Sabratha finds location index

This index has now been reorganized as follows by P.M. Kenrick.

As far as possible the cards have been arranged in order of context: this is basically alphabetical, but follows the Y.I. numbering sequence, both between sites and within each site. (Not all sequences have yet been rearranged within individual sites.) Study of the finds is likely to be context-based initially, so this is thought to be most convenient. Broad categories of ware can be ~~TABLES~~ recovered through the colour-coding on the cards.

There is a general key to the Y.I. site numbers, and an internal key for each site (e.g. T1-5.H = Y.I. xxi. 14)

Not all contexts have been fully integrated into the Y.I. numbering system, and relevant cards are placed at the end of each section for the site (except for sites A-F, all of which are Forum area which is divided chronologically between Y.I. i – viii and xxvii !)

Some of the material is bagged not by context but by type, and these type-series entries are gathered together at the end of the file.

10.8.82

PLEASE KEEP ANY NEW CARDS SEPARATE, as I wish to see them before they are integrated into the index!
