MEDIEVAL CERAMICS

Bulletin of the Medieval Pottery Research Group

No. 1 1977 Edited by P. J. Davey and R. A. Hodges

CONTENTS

Introduction by M. McCarthy

Neutron Activation Analysis of Medieval Ceramics by A. Aspinall

A Note on Continental Imports in the North West by P. J. Davey and J. A. Rutter

The Brenig Hafod: a study of pottery use, dispersal and survival by J. P. Greene

Red-Painted Pottery in North-Western Europe: New light on an old controversy by
R. A. Hodges

An Approach to Pottery Study: Stamford Ware by K. Kilmurry

Some Aspects of Pottery Quantification by A. G. Vince

Anotations on Anglo-Saxon Pottery by J. G. Hurst

1976 Bibliography

This is the first bulletin of the Medieval Pottery Research Group which was formed in 1975. It contains a range of papers including accounts of particular industries which would otherwise be lost in large excavation reports or not published at all, as well as technological and methodological approaches to the study of ceramics which are of wider interest. In future issues there will be similar articles drawn from many parts of Europe.

The Bulletin is issued to private members of the group on payment of the subscription of £1.50. It is available to institutions at £2.00, including postage. For further details write to: Dr. R. A. Hodges, Department of Prehistory and Archaeology, University of Sheffield, SHEFFIELD, S10 2TN.
