## Appendix 2: Registers

Within this appendix are all registers pertaining to works on-site during the archaeological works.

### Context Register – Area 1

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
1001	1	Deposit		Modern overburden. Compact very dark brown/black silty clay with frequent inclusions of demolition material (brick/sandstone/rubble/slate/concrete) and drain pipe, animal bone, plastic and wood. Shallower towards S end of Area 1 (approximately 400mm), getting deeper towards NE end (approximately 1m).	Modern overburden covering whole site. Mixture of made ground surrounding and under buildings and disturbance from demolition of buildings.	
1002	1	Deposit		Loose to moderately compact yellow sand. Covers most of the area and has been disturbed by animal burrows and root/worm action.	Natural subsoil	
1003	1	Structure	Stone	Section of stone wall which lies in the SE corner of Area 1. NE-SW alignment. Sits at 1.6m out from SE edge of excavated area, runs into SW edge. Measures roughly 7.4m long and 0.6m wide. Constructed of grey stones ranging in size from 0.6m by 0.43m to 0.20m by 0.18m. They have been bonded with mortar which is mostly visible between the stones in the NE half. One course deep. Overlies (1004); [1006] sits running perpendicular at SW end and appears to be a later addition.	Section of stone walling, likely post-medieval to modern in date.	A
1004	1	Deposit		Firmly compacted black silty clay with a large number of charcoal inclusions with lots of small stones. Measures roughly 2.5m wide by 6m in length. Deposit underlying wall [1003].	Spread underlying wall [1003]. Perhaps of medieval date as a large amount of medieval pottery found and no modern inclusions.	
1005	1	Deposit		Deposit of loose dark brown silty sand with 3% charcoal/bone and 1% stones. Approximately 0.3m deep and extends across NW side of Area 1.	Layer of built up material lying across NW end of Area 1.	E
1006	1	Structure	Stone	Section of stone walling in SE corner of Area 1. SE-NW alignment. Runs into SE edge of excavated area. Runs perpendicular to SW end of [1003]. 1.4m in length and 0.76m	Small section of stone walling sitting at SW end of wall [1003], seems to be a later addition to [1003].	A

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				wide with a 53cm gap in middle. Bonded by white mortar.		
1007	1	Fill		Large stones with slate lying underneath sat in a matrix of moderately compact black silt with charcoal inclusions. Measured 1.44m long by 0.76m wide by ran outwith NE edge of excavated area. Overlies lower fill (1033).	Fill of cut [1032]. Medieval find suggests early date rather than modern but this is confused by presence of possible modern slate.	
1008	1	Fill		Black silty deposit with heavy charcoal content with mixed lenses throughout. Some stones present in N half of deposit. Measured 1.82m long by 1.14m wide by 0.12m thick. Lies in SE area running into E edge of trench. Overlies (1015).	Upper fill of feature [1014] which shows evidence of burning.	
1009	1	Structure	Stone	Section of stone walling orientated SW-NE near the northwestern end of Area 1. Constructed of igneous rock/sandstone between 0.4m by 0.44m by 0.15m to 0.19m by 0.15m by 0.16m in size. Irregular, sub-rounded and angular in shape. Measures between 0.65m and 0.75m wide and 11.6m long. Maximum depth 0.4m, between one and two courses. Steps out at 0.8m wide on foundation base. Has some bonding material (clay) between the two faces but is mainly a dry wall.	Section of stone walling, likely post-medieval to modern in date. [1039] appears to be a later addition to NE end.	A
1010	1	Deposit		Firm dark brown/black clay silt with a large number of small rubble stones throughout and infrequent charcoal inclusions. Measures roughly 6.4m by 2.8m by 0.26m thick. Full extent unknown as runs into NW trench edge. Lies to NW of wall (1009).	Deposit which appears to have built in western corner of Area 1, stone inclusions suggests that it may have included tumble, possibly from the demolition of nearby structures/walls.	E
1011	1	Cut		Cut of kiln/oven which contains fills (1025), (1026), (1027), (1028), (1029), (1030), and stone lining [1031]. Sub-circular shaped in plan. Measured 2.7m long by 0.80m to 1.30m wide and 0.2m deep. Gently sloping sides and rounded base. Truncates pit [1040] to S.	Cut for kiln/oven. To the S of the circular aspect of the kiln is a possible rake out area containing burnt material (charcoal rich deposit (1029) and clay (1028)). This is not necessarily a cut more an undulation caused by the action of raking. The upper deposit within the centre of the kiln (1027) has clearly been the subject of intense heat. The stones [1031] are also very friable and clearly heat affected. The cut [1011] may have been made to expose cleaner	B

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
					sand below (1005) which was subsequently used to re-level the kiln prior to the kilns construction.	
1012	1	Cut		Oval shaped. 1.04m wide, approx. 1.26m long and 29cm deep. Gentle break of slope at top with diagonal sides and uneven base. Posthole [1021] cut into base in NE corner. Filled by (1013).	Cut of pit. Posthole [1021] cut into base appeared to share the same fill. Fill indicates possible burning.	F
1013	1	Fill		Slightly compact, very dark brown sand with frequent charcoal inclusions up to 3mm in size. 1.04m wide, 1.26m long and 24cm deep.	Fill of pit [1012]. Possible evidence of burning.	F
1014	1	Cut		Irregular shape in plan with gently sloping sides and a relatively flat base. Measured roughly 1.14m long by 1.03m and 0.19m deep. Clearly defined towards SE edge of the trench but becomes unclear towards NW. Sits near to feature [1032] and wall [1003]. Filled by (1008) and (1015).	Possible cut for area of burning.	
1015	1	Fill		Loosely compacted red burnt sand with some charcoal and stone inclusions. Measured 1.14m long by 1.05m wide and 0.22m maximum depth. Underlies (1008).	Lower fill of [1014]. (1015) leached below [1014] into natural (1002).	
1016	1	Structure	Stone	Section of stone walling. Constructed of sandstone and occasional igneous stones which are between 0.55m by 0.43m and 0.2m - 0.18m by 0.15m in size. Random rubble/irregular shaped. Ranging from 1 to 3 courses high. NW-SE orientated. Whole structure is 0.4 to 0.63m wide, 4.07m long and 0.27 to 0.42m deep.	Section of walling sitting perpendicular to wall [1009]. Appears to have formed a boundary of some sort, likely post-medieval to modern in date.	A
1017	1	Deposit		Loose black silt layer comprised predominantly of charcoal inclusions. Full extent unknown as uncovered in slot through (1003). Measured roughly 1m long by 0.63m wide by 0.03m deep. Lens within spread (1105).	Possible burnt organic lens within spread (1105).	
1018	1	Fill		Loose dark grey/black silty clay with large stones and bone. Measured 0.34cm thick and 0.99m by 1.14m in extent. Fill of pit [1097].	Upper fill of pit [1097]. Presence of stones suggest it may be either a backfill or collapse deposit containing stones which have collapsed from the lining [1119].	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
1019	1	Deposit		Loose black coal fragments, silt and clay. Measured 0.27m by 0.29m by 0.03m thick.	Very small deposit which appears to have been debris filling a slight dip in spread (1132).	E
1020	1	Structure	Stone	Stone setting which was oval shape in plan; open at the centre. Full extent measured roughly 0.6m in length by 0.5m wide by 0.85m deep. Consisted of igneous stones ranging in size from 0.55m by 0.45m by 0.38m to 0.25m by 0.15m by 0.23m. Most seem to have rounded finishes while some are fairly rough and angular. 3 courses high and clay bonded. Lies within cut [1189]. Interior filled by (1190).	Stone setting within pit or possible posthole [1189].	
1021	1	Cut		Circular shaped in plan with vertical BOS, vertical sides and a flat horizontal base. Measured 0.2m wide, 0.3m long, 0.16m deep. Appeared to have been disturbed by an animal burrow on its south side. Filled by (1022).	Cut for possible posthole cut into base of pit [1012]. Uncertain if earlier feature truncated by pit or contemporary with it.	
1022	1	Fill		Very dark brown slightly compact sand, very similar to (1013) but with less frequent charcoal inclusions. Measured 0.2m wide by 0.3m long by 0.16m deep.	Fill of posthole [1021]. Could be the same as (1013) which filled pit [1012] overlying this feature.	
1023	1	Fill		Firmly compact grey to black silty clay with sand. Measured 1.25m long by 0.78m wide by 0.45m deep. Upper 0.27m of fill contains 50% clay, 40% silt, 10% sand. Lower c.0.18m contains 50% clay, 50% silt and 0% sand. Occasional lenses of mid brown sand, occasional charcoal up to 2cm. Contains occasional animal bone, burnt and unburnt. Lenses of pink burnt sand/clay in uppermost levels, and lens of mid brown clay in lower c.0.18m of deposit. Fill within [1125].	Fill of pit [1125].	H
1024	-	-		Voided	Voided	
1025	1	Fill		Lowest deposit within kiln [1011]. Loose/moderately compacted mixed mid-dark yellow brown sand with occasional charcoal flecks. Measured 0.15m deep at most and 1.15m long by 1.30m wide.	Basal deposit within kiln [1011]. Located under the central aspect of the kiln's construction. Possibly re-deposited natural used as a levelling deposit for the overlying structure.	B
1026	1	Fill		Moderately compact light yellow-brown sand. Measured 0.9m by 0.9m in extent and 0.05 - 0.09m deep. Located within	Wind blown sand within kiln/oven [1011].	B

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				kiln/oven [1011].		
1027	1	Fill		Moderately compact light reddish pink/yellow sand. Measured 0.8m by 0.8m in extent and 0.1 - 0.15m deep.	Heat affected sand within kiln/oven [1011] underlying stone lining [1031]. Possibly used as a levelling deposit for the stone lining above.	B
1028	1	Fill		Firmly compacted mid-light brownish grey clay. Measured 0.10m deep and 0.5m by 0.3m in extent. Fill within [1011].	Fill within cut for kiln/oven [1011].	B
1029	1	Fill		Firm dark blackish brown (mixed) silty sand with abundant charcoal and occasional stones and sandstone chunks. Measured 1.16m long by 0.6 - 0.9m wide and 0.13m deep. Located at S extent of the kiln feature within the narrower section.	Fill within kiln/oven [1011], possibly rake out material from clearing out the kiln/oven.	B
1030	1	Fill		Firmly compact light-mid greyish brown clay/sand with occasional small stones. Measured 0.6m by 0.3m and 0.03m deep. Located just north of the central portion of the kiln/oven [1011] in a gap within stone lining [1031].	Uppermost deposit located just north of the centre of kiln/oven [1011] within gap in stone lining [1031], likely sandstone deposit representing where stones may have once been.	B
1031	1	Structure	Stone	Sandstone lining remaining at base of kiln [1011]. The individual size of the stones measured from 0.15m by 0.13m by 0.1m deep, to 0.37m by 0.27m by 0.12m deep, though stones vary in size quite a bit. There are also smaller stones used for packing (0.05 by 0.05 by 0.05m). One course of stone remains (likely originally forming the base of the feature). Stones are sub-rounded and rectangular around the outer edge of the kiln. Shapes vary across the centre. The bonding material for the lining is possibly clay found within deposit (1030). The full dimensions of the remaining lining are 1.3m by 1.3m.	Stone lining remaining at base of kiln [1011]	B
1032	1	Cut		Linear shaped in plan (although only small section visible), sharp break of slope at top with the eastern edge having a gentle stepped slope, the western a sharp incline meeting at a rounded base. Measured 1.62m in length by 0.84m wide by 0.31m deep. Although runs outwith northeastern edge of excavated area. Runs on E-W alignment. Filled by (1007)	Cut of linear shaped feature. Possibly filled by tumble, may be modern in date.	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				and (1033). Lying in SE corner of trench, to the east of (1003).		
1033	1	Fill		Very compact brown black sandy clay with lots of small stone and charcoal inclusions. Measures 1.62m in length by 0.84m wide by 0.31m deep. Deposit directly below (1007).	Lower fill of [1032]. Appears to be associated with tumble (1007) and is mostly likely of modern date due to slate present in (1007).	
1034	-	-		Voided	Voided	
1035	1	Cut		Probably of circular shape in plan but true shape unknown as only half of the feature exposed within the excavated area. Measured 2m in length by minimum 0.84m wide (although extends further outwith the area to the SE) and 0.5m deep. Gentle break of slope at top with gently sloping sides, a gentle break of slope meeting a concave base. Filled by (1036) and (1204).	Cut of pit.	
1036	1	Fill		Medium compact dark brown silty sand with wood lining inclusions which are very thin at the bottom of (1036). Measured 2m in length by 0.84m wide and 0.3m thick maximum. Overlies fill (1204).	Upper fill of pit [1035].	
1037	1	Cut		Slightly irregular shaped oval with rounded corners, nearly vertical W side but the E side is more gradual. Undulating base. 0.35m deep by 1.2m wide by 1m long. Filled by (1038).	Cut for pit. Cuts pit [1044].	F
1038	1	Fill		Strongly compacted very dark brown/black sand with frequent charcoal inclusions, occasional fragments of wood and very friable bone. 0.35m deep by 1.02m wide by 1m long.	Fill of pit [1037].	F
1039	1	Structure	Stone	Section of stone walling which runs continuous with [1009] at its northeastern end. Greywacke/sandstone. Stones are 0.25m by 0.24m by 0.17m to 0.44m by 0.33m by 0.19m. They are sub-squared/ irregular/ rectangular rough rubble. SE-NW orientated. Yellow-brown lime mortar bonding. Measured between 0.6m and 0.66m wide by 4m long and 0.29 to 0.33m deep. One to two courses.	Section of stone walling continuing from NE end of wall [1009]. Appears to be a later addition to [1009] as constructed differently. Likely post-medieval to modern in date.	A
1040	1	Cut		Sub-circular/oval shaped cut in plan. Measured 1.30m by 1m	Cut of pit located at S extent of kiln	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				by 0.27cm deep. Gradual break of slope at top with gently sloping sides, a gradual break of slope at base and a slightly rounded base. Filled by (1041) and (1042). Truncated by kiln [1011] in particular, and by rake out area to S of kiln and deposit (1029). Cuts pit [1055].	[1011] which truncates it. Possible that this relates to an earlier phase of activity relating to this kiln.	
1041	1	Fill		Moderate mixed grey/blackish brown sand with occasional lumps of clay/charcoal. 0.27m deep by 1.30m by 1m.	Upper fill of pit cut [1040]	
1042	1	Fill		Moderate mixed reddish brown deposit with sand and occasional small stones. Extent measured 0.15m deep by 0.85m by 0.85m. Similar to sand (1157) at base of kiln [1116].	Lower fill of pit [1040]. Appears to have been heat affected and may relate to an earlier kiln or phase of use of [1011].	
1043	1	Structure	Stone	Section of stone walling. Formed of rounded boulders between 0.20m and 0.30m in diameter. Randomly laid in a line forming a single coursed wall. Orientated SW-NE without bonding. Measured 4m long by 0.4m wide and 0.15m deep. On same alignment as wall [1009]/[1039] and perpendicular to [1016]. Was only partially visible along the edge of the excavated area.	Section of walling only partially visible along the edge of the excavated area. Sits near to wall [1016] with which it may be associated. Likely post-medieval to modern in date.	A
1044	1	Cut		Rectangular with square corners, 1.65m long by 1.05m wide by 0.48m deep. Reasonably flat base but rises slightly towards the W side. Vertical sides. E-W aligned. Truncated by pit [1077] on N side and also truncated on south side by pit [1037].	Cut of pit. Has been cut by pits [1037] and [1077].	G
1045	1	Fill		Appears to be natural subsoil mixed with darker sand so it is a generally light brown, very loose fine sand that is heavily mottled with frequent dark brown lensing and bands. Occasional charcoal inclusions, 1.65m long by 1.05m wide by 48cm deep.	Fill of pit [1044], very similar to (1078) which fills pit [1077].	G
1046	1	Cut		Unclear shaped in plan, visible in section through pit [1055]. Measured 1m deep by 1m wide. Steep sides on the west, on the east sides are initially gently sloping but become steep. Sloping base which dips down to the SE. Filled by (1056). Appears to be a later cut through the fills of pit [1055].	Cut of possible pit which is a recut within pit [1055].	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
1047	-	-		Voided	Voided	
1048	1	Fill		Slightly compacted medium dark brown coarse sand with silt and occasional fragments of shale and broken red brick. Measured 0.25m N-S by 0.22m E-W. Fill of [1327]. Depth not known as feature not excavated.	Fill of possible posthole [1327].	D
1049	1	Spread		Fairly compact dark brown clay with some flecks of charcoal. Measured 0.03m deep. Appears to go under wall [1009] and measures approximately 3.4m in length and 0.9m wide from what can be seen.	Layer of built up material located in NW end of Area 1.	E
1050	-	-		Voided	Voided	
1051	-	-		Voided	Voided	
1052	1	Cut		Oval shaped cut in plane measuring 0.7m by 0.4m and up to 0.12m deep. Sloping sides with a flat base. NW-SE orientation. More of a scoop really, filled by large flat stones [1195] and levelling material (1192).	Cut/scoop of possible post pad containing large stones [1195] and levelling material (1192).	
1053	-	-		Voided	Voided	
1054	-	-		Voided	Voided	
1055	1	Cut		Circular shaped cut in plan. Measured 2.1m in diameter by 1.15m deep. Gradual break of slope at top with steep sides, gradual break of slope at base and a flat base. Truncated by possible cut [1046], which sat within the interior, and pit [1040] on its SE side. Filled by (1070), (1071), (1072), (1073), (1085), (1098), (1099) and (1100).	Cut of large pit with a number of deposits caused by silting/tipping from the East. Likely relates to the possible oven/kiln [1011] to the direct NW. Possible pit dug for water?	
1056	1	Fill		Moderate to firm mid to light greyish brown silt/sand with frequent charcoal and occasional medium stones. Measured 1m thick by 1m wide at top, 0.20 - 0.30m wide at base.	Single deposit within [1046]	
1057	-	-		Voided	Voided	
1058	-	-		Voided	Voided	
1059	1	Fill		Moderately compacted brown friable silty sand with charcoal. Measured 1.13m wide by 1.68m long 0.22m deep. Of E-W	Upper fill of pit [1207].	H

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				alignment.		
1060	-	-		Voided	Voided	
1061	1	Cut		Shape in plan is oval towards eastern edge but becomes unclear towards west. Measured 2.2m wide by approximately 3m by 1.45m deep. Abrupt break of slope at top with nearly vertical sides, a semi-abrupt break of slope at the base which meets a flat base. Lies along the SE edge of area 1. Filled by (1062), (1280), (1281), (1282) and (1289). Some of the fill comprises redeposited natural subsoil which in sections makes the sides of the cut indistinguishable from the surrounding subsoil.	Cut of pit of probably medieval date.	
1062	1	Fill		Firmly compacted brown grey sandy clay with some moderate charcoal flecks and stone inclusions of varying size. Measured 2.2m long by 2.28m wide by 0.3m deep. Overlies (1280), (1281), (1282) and (1289).	Upper fill of pit [1061] which is likely of medieval date.	
1063	-	-		Voided	Voided	
1064	1	Cut		Sub-circular in plan. Measured up to 0.9m long by 0.9m wide by 0.40m deep. Abrupt break of slope at top with nearly vertical sides and a gradual break of slope meeting a rounded base. Filled by (1201).	Cut of pit.	
1065	1	Cut		Oval shape in plan with gently sloping sides which are steeper towards the top of the pit. Measures 2.38m long by 1.4m wide by 0.39m. Break of slope at top is sharp with steep sides and a gentle break of slope at the bottom which meets a rounded base. NE-SW orientated. Filled by (1170).	Cut of pit which is probably of medieval date.	
1066	1	Fill		Fill of medium compaction mid-brown silt with stone and charcoal inclusions which measure between 4-5cm wide and small stones. Measured 0.46m long by .0.26m by 0.1m deep.	Fill of possible posthole [1203].	
1067	-	-		Voided	Voided	
1068	1	Cut		Roughly circular in shape with a gentle break of slope at top with steeply sloping sides which reach a relatively flat base. Measured 1.62m long by 1.24m wide by 0.55m deep. Been	Cut of pit.	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				truncated by a modern rubbish pit. Filled by (1212).		
1069	1	Cut/Fill		Oval shape in plan measuring 5.4m long by 3.5m wide by 2m deep (maximum). Filled by a fairly compact dark brown silty clay with frequent small - medium sized stones. The deposit contained a mixture of modern and older finds which had been re-deposited from disturbance in the surrounding area.	Cut and fill of large modern pit, likely 20th century in date.	
1070	1	Fill		Moderately to firmly compact mid to dark greyish brown sand with occasional degraded bone and frequent charcoal. 0.7m deep by 0.9m diameter.	Fill within pit [1055]. Appears to have been tipped from the E extent of pit.	
1071	1	Fill		Firmly compact mixed light pale orange brown clay and sand with occasional burnt bone and frequent charcoal. 0.1m deep by 0.65m in diameter.	Clay rich fill of large pit [1055] which appears to have been tipped from the E extent of the pit. Truncated by [1046].	
1072	1	Fill		Firmly compact dark blackish brown clay/silt and sand with occasional charcoal and degraded bone. Measured 0.1m deep by 0.75m in diameter.	Fill within pit [1055]. Appears to have been tipped from E edge of extent of pit [1055]. Truncated by [1046].	
1073	1	Fill		Moderate to firmly compact mid to dark blackish brown clay/silty with frequent charcoal. 0.05m thick and 0.45m in diameter.	Uppermost deposit in pit [1055]. Appears to have been topped from the E sloping down from right to left. Truncated by [1046].	
1074	-	-		Voided	Voided	
1075	1	Fill		Loose black dark grey silty clay with stone, charcoal and coal inclusions. Measured 0.21m thick by 1.2m by 0.79m.	Fill of pit [1076].	
1076	1	Cut		Sub-circular shaped in plan. Measured 1.26m by 0.79m by 0.21m. Convex sides and a rounded base. N-S orientated. Filled by (1075).	Cut of pit.	
1077	1	Cut		Roughly oval shaped. 0.7m long by 0.7m wide by 0.25m deep. Undulating bottom with a gradual slope on the S side but almost vertical N side. NE-SW aligned. Cuts into larger pit [1044]. Filled by (1078).	Cut of pit. Cuts pit [1044].	G
1078	1	Fill		Generally light brown, very loose sand with occasional (roughly 1%) charcoal pieces around 1cm in size. Very heavily mottled with frequent dark brown bands and black	Fill of pit [1077].	G

