Interpretation and discussion. Cut or large enclosure ditch that runs through large portion of area. Is cut by a small gully that then terminates somewhere in section. cuts [1633] . Cuts a smaller ditch [1631] of unknown functions. Pottery finds from fill suggest initial ditch cut must be Roman or earlier.

Interpretation and discussion. Initial fill of [1614]. Several large stones. The largest & heaviest stone including out of all the fill of [1614]. Suggests they rolled into the base while the ditch was still open. (1619) & (1620) lay over it. No finds from this fill, but finds from others suggest it must be Roman or earlier in date.

Interpretation and discussion The first middle fill or [1614], the second, (1620), slightly slumped over it, and so must be slightly later. Likely slumped or silted in from weathering while the ditch was still open, but after (1618) had already formed. Pottery suggests Italy a Roman date - bone could provide a more exact date.																																			
Is also curby gully [1633]

Interpretation and discussion Shallow cut of gully, partially truncating the upper side of [1614], including fills [1621] and [1619], given the post Roman date of [1614], the gully must then be Roman or later. Gully does not appear on E Facing sec so must terminate somewhere in section, but it is unclear where.

Interpretation and discussion					
Cut of a Ditch running N → S. same as [1455] + [1457] merge into one ditch [1637] possibly why the base has different levels in [1637]. In section it is clear that is not on one ditch.

Interpretation and discussion						
Upper fill of N → S running Ditch. Ditch merges with [1456] + [1458] - fills slightly different so will not call them the same. Continuation of [1455] . Cut [1455] only has one fill but [1637] has two. Therefore will not include the fills as the same only the cuts.

Interpretation and discussion					
part of a small gully - where the digger removed the top soil perhaps created the ^(longer) terminus while the gully itself is part of a larger feature.

Interpretation and discussion Cut of Pit. Pit likely used for rubbish. Stone fill and soil fill mixed. Some stones are lying on the natural whereas so others are higher in the cut. Some stones lying on the natural, so surface is uneven in some areas. Possibility that originally the pit was used as a watering hole at the end of ditches and eventually was filled.
