## NON-TECHNICAL SUMMARY

---

North Pennines Archaeology Ltd were commissioned by Graham K Norman on the 19<sup>th</sup> December 2005 to carry out a level 2 building survey on a barn at Langton Farm, Langton, Appleby in Westmoreland. This work was carried out in January 2006 by Fiona Wooler. The buildings subject to this survey were certainly in existence by the first edition Ordnance survey map of 1865, possibly dating to the late eighteenth- early nineteenth century and show evidence of extensive remodelling in the late 19<sup>th</sup> century.

---

## ACKNOWLEDGEMENTS

---

North Pennines Archaeology Ltd would like to thank Mr Graham K Norman for commissioning the project and Mr and Mrs Armitage of Langton Farm for supporting the recording work on site, as well as Jeremy Parsons, Assistant Archaeologist, Cumbria County Council.

The report was written by Fiona Wooler BA, MA and edited by Juliet Reeves BA. Overall responsibility for the project rested with Frank Giecco BA, Dip Arch, Technical director for North Pennines Archaeology.