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				lensing. Appears to be re-deposited natural mixed with darker sand. 0.7m long by 0.7m wide by 0.25m deep		
1079	1	Cut		Circular shaped in plan measuring 0.25m long, 0.3m wide and 0.05m deep. Gradually sloping sides and even base. Truncates (1045) although also possible it was deposited within it and contemporary with this pit. Filled by (1080).	Cut for possible posthole. Cuts (1045) and (1080).	
1080	1	Fill		Very loose, light brown/yellow sand. Measured 25cm by 30cm by 5cm deep in extent.	Fill of possible posthole [1079]. Appears to be redeposited natural.	
1081	-	-		Voided	Voided	
1082	-	-		Voided	Voided	
1083	-	-		Voided	Voided	
1084	-	-		Voided	Voided	
1085	1	Fill		Firm light to mid greyish brown sand, slightly silt, with occasional charcoal and degraded bone. Measured 0.2m thick by 0.9m diameter.	Fill within pit [1055]. Appears to have been tipped from the E extent of pit [1055]. Truncated by [1046] and by pit [1040].	
1086	-	-		Voided	Voided	
1087	-	-		Voided	Voided	
1088	-	-		Voided	Voided	
1089	1	Spread		Loose light brown yellow sand with coal fragments. Only present as a small patch sitting within (1132).	Patch of sand sitting within (1132), likely to be windblown.	E
1090	-	-		Voided	Voided	
1091	1	Deposit		Moderately compact mid to dark brown clayey sand with frequent charcoal fleck and occasional medium sized stone inclusions. Same as (2002) but extending into NE end of Area 1. Extent of deposit within Area 1 measures approx. 2.8m NE-SW by 6.6m NW-SE.	Possible medieval soil horizon.	
1092	1	Structure	Stone	Stone wall at northeast end of Area 1. Stone was a mix of sandstones and granites. Largest stone is 0.6m by 0.5m, smallest was 0.2m by 0.2m. Naturally rounded, a couple of	Section of stone walling. Likely post-medieval to modern in date.	A

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				stones finished. At NE facing side, there is one coursing of large stones. At SW facing side there are 3 courses of small stones/rubble. Linear in shape. NE-SW orientated. Dry stone with partial clay bonding. Whole wall measures 2m long by 0.9m wide and 0.4m high.		
1093	1	Deposit		Loosely compact mid-brown silty sand. Measured 2m long by 0.9m wide and 0.4m deep.	Spread surrounding and overlying parts of wall [1092].	
1094	1	Cut		Circular shaped in plan. Measured 0.25m wide by roughly 0.25m long by 0.29m deep. Rounded bottom with vertical sides. Filled by (1095).	Cut of possible posthole. Possibly contemporary with [1012] as their fills are similar.	
1095	1	Fill		Loosely compacted with silty sand with occasional charcoal inclusions around 1cm in size. 0.25m by 0.25m by 0.29m deep. Similar to (1013).	Fill of posthole [1094]. Similar to (1013), fill of [1012].	
1096	1	Structure	Timber	Loose mid brown/yellow silt/clay silt with animal bone. Measured 0.92m long by 0.8m wide by 0.17m deep. Underlies (1018) and overlies [1019].	Possible remains of a wooden lining at the base of [1097]. May have been there to give extra support to ensure no liquid percolated out of the stone lining at the base. This is assuming that [1097] is a pit for holding water.	
1097	1	Cut		Sub-circular (oval) shaped in plan. Measured 0.99m by 1.14m and 0.51m deep. Vertical sides and flat base. E-W orientated. Base and sides were stone lined [1019] which were set into clay (1120) and interior filled by (1096) and (1018). Stone lining at the base extends under the lining at the sides indicating that the pit cut was made first then stones placed at the base then the sides. Evidence of a possible wooden lining at base (1096) possibly put in after the stone lining.	Cut of stone-lined pit. Uncertain function but possibly for holding water or liquid of some kind.	
1098	1	Fill		Moderate to loose light to mid yellowish brown sand with occasional charcoal flecks. Measured 0.35m at thickest by 1.30m.	Fill within pit [1055]. Whereas the other fills of [1055] - (1070), (1071), (1072), (1073) and (1085) - appear to have been placed or tipped, (1098) has likely silted up naturally possibly as a result of pit being left open.	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
1099	1	Fill		Moderate to loose dark greyish brown sand with occasional charcoal flecks. Measured 0.10m by 1.40m	Fill within pit [1055]. Has likely been tipped from E extent of trench	
1100	1	Fill		Moderately compact mixed orange brown sandy silt with occasional clay, small stones and charcoal flecks. Measured up to 0.30m thick and 1.55m in diameter.	Lowest fill within pit [1055]. Possibly formed through natural silting as a result of pit being left open.	
1101	1	Fill		Loose yellow/light brown sandy lime mortar with snail shells (in sample). Measured 0.18m maximum depth in W-facing section of slot 2. Measured 2.8m by 2.9m in extent. Contained a fragment of 19th century clay tobacco pipe and sherds of greyware. Fill of [1144].	Fill of [1144].	
1102	1	Deposit		Very loose light to mid brown sand with frequent charcoal. Measured approximately 4-5m N-S by approximately 5.4m E-W, and approximately 0.3 to 0.4m deep.	Layer of built up material in northern corner of Area 1. Could possibly be a continuation of buried soil (2002) into Area 1.	E
1103	1	Fill		Very compact mixed grey orange and black silty clay with degraded charcoal and frequent sandstone inclusions (which are 100mm by 100mm and highly degraded also). Thickness varied from 0.20m to 0.27m and measured 1m diameter in plan.	Upper fill of kiln/oven [1116] overlying (1118) with some possible tumble inclusions.	B
1104	1	Deposit		Stone deposit lying west of (1009) in SW area of Area 1. Comprised of mostly smallish stones (10cm by 10cm by 4cm) alongside a small amount of larger stones (49cm by 44cm by 8cm). The stones curve slightly to suggest a possible circular feature. Lies underneath possible tumble from (1009) at the southeastern. Full extent 2.6m by 1.55m by 0.4m.	Possible floor surface adjacent to kiln/oven [1116]. (1109) lies within (1104) which may support the idea of it being a floor surface. Relationship and sequencing with [1116] and [1009] uncertain as appears to respect and curve round location of [1116] but uncertain if this is deliberate, or whether it's an earlier feature cut by the insertion of [1116].	C
1105	1	Deposit		Mixed deposit of red and grey slightly silty clay with a small number of charcoal and small stone inclusions. Measured approximately 2.9m long by 1.56m wide by 0.34m deep. There was a large amount of heat affected sand underlying this spread suggests this was an area of burning. Overlies	Spread underlying deposit (1004) which underlies wall [1003].	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				[1122]. Contains lens of (1017).		
1106	1	Fill		Loose to moderate compacted light brown sand mixed with a large amount of grey mortar-like material. Measured roughly 0.88m long by 0.46m wide by 0.38m deep.	Fill of [1122].	
1107	1	Fill		Moderately compacted black silty sand with frequent carbonised wood and charcoal. Included possible seeds. Thickness varies from 0.2m to 0.3m. Contains rubble from stone lining [1108]. In plan it measured 0.6m by 0.5m.	Fill of [1116]. Burnt deposit from section which may have been the flue or rake-out from the main part of feature.	B
1108	1	Structure	Stone	Stone lining remaining at base of kiln [1116]. Rounded/varied pink sandstone. Size varies. Large flat stones on base of cut and rounded stones packed into (1117) clay bonding/lining at the sides. Flat stones found at flue-end but do not extend into the flue itself (only tumble). Full extent measures 2.5m long by 2m wide by 0.4m deep.	Stone lining remaining at base of kiln [1116]	B
1109	1	Deposit		Two flat stone slabs lying to the E of kiln [1116] appearing to lie within extent of (1104). NE-SW alignment. One measured 42cm by 33cm by 4cm, while the other 37cm by 29cm by 3cm. May be heat affected as they each have a two tone effect going from black grey to light red.	May relate to stones (1104) as they lie within them. May also relate to kiln [1116]. Could possibly be part of a flat surface surrounding [1116].	C
1110	1	Deposit		Large stone deposit lying W of (1009) and [1116]. Comprised of stones ranging in size from 0.08m by 0.05m by 0.05m to 0.4m by 0.18 by 0.03m. Full extent measures 2.35m by 1.6m. Fill surrounding stones seems to be comprised of gravel and silt.	Possible flat surface or could be a layer of tumble (maybe from [1009]) spread across an area.	C
1111	-	-		Voided	Voided	
1112	1	Cut		Circular shaped cut in plan. Measured 48cm by 50cm in plan. Depth unknown as not fully excavated. The larger part of a double posthole along with [1114]. It is unknown which cuts the other but they appear to be contemporary. Filled by (1113).	Cut of possible posthole. Not excavated, may be modern.	
1113	1	Fill		Dark brown, loosely compact fine sand with occasional charcoal flecks and light brown lensing which may represent possibly windblown natural (1002). Extent measures 0.48m	Fill of possible posthole [1112]. Date unknown but possibly modern.	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				by 0.5m. Depth unknown as has not been fully excavated. Some degraded bone found at the top of this fill.		
1114	1	Cut		Circular shaped cut in plan. Measured 0.29m by 0.27m in plan. Not fully excavated so depth unknown. Possibly contemporary with [1112] as it is the smaller part of a double posthole with [1112]. Filled by (1115).	Cut of possible posthole. Not excavated, may be modern.	
1115	1	Fill		Light brown loosely compacted fine sand with frequent small stone inclusions (1-2cm wide) and a thin dark brown band around the outside. Measured 0.29m by 0.27m. Depth unknown as not fully excavated.	Fill of possible posthole [1114]. Date unknown but possibly modern.	
1116	1	Cut		Cut of kiln/oven filled by (1103), (1107), (1117), (1118), (1155), (1156), (1157), and remains of stone lining [1108]. Keyhole shaped in plan. Orientated with narrow end pointing NNW. Measured 2.6m long by 1.9m (at its widest) and 0.3 - 0.5m deep. Narrow section measured 0.65m long by 0.55m wide by 0.2m deep. Had shallow sloping sides to a flattened base. Overlain by wall [1009] which was constructed directly over its SE edge. Also possible associated stake hole [1160] sitting just to north of its edge.	Cut of possible kiln/oven. The narrow section to the NNW was possibly either the location of a flue or acted as a rake out area for cleaning out the kiln/oven after use. Wall [1009] constructed directly over the top of it along its southern end. If seeds are recovered from (1107), may suggest it was a corn drying kiln.	B
1117	1	Fill		Clay lining of kiln [1116]. Very compact light yellowish grey clay with few small stone inclusions. Varies from very thin 20 - 50mm at the flue to substantial 150 - 200 mm at the back of the kiln, for stone lining. Concentrated at upper limits of the sides of [1116], supposedly for support of subsoil or for the inlay of the side stones in the sand. It is not found beneath the stones [1108] at the bottom of the kiln - these stones lie directly on sand (1157).	Deposit underlying stone lining at sides of cut [1116], possibly used to set stones into the edge.	B
1118	1	Fill		Lower fill of [1116]. Moderately compact black silty sand with frequent charcoal and carbonised wood. Few small stony inclusions and small 20mm by 10mm "pods" of clay. On average it measured 50mm thick by 1.2m diameter. Covers/infills lower extent of the kiln above the stone lining [1108]. Contains very slight striations/tip-like lines towards rake off/flue-end.	Lower fill of kiln/oven [1116] overlying stone lining [1108] showing evidence of burning <i>in situ</i> .	B

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
1119	1	Structure	Stone	Sandstone lining covering base and sides of pit [1097]. Stones measure an average individual size of 10cm by 16cm by 12cm and were sub-angular and sub-rounded in shape. Compact and bonded with clay deposit (1120) at sides and base of pit. Thickness varies between 0.15m and 0.45cm.	Sandstone lining covering base and sides of pit [1097]. Some of the stone lining may have collapsed as stones were found in fill (1018).	
1120	1	Fill		Clay bonding in pit [1097]. Firmly compact light grey with a blue/yellow hue. Varying up to 10cm thick, and 1.26cm by 1.11cm in extent. Sits under the base of stone lining [1119] and in between the stones which formed the sides.	Clay bonding around underlying base and surrounding sides of stone lining [1119] in pit [1197].	
1121	-	-		Voided - duplication	Voided - duplication	
1122	1	Cut		Linear shaped feature measuring 0.88m long by 0.48m wide by 0.38m deep. Has a sharp break of slope with steep sides which curve at the bottom, creating a slightly curved bottom. Runs on an ESE/WNW alignment. Underlies (1105). Filled by (1106).	Cut of linear feature filled with possible construction material. Lies underneath (1105).	
1123	1	Cut		Linear cut which lies in SW corner of Area 1, orientated SW-NE. Steep sided with a slightly rounded bottom. Measured 1.03m wide by 0.4m deep. The visible length of the feature is 1.3m but has been cut by [1055] at its SW end and obscured by (1010) at its NE end. Filled by (1152). Also cut by smaller feature [1151] along its NW edge at the NE end.	Linear feature which may represent a continuation of the cut for wall (1009) but has been obscured by (1010) at its NE end.	
1124	1	Deposit		Fairly compact light-mid brown clay-silt with infrequent charcoal inclusions. Measured approximately 0.19 to 0.23m deep approx. but varied across extent. Extends across southwest corner of Area 1, approximately 6.5m by 7m. May be same as (1132).	Layer of built up material at NW end of Area 1.	E
1125	1	Cut		Oval shape in plan measuring 1.25m long by 0.78m wide by 0.45m deep. Abrupt break of slope at the top. Sides on NE are steep, near vertical and sides on NW are steep. Both sides have a gradual break of slope at base which meet at a rounded undulating base. ENE-WSW orientated. Filled by (1023). Cuts fill of pit [1150]	Cut of pit which cuts pit [1150].	H
1126	1	Fill		Moderately compact dark grey brown clayey silt with sand (40% clay, 50% silt, 10% sand). Frequent charcoal up to 6cm	Upper fill of pit [1127].	H

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				in size, but generally less than 2cm. Occasional stones up to 10cm with rounded stones. Measured 0.8m long by 0.7m wide by 0.23m deep. Overlies (1128).		
1127	1	Cut		Oval shape in plan measuring 0.8m long by 0.7m wide by 0.3m deep. Abrupt break of slope at top, sloping sides, gradual break of slope at bottom which meets a rounded base. ENE - WSW orientated. Filled by (1126) and (1128). Cut into existing pit [1143] and [1146]. Cuts pit [1143].	Cut of pit feature. Cuts pit [1143].	H
1128	1	Fill		Moderately compact dark brown clayey silt (30%-70%) with rounded stones up to 70cm, occasional charcoal up to 3cm and occasional burnt bone less than 1cm. Measured 0.8m long by 0.33m wide by 0.1m deep maximum. Only appears in West end of [1127]. Underlies (1126).	Basal fill of pit [1127].	H
1129	1	Fill		Firmly compacted dark grey clay with small stones 1-5cm which encompass less than 1%, and charcoal between 1-5%. Measured 3.84m long by 3.8m wide by 0.23m deep. Has a windblown sand deposit (1136) lying on top across its northern half.	Fill of pit [1287] - most likely backfill	
1130	-	-		Voided	Voided	
1131	1	Fill		Soft-moderately compact mid-dark brown silty sand which is 10% silt and 90% sand. Measured 1.6m long by 0.95m wide by 0.12m. Cut by pit [1125].	Fill of pit [1150] - possibly redeposited natural. Cut by pit [1125].	H
1132	1	Spread		Loose dark brown/red-grey silty clay with coal and charcoal. Approximately 0.24m deep. Extends across NW side of site and underneath walls (1009), (1016) and (1039). Full extent measures approximately 18.5m by 7.7m. May be same as (1124).	Layer of built up material in NW end of Area 1.	E
1133	1	Cut		Sub-rectangular in plan with rounded corners measuring 0.52m long by 0.3m wide by 0.14m deep. Sharp break of slope at top with the NW side, sloping gently to a rounded bottom and the SE sloping steeply to the bottom. Filled by (1134). Cuts into spread (1129) and underlies (1136).	Cut of small modern pit, possibly 18th or 19th century in date.	
1134	1	Fill		Mixed fill layer with a black charcoal spread at the top	Fill of small pit [1133].	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				alongside a small deposit of loose white mortar. The remainder of the fill is a moderately compact dark brown silty clay. Measured 0.52m long by 0.3m wide by 0.14m deep. The black deposit measured 0.52m long 0.25m wide by 0.02m maximum depth. Underlies (1136).		
1135	1	Fill		Moderate to firmly compact dark red brown clayey sand (40% - 60%). Measured 0.80m long by 0.76m wide by 0.29m deep. Rare rounded stone up to 7cm with occasional fragments of unburnt animal bone.	Fill of pit [1143].	H
1136	1	Deposit		Loosely compact light brown/orange sand measuring 2.7m long by 1.4m wide and 0.05m deep maximum. Contains some small charcoal inclusions. Depth is about 5cm max. by 27cm by 1.4m. Fills undulation within spread (1129).	Windblown sand deposit overlying (1129).	
1137	1	Cut		Rectangular in plan with rounded corners measuring roughly 1.37m long by 0.86m wide by 0.34m deep. Sharp break of slope with steep sides which meet towards a relatively flat bottom. The bottom half is indeterminate due to burrowing. Filled by (1138). Cut into (1129) and [1141].	Cut of pit of uncertain date.	
1138	1	Fill		Loose brown silty sand with a large amount of charcoal throughout. Measured roughly 1.37m long by 0.86m wide by 0.34m deep.	Fill of [1137].	
1139	1	Deposit		Firmly compact light brown clay/silt with a small number of charcoal inclusions measuring roughly 1.3m long by 0.05m. Full extent unknown as it was uncovered in section through (1123). Underlies (1124), cut by [1123].	Spread of deposit - lens within deposits built up over NW end of area.	E
1140	1	Fill		Moderately compact mixed/mottled dark brown black silty sand with 60% clay and 40% sand. In the NE where [1146] side has collapsed the fill became much more mixed rather than banded/mottled. Feature has been truncated by [1143].	Fill of [1146]. Deposit is similar to (1023) which fills adjacent cut [1125].	H
1141	1	Cut		Was circular shape in plan measuring roughly 0.46m long by 0.43m wide by 0.21m deep. Gentle break of slope with gently curving sides, the bottom is also slightly unclear and may be stepped. The only side that showed the cut lies on the NE	Cut of possible posthole or pit feature. The faint stepping of the feature may suggest it was a posthole.	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				side as the other was truncated by [1137]. Filled by (1142)		
1142	1	Fill		Loose very light sand deposit with a small number of charcoal inclusions and very small clumps of grey clay. Measures roughly 0.46m by 0.43m by 0.21m. Been cut by [1137].	Fill of [1141].	
1143	1	Cut		Oval shape in plan measuring 0.80m long by 0.76m wide by 0.29m wide. Abrupt break of slope at top with gently sloping sides, gradual break of slope at base which meets a rounded base. NE-SW orientated. Cuts into [1146] and then is truncated by [1127]. Filled by (1135).	Cut of pit perhaps used for domestic waste. Cuts into pit [1146] and is truncated by pit [1127].	H
1144	1	Cut		Curvilinear shaped feature in plan forming a U-shape. Measured 7m along length but curved so that extent covered an area measuring 2.8m by 1.9m. Measured 0.18m maximum depth (as revealed in Slot 2). Near vertical sides and a flat base. E-W orientated but curving to the north. Filled by (1101).	Cut of curvilinear feature which may have represented the foundations of a curved wall. Fragment of clay tobacco pipe within the fill suggests a possible date of 19th century.	
1145	-	-		Voided - Re-numbered [1285] (1279)	Voided	
1146	1	Cut		Probably originally sub-circular in plan but collapse in NE makes it look irregular in plan. Measured 1.4m long by 1.1m wide by 0.44m deep. Abrupt break of slope at top with sides gently sloping at W side of pit and nearly vertical at the East, although collapse at NE masks exact profile of side at that point. Gradual to abrupt break of slope at base meeting a flat bottom. NE-SW orientated. Filled by (1140). Cuts fill of possible pit [1162], and is cut by pit [1143].	Cut of pit which appears to cut possible pit [1162] and is cut by pit [1143].	H
1147	1	Deposit		Firm dark brown silty clay with a small number of charcoal inclusions throughout. Seen in section through feature [1123] so full extent is unknown. In section measures 1.34m long by 0.12m deep. Underlies (1139) and cut by [1123].	Spread of deposit - lens within deposits built up over NW end of area.	E
1148	1	Deposit		Loose mottled brown orange sand. Appears in small patches in southwestern corner of Area 1 sitting within (1124).	Layer of built up material in NW end of Area 1.	E
1149	1	Fill		Firm light grey clay. Measured approximately 0.62m by 0.4m by 0.23m.	Fill of linear feature [1151]. Cut into NW edge of [1123].	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
1150	1	Cut		Sub-rectangular in plan with rounded edges measuring 1.6m long by 0.95m wide by 0.55m deep. Abrupt break of slope at top with abrupt sides and abrupt break of slope at bottom which meets a flat base. NE-SW orientated. Slightly truncated at W side by service trench. Filled by (1131). Cut by pit [1125] and appears to cut possible pit [1162]. Difficult to determine relationship between [1146] and [1150].	Cut of pit, which appears to cut earlier pit [1162] and is cut by later pit [1125].	H
1151	1	Cut		Linear shaped feature in plan running NE - SW. Measured 0.6m by 0.23m by 0.39m but obscured by (1010) at its northeastern end. Sharp break of slope with steep sides with rounded break of slope at base and a slightly rounded base. Filled by (1149). Cut into NW edge of linear feature [1123] at its NE end.	Cut of short linear feature cut into NW side of feature [1123].	
1152	1	Fill		Very firm dark brown black silty clay with a small number of charcoal inclusions. Measured 1.03m wide by 0.40m deep. The visible length of the feature is 1.3m.	Fill of linear feature [1123].	
1153	1	Deposit		Firm light brown sandy silt with no inclusions. Uncovered in section so full extent unknown but measures 0.16m long by 0.05m deep. Underlies spread (1148).	Redeposited natural, possibly lens through (1148) - part of deposits built up over NW end of area.	E
1154	1	Deposit		Firm dark brown/black silty clay with a small number of charcoal inclusions throughout. Full extent unknown but measures 1.17m long by 0.1m deep in section. Underlies (1148).	Spread of deposit - lens within deposits built up over NW end of area.	E
1155	1	Fill		Very compact mixed red pink and grey stony deposit with small mixed stone inclusions. Extent measured 1m long by 0.15m wide by 0.15m deep, only found in a small portion along the southern edge of cut [1116]. Possibly mixed with clay lining fill (1117).	Stoney deposit along southern edge of kiln [1116]. Possibly same as [1108] but much more degraded.	B
1156	1	Fill		Black vitrified layer on surface of stone lining [1108] in kiln [1116]. Very compact stone and charcoal. No inclusions. Measured 20-30mm thick and covered area of 0.8m by 0.45m in centre of feature.	Vitrified layer on surface of stone lining [1108] in kiln [1116]. Likely a working surface built up over repeated use of kiln/oven [1116].	B
1157	1	Fill		Loosely compacted red/pink sand with charcoal flecks. Some anthropic evidence - bone and possibly fragments of slag	Redeposited natural forming basal deposit in kiln/oven [1116]. Possible	B

