Interpretation and discussion					
The relationship slot ultimately showed no relationship between the pit and the gully. It would be difficult to determine which feature is earlier. The surrounding soil appears dark much like the fill - But this is most likely due to the digger. The pit may also be a tree bowl, areas needed to be dug out similar to rooting.					
Excavated 24-25/8/21 and date EH		Recorded 25/8/21 and date EH		Site check	
				Post-ex check

Interpretation and discussion					
Naturally silted fill of [1686] . Filled after stones were added. Some may have been at the same time due to placement of stones. Some finds were found pushed into the natural. Most of the finds found in the corner (the centre of the full feature). Piece of Pot with frags and dogs(?) found - samian ware. Large piece of metal found (see drawings). [1686]					
Excavated 26.08.21 LN		Recorded 31.08.21 LN		Site Post-ex	

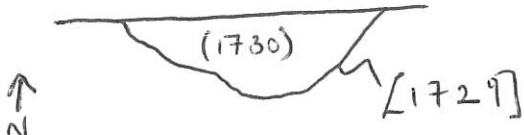

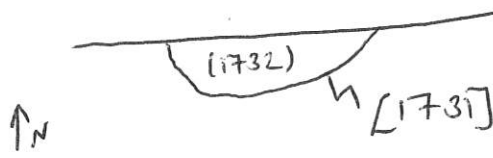

* Therefore the stones are included as in the same fill (1723)

Interpretation and discussion					
Stone fill of rubbish pit. Some finds found below the stones, perhaps added after 'rubbish' then naturally filled with soil. Stones appeared to be circular but this was not significant in the end. They were only fill. Stones added to pad down 'rubbish'. This layer fill is very diffuse with (1723) so the finds are mostly allocated to the upper fill - some were separated when it was more clear. but mostly the fill is seen in the section.					
Excavated 26.08.21		Recorded 31.08.21		Site Post-ex

Interpretation and discussion 1798 IS A POTENTIAL BOUNDARY DITCH CONTAINING FILLS (1830) , (1831) AND (1832) . MAY POTENTIALLY BE A RE-CUT OF EARLIER CUT 1797 OR REWORKING CUTTING A PRE-EXISTING LINEAR. FINDS FROM FILL (1831) SUBJECT 1831 IS NOT NO THE ARE REMAIN IN ORIGIN.
