH LOCATED ON THE CORNER NW. SOME PARTS ARE UNUSABLE ON PLAN DUE TO LINEARS OF FURROWS CROSSING NW-SE, ALTHOUGH IT SEEMS THE DITCH KEEP GOING ALONG THE BACK SOUTH SIDE QUITE SHARP, WHICH SUGGEST POSSIBLE FUNCTION OF DITCH NOT JUST AS A BOUNDARY BUT ALSO AS A DEFENSIVE FEATURE. CHRONOLOGY ROMAN. NORTH SIDE HAS BEEN CUT INTO A SALT CLAY & GRAVEL STONY NATURAL.