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				recovered. Thought to be natural subsoil but likely re-deposited from elsewhere. Kiln [1116] constructed into/over this deposit, burning it over time. Deposit extends under working surface of kiln [1108] stones. Measured 2m in diameter and maximum by 80 to 100mm thick.	packing for stone lining [1108] which overlies. Appears to have been burnt <i>in situ</i> by kiln/oven workings.	
1158	1	Deposit		Firm dark brown silty clay with a small number of charcoal inclusions. Full extent unknown but seen in section and measures 0.69m by 0.06m thick. Could be the same as (1152), fill of [1123]. Been cut by [1055].	Spread of deposit - lens within deposits built up over NW end of area.	E
1159	1	Deposit		Comprised of mottled brown/red/orange silty sand with a small number of charcoal inclusions. Full extent unknown. Likely same as (1148).	Spread of deposit - lens within deposits built up over NW end of area.	E
1160	1	Cut		Circular in plan measuring 0.08m in diameter by 0.12m deep. Vertical sides which meet a rounded base. Filled by (1161).	Cut of stakehole to NE of kiln/oven [1116].	
1161	1	Fill		Wooden stake <i>in situ</i> surrounded by mid brown silty sand measuring 0.08m in diameter by 0.12m deep. Reddened stake possibly suggests burning in the area.	Fill of stakehole [1160].	
1162	1	Cut		Irregular shaped cut in plan, measuring 1m long by 0.24m wide by 0.17m - 0.39m deep. Gradual break of slope at top with gently sloping sides and a gradual break of slope at base. Little of the base survives but appears to have been rounded. Filled by (1163). Heavily truncated by pits [1146] and [1150] at E and W respectively.	Possible cut of pit which has been cut by later pits [1146] and [1150]. Uncertain if definite feature as has been badly truncated by later pits but appears likely to be.	H
1163	1	Fill		Firmly compacted mid-dark brown silty sand (around 50% silt and 50% sand). Measures roughly 1m long by 0.24m - 0.5m wide by 0.39m deep. Heavily truncated by pits [1146] and [1150].	Fill of possible pit [1162].	H
1164	1	Deposit		Mixed deposit of very loose black charcoal and very compact beige silty sand. Full extent unknown as discovered during excavation of (1105). Measured about 0.66m long by 0.5m wide by 0.19m deep. Underlies (1105).	Small deposit of burnt material underlying spread (1105) and likely relating to it.	
1165	1	Cut		Circular shaped feature in plan measuring 0.33m in diameter. Not fully excavated so depth not known. Sits adjacent to pits	Cut of possible posthole. Not excavated so date unknown but does not appear to	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				[1077] and [1044] in W corner of area 1. Filled by (1166).	form part of a structure.	
1166	1	Fill		Compact dark brown silty clay with moderate charcoal flecks and some small sub-angular / sub-rounded stone inclusions. Measuring roughly 0.34m in diameter. Unknown depth as feature not excavated	Fill of possible posthole [1165]. Not excavated so date unknown.	
1167	1	Deposit		Moderately compact dark grey silty sand (10% silt and 90% sand). Moderate, small (less than 1cm) rounded stones, same as modern "pea gravel", frequent charcoal flecks and occasional charcoal lumps less than 2cm. Measures roughly 2.5m wide by 6m in length by 0.07m - 0.1m deep. Underlies and is amongst stones of wall [1003]. Same as (1004).	Deposit of material, same as (1004) - duplicate number.	
1168	1	Fill		Loose to moderately compact mixed mid-brown/dark-brown silty sand mixed with some dark brown clay. Moderate charcoal lumps/flecks (less than 2cm). Measured approximately 1.45m long by 1.15m wide by 0.2m deep. Overlies (1297).	Upper fill of [1181].	
1169	-	-		Voided	Voided	
1170	1	Fill		Moderately to loosely compact dark brown sandy clay with flecks of charcoal. Measured 2.27m long by 1.31m wide by 0.51m deep.	Fill of pit [1065].	
1171	1	Deposit		Hard compacted, mid-grey gritty clayey silt (30% clay and 70% silt) with frequent charcoal and occasional stones up to 10cm. Measures roughly 2.3m long by around 0.8m wide by 0.02m deep. Overlies [1181].	Thin spread overlying pit [1181] to north of wall [1003].	
1172	1	Fill		Loosely compacted dark brown/dark grey silty sand with low frequency of charcoal and small fragments of bones. Measured 1.2m long by 1.13m wide by 0.25m deep. Overlies (1202).	Secondary fill of pit [1197].	
1173	1	Cut		Oval shaped in plan measuring 0.54m long by 0.41m wide by 0.39m deep. Sharp break of slope at top with steep sides, rounded break of slope at base which meets a rounded base. Filled by (1174).	Cut of possible posthole, of possibly modern date.	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
1174	1	Fill		Moderately to loosely compact pale grey grubby/sandy mortar with fine gravel. Small to medium sized stone inclusions. Measured 0.54m long by 0.41m wide by 0.39m deep.	Fill of posthole [1173]. Possibly a modern mortar fill.	
1175	1	Deposit		Mixed deposit that has accumulated abutting stones (1180). Comprised very compact dark red-brown-dark grey mixture of silty clay (which is the dark red brown component) and gritty sand (which is the dark grey component). Contains occasional charcoal lumps around 1cm, patches of reddened clay which is still pliable, occasional stones, rounded, up to 3cm, occasional small lumps of possible smashed and poorly fired brick - red in colour and less than 1cm. Full extent unknown as was taken off prior to excavation but the remains measure roughly 0.8m long by 0.5m wide by 0.16m deep. May relate to (1171) or (1180).	Layer of material built up near to stone (1180).	
1176	1	Deposit		Loose, black very silty/probably organic material. Charcoal rich. Measured roughly 1.5m in diameter by 0.09m deep. Overlies deposit (1177).	Spread of material sitting in NW end of Area 1.	
1177	1	Deposit		Loose, black slag deposit with frequent coal measuring 1m long by 0.4m wide by 0.08m deep. Overlies (1124) and (1132). Underlies spread (1176).	Spread of material sitting in NW end of Area 1.	
1178	1	Deposit		Loose, grey, with several fragments of lime stone. Measured 0.04m deep by 0.65m E-W by 1m N-S.	Deposit of mortar/lime contained at NW side of cut [1198] and overlying feature [1311]. Lime shell mortar deposit possibly connected to industrial activities in surrounding spreads and deposits.	
1179	1	Deposit		Firm black/maroon slightly silty clay with charcoal and small number of small stones and a few large clumps of slag. Measured 1.53m long by 0.7m wide and 0.1m deep. Underlies (1178) and lies within (1183) and (1182).	Deposit of possible industrial residue - lens within deposits built up over NW end of area.	E
1180	1	Structure	Stone	Arrangement of large rounded boulders - consists of 5 large stones, largest of which is 0.54m by 0.44m by 0.4m, others a little smaller. Overall size of arrangement measures 1.4m	Group of stones which may relate to structure (1003) -perhaps post packing area.	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				long by 1.2m wide by 0.44 deep. Central area contains smaller stones (up to 20cm) looks similar to packing for posts.		
1181	1	Cut		Linear/rectilinear shape in plan with rounded corners measuring 1.45m long by 1.15m wide by 0.75m deep. Abrupt break of slope at top with steep sides, gradual break of slope at base and a rounded base. E-W orientated. Filled by (1168) and (1297).	Cut of linear feature of possible medieval date.	
1182	1	Deposit		Loose to mid/light brown silty sand with no inclusions. Full extent unknown, seen in section, measures 0.4m wide by 0.33m deep.	Spread of deposit - lens within deposits built up over NW end of area.	E
1183	1	Deposit		Loose mottled orange/yellow/brown sand with a small number of charcoal inclusions. Full extent unknown as uncovered in slot through (1010). Same as (1148) - see for full description. Underlies (1124).	Spread of deposit - lens within deposits built up over NW end of area. Same as (1148).	E
1184	1	Deposit		Linear stone feature, NW-SE aligned lying in the W corner of Area 1. Mainly comprised large stones sitting in a small amount of soil on either side comprised of a grey silty clay. Full extent unknown as extends outwith excavated area. Measured 0.59m wide by 0.46m deep.	Possible rubble drain which has cut through (1010), (1124) and (1183).	
1185	-	-		Voided	Voided	
1186	-	-		Voided	Voided	
1187	1	Cut		Circular shaped cut in plan which measured 0.7m in diameter and 0.38 maximum depth. Steep sides with a near flat base. Contains <i>in situ</i> wooden barrel [1325] and internal fill (1188).	Cut of pit containing <i>in situ</i> wooden barrel [1325]. Barrel remains were right against the edge of the pit.	
1188	1	Fill		Slightly compacted dark brown mottled coarse sand and silt, with orange and black shale flecks. Contains the remnants of an <i>in situ</i> wooden barrel. Measures 0.38m maximum depth by 0.70m in diameter. Fill of pit [1187].	Fill of barrel [1325] within cut [1187].	
1189	1	Cut		Roughly circular in plan measuring 1.1m diameter by 0.85m deep. Has a sharp break of slope at the top, vertical sides, sharp break of slope at the bottom meeting an uneven base. Contained stone setting [1020] filled by (1190). Cuts through	Cut of small pit or possible posthole containing stone setting [1020].	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				spreads (Feature Group E) and cuts into spread (1249).		
1190	1	Fill		Compact mid brown to dark brown clay silt with wood inclusions and some charcoal flecks. Measured roughly 1.1m in diameter and 0.85m deep. Fill within pit [1189] in the interior of stone setting [1020]. Contained fragment of wood (1292).	Fill of cut [1189] sitting within interior of stone setting [1020].	
1191	1	Fill		Moderately compact grey brown silty sand with 1% stones and occasional charcoal flecks. Measured 0.28m deep. Contained complete pot, Find No. 302.	Fill of pit [1198] containing medieval pot Find No. 302.	
1192	1	Fill		Moderately compact mid-dark grey clayey sand (30% clay and 70% sand) with some silt. 0.11m deep. Lay under stones [1195] at base of cut [1052].	Fill of pit [1052]. Possible levelling material for [1195].	D
1193	1	Fill		Slightly compact medium dark brown loose sand with silt and occasional fragments of slate. Measured 0.5m by 0.4m. Fill of [1326]. Depth not known as feature not excavated.	Fill of possible posthole [1326].	D
1194	1	Fill		Slightly compact medium dark brown coarse sand with silt and occasional small fragments of broken red brick and occasional small flecks of shale. Measured 0.4m by 0.4m and 0.12m deep. Fill of [1196].	Fill of possible posthole [1196].	D
1195	1	Structure	Stone	Two flat surfaced stones laid adjacent to each other within cut [1052]. The larger stone measured 29cm by 35cm by 6cm thick and the smaller, 16cm by 25cm by 3cm thick. Single course. Stones have been laid level, set in deposit (1192) orientated NW-SE. No bonding material. Whole structure together measures 0.52m by 0.3m in extent.	Possible post pad within [1052].	D
1196	1	Cut		Sub-circular (oval) shaped cut in plan measuring 0.4m by 0.4m by 0.12m maximum depth. Steep side on N edge, gradual sloping sides on S and E edges. Nearly flat base gently sloping to the north. Filled by (1194).	Cut of possible posthole. Possibly associated with nearby features [1052], [1326] and [1327].	D
1197	1	Cut		Oval in plan measuring 1.2m long by 1.13m wide by 0.3m deep. Sharp break of slope at top with steep sides, gradual break of slope at the base and an almost flat base. Cut of pit filled by (1172) and (1202).	Cut of pit.	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
1198	1	Cut		Circular shaped in plan. Measured 0.3m E/W and 0.45m N/S, 0.29m deep. Sharply dropping break of slope in the south and gradual break of slope in the north. Sharp dropping sides. Concave break of slope at base and concave base. N-S orientated. Filled by (1191).	Cut of pit containing complete medieval pot Find No. 302.	
1199	-	-		Voided	Voided	
1200	-	-		Voided	Voided	
1201	1	Fill		Moderately compact light brown-yellow silty sand (20% silt and 80% sand) with frequent lumps of coal less than 3cm. Measures 0.9m diameter by 0.35m deep. Small lenses of possible windblown sand.	Fill of pit [1064]. Appears to be deposited gradually as there are no tip lines.	
1202	1	Fill		Loosely compacted slightly silty mid brown sand mixed with lighter sand measuring roughly 1.2m long by 1.13m wide by 0.14m deep. Underlies (1172).	Primary fill of [1197]	
1203	1	Cut		Oval in shape measuring 0.46m long by 0.26m wide by 0.1m deep. Has a gradual break of slope at top with a "V" shape round base. Filled by (1066).	Cut of possible posthole.	
1204	1	Fill		Medium dark yellow-grey slightly silty sand with some charcoal flecks measuring 2m wide by 1.9m long by 0.2m deep. Underlies (1036).	Lower fill of pit [1035].	
1205	1	Fill		Loose brown sand. Measures 1.94m by 1.13m wide and by 0.27m deep. Underlies (1059) and overlies (1206).	Fill within pit [1207].	H
1206	1	Fill		Moderately compact red-brown clay silt. Measures roughly 2m long by 1.3m wide by 0.08m deep. Underlies (1205).	Possible clay lining of pit [1207].	H
1207	1	Cut		Sub-rectangular pit with rounded corners measuring 2m long by 1.3m wide by 0.47m deep. Has a sharp break of slope at top in the north and gradual break of slope at the top in the south. Sharply sloping sides on the north side and gradual sloping sides on the south side. Gradual break of slope at base and is an irregular concave shaped base. E-W orientated. Filled by (1059), (1205) and possible clay lining (1206). Cuts pits [1224] and [1241].	Cut of pit which cuts earlier pits [122] and [1241].	H

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
1208	1	Fill		Moderate to firmly compact black brown clay. Measured 1.91m long by 1.52m wide by 0.15m deep.	Fill of pit [1324].	H
1209	-	-		Voided	Voided	
1210	-	-		Voided	Voided	
1211	1	Fill		Moderately compacted black silt with charcoal and bone. Measures roughly up to 1.42m E-W by 0.6m N-S by 0.15m deep. Amorphous deposit of midden material. May be same as (1217). Overlies (1218) and underlies (1220).	Fill of pit [1219], may be the same as (1217).	H
1212	1	Fill		Mixed fill of firm grey silty clay with some charcoal inclusions, a small number of stones and a re-deposited sand layer which was a loose light yellow/light brown with small clay deposits throughout. Measured roughly 1.62m long by 1.24m wide by 0.55m deep.	Fill of pit [1068].	
1213	-	-		Voided	Voided	
1214	1	Fill		Moderately compact yellow-brown sand. Measures up to 1.42m E-W by 1.43m N-S by 0.1m deep. Overlies (1215) and has been cut by [1207].	Fill within pit cut [1241], may be redeposited natural.	H
1215	1	Fill		Moderately compact dark/mid brown silty sand. Measures up to 1.42m E-W by 1.7m N-S by 0.17m deep. Underlies (1214). Possibly the same as (1223).	Basal fill of pit [1241] on NW side, may be redeposited natural. Possibly the same as (1223).	H
1216	1	Fill		Loosely compacted brown silty sand with a charcoal lens deposit at the base. Measures up to 1.42m E-W, 0.92m N-S and 0.17m deep. Overlies (1217) and has been cut by [1241]. May be the same as (1220).	Fill of pit [1219]. Possibly the same as (1220). Has been cut by pit [1241].	H
1217	1	Fill		Loosely compacted brown silty sand measuring up to 1.42m E-W by 0.89m N-S by 0.16m deep. Overlies (1218) and underlies (1216). May be same as (1211).	Fill of pit [1219], may be same as (1211).	H
1218	1	Fill		Moderately compacted black silty sand with charcoal and bone inclusions measuring up to 1.42m E-W by 1.18m N-S and 0.03m thick. Underlies (1211) and (1217).	Basal fill of pit [1219] on NW side.	H
1219	1	Cut		Sub-oval shaped in plan measuring 2.94m N-S, 1.42m E-W	Cut of large oval shaped pit which has	H

