

# AN EXAMINATION OF PREHISTORIC STONE BRACERS FROM BRITAIN

*By Ann Woodward, John Hunter*

*with*

*David Bukach, Fiona Roe, Peter Webb, Rob Ixer, John Watson and Philip Potts*

## *Contents*

The files presented here were originally contained on a CD accompanying the original hardback edition of this book. The book has now been reissued in paperback by Oxbow Books without the CD (ISBN 9798888570616, November 2023). The files were originally created in a Microsoft Access relational database. In order to make the data available cross-platform in the simplest forms possible, the data are provided in two formats: as an Excel spreadsheet and as a series of CSV files (comma-separated values). The CSV files can be conveyed as input to another table-oriented application such as a relational database or may be opened and read as independent ‘flat’ files.
