Interpretation and discussion THIS FILL WAS FORMED MOSTLY IN NATURAL PROCESS OF ACCUMULATION SOIL INTO THE DITCH. THE SIDES COLLAPSED, SO THAT'S WHY THE FILL ON THE SIDES AND IN THE BOTTOM LOOKS LIKE SIMILAR TO NATURAL GRAVEL. HOWEVER, THE SETTLEMENT'S WASTES WERE GETTING INTO THE DITCH AS WELL.

Interpretation and discussion					
Cut of ditch with fill. It's in an area where some pits and ditches join, with similar fills, what hasn't allowed to locate them in the plan. This ditch is one of the most modern feature of this slot, with the ditch [1481] and the pit [1613], and it's cutting the fills of the pits [1485], [1486] and [1487]. Probably drainage system. No finds in its fill.

Interpretation and discussion Cut of ditch with 2 gills. It's in an area where some pits and ditches join, with similar gills, what hasn't allowed to locate them in the plan. This ditch is one of the most modern feature of this slot, with the ditch [1479] and the pit [1613], and it's cutting the gills of the pits [1515], [1516] and [1483]. No finds in its gills. Probably drainage system.