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				and 0.87m deep. Break of slope at the top was not visible on the north side as it had been partially truncated by pit [1207] though it is possible that cut [1224] was the continuation of this pit cut. On the southern side there was a sharp break of slope with near vertical sides and a sharp break of at the base. The base formed a flat ledge or step at southern side which then sharply dropped into a deeper part of the pit. This deeper part had gradual to near vertical sides and flat/irregular base. The pit was N-S orientated. Truncated by [1241]. Filled by (1218), (1211), (1217), (1220), (1216) and (1222).	been truncated by later pit [1241]. It is possible that [1224] represents a continuation of this pit but connection has been obscured by later pits.	
1220	1	Fill		Moderately compacted yellow brown sand with friable texture measuring up to 1.42m E-W by 0.6m N-S by 0.12m deep. Re-deposited sand similar to the natural but with evidence of silting. Overlies (1211) and underlies (1215). Has been cut by [1241]. Possibly the same as (1216).	Fill within pit [1219] which has been cut by later pit [1241]. Possibly the same as (1216).	H
1221	-	-		Voided	Voided	
1222	1	Fill		Loosely compacted brown silty sand measuring up to 1.42m E-W by 1.54m N-S by 0.19m deep. Organic in nature but has leached off some of its organic content - may possibly be redeposited silting. Possibly the same as (1216). Has been cut by [1241].	Basal fill of pit [1219] on SE side.	H
1223	1	Fill		Moderately compacted mid brown silty sand measuring 2.91m E-W by 1.5m N-S by 0.14m deep. Has been cut by [1324]. Possibly the same as (1215).	Basal fill of pit [1241] on SE side, possibly the same as (1215). Has been cut by later pit [1324].	H
1224	1	Cut		Upper NW side of cut only visible in section, measuring 0.25m deep by 0.27m N-S with a gradual break of slope at top and a gradual sloping side. The remainder of the cut is not visible as feature has been cut by pit [1207]. Filled by (1242).	Cut only observable in section but is very likely continuation of cut [1219], which has been cut by later pit [1207].	H
1225	-	-		Voided	Voided	
1226	1	Cut		Linear feature of NW-SE orientation with rounded terminal SE end measuring 2.7m long by 1.05m wide by 0.3m deep but full extent unknown as it runs outwith trench edge to NW.	Cut of linear feature. Possibly medieval or post-medieval in date. Part of a series of linear features including	U

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				Has an abrupt break of slope at the top with sloping sides, a gradual break of slope at base and a slightly concave base. Filled by (1248). Underlies Feature Group E.	[1227], [1228], [1229], [1230], [1231] and [1328]. Possibly horticultural.	
1227	1	Cut		Linear feature of NW-SE orientation with rounded terminal SE end measuring 2.75m long by 1.07m wide by 0.39m deep but full extent unknown as it runs outwith trench edge to NW. Has an abrupt break of slope at the top with nearly vertical sides, a semi-abrupt break of slope at base and a flat base. Filled by (1247). Underlies Feature Group E.	Cut of linear feature. Possibly medieval or post-medieval in date. Part of a series of linear features including [1226], [1228], [1229], [1230], [1231] and [1328]. Possibly horticultural.	U
1228	1	Cut		Linear feature of NW-SE orientation with rounded terminal SE end measuring 3.2m long by 1.08m wide by 0.14m deep but full extent unknown as runs outwith trench edge to NW. Has an abrupt break of slope with irregular sides as it has been heavily truncated, unclear break of slope at the bottom but may be abrupt which meets a flat base. Filled by (1246). Underlies Feature Group E.	Cut of linear feature. Possibly medieval or post-medieval in date. Part of a series of linear features including [1226], [1227], [1229], [1230], [1231] and [1328]. Possibly horticultural.	U
1229	1	Cut		Linear feature of NW-SE orientation with rounded terminal SE end measuring 3.6m long by 0.75m wide by 0.26m deep but full extent unknown as it runs outwith trench edge to NW. Has an abrupt break of slope at the top with nearly vertical sides, an abrupt break of slope at the base which meets a flat base sloping down from S to W. Filled by (1245). Underlies Feature Group E.	Cut of linear feature. Possibly medieval or post-medieval in date. Part of a series of linear features including [1226], [1227], [1228], [1230], [1231] and [1328]. Possibly horticultural.	U
1230	1	Cut		Linear feature of NW-SE orientation with rounded terminal SE end measuring 3.55m long by 0.96m wide by 0.14m deep but full extent unknown as it runs outwith trench edge to NW. Has an abrupt break of slope at the top with heavily truncated sides with a gradual break of slope at the bottom which meets a flat base. Filled by (1244). Underlies Feature Group E.	Cut of linear feature. Possibly medieval or post-medieval in date. Part of a series of linear features including [1226], [1227], [1228], [1229], [1231] and [1328]. Possibly horticultural.	U
1231	1	Cut		Linear feature of NW-SE orientation with rounded terminal SE end measuring 3.26m long by 0.9m wide by 0.21m deep but full extent unknown as it runs outwith trench edge to NW. Has an abrupt break of slope at the top with vertical sides, a gradual break of slope at the base and a flat base. Filled by	Cut of linear feature. Possibly medieval or post-medieval in date. 				(1243). Underlies Feature Group E.	and [1328]. Possibly horticultural.	
1232	1	Cut		Sub-rounded in plan with rounded corners measuring 2.2m long by 2.1m wide by 0.76m deep with a sharp break of slope at the top with vertical sides, a sharp break of slope at the base which meets a flat base. Filled by (1270) which has been recut by pit [1271]. Underlies Feature Group E.	Cut of pit.	
1233	-	-		Voided - duplicate with [1258]	Voided	
1234	-	-		Voided - duplicate with [1312]	Voided	
1235	-	-		Voided	Voided	
1236	1	Fill		Moderately compact yellow brown sand measuring 2.1m long by 1.1m wide by 0.39m deep. Possibly mixed redeposited natural subsoil.	Fill of pit [1305].	
1237	1	Fill		Loosely compacted dark brown sandy silt with inclusions of bone fragments mostly small to medium (20 - 60mm), animal, rare (less than 2%) to occasional (3%). Measures roughly 3.7m long by 2.7m wide by 1.7m deep. Fill encompasses well [1253] and stone feature [1250] lying within [1251]. Main fill of pit [1251], surrounds well [1253] and overlies stone structure [1250].	Fill of pit [1251].	
1238	-	-		Voided - duplicate with [1260]	Voided	
1239	1	Cut		Circular shape in plan measuring 0.68m in diameter by 0.30m deep, with a sharp break of slope at the top with nearly vertical sides which meet sharply at the flat base. Filled by (1268). Underlies Feature Group E.	Cut of pit, sits within concentration of similar features.	
1240	1	Fill		Moderately compacted brown organic material with lenses of brown sand measuring 3m long by 1.14m wide by 0.17m deep.	Fill of linear feature [1306].	
1241	1	Cut		Cut only observable in section. Measured 2.91m long by 1.6m wide by 0.62m deep. Cut has a gradual base of slope at top with gradual sloping side on the south which drops away sharply to become a steep side and a steep side on the north with sharp break of slopes which meet an uneven base. N-S	Cut of pit which cuts earlier pit [1219], and has been cut later pits [1207] and [1324].	H

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				orientated. Filled by (1215), (1223) and (1214). Cuts into fill (1216), (1220) and (1222) within pit [1241]. Has been cut by pits [1207] and [1324].		
1242	1	Fill		Moderately compact brown sand measuring 0.27m N-S by 0.25m deep. Truncated by cut [1207].	Fill of [1224] - redeposited with evidence of silting. Has been cut by pit [1207].	H
1243	1	Fill		Moderately compact mid dark brown silty sand (50%) with organic material. Contains very rare stone inclusions measuring up to 10cm and are mainly rounded and occasional moderate sized charcoal lumps measuring less than 1cm in size. Measured 3.26m long by 0.9m wide by 0.21m deep.	Fill of linear feature [1231].	U
1244	1	Fill		Moderately compact mid dark brown silty sand (50%) with organic material. Contains very rare stone inclusions measuring up to 10cm and are mainly rounded and occasional moderate sized charcoal lumps measuring less than 1cm in size. Measured 3.55m long by 0.96m wide by 0.14m deep.	Fill of linear feature [1230].	U
1245	1	Fill		Moderately compact mid dark brown silty sand (50%) with organic material. Contains very rare stone inclusions measuring up to 10cm and are mainly rounded and occasional moderate sized charcoal lumps measuring less than 1cm in size. Measured 3.6m long by 0.75m wide by 0.26m deep.	Fill of linear feature [1229].	U
1246	1	Fill		Moderately compact mid dark brown silty sand (50%) with organic material. Contains very rare stone inclusions measuring up to 10cm and are mainly rounded and occasional moderate sized charcoal lumps measuring less than 1cm in size. Measured 3.2m long by 1.08m wide by 0.14m deep.	Fill of linear feature [1228].	U
1247	1	Fill		Moderately compact mid dark brown silty sand (50%) with organic material. Contains very rare stone inclusions measuring up to 10cm and are mainly rounded and occasional moderate sized charcoal lumps measuring less than 1cm in size. Measured 2.75m long by 1.07m wide by	Fill of linear feature [1227].	U

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				0.39m deep.		
1248	1	Fill		Moderately compact mid dark brown silty sand (50%) with organic material. Contains very rare stone inclusions measuring up to 10cm and are mainly rounded and occasional moderate sized charcoal lumps measuring less than 1cm in size. Measured 2.7m long by 1.05m wide by 0.3m deep.	Fill of linear feature [1226].	U
1249	1	Deposit		Firm fine grained sediment of mid-dark brown clayey silt with some charcoal flecks measuring 1.7m long by 1.47m wide by 0.13m thick. Cut by pit [1189] and overlies fill of linear feature [1284]. Underlies Feature Group E.	Spread which has been cut by pit [1189].	
1250	1	Structure	Stone	Rectangular stone structure with an open interior. Structure consists of large granite, rough, irregular stone (e.g. 0.4m squared) and smaller irregular stone (c.10cm squared). Stone lined base comprised of large stones (measuring up to 0.94m by 0.84m in plan) located beneath silty deposit (1254). Fragments of wooden beams [1257] present lining interior of structure approximately 0.2m above the base. Whole structure is 3.70m length by 2.7m width by 0.8m deep. Interior measures 1.7m by 1.1m. Possible stepped area located in W corner of well structure of rough undefined quality. Sits at a lower depth than well [1253] (top of [1250] sits at 1.7 to 1.8m below top of [1253]) but appears to be contemporary. Sits within cut [1251]. Interior filled by (1237), (1254) and (1255).	Stone lined pit sitting adjacent to well [1253], which both sit within cut [1251] and appear to be contemporary.	
1251	1	Cut		Large sub oval pit measuring 3.7m long by 2.7m wide and 1.7m minimum depth. The upper portion had gradual sloping sides which came tight to the edges of structures [1250] and [1253] and appeared to then be near vertical in the lower portions surrounding the two structures themselves. The base was not fully revealed but was possibly fairly flat underneath the two structures. Contains well [1253] and stone structure [1250], and fills (1237), (1252), (1254) and (1255).	Cut to accommodate the construction of well [1253] and stone structure [1250].	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
1252	1	Fill		Loosely compacted light yellow/grey gravelly sand moderately sorted. Deposit is sandy interspersed with small (6mm) to very small (2mm) rounded pebbles. Measures 0.2 to 0.3m wide around the outer circumference of [1253] and 0.2m deep maximum. Overlies (1237).	Fill surrounding well [1253]. Probably washed out material from well but has a faint appearance similar to medieval mortar.	
1253	1	Structure	Stone	Circular feature in plan consisting of stone lining constructed with irregular stone, sub-angular to angular in nature and of a variety of types, smooth to rough. Structure measures 1.77m diameter to outer edge, with inner diameter measuring is 0.9m. No signs of working and no mortar evident. Contains fill (1256) within its interior, and surrounded by deposit (1252) around the exterior.	Well of possible medieval date constructed in tandem with [1250].	
1254	1	Fill		Loose dark brown-grey sandy silt containing some bone fragments (less than 2%). Same as (1237) - see (1237) for fuller description.	Fill within pit [1251], likely of medieval date.	
1255	1	Deposit		A loose dark brown sandy silt deposit with medium - large irregular sub-angular stone abundantly present throughout. Moderately sorted - poorly sorted. Measured 0.6m long by 0.45m wide by 0.5m deep. Similar in nature to (1237) and may be a stony part of the same fill.	Deposit within pit [1251], which may be tumble from [1253] or possibly collapse from [1250].	
1256	1	Deposit		A mid-yellow brown sand which is well sorted located within the interior of well [1253]. Loose with no obvious inclusions at time of recording deposit. Has not been excavated and remains <i>in situ</i> .	Deposit within interior of well [1253] - possibly backfill.	
1257	1	Structure	Timber	Timber frame which is set into the interior of stone lining [1250]. Encloses an area which is sub-rectangular in shape measuring roughly 1.78m NW-SE and 1.2m NE-SW. Individual timbers had a width of 0.16m and thickness of 0.12m. The timbers have rotted away in places and stones making up [1250] have pushed them down or warped their shape. The frame overlaps the square opening of the well [1250] in the SE where the beam rests on a very large squared off stone. The frame is also angled upwards from the NW to SE. It is unclear if the frame is located at what would have been the top of the structure or if it is only part of the	Timber frame which is set into the interior of stone lining [1250]. Possibly for structural reinforcement or part of a frame for a hatch cover.

				way up.		
1258	-	-		Voided	Voided	
1259	1	Cut		Circular in shape measuring 0.68m long by 0.70m wide by 0.22m deep with a sharp break of slope at the top with steep sides which curve to meet a relatively flat bottom. Filled by (1267).	Cut of pit, sits near to concentration of similar features.	
1260	1	Cut		Uneven oval shape in plan measuring 0.81m long by 0.7m wide by 0.12m deep with a gradual break of slope at the top with gently sloping sides and a gradual break of slope at the rounded base which has a slight dip in the middle. SW-NE orientation. Filled by (1266).	Cut of pit, sits within concentration of similar features.	
1261	1	Cut		Oval shape in plan measuring 0.43m long by 0.38m wide by 0.12m deep with a gradual break of slope at the top with gently sloping sides, a gradual break of slope at the slightly rounded base. S-N orientation. Filled by (1265).	Cut of possible posthole, sits within concentration of similar features.	
1262	1	Cut		Oval in shape in plan measuring 0.81m long 0.72m wide by 0.18m deep with a gradual break of slope at the top with the NW side being a slightly steeper slope than the gradual slope of the SE edge. The NW edge has a sharper break of slope at the base than the gentle break of slope on SE side which reaches a rounded a base. Both have a sharp break of slope on the NW side, more gentle on SE. Rounded base. NW-SE orientation. Filled by (1264). Underlies Feature Group E.	Cut of pit, sits within concentration of similar features.	
1263	1	Fill		Moderately compact black/dark brown silty sand with 1% stones/sandstone with some lenses of sand but fill has an organic nature. Measures 1.9m long by 1.5m wide 0.62m deep.	Fill of pit [1271] which is a possible re-cut pit [1232].	
1264	1	Fill		Mid to dark brown clayey silt measuring 0.81m long by 0.72m wide by 0.18m deep.	Fill of [1262].	
1265	1	Fill		Loose compact dark - mid brown silty sand measuring 0.43m long by 0.38m wide by 0.12m deep.	Fill of possible posthole [1261].	
1266	1	Fill		Dark to mid brown silty sand which is mottled by mid-orange sand at NE side measuring 0.81m long by 0.7m wide and	Fill of [1260].	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				0.12m deep.		
1267	1	Fill		Grey, mid-firmly compact clay/silt with some small charcoal inclusions measuring 0.7m by 0.69m by 0.22m. Contains at least 8 large stones similar in size to each other, measuring roughly 0.25m by 0.15m by 0.07m.	Fill of [1259].	
1268	1	Fill		Very firm dark grey very slightly silty clay with some small charcoal inclusions. Measures roughly 0.68m diameter by 0.30m deep.	Fill of pit [1239].	
1269	-	-		Voided	Voided	
1270	1	Fill		Moderate-loosely compact brown sand with organic lenses measuring 2.2m long by 2.1m wide by 0.15m deep. Redeposited natural which has organic lenses and sedimentation lenses which fall and form tip lines from the east. Been cut by possible re-cut [1271].	Fill of [1232] - possibly caused by silting	
1271	1	Cut		Oval shape in plan measuring 1.9m long by 1.5m wide by 0.62m deep with a sharp break of slope at the top with sharp sides and a sharp break of slope at the flat base. Filled by (1263).	Possible re-cut of larger pit [1232].	
1272	1	Fill		Compact dark brown-grey slightly silty sandy clay with occasional small organic lenses within the fill, frequent charcoal and coke and badly degraded bone. Measures 12m long by 1.87m wide by 0.44m deep. Overlies (1290).	Tertiary fill of linear feature [1284].	
1273	1	Deposit		Very firm dark brown slightly silty clay with frequent charcoal and coke and badly degraded bone measuring possibly 12m long by 0.82m wide by 0.21m deep but thins slightly to meet (1272). (1272) and (1273) are probably the same as each other with this fill perhaps being run off from (1272), the upper fill of [1284]. Overlies spread (1293).	Spread of material possibly run off from linear feature [1284].	
1274	1	Fill		Very slightly stony loose loamy dark brown sand measuring 1.74m long by 1.64m wide 0.58m deep.	Upper fill of pit [1295].	
1275	1	Fill		Lower deposit comprised of mid compact beige-light brown silty sand lenses with infrequent charcoal which measures roughly 1.5m by 0.8m wide by 0.46m deep. Upper deposit	Fill of pit [1318].	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				comprised of mid-firm dark brown silty clay with infrequent charcoal.		
1276	1	Fill		Very compact, almost clay compaction, dark grey almost black, organic silt. Measured 0.25m depth in some areas by 1.50m by 5.5m maximum. Overlies (1321).	Upper fill of pit [1311]. Organic deposit with no signs of charcoal or burning.	
1277	-	-		Voided	Voided	
1278	-	-		Voided	Voided	
1279	1	Fill		Loose - moderately compact mid-dark grey brown sandy silt with 70-80% inclusions of small sub-angular and sub-rounded stones. Fill measures 1.12m long by 0.93m wide by 0.62m deep.	Fill of pit [1285]	
1280	1	Fill		Soft-moderately compact mixed mid brown orange/mid brown silty sand with rare angular stones measuring up to 3.08m long by 1.63m wide by 0.25m deep. Underlies (1062) and overlies (1281).	Fill of pit [1061].	
1281	1	Fill		Moderately compact mid orange-yellow sand measuring up to 3.08m long by 1.26m wide by 0.30m deep. Underlies (1280) and overlies (1282).	Fill of pit [1061].	
1282	1	Fill		Moderately compact silty sand with mixed colour. Upper portion is light - mid brown/yellow-orange, lower is mid orange-yellow. Measures up to 3.08m long by 1.04m wide up to 0.54m thick. Underlies (1281) and overlies (1289).	Fill of pit [1061].	
1283	-	-		Voided	Voided	
1284	1	Cut		Linear feature running on NE-SW orientation measuring 12m approx. long by 1.3m wide by 0.81m deep. Has a sharp break of slope on NW side with steep, near vertical, side and a sharp break of slope at the bottom whilst the SE side is a gradual slope which drops to become a steep slope with a gradual break of slope at the bottom which meets a concave base. Fill (1273) has probably over-reached/leached over limitations of cut on NW. Filled by (1291), (1290) and (1272). Has cut spread (1293) and underlies spread (1249) and Feature Group E. [1306] may be a continuation of this feature	Cut of linear feature, possible a drainage ditch of some kind.	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				further to the NE.		
1285	1	Cut		Roughly circular shaped in plan measuring 1.12m long by 0.93m wide by 0.62m deep with a sharp break of slope at top with almost vertical sides and a sharp break of slope at the base meeting a slightly irregular shaped bottom. Filled by (1279). Underlies Feature Group E.	Cut of large stone filled pit.	
1286	1	Cut		Oval shaped cut in plan. Measured 0.65m by 0.95m by 0.37m. Steep break of slope at top with sharp sides, 90 degrees angle at break of slope at bottom and a flat base. E-W orientated. Filled by (1323). Underlies Feature Group E.	Cut of pit.	
1287	1	Cut		Sub-rectangular in shape with rounded corners measuring 3.85m long by 3.8m wide by 0.3m deep. Has very gentle break of slope at the top with gradual sloping sides but is steeper on the NW side; less clear on NE edge with gentle break of slope at the bottom which is fairly flat. Has been cut by [1133] and [1137]. Filled by (1129) and (1136). Has cut [1288] sat in base, uncertain if [1288] is an earlier feature cut by [1287] or whether they could be contemporary.	Cut of large shallow pit. Has cut [1288] visible at centre of base. Unclear if it is an earlier feature which has been truncated by [1287] or contemporary with it. Possible that this area may have been the location of a tree and [1287] and [1288] were dug during its removal.	
1288	1	Cut		Sub-circular in shape with rounded corners measuring 1.51m wide by 0.28m deep. Full extent unknown as uncovered in section at base of [1287]. Has a sharp break of slope at the top with steep sides, a sharp break of slope at the bottom and an undulating - flat base. Has been cut by pit [1137]. Filled by (1294). May be contemporary with [1287] or an earlier feature which has been truncated.	Cut visible in centre of base of larger pit [1287]. Unclear if it is an earlier feature which has been truncated by [1287] or contemporary with it. Possible that this area may have been the location of a tree and [1287] and [1288] were dug during its removal.	
1289	1	Fill		Moderately compact mid brown silty sand with frequent charcoal flecks and lumps less than 2cm in size. Contains rare patches of burnt orange grey patches up to 3cm in diameter, and occasional small rounded stones up to 3cm. Measures up to 1m long by 0.85m wide and 0.06m deep. Underlies (1282).	Basal fill of [1061].	
1290	1	Fill		Loose-mid light beige brown silty sand with infrequent charcoal measuring 12m long by 1.12m wide by 1.12m deep. Underlies (1272) and overlies (1291).	Secondary fill of linear feature [1284].	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
1291	1	Fill		Mid to loose dark grey silty clay with infrequent charcoal measuring 12m long by 0.6m wide by 0.2m deep. Underlies (1290).	Primary fill of linear feature [1284].	
1292	1	Structure	Timber	Fragment of wooden plank found within stone setting [1020]. SW-NE orientation, very crumbly and quite rotten. Measured 0.3c by 0.2m. Found halfway way up feature within the middle, running underneath the stones of [1020]. Has a hole in it, possibly for a nail at one point. Sat within fill (1190).	Wood found within interior of stone setting [1020] in pit [1189].	
1293	1	Deposit		Loose light brown grey mottled clay silt measuring 1.42m wide by 2.8m by 0.3m deep. Underlies (1273) and Feature Group E. Cut by [1284].	Spread which has been cut by linear feature [1284].	
1294	1	Fill		Loose mottled brown/yellow/ grey sandy silt measuring 1.35m wide by 0.31m deep.	Fill of pit [1288].	
1295	1	Cut		Roughly circular in shape measuring 2m long by 1.74m wide by 0.84m deep. The break of slope was 45 degrees with steep to vertical sides which have a 60 degree break of slope at the bottom on south side, more gentle on the north, which meet at a flat base. Filled by (1274) and (1296). Underlies Feature Group E.	Cut of pit.	
1296	1	Fill		Loose, well sorted dark brown sandy fill with occasional lenses of re-deposited natural. Measures 2m long by 1.75m wide by 0.25m thick. Underlies (1274).	Lower fill of [1295].	
1297	1	Fill		Soft-moderately compacted generally light mid brown, but marbled with yellow, mid brown and dark brown, silty sands (darker portions higher in silt proportion) with occasional charcoal flecks and lumps less than 2cm in size. Extent measured 1.45m long by 1.15m wide by 0.59m deep. Underlies (1168).	Lower fill of [1181].	
1298	-	-		Voided	Voided	
1299	1	Fill		Mid-loose mixed mid dark brown sandy silt with patches of mid-yellow sand measuring around 4.4m long by 1.1m wide by 0.3m deep. Overlies (1316).	Upper fill of [1314].	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
1300	1	Deposit		Loose to moderately compact silty sand with occasional charcoal flecks measuring 3.2m long by 3.11m wide by 0.21m deep. Possibly associated with linear features [1307] and [1314]. Overlies pit [1309].	Spread - possibly an occupation layer.	
1301	1	Cut		Sub-circular shaped in plan measuring 0.28m long by 0.13m wide. Upper fill mixed dark grey sandy silt with light grey green clay patches. Seems to be at least 70 - 80% stone inclusions.	Cut of possible posthole, not excavated. May relate to possible posthole [1315] and spread (1300).	
1302	1	Fill		Loose to moderately compact mid-dark grey sandy silt with patches of light green grey clay with 80% stone inclusions. Measured 0.4m long by 0.3m wide by 0.24m deep.	Fill of possible posthole [1315]	
1303	-	-	-	Voided	Voided	
1304	-	-	-	Voided	Voided	
1305	1	Cut		Sub rectangular in shape with rounded corners measuring 2.1m long by 1.1m wide by 0.39m deep with a gradual break of slope at the top with sharply dropping sides, a sharp break of slope at the flat base. N-S orientated. Filled by (1236).	Cut of pit. Possibly related to nearby pit [1312].	
1306	1	Cut		Cut of linear feature of E-W orientation measuring 3m long by 1.14m wide by 0.14m deep with a sharp break of slope at the top with sharply dropping sides, a gradual break of slope at the bottom and a flat base. Filled by (1240). Underlies Feature Group E.	Cut of linear feature which may be a continuation of [1284].	
1307	1	Cut		Linear shaped in plan measuring 2m long by 0.7m wide by 0.2m deep. Break of slope at top was gentle, sides were gently sloping, break of slope at base was gentle and the base was concave. Filled by (1308). Underlies (1300) and possibly relates to [1309].	Cut of linear feature which may relate to [1309] and (1300).	
1308	1	Fill		Moderately compacted mixed brown black silty sand with no inclusions. Measures 2m long by 0.7m wide by 0.2m deep.	Fill of linear feature [1307].	
1309	1	Cut		Circular shaped in plan measuring 1.8m diameter and 0.4m deep. Break of slope at top was sharp, sides were vertical, break of slope at base was sharp and the base was flat.	Cut of pit which underlies spread (1300).	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				Filled by (1310). Underlies spread (1300).		
1310	1	Fill		Moderately compacted mixed brown black silty sand with occasional small stone inclusions measuring 1.8m diameter by 0.4m deep.	Fill of pit [1309].	
1311	1	Cut		Rectilinear shaped in plan. Measured 5.5m by 1.5m by 0.25m deep. Break of slope at top was gradual to sharp, sides were gradually sloping to vertical, break of slope at base was gradual to sharp and the base was flat. Filled by (1276) and (1321).	Cut of rectilinear shaped feature.	
1312	1	Cut		Sub-circular shaped pit measuring 1.63m long by 1.4m wide by 0.6m deep. Break of slope at top was sharp, sides were vertical, break of slope at base was sharp and the base was flat. Orientated in an E-W direction. Filled by (1319), (1313) and (1320). Underlies Feature Group E.	Cut of pit. Possibly related to nearby features [1305] and [1306].	
1313	1	Fill		Moderately compacted dark brown silty sand with very infrequent stone inclusions measuring 1.63m long by 1.4m wide by 0.32m deep. Underlies (1319) and overlies (1320).	Fill of pit [1312].	
1314	1	Cut		Linear shaped in plan with rounded corners measuring 4.4m long by 1.2m wide by 0.5m deep. Break of slope at top was gentle to sharp, sides were gentle but became near vertical near the bottom, break of slope at base was gentle and the base was concave. Orientated in a SW-NE direction. Filled by (1316), (1317) and (1299).	Cut of linear feature, may be associated with spread (1300).	
1315	1	Cut		Sub-circular shaped in plan measuring 0.4m long by 0.3m wide by 0.24m deep. Break of slope at top was gradual, sides were near vertical, break of slope at base was sharp and the base was irregular/flat. Orientated in a NW-SE direction. Filled by (1302).	Cut of possible posthole, may relate to possible posthole [1301] and spread (1300).	
1316	1	Fill		Firmly compacted dark brown sandy clay with infrequent charcoal inclusions. Measures 4.4m long by 1.1m wide by 0.3m deep. Underlies (1299) and overlies (1317). What looks to be (1316) in southernmost terminus may be a mixture of (1316) and (1317).	Secondary fill of [1314]	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
1317	1	Fill		Loose to moderately compact mixed yellow sand/dark-mid brown sandy silt with no inclusions. Measures 4.4m long by 0.7m wide by 0.15m deep. Underlies (1316).	Basal fill within [1314].	
1318	1	Cut		Sub-rectangular shaped in plan measuring 1.5m long by 0.8m wide by 0.46m deep with a sharp break of slope at top with steeply sloping sides, a sharp break of slope at base meeting a concave base. Orientated in a NE-SW direction. Filled by (1275). Underlies Feature Group E.	Cut of pit.	
1319	1	Fill		Moderately compacted dark brown silty sand with sand lenses throughout. Measures up to 1.63m long by 0.87m wide by 0.25 deep. Overlies (1313).	Upper fill of pit [1312].	
1320	1	Fill		Moderately compacted brown sand with very infrequent (1%) stone inclusions. Measures up to 1.63m long by 0.77m wide by 0.68m deep. Underlies (1313).	Basal fill of pit [1312].	
1321	1	Fill		Moderately compacted light to mid brown sand with no inclusions. Extent 0.12m deep. Underlies (1276) and fills cut [1311].	Basal fill of rectilinear shaped pit [1311].	
1322	1	Deposit		Very loosely compacted orange red sand with no inclusions measuring 0.47m long by 0.26m wide by 0.09m deep. Possibly heat affected sand showing an area of burning.	Small spread which sits adjacent to spread (1300). Possibly represents an area of burning.	
1323	1	Fill		Loosely compacted dark grey silty sand with large sized stone (0.4m) inclusions. Extent 0.65m by 0.55m by 0.37m deep.	Fill of pit [1286].	
1324	1	Cut		Sub-oval shaped in plan. Measured 1.52m N-S, 0.7m E-W (though may have been larger as eastern part of feature unknown) and 0.15m deep. Break of slope at the top was gentle in the S and gradual on the N. The sides were gently sloping in the S and gradually sloping in the N with the break of slope at the base gradual which met a flat/irregular base. Filled by (1208). Cuts fill of pit [1241].	Cut of shallow pit which cuts earlier pit [1241].	H
1325	1	Structure	Timber	Circular shape in plan measuring 0.7m diameter and 0.38m deep. The wood was approx. 0.01-0.02m thick but was badly degraded. Bucket itself was made of staves of wood on the	Remains of wooden bucket or small barrel sat within circular cut [1187].	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				bottom and sides bound together by iron bindings. Sat within cut [1187] and interior filled by (1188).		
1326	1	Cut		Circular shaped cut in plan measuring 0.5m by 0.4m. Filled by (1193). Depth and profile not known as feature not excavated.	Cut of possible posthole. Possibly associated with nearby features [1048], [1052], and [1327].	D
1327	1	Cut		Circular shaped cut in plan measuring 0.22m by 0.25m. Filled by (1048). Depth and profile not known as feature not excavated.	Cut of possible posthole. Possible associated with [1048], [1052] and [1326].	D
1328	1	Cut		Same as [4191] - given extra Area 1 number for reference in report as feature lay more within Area 1 than Area 4.	See [4191]	U

## Context Register – Area 2

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
2001	2	Deposit		Compact very dark brown/black silty clay with frequent inclusions of demolition material (brick/sandstone/rubble/slate/concrete) and drain pipe, animal bone, plastic and wood. Same as (1001), (3001) and (4001). Measures 750mm (approx.) in depth	Made ground lying across whole site with frequent modern demolition material throughout. Has been disturbed during demolition works when buildings taken down.	
2002	2	Deposit		Moderately compact mid to dark brown clayey sand with frequent charcoal fleck and small stone inclusions, and occasional medium sized stone inclusions. An upper spread of Area 2, it is a homogenised deposit that covers the entire extent of Area 2 (10m by 25m) and beyond. Same as (1091), (3002) and (4002).	Possible medieval soil horizon, may be an earlier topsoil deposit.	
2003	2	Fill		Tightly compacted medium to dark brown silty sand with moderate number of small stone and charcoal inclusions. Extent measured 0.77m wide by 6.3m long and 0.28m deep but extends outwith edge of excavated area.	Fill of linear feature [2035].	I
2004	-	-		Voided	Voided	
2005	-	-		Voided	Voided	
2006	2	Cut		Sub-oval shape in plan. Measured 2.62m N-S, 1.7m E-W and 0.5m deep. Had gentle break of slope at top, steeply sloping sides especially at W side, gentle break of slope at base and a gently concave base. Orientated N-S. Filled by (2071). Cut into natural subsoil (2044) and underlies buried soil (2002).	Cut of pit. Possibly medieval (from ceramics found), located below buried soil (2002).	
2007	2	Deposit		Firm black silty clay layer with frequent charcoal flecks throughout. Measures roughly 1.12m by 0.73m by 0.15m deep. Contained modern white glazed pottery fragments at base. Overlies (2002).	Small spread sitting on top of buried soil (2002). Presence of modern white glazed pottery at the bottom of the deposit indicates it is most likely of modern date.	K
2008	-	-		Voided	Voided	
2009	2	Deposit		Loose dark grey silty clay with charcoal flecks and fragments of brick, stone, animal bone, and modern metal, glass and	Area of modern disturbance, possibly	K

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				pottery. Measured 0.73m by 0.34m in plan and up to 0.45m deep. Overlies (2002).	containing demolition material.	
2010	2	Fill		Firm black silty clay layer with a large number of charcoal inclusions throughout. Measured roughly 0.66m by 0.52m by 0.45m deep. Fragments of clay pipe and modern glass found near to the base suggests a modern date.	Fill of pit [2032]. Fragments of clay pipe and modern glass found near to the base suggests a modern date.	
2011	2	Fill		Firm black silty clay deposit with large number of charcoal inclusions and possible modern and medieval pottery sherds. Measured roughly 1.12m by 0.56m by 0.26m deep but extended outwith the edge of the excavated area.	Fill of pit [2033]. Presence of modern pottery sherds suggests it is likely modern in date.	K
2012	-	-		Voided	Voided	
2013	2	Deposit		Firm black silty clay with a large number of charcoal inclusions. Measures roughly 0.49m by 0.47m by 0.14m deep. Modern pottery fragments found at base. Overlies (2002).	Spread located in a small section in the along the northeastern edge of Area 2. Presence of modern pottery suggests likely modern in date.	K
2014	-	-		Voided	Voided	
2015	2	Fill		Firm black silty clay deposit with a large number of charcoal inclusions. Measured roughly 0.96m by 0.76m by 0.14m deep.	Fill of pit [2034].	K
2016	-	-		Voided	Voided	
2017	2	Cut/Fill		Roughly oval shaped with rounded corners, gradually sloping base and sides. Measured 0.13m deep, 0.85m wide and 1.42m long. Filled by a black, slightly loosely compacted silty sand with occasional small charcoal inclusions. Comes down onto a light brown charcoal heavy layer. Contained shards of modern glass. Cut into (2002).	Cut and fill of pit which is modern in date as modern glass discovered within fill.	K
2018	-	-		Voided	Voided	
2019	-	-		Voided	Voided	
2020	2	Deposit		Firm black silty clay layer with a large number of charcoal inclusions. Measures roughly 0.88m by 0.66m by 0.14m. Overlies (2002).	Spread located in a small section near centre of Area 2. Presence of modern pottery suggests likely modern in date.	K

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
2021	2	Fill		Low compaction mid brown slightly silty sand with charcoal. Measured 0.12m thick by 0.48m by 0.53m.	Fill of small pit [2022].	I
2022	2	Cut		Sub-circular shaped in plan. Measured 0.12m deep by 0.48m long by 0.52m wide. Gradual break of slope at top, steep sides, gradual break of slope at bottom and a flat base. Filled by (2021). Cut into (2002).	Cut of small pit located in the NE of Area 2.	I
2023	-	-		Voided	Voided	
2024	-	-		Voided	Voided	
2025	-	-		Voided	Voided	
2026	2	Cut		Oval shaped in plan. Measured 1.75m in length and 1.55m in width and 0.36m deep. Sharp break of slope with almost vertical but irregular shape on S edge and a more gradual break of slope that truncated by [2035] at the N edge. Uneven base. Filled by (2027). Cut into (2002).	Cut of pit. Truncated by linear feature [2026] at its northeastern end.	I
2027	2	Fill		Tightly compacted medium brown silty sand with a moderate number of charcoal and small stone inclusions. Measured 0.36m thick, 1.55m in extent and 1.75m in length.	Fill of pit [2026].	I
2028	2	Cut		Sub-circular shaped in plan. Measured 0.68m long by 0.75m wide by 0.47m deep. Gradual break of slope at top, steep sides and gradual break of slope at base with a rounded base. Filled by (2030) and (2031). Cut into (2002).	Cut of pit located at the SE extent of Area 2.	I
2029	-	-		Voided	Voided	
2030	2	Fill		Moderately compacted dark slightly greyish brown sand/silt with frequent charcoal. Measured 0.4m thick by 0.68m by 0.75m.	Upper fill of pit [2028].	I
2031	2	Fill		Moderately compact mid orange brown sandy silt. Measured 0.07m deep by 0.45m in section.	Lower fill of pit [2028]. Appears to have slumped or blown in from northern extent	I
2032	2	Cut		Oval shaped feature in plan. Measured 0.66m by 0.52m by 0.45m deep. Extended outwith the edge of the excavated area. Top break of slope was sharp with a gently sloping	Cut of pit. Modern pottery and glass found near the bottom of the feature suggests a modern date. May have	K

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				sides. It curved off to a rounded bottom. Filled by (2010). Cut into (2002).	been a small dump or possibly bioturbation.	
2033	2	Cut		Sub-rectangular shaped in plan with the edge running under trench edge. Measured roughly 1.12m by 0.56m by 0.26m but extended outwith the edge of the excavated area. Had a sharp break of slope with steep sides which curve slightly when it meets the flat bottom. Filled by (2011). Cut into (2002).	Cut of pit, presence of modern pottery in fill suggests it is likely modern in date.	K
2034	2	Cut		Oval shaped in plan orientated NE-SW, narrower at the SW end. Measures 0.96m by 0.76m by 0.14m deep although extends outwith the northeastern edge of the excavated area. Sharp break of slope but gently sloping sides leading towards a rounded bottom. Filled by (2015).	Cut of pit. Uncertain date but likely modern as fill is very similar to surrounding modern features [2012], [2013], [2014], [2014], [2032] and [2033].	K
2035	2	Cut		Linear shaped feature in plan measuring 6.3m in length by 0.77m wide and 0.28m deep. Gradually sloping sides with an almost rounded although somewhat irregular base (due to disturbance from animal burrowing). Located in SE of Area 2 cut into buried soil layer (2002), and orientated SE to NW. Appeared to cut [2026]. Feature runs outwith edge of excavated area so full length unknown. Filled by (2003). Cut into (2002).	Cut of linear feature. Appears to cut [2026].	I
2036	-	-		Voided	Voided	
2037	-	-		Voided	Voided	
2038	2	Cut		Circular shaped in plan. Measured approximately 0.6m in diameter and 0.35m deep. Sharp break of slope at top with steep sides, a gradual break of slope at base and a rounded base. Filled by (2043). Cut into natural subsoil (2044) and underlies buried soil (2002).	Cut of pit.	
2039	-	-		Voided	Voided	
2040	2	Cut		Irregular oval. Maximum depth of 0.42m, minimum depth of 0.38m. Measured 0.64m by 0.59m. Sharp/steep break of slope at top with steep sides, a gradual break of slope at bottom and an uneven base. Possibly truncated by an animal	Cut of pit.	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				burrow. Filled by (2045). Cut into natural subsoil (2044) and underlies buried soil (2002).		
2041	2	Cut		Oval shaped in plan. Maximum depth 0.13m. Dimensions were 0.3m by 0.4m. Gentle break of slope at top with steep sides and a 'U' Shaped break of slope at base and base itself. Filled by (2042). Cut into natural subsoil (2044) and underlies buried soil (2002).	Cut of possible posthole.	
2042	2	Fill		Loose mid-brown silty sand and charcoal inclusions. Extent measured 0.3m by 0.4m and 0.13m deep.	Fill of possible posthole [2041].	
2043	2	Fill		Loose brownish-grey sandy silt with charcoal flecks, animal bone and sub-rounded and sub-angular stones between 5cm and 15cm wide. Extent measured 0.6m in diameter and 0.35m deep.	Fill of pit [2038].	
2044	2	Deposit		Natural subsoil. Grey-yellow sand. Extent unknown.	Natural subsoil across Area 2.	
2045	2	Fill		Loose mid-dark brown slightly silty sand with infrequent charcoal, animal bone and burnt bone, small and medium stones (>10cm wide). Pit dimensions are 0.64m by 0.59m by 0.38 - 0.42m deep.	Fill of pit [2040].	
2046	2	Cut		Sub-oval with rounded corners in plan. Measured 1.3m by 1.1m by 0.22m deep. Gentle break of slope at top with gently sloping sides which are steeper at terminal end, a gentle break of slope at base and a slightly concave base. NW-SE orientated. Filled by (2047). Contained articulated cow remains (2051) and sitting near to stones (2048). Cut into (2002).	Cut of pit containing the remains of an articulated cow burial. Possibly medieval/post medieval given ceramics found within fill (2047). Cut into buried soil layer (2002). Likely associated with pit [2081] which contains another cow burial.	J
2047	2	Fill		Moderate dirty dark greyish brown silty clay with charcoal flecks and lots of animal bone. Measured 0.22m thick by 1.1m by 1.3m. Contained articulated cow remains (2051).	Fill of pit [2046] containing the remains of an articulated cow burial. Medieval/post medieval ceramics found in fill.	J
2048	2	Deposit		Group of sandstone boulders sitting adjacent to pit [2046] on top of buried soil layer (2002). At NE side, components comprise 2 large boulders c. 0.5m by 0.17m by 0.15m while at SW side, components comprise a line of 6 unshaped	Possible platform/foundations/walling/stone structure or deposit of stones sitting on top of buried soil (2002) near to pit	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				stones c. 0.27m by 0.2m by 0.1m. Between the two lines there is a very rough 'possible infill', i.e. lots of smaller stones. Stones are unfinished. There is one course with no bonding and they do not appear to sit within a cut. They form a linear/rectangular shape. Faces NE/SW. Dimensions for whole structure are 1.3m by 0.18m and it is orientated NW-SE.	[2046] with which it may be associated. Are not bonded and do not appear to have sat within a cut.	
2049	-	-		Voided	Voided	
2050	-	-		Voided	Voided	
2051	2	Skeleton	Animal	Articulated animal remains, identified as cow during post-excavation phase, placed in pit [2046]. 'Burial' orientated roughly NW-SE. The full extent of the bones measured 1.6m by 1m.	Articulated animal remains, identified as cow during post-excavation phase, placed in pit [2046]. Likely associated with other cow burial remains (2084).	J
2052	-	-		Voided	Voided	
2053	-	-		Voided	Voided	
2054	-	-		Voided	Voided	
2055	-	-		Voided	Voided	
2056	2	Cut		Linear shaped feature in plan. Slightly rounded terminus at the E. Measured c. 6.2m long, 0.6m wide and 0.5m deep. Runs below unexcavated ground to the W. Gentle break of slope at top with steeply sloping sides and a gentle break of slope at base with concave base. Orientated SE-NW. Filled by (2057). Cut into natural subsoil (2044) and underlies buried soil (2002) and re-deposited natural subsoil layer (2068).	Cut of linear feature. Possibly medieval or post-medieval in date. Part of a series of linear features including [2058], [2060], [2062], [2064], [2066], [2073], [2075] and [2077]. Possibly horticultural.	L
2057	2	Fill		Moderately compact dark greyish brown, very similar to (2002) medieval soil horizon. Sandy silt with charcoal inclusions. Measured c. 6.2m long, 0.6m wide and 0.5m deep.	Fill of linear feature [2056]. Possibly medieval or post-medieval in date due to ceramic inclusions.	L
2058	2	Cut		Linear shaped feature in plan. Slightly rounded terminal at the E. Measured c. 6.2m by 0.8m by 0.4m. Runs below unexcavated ground to the W. Gentle break of slope at top	Cut of linear feature. Possibly medieval or post-medieval in date. Part of a series of linear features including	L

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				with gently sloping sides at the South, steeper at North for c. 0.12m then break of slope at base flattens out for c. 0.12m then break of slope is gentle to the concave base. Orientated SE-NW. Filled by (2059). Cut into natural subsoil (2044) and underlies buried soil (2002) and redeposited natural subsoil layer (2068).	[2056], [2060], [2062], [2064], [2066] and [2073], [2075] and [2077]. Possibly horticultural.	
2059	2	Fill		Moderately compact dark greyish brown similar to (2002) medieval soil horizon. Sandy silt with charcoal inclusions. Measured c. 6.2m by 0.8m by 0.4m.	Fill of linear feature [2058]. Possibly medieval or post-medieval in date due to ceramic inclusions.	L
2060	2	Cut		Linear shaped feature in plan. Rounded terminal to the E. Measured c. 6.2m E-W by 0.9m by 0.5m. Runs below unexcavated ground to the west. Gentle break of slope at top with steeply sloping sides and a gentle break of slope at base with concave base. Orientated SE-NW. Filled by (2061). Cut into natural subsoil (2044) and underlies buried soil (2002) and redeposited natural subsoil layer (2068).	Cut of linear feature. Possibly medieval or post-medieval in date. Part of a series of linear features including [2056], [2058], [2062], [2064], [2066], [2073], [2075] and [2077]. Possibly horticultural.	L
2061	2	Fill		Moderately compact dark greyish brown very similar to (2002) medieval soil horizon. Sandy silt with charcoal inclusions. Measured c. 6.2m E-W by 0.9m by 0.5m.	Fill of linear feature [2060]. Possibly medieval or post-medieval in date due to ceramic inclusions.	L
2062	2	Cut		Linear shaped feature in plan. Rounded terminal to the E. Measured c. 6.2m by 0.9m by 0.4m. Runs below unexcavated ground to the W. Gentle break of slope at top with steeply sloping sides at South, nearly vertical at North, gentle break of slope at base and an almost flat base. Orientated SE-NW. Filled by (2063). Cut into natural subsoil (2044) and underlies buried soil (2002) and redeposited natural subsoil layer (2068).	Cut of linear feature. Possibly medieval or post-medieval in date. Part of a series of linear features including [2056], [2058], [2060], [2064], [2066], [2073], [2075] and [2077]. Possibly horticultural.	L
2063	2	Fill		Moderately compact dark grey brown very similar to medieval soil horizon (2002). Sandy silt with charcoal inclusions. Measured c. 6.2m by 0.9m by 0.4m.	Fill of linear feature [2062]. Possibly medieval or post-medieval in date due to ceramic inclusions.	L
2064	2	Cut		Linear shaped feature in plan. Rounded terminal at E. Measured c. 6.2m by 0.9m by 0.4m. Runs below unexcavated ground to the W. Gentle break of slope at top with steeply sloping sides at S and nearly vertical at the N.	Cut of linear feature. Possibly medieval or post-medieval in date. Part of a series of linear features including [2056], [2058], [2060], [2062], [2066],	L

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				Gentle break of slope at base and concave base. Orientated SE-NW. Filled by (2065). Cut into natural subsoil (2044) and underlies buried soil (2002) and redeposited natural subsoil layer (2068).	[2073], [2075] and [2077]. Possibly horticultural.	
2065	2	Fill		Moderately dark grey brown, very similar to (2002) medieval soil horizon. Sandy silt with charcoal inclusions. Measured c. 6.2m by 0.9m by 0.4m.	Fill of linear feature [2064]. Possibly medieval or post-medieval in date due to ceramic inclusions.	L
2066	2	Cut		Linear shaped feature in plan. Rounded terminal at E. Measured c. 6.2m by 0.8m by 0.4m. Runs below unexcavated ground to the W. Gentle break of slope at top with gentle sloping sides, gentle break of slope at base and an almost flat base. Orientated SE-NW. Filled by (2067). Cut into natural subsoil (2044) and underlies buried soil (2002) and redeposited natural subsoil layer (2068).	Cut of linear feature. Possibly medieval or post-medieval in date. Part of a series of linear features including [2056], [2058], [2060], [2062], [2064], [2073], [2075] and [2077]. Possibly horticultural.	L
2067	2	Fill		Moderately compact dark grey brown very similar to (2002). Sandy silt with charcoal inclusions. Measured c. 6.2m by 0.8m by 0.4m.	Fill of linear feature [2066] Possibly medieval or post-medieval in date due to ceramic inclusions.	L
2068	2	Deposit		Loose mixed yellow/brown/orange sand with some silty pockets. Measured 10m (SW-NE) by 7m (NW-SE) in plan although ran outwith the excavated area to the NE, NW and SW. It ranged in depth from 250 to 500mm. Underlies buried soil (2002) in the NW end of Area 2 and overlies features cut into natural subsoil (2044). Ran into NW end of Area 4 but was removed along with buried soil (4002) and not given a separate number.	Layer of re-deposited natural subsoil under buried soil (2002) across the NW end of Area 2.	
2069	2	Cut		Sub-circular shaped in plan. Measured 0.7m diameter by c.10cm depth. Gradual break of slope at top, gently sloping sides, gentle break of slope at base and an uneven rounded base. Filled by (2070). Cut into natural subsoil (2044) and underlies buried soil (2002).	Cut of pit. Possible medieval pit/midden close to pit [2006].	
2070	2	Fill		Tight/very compact dark brown-black clayey sand with charcoal flecks and some animal bone. Measured 0.7m diameter by c.10cm depth.	Fill of pit [2069].	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
2071	2	Fill		Moderately compact dark grey-brown sandy silt with charcoal flecks and small stones. Extent measures 2.62m by 1.7m by 0.5m deep.	Fill of pit [2006].	
2072	-	-		Voided	Voided	
2073	2	Cut		Linear shaped feature in plan. Steeply sloping sides with a concave base. Measured 0.6m across by 0.5m deep by 6m long. Runs outwith NW edge of excavated area. Orientated SE-NW. Filled by (2074). Cut into natural subsoil (2044) and underlies buried soil (2002) and redeposited natural subsoil layer (2068).	Cut of linear feature. Possibly medieval or post-medieval in date. Part of a series of linear features including [2056], [2058], [2060], [2062], [2064], [2066], [2075] and [2077]. Possibly horticultural.	L
2074	2	Fill		Dark grey-brown sandy silt with charcoal inclusions. Measured 0.6m across by 0.5m deep by 6m long. Similar to buried soil layer (2002).	Fill of linear feature [2073]. Possibly medieval or post medieval in date.	L
2075	2	Cut		Linear shaped feature in plan. Steeply sloping sides with a concave base. Measured 0.8m across by 0.5m deep by 6m in length. Runs outwith NW edge of excavated area. Orientated SE-NW. Filled by (2076). Cut into natural subsoil (2044) and underlies buried soil (2002) and redeposited natural subsoil layer (2068).	Cut of linear feature. Possibly medieval or post-medieval in date. Part of a series of linear features including [2056], [2058], [2060], [2062], [2064], [2066], [2073] and [2077]. Possibly horticultural.	L
2076	2	Fill		Dark grey-brown sandy silt with charcoal inclusions. Measured 0.8m across by 0.5m deep by 6m in length. Similar to buried soil layer (2002).	Fill of linear feature [2075]. Possibly medieval or post medieval in date.	L
2077	2	Cut		Linear shaped feature in plan. Steeply sloping sides with a concave base. Measured 1m across by 0.5m deep by 6m long. Runs outwith NW edge of excavated area. Orientated SE-NW. Filled by (2078). Cut into natural subsoil (2044) and underlies buried soil (2002) and redeposited natural subsoil layer (2068).	Cut of linear feature. Possibly medieval or post-medieval in date. Part of a series of linear features including [2056], [2058], [2060], [2062], [2064], [2066], [2073] and [2075]. Possibly horticultural.	L
2078	2	Fill		Dark grey-brown sandy silt with charcoal inclusions. Measured 1m across by 0.5m deep by 6m long. Similar to buried soil layer (2002).	Fill of linear feature [2077]. Possibly medieval or post medieval in date.	L
2079	2	Cut		Square cut shape in plan. Measured 0.8m by 0.8m in plan. Located in southern corner cut into buried soil layer (2002).	Cut of modern pit containing modern demolition material.	K

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				Not excavated.		
2080	2	Fill		Dirty black gritty silty sand with patches of redeposited natural subsoil. Contained fragments of brick, modern glazed ceramics and iron fragments.	Fill of [2079].	K
2081	2	Cut		Roughly square shaped in plan. Measured 1.2m NE-SW, 1m NW-SE and 0.3m deep. Gentle break of slope at top with steeply sloping sides, gentle break of slope at base and concave base. Upper portion of cut appears to have been very disturbed making it difficult to see. Filled by (2082) and (2083) containing articulated animal burial remains (2084). Appears to be cut into buried soil (2002).	Cut of pit containing the remains of an articulated cow burial. Possibly medieval/post medieval given ceramics found within fills. Appears to be cut into buried soil layer (2002). Likely associated with pit [2046] which contains another cow burial.	J
2082	2	Fill		Soft light greyish yellow sand, c.20cm deep. Measured 1.2m by 1m in extent in plan.	Upper fill of pit [2081] formed of re-deposited natural subsoil which appears to have been disturbed.	J
2083	2	Fill		Loose dirty black brown sandy silt, c.10cm deep. Measured 1.2m by 1m in extent in plan. Contained articulated remains of animal burial (2084).	Lower fill of [2081]. Contained articulated remains of animal burial (2084).	J
2084	2	Skeleton	Animal	Remains of animal burial in articulated sections. Possibly disturbed by heavy truncation from above. Set in pit [2081] within fill (2083). Head/skull on S side with spine orientated from SW to NE mainly, but in sections. Approximately 1.5m wide in square shaped extent.	Articulated animal remains, identified as cow during post-excavation phase, placed in pit [2046]. Likely associated with other cow burial remains (2051).	J

### Context Register – Area 3

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
3001	3	Deposit		Modern overburden covering whole trench comprising of brick, glass, modern pottery and other detritus. c. 1.5m thick. Overlying medieval soil horizon (3002). Same as (1001), (2001) and (4001).	Modern made ground which covers whole of site. Contains demolition material from recent demolition of upstanding buildings.	
3002	3	Deposit		Moderately compact, chocolate-brown sandy silt. Frequent	Possible medieval soil horizon.	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				charcoal flecks. Some small stone inclusions and pottery sherds. Covers entire site in plan and measures c. 0.2m - 0.4m thick. Immediately below modern overburden (3001). Same as (1091), (2002) and (4002).		
3003	3	Deposit		Moderately compact golden yellow gritty sand covering entire site. Contains some post medieval to medieval ceramic sherds. Underlies (3002).	Natural subsoil.	
3004	3	Cut		Linear feature running on NW-SE alignment measuring 4.68m long by 0.82m wide by 0.24m deep. Full extent unknown as runs outwith NW trench edge. Rounded SE terminal end. Sharp break of slope with steeply sloping sides but reaches an uneven pointed base. Filled by (3005) and cuts into buried soil (3002).	Cut of linear feature. Part of F5:F16a series of linear features including [3006], [3008], [3010], [3012], [3014], [3016] and [3018]. Possibly horticultural.	M
3005	3	Fill		Medium/firm compact very dark brown/black clay silt with a small amount of charcoal inclusions alongside infrequent small stones. Measures 4.86m long by 0.82m wide by 0.24m deep. Full extent unknown as runs out of NW trench edge. Similar fill to (3007), (3009), (3011), (3013), (3015), (3017) and (3019).	Fill of linear feature [3004].	M
3006	3	Cut		Linear feature running on NW-SE alignment measuring roughly 4.88m long by 0.80m wide by 0.23m deep. Full extent unknown as runs outwith NW trench edge. Rounded SE terminal end. Sharp break of slope with steeply sloping sides which meet at a relatively flat base. Filled by (3007) and cuts into buried soil (3002).	Cut of linear feature. Part of a series of linear features including [3004], [3008], [3010], [3012], [3014], [3016] and [3018]. Possibly horticultural.	M
3007	3	Fill		Medium/firm compact very dark brown-black clay silt with a small amount of charcoal inclusions alongside infrequent stone inclusions. Measures 4.88m long by 0.8m wide by 0.23m deep. Full extent unknown as runs out of NW trench edge. Similar fill to (3005), (3009), (3011), (3013), (3015), (3017) and (3019).	Fill of linear feature [3006].	M
3008	3	Cut		Linear feature running on NW-SE alignment measuring 4.83m long by 0.85m wide by 0.26m deep. Full extent unknown as runs outwith NW trench edge. Rounded SE	Cut of linear feature. Part of a series of linear features including [3004], [3006], [3010], [3012], [3014], [3016] and	M

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				terminal end. Sharp break of slope with steeply sloping sides - nearly vertical - which meet at a slightly curved bottom. Filled by (3009) and cuts buried soil (3002).	[3018]. Possibly horticultural.	
3009	3	Fill		Medium/firm compacted very dark brown clay/silt with a small amount of charcoal inclusions alongside infrequent small stone inclusions. Measures roughly 4.83m long by 0.85m wide by 0.26m deep. Full extent unknown as runs into NW trench edge. Similar fill to (3005), (3007), (3011), (3013), (3015), (3017) and (3019).	Fill of linear feature [3008].	M
3010	3	Cut		Linear feature running on NW-SE alignment measuring roughly 4.84m long by 0.68m wide by 0.26m deep. Full extent unknown as runs outwith NW trench edge. Rounded SE terminal end. Has sharp break of slope with steeply sloping sides which meet at a flat bottom. Filled by (3011) and cuts buried soil (3002).	Cut of linear feature. Part of a series of linear features including [3004], [3006], [3008], [3012], [3014], [3016] and [3018]. Possibly horticultural.	M
3011	3	Fill		Medium/firm compacted very dark brown/black clay/silt with a small amount of charcoal inclusions alongside possible mortar relating to modern foundations lying to the NE of the linear. Measures roughly 4.84m by 0.68m by 0.26m with a NW-SE alignment. Full extent unknown as runs into NW trench edge. Similar fill to (3005), (3007), (3009), (3013), (3015), (3017) and (3019).	Fill of linear [3010]. Possible post-medieval horticultural feature. May also relate to linear features in Areas 1, 2 and 3.	M
3012	3	Cut		Linear feature running on NW-SE alignment measuring roughly 4.38m long by 0.84m wide by 0.26m deep. Full extent unknown as runs outwith NW trench edge. Rounded terminal end. Has a SE sharp break of slope and a vertical side which meets at a very flat base. Filled by (3013), cuts buried soil (3002) and cut on NE edge by modern concrete foundation.	Cut of linear feature. Part of a series of linear features including [3004], [3006], [3008], [3010], [3014], [3016] and [3018]. Possibly horticultural.	M
3013	3	Fill		Medium/firm compacted very dark brown/black clay/silt with a small number of charcoal inclusions alongside infrequent stone inclusions. Full extent unknown as runs into NW trench edge. Measures roughly 4.38m by 0.84m by 0.26m. Similar fill to (3005), (3007), (3009), (3011), (3015), (3017) and	Fill of linear feature [3012].	M

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				(3019).		
3014	3	Cut		Linear feature running on NW-SE alignment measuring roughly 4.35m long by 0.72m wide by 0.29m deep. Full extent unknown as runs outwith NW trench edge. Rounded terminal end. Has a sharp break of slope with a nearly vertical side which meets an uneven base. Fill form by (3015), cuts buried soil (3002) and cut on SW edge by modern concrete foundation.	Cut of linear feature. Part of a series of linear features including [3004], [3006], [3008], [3010], [3012], [3016] and [3018]. Possibly horticultural.	M
3015	3	Fill		Medium/firm compacted very dark brown/black clay/silt with a small number of charcoal inclusions and infrequent stones. Measures roughly 4.35m long by 0.72m wide by 0.29m deep. Full extent unknown as runs into NW trench edge. Similar fill to (3005), (3007), (3009), (3011), (3013), (3017) and (3019).	Fill of linear feature [3014].	M
3016	3	Cut		Linear feature running on NW-SE alignment measuring roughly 4.3m long by 0.90m wide by 0.27m deep. Full extent unknown as runs outwith NW trench edge. Rounded terminal end. Has a sharp break of slope with steeply sloping sides which meet at a concave base. Filled by (3017) and cuts buried soil (3002).	Cut of linear feature. Part of a series of linear features including [3004], [3006], [3008], [3010], [3012], [3014] and [3018]. Possibly horticultural.	M
3017	3	Fill		Medium/firm compacted very dark brown/black clay/silt with a small amount of charcoal and infrequent stones. Measures roughly 4.3m long by 0.9m wide by 0.27m deep. Full extent unknown as runs into NW trench edge. Similar fill to (3005), (3007), (3009), (3011), (3013), (3015) and (3019).	Fill of linear feature [3016].	M
3018	3	Cut		Linear feature running on NW-SE alignment measuring 3.94m long by 1.02m wide by 0.30m deep. Full extent unknown as runs outwith NW trench edge. Rounded terminal end. Has sharp break of slope with steep, nearly vertical sides which meet at a concave base. Filled by (3019) and cuts into buried soil (3002).	Cut of linear feature. Part of a series of linear features including [3004], [3006], [3008], [3010], [3012], [3014] and [3016]. Possibly horticultural.	M
3019	3	Fill		Medium/firm compacted very dark brown/black clay silt with a small amount of charcoal inclusions and infrequent stones. Measures roughly 3.94m long by 1.02m wide by 0.30m deep. Full extent unknown as runs into NW trench edge. Similar fill	Fill of linear [3018]. Possible post-medieval horticultural feature. May also relate to linear features in Areas 1, 2 and 3.	M

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				to (3005), (3007), (3009), (3011), (3013), (3015) and (3017).		
3020	3	Cut		Large circular pit forming the cut of a wood lined feature. Measures 3.7m in diameter by 1.1m at deepest. Gradual break of slope at top with steeply sloping sides and a sharp break of slope at base with a gentle concave base. Filled by wood [3063], (3061), (3062), (3034), and (3033). Cuts into natural (3003), underlying buried soil (3002).	Cut of pit - wood lined feature of medieval or post medieval date. Possibly associated with adjacent pit [3021].	
3021	3	Cut		Sub-circular shaped cut measuring 3.5m from SW-NE, 2.5m from SE-NW and 0.72m at deepest. Has a gentle break of slope at top with gently sloping sides, and gentle break of slope at base with a flat base. Filled by (3067), (3068), (3069), (3070), (3071) and (3072). May be related to [3020]. Cuts into natural (3003), underlying buried soil (3002).	Cut of pit, possible associated with adjacent to [3020].	
3022	3	Cut		Cut of linear feature of NW-SE alignment, measuring roughly 4.7m long by 1.88m wide by 0.5m deep. Has a gentle break of slope and gentle sloping sides which drops away sharply with a vertical edge to meet an uneven base. Filled by (3065), (3066), (3064) and (3054). Cuts pit [3023]. Cuts into natural (3003), underlying buried soil (3002).	Cut of linear feature which cuts pit [3023].	
3023	3	Cut		Cut of oval pit of NE-SW alignment measuring roughly 2.4m long by 0.88m wide by 0.5m deep. Has sharp break of slope with a steep slope which then slopes more gently halfway down to meet at an obtuse angle to the curved bottom. Cut by pit [3022]. Filled by (3053). Cuts into natural (3003), underlying buried soil (3002).	Cut of pit. Truncated by linear feature [3022] on SE side.	
3024	3	Cut		Sub-circular shaped pit measuring 1.40m wide by 1.50m long by 0.38m maximum depth. Gradual sloping sides, steep break of slope at the top at northern end and gradual on southern end with a flat base and rounded break of slope at the bottom. There are a number of silted layers within fills suggesting periods of high water saturation which may suggest that the feature was left open or is associated with some form of activity/use. Filled by (3035) and (3036). Cuts into natural (3003), underlying buried soil (3002).	Cut of sub-circular pit.	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
3025	-	-		Voided	Voided	
3026	3	Cut		Large linear feature running, on NE-SW alignment, continuing outwith both SW and NE trench edges. Full extent unknown but visible dimensions measure roughly 9.02m long by 1.30m wide by 0.69m deep. Sharp break of slope with steep sloping sides which meet at a pointed bottom. Cuts into natural (3003), underlying buried soil (3002). Filled by (3039), (3040) and (3041).	Linear cut of possible medieval date. Likely related to linear features [3032] and [3042].	N
3027	-	-		Voided	Voided	
3028	3	Cut		Linear feature of NW-SE alignment measuring roughly 3m long by 0.95m wide by 0.14m deep. Runs outwith trench to SE. Sharp break of slope on NE side with steep sides while the SE is a gentle break of slope with gentle sloped sides meeting a relatively flat base. The base dips off slightly to the NE. Possibly truncated by [3026]. Filled by (3051). Cuts into natural (3003), underlying buried soil (3002).	Cut of linear feature - possible medieval date. May relate to linear feature [3030].	O
3029	-	-		Voided	Voided	
3030	3	Cut		Linear feature running on a NW-SE alignment measuring roughly 5.40m long by 0.79m wide by 0.08m deep but full extent unknown as runs into SE edge trench edge. Has a sharp break of slope with gentle sloping sides which curve to meet an uneven base. Filled by (3050). Possibly truncated by [3026]. Cuts into natural (3003), underlying buried soil (3002).	Cut of linear feature of possible medieval date. May relate to linear feature [3028].	O
3031	3	Fill		A light-mid brown silty sand of moderate compaction with very infrequent charcoal inclusions. Measures roughly 5.10m long by 0.78m wide by 0.14m deep with a NW-SE alignment. Full extent unknown as runs into SE trench edge.	Fill of linear feature [3038].	
3032	3	Cut		Linear of NW-SE alignment running alongside trench edge. Measures roughly 12.2m long by 1.3m wide by 0.7m deep though full extent is unknown as continues outwith trench to the SE. Sharp break of slope with gently sloping sides which meet at a flat bottom. Filled by (3052). Cuts into natural (3003), underlying buried soil (3002).	Linear cut of possible medieval date. Likely related to linear features [3026] and [3042].	N

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
3033	3	Fill		Moderate/firm compacted dark greyish brown silty sand with occasional charcoal flecks measuring 3.7m in diameter and 0.5m at thickest. Overlies (3034).	Upper fill of pit [3020].	
3034	3	Fill		Firm/hard blackish brown loamy clay measuring up to 3.7m in diameter and 0.18m thick. Underlies (3033) and overlies (3062).	Fill of pit [3020].	
3035	3	Fill		Slightly compact sand (medium grain) with thin layers of silt throughout and some thin organic layers and medium dark brown with areas of mixed lighter patches of sand. Very mixed at points. Small wood and burnt bone fragment inclusions. Measures 1.40m wide by 1.50m long and 0.38m deep. Underlies (3036).	Primary fill of pit [3024].	
3036	3	Fill		Slightly compact light brown sand (very similar to natural). Measuring 0.5m wide by 0.7m long by 0.2m deep. Overlies (3035).	Secondary fill of pit [3024] - possibly redeposited natural.	
3037	3	Structure	Stone	Large linear deposit of concrete running on a NW-SE alignment from the NW trench edge measuring 4.79m long by 1.45m wide. Comprised of large stone slabs and mortar. Cuts into buried soil (3002) and linear features [3012] and [3014].	Modern concrete - possible part of a foundation.	
3038	3	Cut		Linear feature of NW-SE alignment measuring 3.1m long by 0.78m wide by 0.14m deep. Full extent unknown as runs from SE trench edge. Has gentle break of slope with gently sloping sides which meet at a fairly flat bottom. Rounded NW terminal end. Filled by (3031). Cuts into natural (3003), underlying buried soil (3002).	Cut of linear feature. Possibly associated with linear features [3028] and [3038].	
3039	3	Fill		A relatively loose light brown/beige sand measuring up to 9.02m long by 0.74m wide by 0.52m deep in section. Underlies (3040) and (3041).	Primary fill of linear feature [3026].	N
3040	3	Fill		Mid-brown loose silty sand measuring up to 9.02m long by 1.02m wide by 0.26m deep. Underlies (3041) and overlies (3039).	Secondary fill of linear feature [3026].	N
3041	3	Fill		Comprised of relatively loose light brown silty sand	Tertiary fill of linear feature [3026].	N

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				measuring up to 9.02m long by 1.02m by 0.35m. Overlies (3040) and (3039).		
3042	3	Cut		Linear running on NNE-SSE alignment into trench edge measuring roughly 9.3m long by 2.06m wide by 0.53m deep, although runs outwith excavated area to the NE and SW. NW side slopes steeply to meet a curved bottom which then rises slightly to become relatively flat. The feature has been cut by possible posthole [3057] at the SW end, and it cuts into spread (3055). Cut is lined by a very thin layer of clay. Filled (3043) and (3060). Cuts into natural (3003), underlying buried soil (3002).	Linear cut of possible medieval date. Likely related to linear features [3026] and [3032].	N
3043	3	Fill		Comprised of moderately compact beige/light brown mottled sand measuring roughly 9.3m long by 2.06m wide by 0.53m deep. Underlies (3060). Cut by posthole/bucket [3057].	Primary fill of linear [3042].	N
3044	3	Cut		Linear running NE-SW into southern trench edge, with visible section measuring roughly 3.3m long by 0.31m wide by 0.03m deep. Has sharp break of slope with steep sides which meets at a curved break of slope base and a relatively flat bottom. Cuts into the spread (3055). Filled by (3045). Underlies buried soil (3002).	Cut of linear shallow linear feature.	
3045	3	Fill		Comprised of dark brown/black loose-mid compacted silty clay measuring roughly 3.3m long by 0.31m wide by 0.03m deep.	Fill of linear [3044].	
3046	-	-		Voided	Voided	
3047	-	-		Voided	Voided	
3048	-	-		Voided	Voided	
3049	-	-		Voided	Voided	
3050	3	Fill		Loose dark yellow/light orange sand with small pockets of medium brown silty sand. Measures 5.40m long by 0.79m wide by 0.08m deep but full extent unknown as runs into SE trench edge.	Fill of linear feature [3030].	O
3051	3	Fill		Loose/moderately compact medium brown silty sand	Fill of linear feature [3028].	O

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				measuring up to 3m long by 0.95m wide by 0.14m deep. Heat affected sand lies underneath which suggests area of burning.		
3052	3	Fill		Moderately compact sandy silt containing very small lenses of orange sand on SW side. Full extent unknown but measures roughly 12.2m long by 1.3m wide by 0.7m deep.	Fill of linear feature [3032].	N
3053	3	Fill		Moderately compact light brown sandy silt. Measures roughly 2.4m long by 0.88m wide by 0.5m deep.	Fill of pit [3023].	
3054	3	Fill		Loose black loamy organic silty sand measuring 2.4m long by 0.7m wide by 0.4m deep. Present in small portion against northwestern edge of pit [3022]. Underlies (3064).	Fill within pit [3022] against northwestern side.	
3055	3	Deposit		Light-mid brown silty sand with a small amount of burnt orange sandy specks within. Covers an area which measures 9.3m long by 3.2m wide by 0.17m deep. Cut by linear [3042] and overlies (3059).	Spread/deposit. Possible build up of soil from the area being in use for burgage plots.	
3056	3	Deposit		Loose grey/black sand which is roughly 0.03m deep. Lies on top of natural and underneath (3059).	Thin band of darker sand revealed in section at NW end of Area 3, appears to have formed naturally, possibly from old water levels.	
3057	3	Cut		Shape in plan unknown as uncovered in section, measures roughly 0.4m wide and 0.4m deep. Has a sharp break of slope at top with vertical sides which meets the flat bottom at a right angle. Cuts into linear feature [3042]. Filled by (3058). Underlies buried soil (3002).	Cut of possible posthole. It appeared to cut [3042] and be a later feature, but after it went out of use possibly got partly backfilled by the surrounding fill of [3042] making the cut harder to see in the upper portion.	
3058	3	Fill		Very dark brown sandy silt of moderate to firm compaction. Full extent unknown in plan but roughly measures 0.4m wide by 0.4m deep.	Fill of [3057].	
3059	3	Deposit		Thin layer visible in section at NW end, comprising of a loose beige sand with a small number of burnt orange specks. Full extent unknown but measures roughly 0.22m thickness.	Sand deposit revealed in section at NW end of Area 3, appears likely to be natural subsoil same as (3003) but separated by natural band of material (3056).	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
3060	3	Fill		Moderately compact dark brown sandy silt with a small number of charcoal inclusions. Full extent unknown but measures roughly 9.3m long by 2.06m wide by 0.3m deep. Seems to be cut by [3057] but also lies on top suggesting that one side of [3057] collapsed or eroded away. Overlies (3043).	Secondary fill of [3042].	N
3061	3	Fill		Firm compact dark greyish brown clay sand measuring up to 3.7m in diameter and 0.2m thick. Underlies (3062) and overlies [3063].	Fill within pit [3020].	
3062	3	Fill		Firm dull orange yellow sand measuring up to 3.7m in diameter and 0.38m thick. Underlies (3034) and overlies (3061).	Fill within pit [3020].	
3063	3	Structure	Timber	Remains of wood lining, set against SE edge of base of large pit [3020]. Roughly N-S alignment measuring 1.98m long, 0.12m wide and 0.09m thick. The wood is in good condition with three layers of planks visible/recorded. Underlies (3061).	Possible wood lining at base of pit [3020].	
3064	3	Fill		Moderate-firm dark brown silty sand with a small number of charcoal inclusions. Measures roughly 4.7m long by 1.88m wide by 0.5m deep. Overlies (3065) and (3066). (3064), (3065) and (3066) may simply all be lenses within a singular fill.	Upper and main fill of linear feature [3022].	
3065	3	Fill		Lenses of beige sand, orange sand and clay and ranges from loose to firm compaction. Measures roughly up to 4.7m long by 1.34m wide by 0.29m deep in section. Underlies (3064).	Fill of linear feature [3022].	
3066	3	Fill		Lenses of beige sand, orange sand and clay ranging from loose to firm compaction. Measures up to 4.7m long by 1.72m wide by 0.42m deep. Similar to (3065). Underlies (3064).	Fill of linear feature [3022].	
3067	3	Fill		Moderate mild brown mottled silty sand with black loamy clay at base similar to (3034). Measures 1.08m SW-NE by up to 2.5m SE-NW and 0.24m deep. Overlies (3068).	Upper fill of pit [3021].	
3068	3	Fill		Soft to moderately compact light yellow brown mottled silty sand. Measures 1.68m SW-NE by up to 2.5m SE-NW by	Fill of pit [3021].	

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Feature Group
				0.14m deep. Underlies (3067) and overlies (3069) and (3071).		
3069	3	Fill		Moderate mid-dark brown sand with loam and charcoal fleck inclusions. Measures up to 2.34m SW-NE by up to 2.5m SE-NW by 0.15m deep. Underlies (3068) and overlies (3070) and (3071).	Fill of pit [3021].	
3070	3	Fill		Moderate mottled mid brown and light orange brown sandy silt with occasional charcoal flecks. Measures up to 0.94m SW-NE by up to 2.5m SE-NW by 0.09m thick. Underlies (3069) and overlies (3071).	Fill of pit [3021].	
3071	3	Fill		Moderate marbled mid brown, dark brown and beige sand with organic material, loamy sand and charcoal fleck inclusions. Measures 3.8m SW-NE by up to 2.5m SE-NW by 0.28 deep. Underlies (3068), (3069) and (3070), and overlies (3072).	Fill of pit [3021].	
3072	3	Fill		Moderate to firm mid-dark brown silty sand with some clay. Measures 2.26m SW-NE by up to 2.5m SE-NW by 0.20m thick. Underlies (3071).	Basal fill of pit [3021].	

#### Context Register – Area 4

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
4001	4	Deposit		Modern overburden. Compact very dark brown/black silty clay with frequent inclusions of demolition material (brick/sandstone/rubble/slate/concrete) and drain pipe, animal bone, plastic and wood. Shallower towards S end of Area 1 (approximately 400mm), getting deeper towards NE end (approximately 1m).	Modern overburden covering the entire site (same as 1001, 2001 and 3001).		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
4002	4	Deposit		Moderately compact mid to dark brown clayey sand with frequent charcoal fleck and occasional medium sized stone inclusions. Also includes frequent medieval pottery finds. Same as (1091), (2002) and (3002). Measured approximately 0.4 to 0.6m thick.	Buried soil layer covering the entirety of Area 4 and continuing into (2002) in area 2 and beyond to the NW and NE of site. Medieval to Post-Medieval in date.		
4003	4	Cut		Circular shaped in plan. Measured 0.28m diameter and 0.12m deep. Break of slope at the top sharp, the sides were steeply - gently sloping, the break of slope at the base was gradual - abrupt and the base was rounded. Filled by (4010). Cut into surface of buried soil (4002).	Cut of possible posthole.		
4004	-	-		Voided	Voided		
4005	4	Fill		Moderately compacted grey white mortar with fragments of pottery and shell throughout. Also occasional animal bone inclusions. Extent 1.2m across, c.3m long in plan and c.0.16m thick. Underlies (4044) and overlies (4046) within cut [4051].	Fill within large pit [4051].		
4006	4	Fill		Moderately compacted black charcoal layer with no inclusions. Extent c.1.2m across, c.3m long in plan and c.0.05m thick. Overlies (4044) within cut [4051].	Fill within large pit [4051].		
4007	4	Fill		Very loosely compacted red brown silty sand with very frequent brick building debris, small stone, coke/coal and degraded bone inclusions. Extent 0.45m by 0.3m and 0.1m deep. Underlies (4001) and fills [4037].	Fill of possible posthole [4037], appears likely to be modern in date.		
4008	4	Fill		Firmly compacted grey black silty clay with frequent charcoal inclusions. One piece of medieval pottery (Find No. 266) was recovered from within the fill. Extent 1.55m long, 0.69m wide	Fill of linear shaped feature [4041].		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
				and 0.24m deep. Underlies (4001) and fills [4041].			
4009	-	-		Voided	Voided		
4010	4	Fill		Moderately compacted dark grey clayey silt with some sandy pockets within fill makeup. Occasional small stone inclusions as well as pottery sherds (Find No. 261). Extent 0.28m diameter and 0.12m deep.	Fill of possible posthole [4003].		
4011	-	-		Voided	Voided		
4012	4	Cut		Circular shaped in plan. Measured 0.7m diameter and 0.64m deep. Break of slope at the top sharp, the sides were almost vertical, the break of slope at the base was sharp and the base was flat. Filled by (4036), (4045) and (4055) which show evidence of a post pipe and possible packing stones at base. Cut into surface of buried soil (4002).	Cut of possible posthole which has been cut into the fills of larger pit [4056] at its SW end.		
4013	4	Cut		Sub-circular shaped in plan. Measured 0.55m N-S, 0.6m E-W and was 0.18m deep. Break of slope at the top sharp, the sides were steep, the break of slope at the base was gradual and the base was flat - undulating. Filled by (4027). Cut into surface of buried soil (4002).	Cut of pit of which function is unclear.		
4014	-	-		Voided	Voided		
4015	-	-		Voided	Voided		
4016	4	Fill		Moderately to firmly compacted dark brown sandy clay with charcoal flecking inclusions. Late medieval or post-medieval pottery sherds and clay pipes and bone recovered from fill (Find No. 281, 282 and 283). Extent 0.96m by 0.72m by 0.42m deep.	Fill of pit [4060].		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
4017	4	Fill		Loosely compacted dark grey sandy silt with infrequent (1-5%) charcoal inclusions. Extent 3.8m diameter and 0.88m deep. Overlies (4052).	Upper fill of large pit [4043] and adjoining pit [4069].		
4018	4	Fill		Moderately compacted dark brown silty sand with very infrequent (1%) small stone inclusions. Pottery sherd recovered (Find No. 253). Extent 0.6m by 0.5m by 0.29m deep.	Fill of posthole [4023].		P
4019	4	Fill		Moderately compacted dark brown silty sand with coal/charcoal inclusions. Extent 0.27m by 0.18m by 0.11m deep.	Fill of posthole [4030]		P
4020	4	Fill		Moderately compacted dark brown silty sand with very infrequent (1%) gravel inclusions. Post medieval pottery sherds recovered (Find No. 260). Extent 0.26m deep. Overlies (4038).	Upper fill of pit [4031].		P
4021	4	Deposit		Group of small irregular shaped stones (approximately 20 in total) sitting in a matrix of moderately compacted dark brown silty sand with no inclusions. Full extent measured 0.25-0.3m long and 0.07-0.15m deep. Surrounded by spread (4059) with which it appears to be associated. Overlying buried soil (4002).	A group of small stones which appear to have been dumped, possible rubble demolition material.		
4022	-	-		Voided	Voided		
4023	4	Cut		Sub-circular shaped in plan. Measured 0.6m by 0.5m by 0.29m deep. Break of slope at the top sharp, the sides were steep, the break of slope at the base was sharp and the base was concave. Filled by (4018). Cut into surface of buried soil (4002).	Cut of possible posthole associated with [4030] and [4031].		P

4026	-	-		Voided	Voided		
4027	4	Fill		Moderately compacted dark grey brown sandy silt with infrequent small rounded stone inclusions. Extent 0.55m N-S, 0.6m E-W and was 0.18m deep.	Fill of pit [4013].		
4028	4	Fill		Loosely compacted dark brown/black sandy silt with occasional small stone inclusions. Extent 0.38m E-W, 0.3m N-S and 0.06m deep.	Fill of small pit [4042].		
4029	-	-		Voided	Voided		
4030	4	Cut		Sub-circular shaped in plan. Measured 0.27m by 0.18m by 0.11m deep. Break of slope at the top sharp, the sides were steep, the break of slope at the base was sharp and the base was concave/pointed. Filled by (4019). Cut into surface of buried soil (4002).	Cut of possible posthole associated with [4023] and [4031].		P
4031	4	Cut		Sub-circular shaped in plan. Measured 0.76m by 0.6m by 0.35m deep. Break of slope at the top sharp, the sides were steep, the break of slope at the base was gradual and the base was concave. Filled by (4020) and (4038). Cut into surface of buried soil (4002).	Cut of possible posthole associated with [4023] and [4030].		P
4032	4	Fill		Loosely compacted dark brown/black sandy silt with occasional small sub-rounded and sub-angular stone. Fragments of modern glass, sheet metal and modern pottery were present. Extent 0.96m by 0.4m by 0.48m deep.	Fill of modern pit [4039].		
4033	-	-		Voided	Voided		
4034	-	-		Voided	Voided		
4035	-	-		Voided	Voided		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
4036	4	Fill		Moderately compacted dark grey clayey silt with occasional small stone, mortar and charcoal inclusions. Extent 0.39m deep. Overlies (4055) and (4045).	Upper and inner fill of possible posthole [4012] which appears to form the remains of a possible post pipe which has infilled after the pipe was removed.		
4037	4	Cut		Oval shaped in plan. Measured 0.45m by 0.3m by 0.1m deep. Break of slope at the top gradual, the sides were moderately sloped, the break of slope at the base was gradual and the base was concave. Filled by (4007). Cuts into upper surface of large pit [4051].	Cut of possible posthole, appears likely to be modern. Cuts into upper surface of pit [4051].		
4038	4	Fill		Moderately compacted light brown silty sand with (1%) gravel inclusions. Extent 0.76m by 0.6m by 0.16m deep. Underlies (4020).	Lower fill of possible posthole [4031].		P
4039	4	Cut		Oval shaped in plan. Measured 0.96m E-W, 0.4m N-S and 0.48m deep. Break of slope at the top sharp, the sides were steeply sloped, the break of slope at the base was gradual-sharp and the base was uneven and sloping towards the east. Filled by (4032). Cut into surface of buried soil (4002).	Cut of pit.		
4040	-	-		Voided	Voided		
4041	4	Cut		Linear shaped in plan. Measured 1.55m long, 0.69m wide and 0.24m deep. Break of slope at the top sharp, the sides were steeply sloped, the break of slope at the base was gradual-gentle and the base was rounded. Filled by (4008). Cut into surface of buried soil (4002).	Cut of linear feature [4041].		
4042	4	Cut		Sub-circular shaped in plan. Measured 0.38m by 0.3m by 0.06m deep. Break of slope at the top gradual, the sides were gently sloped, the break of slope at the base was gradual and the base was rounded. Filled by (4028). Cut into surface of	Cut of small pit.		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
				buried soil (4002).			
4043	4	Cut		Circular shaped in plan. Extent 3.38m in diameter and 1.85m deep. Break of slope at the top sharp, the sides were steeply sloped, the break of slope at the base was gradual and the base was fairly flat. Filled by (4017), (4052) (4073), and the remains of well [4186] filled by (4074), (4187) and (4206). Cut into surface of buried soil (4002).	Cut of large pit [4043] containing remains of well [4186] at its base. The upper courses of this well appeared to have been robbed out, and it is likely that this phase is what [4043] relates to, rather than the well's original construction. Adjoining pit [4069] may have acted as an access point.		
4044	4	Fill		Moderately compacted dark brown silty sand with infrequent small stone and charcoal inclusions. Extent 1.2m across, and 0.05m thick. Underlies (4006) and overlies (4005).	Fill within large pit [4051].		
4045	4	Fill		Moderate to firmly compacted dark grey silt with stone (packing) located near the base of the fill. Extent 0.23m deep. Basal fill of possible posthole [4012], underlies (4036).	Basal fill of possible posthole [4012]. Uncertain if this was primary silting which would have sat below the post while it was <i>in situ</i> , or whether it was infilling after the post was removed.		
4046	4	Fill		Loosely compacted light brown grey silty sand with occasional small stone and mortar, possibly intrusions from (4005). There were also frequent charcoal and medium sized stone inclusions. Extent 1.3m across in section and 0.2-0.25m thick. Underlies (4005) within cut [4051].	Basal fill within large pit [4051]		
4047	-	-		Voided	Voided		
4048	4	Fill		Very loosely compacted dark grey brown mixed silty sand with large medium sized stone inclusions (both rounded and squared in shape). Extent 1.5m by 0.8m and maximum depth of 1.1m.	Fill of pit [4049]		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
4049	4	Cut		Oval/linear shaped in plan. Measured 1.5m long by 0.8m wide and 1.1m deep. Orientated in a NW-SE direction. Break of slope at the top sharp, the sides were steeply sloped/vertical but becoming more gradual after 0.3m down, the break of slope at the base was sharp and the base was concave. Filled by (4048).	Cut of oval/linear shaped pit. Truncates large pit [4051] and also appears to truncate lining [4279] which sits in pit [4336] (underlying [4051]) - possibly a robber cut to get to the stones of the lining.		
4050	-	-		Voided	Voided		
4051	4	Cut		Oval shaped in plan although very difficult to make out at the surface. Measured approximately 3m by 3.9m and 1.15m deep. Break of slope at the top was gentle on SW side and sharp on the NE side, the sides were steeply sloped on the NE side and gently sloped SW side, the break of slope at the base was sharp at the NE side and gentle at the SW side and the base was concave. Filled by (4006), (4044), (4005) and (4046). Pit was truncated by modern posthole [4037] and pit [4049], and truncates stone-lined pit [4336]. Cut through surface of buried soil (4002).	Cut of oval/linear shaped pit. Truncated by small modern posthole [4037] and by pit [4049], and cuts into stone-lined pit [4336].		
4052	4	Fill		Loosely compacted yellow brown silty sand with infrequent (1-5%) stone and charcoal inclusions. Extent 2.4m diameter and 0.63m deep. Underlies (4017) and overlies (4073).	Fill of large pit [4043].		
4053	-	-		Voided	Voided		
4054	-	-		Voided	Voided		
4055	4	Fill		Moderate to firmly compacted dark brown grey silty sand with no inclusions. Extent (either side of post pipe 4036) 0.1m wide on SW side, 0.3m wide on NE side and 0.35m deep.	Upper fill within possible posthole [4012]. Lies at either side of post pipe (4036) and may have been from silt accumulating around the post while it was <i>in situ</i> .		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
4056	4	Cut		Oval shaped in plan. Measured 1.28m NE-SW, 0.94m NW-SE and 0.75m deep. Break of slope at the top was sharp, the sides were steeply sloped to near vertical, the break of slope at the base was gradual to sharp and the base was concave. Filled by (4063) and (4072) which have been cut at SW end by possible posthole [4012]. Cut into surface of buried soil (4002).	Cut of large pit. Function unknown. Has been cut by possible posthole [4012] which sits fully within its limits at its SW end.		
4057	4	Fill		Moderately compacted dark brown silty sand with stone and charcoal/coal inclusions. Pottery sherds were recovered from the fill (Find No. 285, 298 and 299). Truncated but pit [4043] and overlies (4064). Extent measured 0.5m deep.	Upper fill of large oval shaped pit [4058].		
4058	4	Cut		Oval shaped in plan orientated roughly W-E. Measured 2.83m by 1.5m by 0.87m deep. Break of slope at the top was sharp, the sides were gradual to steeply sloped, the break of slope at the base was gradual to sharp and the base was flat. Truncated by pit [4043]. Filled by (4057), (4064), (4065), (4066), (4067) and (4068). Cut into surface of buried soil (4002).	Cut of large oval shaped pit. Truncated by pit [4043].		
4059	4	Deposit		Moderately compacted brown silty sand with occasional small stone and medieval pottery sherd inclusions. Extent measured approximately 5m by 3m and 0.1m thick. Surrounds dump of small stones (4021) and overlies upper fill of pit [4058].	Spread which is likely small area of redeposited buried soil (4002), possibly deposited at same time as stones (4021).		
4060	4	Cut		Oval shaped in plan. Measured 0.96m by 0.72m by 0.42m deep. Break of slope at the top was gradual, the sides were steeply sloped, the break of slope at the base was gradual to sharp and the base was rounded. Filled by (4016) and cuts into buried soil (4002).	Cut of pit.		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
4061	4	Fill		Firmly compacted grey/mottled grey beige sandy silt with occasional charcoal inclusions. Extent 0.77m by 0.7m by 0.2m deep.	Fill of pit [4270].		
4062	4	Deposit		Moderately compacted mid to dark brown silty clay with charcoal/coal and mortar inclusions. Bone and pottery sherds also recovered (Find No. 288, 492, 493, 494 and 496). Cut by [4051] and [4086]. Overlies [4278] and base of walls [4193] and [4279], and underlies (4332). Extent 2.5m wide and between 0.6 to 1m deep.	Lowest infill deposit covering floor [4279] and base of walls [4193]/[4278], in pit [4336].		
4063	4	Fill		Firmly compacted dark grey brown sandy silt (with some clay pockets) with occasional wood and frequent inclusions of rounded and angular stone (0.25m thick). Extent 0.2m thick. Underlies (4072) and fills [4056]. Has been cut by possible posthole [4012].	Lower fill of large pit [4056].		
4064	4	Fill		Loosely compacted yellow brown silty sand with no inclusions. Extent 0.07m deep. Underlies (4057) and overlies (4065).	Fill of large oval shaped pit [4058].		
4065	4	Fill		Loosely compacted black silt with charcoal and possible daub inclusions. Extent 0.95m long and 0.04m deep. Underlies (4064) and overlies (4066).	Fill of large oval shaped pit [4058].		
4066	4	Fill		Loosely compacted yellow brown sand with occasional gravel inclusions. Extent 0.85m wide and 0.1m deep. Underlies (4065) and overlies (4067).	Fill of large oval shaped pit [4058].		
4067	4	Fill		Loosely compacted brown silty sand with very infrequent (1%) charcoal. Extent 1.27m wide and 0.09m deep. Underlies (4066) and overlies (4068).	Fill of large oval shaped pit [4058].		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
4068	4	Fill		Loosely compacted yellow brown sand with no inclusions. Extent 1.2m by 0.18m deep. Underlies (4067) and fills [4058].	Basal fill of oval shaped pit [4058].		
4069	4	Cut		Sub-rectangular shaped in plan. Measured 1.25m by 0.35-0.55m by 0.75-0.95m deep. Break of slope at the top was sharp, the sides were steeply sloped, the break of slope at the base was gradual to sharp and the base was flat (though sloping upwards slightly from north to south). Filled by (4070) and (4017). Cut into surface of buried soil (4002).	Sub-rectangular cut possibly created as access into pit [4043].		
4070	4	Fill		Loosely compacted brown silty sand with moderate (20%) organic inclusions. Extent 1.25m by 0.35-0.55m by 0.75-0.95m deep. Underlies (4017) and fills [4069].	Possible re-deposited natural/organic fill. Lines the sides of sub-rectangular pit [4069].		
4071	4	Deposit		Loosely compacted light yellow brown (with light brown mottling) sand with no inclusions. Extent was throughout Area 4.	Natural subsoil within Area 4.		
4072	4	Fill		Firmly compacted light yellow/mid brown mix of silty sand with pockets with more clay content. There were no inclusions. Extent 1.2m by 0.98m by 0.71m deep. Overlies (4063) and has been cut by [4012].	Upper fill of large pit [4056].		
4073	4	Fill		Loosely compacted brown silty sand with very infrequent (0.1-1%) sub-rounded stone inclusions. Extent 2.15m diameter by depth of 0.26m. Underlies (4052) and overlies (4074) and remains of well [4186].	Fill of pit [4043] overlying remains of well [4186].		
4074	4	Fill		Loosely to moderately compacted brown silty sand with no inclusions. Extent 0.65m by 0.1m deep. Underlies (4073), and sits within interior of remains of well [4186] within cut [4043]. Overlies	Fill within remains of well [4186] at base of pit [4043].		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
				(4187).			
4075	4	Cut		Oval shaped in plan. Measured 0.8m by 0.53m by 0.22m deep. Break of slope at the top was sharp, the sides were steeply sloped, the break of slope at the base was gradual and the base was rounded. Filled by (4211).	Cut for possible posthole, sits within a concentration of similar features.		
4076	4	Cut		Sub-circular shaped in plan. Measured 0.51m by 0.5m by 0.28m deep. Break of slope at the top was sharp, the sides were steeply sloped, the break of slope at the base was sharp and the base was flat. Filled by (4241) and (4242).	Cut of possible posthole, sits within a concentration of similar features.

				0.46m. Unknown depth and profile as not excavated. Filled by (4253).	appear to form part of a recognisable structure.		
4115	-	-		Voided - duplicate number	Voided		
4116	4	Cut		Linear shaped in plan orientated NW-SE. Measured 5.3m (although ran outwith NW end of excavated area) by 0.49m and 0.13m deep. Break of slope at the top was sharp, the sides were moderately sloped, the break of slope at the base was gradual and the base was flat. Rounded SE terminal end. Filled by (4117).	Cut of linear feature. Possibly medieval or post-medieval in date. Part of a series of linear features including [4118], [4130], [4136], [4138], [4140], [4142], [4144], [4146], [4148], [4173], [4181], [4189], [4190] and [4207]. Possibly horticultural.		Q
4117	4	Fill		Moderately compacted mid to dark brown silty sand with occasional small rounded stone and occasional to moderate charcoal inclusions. Extent 5.3m by 0.49m and 0.13m deep.	Fill of linear feature [4116].		Q
4118	4	Cut		Linear shaped in plan orientated NW-SE. Measured 7m (although ran outwith NW end of excavated area) by 0.5m by 0.16m deep. Break of slope at the top was sharp, the sides were moderately sloped, the break of slope at the base was gradual and the base was flat. Rounded SE terminal end. Filled by (4119).	Cut of linear feature. Possibly medieval or post-medieval in date. Part of a series of linear features including [4116], [4130], [4136], [4138], [4140], [4142], [4144], [4146], [4148], [4173], [4181], [4189], [4190] and [4207]. Possibly horticultural.		Q
4119	4	Fill		Moderately compacted mid to dark brown silty sand with occasional small rounded stone and occasional to moderate charcoal inclusions. Extent 7m by 0.5m and 0.16m deep.	Fill of linear feature [4118].		Q
4120	4	Cut		Circular shaped in plan. Measured 0.3m diameter and 0.1m deep. Break of slope at the top was sharp, the sides were moderately sloped, the break of slope at the base was gradual and the base was flat. Filled by (4121).	Cut of possible posthole. Sits adjacent to similar features with which it may be associated.		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
4121	4	Fill		Loose to moderately dark brown silty sand with one singular stone inclusion. Extent 0.3m diameter and 0.1m deep.	Fill of possible posthole [4120].		
4122	4	Cut		Oval shaped in plan. Measured 1m by 0.8m by 0.2m deep. Break of slope at the top was gentle, the sides were gently sloped, the break of slope at the base was gentle and the base was rounded/concave. Filled by (4123).	Cut of shallow pit. Sits adjacent to similar features with which it may be associated.		
4123	4	Fill		Moderately compacted mid-dark brown silty sand with charcoal and occasional small stone inclusions. Extent 1m by 0.8m by 0.2m deep.	Fill of shallow pit [4122].		
4124	4	Cut		Circular shaped in plan. Measured 0.8m diameter and 0.08m deep. Break of slope at the top was gentle, the sides were gently sloped, the break of slope at the base was gentle and the base was flat. Filled by (4125).	Cut of shallow pit. Sits adjacent to similar features with which it may be associated.		
4125	4	Fill		Moderately compacted mid to dark brown silty sand with charcoal inclusions. Extent 0.8m diameter and 0.08m deep.	Fill of shallow pit [4124].		
4126	-	-		Voided	Voided		
4127	-	-		Voided	Voided		
4128	4	Cut		Circular shaped in plan. Measured 0.5m diameter and 0.19m deep. Break of slope at the top was sharp, the sides were moderately sloped, the break of slope at the base was gradual and the base was rounded. Unclear relationship with pit [4132]. Filled by (4129).	Cut of shallow pit. Sits adjacent to similar features with which it may be associated.		
4129	4	Fill		Moderately compacted mid brown sandy silt with occasional charcoal flecking inclusions. Extent 0.5m diameter and 0.19m deep.	Fill of shallow pit [4128].		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
4130	4	Cut		Linear shaped in plan orientated NW-SE. Measured 4m (although ran outwith NW end of excavated area) by 0.58m and 0.09m deep. Break of slope at the top was sharp, the sides were moderately sloped, the break of slope at the base was gradual and the base was flat. Rounded SE terminal end. Filled by (4131).	Cut of linear feature. Possibly medieval or post-medieval in date. Part of a series of linear features including [4116], [4118], [4136], [4138], [4140], [4142], [4144], [4146], [4148], [4173], [4181], [4189], [4190] and [4207]. Possibly horticultural.		Q
4131	4	Fill		Moderately compacted mid to dark brown silty sand with occasional small rounded stone and occasional to moderate charcoal inclusions. Extent 4m by 0.58m and 0.09m deep.	Fill of linear feature [4130].		Q
4132	4	Cut		Sub-circular shaped in plan. Measured 1.23m by 1.07m by 0.48m deep. Break of slope at the top was sharp, the sides were steeply sloped, the break of slope at the base was sharp and the base was flat. Filled by (4183) and (4133). Pit truncated by [4130] and unclear relationship with pit [4128].	Cut of pit. Sits adjacent to similar features with which it may be associated. Truncated by linear feature [4132].		
4133	4	Fill		Moderately compacted dark brown sandy silt (lens of light yellow silty sand also present) with moderate charcoal inclusions. Extent 1.23m by 1.07m and 0.36m deep. Overlies (4183).	Upper fill of pit [4132].		
4134	4	Cut		Sub-circular shaped in plan. Measured 0.48m by 0.43m by 0.13m deep. Break of slope at the top was sharp, the sides were steeply sloped, the break of slope at the base was sharp and the base was rounded. Filled by (4135). Truncated by linear features [4130] and [4136].	Cut of possible posthole. Sits adjacent to similar features with which it may be associated.		
4135	4	Fill		Loosely compacted dark brown silty sand with no inclusions. Extent 0.48m by 0.43m by 0.13m deep. Truncated by linear features [4130] and	Fill of possible posthole [4134].

				of slope at the top was sharp, the sides were moderately sloping, the break of slope at the base was gradual and the base was flat/rounded. Rounded SE terminal end. Filled by (4147).	including [4116], [4118], [4130], [4136], [4138], [4140], [4142], [4144], [4148], [4173], [4181], [4189], [4190] and [4207]. Possibly horticultural.		
4147	4	Fill		Moderately compacted mid to dark brown silty sand with occasional small rounded stone and occasional to moderate charcoal inclusions. Extent 5.4m by 1.37m and 0.31m deep.	Fill of linear feature [4146].		Q
4148	4	Cut		Linear shaped in plan orientated NW-SE. Measured c.5m (although ran outwith NW end of excavated area) by 1.4m and 0.6m deep. Break of slope at the top was sharp, the sides were moderately sloping, the break of slope at the base was gradual and the base was flat/rounded. Rounded terminal end. Filled by (4149) and (4184).	Cut of linear feature. Possibly medieval or post-medieval in date. Part of a series of linear features including [4116], [4118], [4130], [4136], [4138], [4140], [4142], [4144], [4146], [4173], [4181], [4189], [4190] and [4207]. Possibly horticultural.		
4149	4	Fill		Moderately compacted mid to dark brown silty sand with occasional small rounded stone and occasional to moderate charcoal inclusions. Extent 5m by 1.4m and 0.6m deep. Overlies (4184).	Upper fill of linear feature [4148].		
4150	4	Fill		Loose to moderately compacted dark brown sandy silt with occasional inclusions of charcoal and animal bone. Extent 0.96m by 0.4m by 0.3m deep. Similar to (4297) and (4331).	Fill of small pit [4188].		S
4151	-	-		Voided	Voided		
4152	4	Fill		Loosely compacted dark brown silty sand with no inclusions. Extent 0.15m diameter and 0.12m deep. Underlies (4002). Similar to (4334), (4335) and (4153).	Fill of possible posthole [4251].		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
4153	4	Fill		Loosely compacted dark brown silty sand with no inclusions. Extent 0.2m diameter and 0.25m deep. Underlies (4002). Similar to (4334), (4335) and (4152).	Fill of possible posthole [4252].		
4154	4	Cut		Oval shaped in plan. Measured 3.7m by 3m by 1.37m deep. Break of slope at the top was gentle, the sides were moderate to steeply sloping, the break of slope at the base was gradual and the base was flat. Appears to cut earlier pits [4261], [4262] and [4263] which are similar in character. Filled by (4254), (4329) and wood lining [4330].	Cut of large pit or trough which contains wood lining [4330] at its base. May have been open and in use at same time as pit [4261] and/or pits [4262] and [4263], or possibly part of a series of replacement pits one after another. A difference in fill between this pit and [4261], [4262] and [4263], suggests that this was the last to be backfilled, and instead of being backfilled using material from digging other pits it was backfilled mainly in one event with topsoil and other material. It is possible that wood lining was originally more extensive but has not survived.		R

4190	4	Cut		Linear shaped in plan orientated NW-SE. Measured 3.6m (although ran outwith NW end of excavated area) by 1.03m and 0.24m deep. Break of slope at the top was sharp, the sides were steeply sloped, the break of slope at the base was gradual and the base was flat. Rounded SE terminal end. Filled by (4196).	Cut of linear feature. Possibly medieval or post-medieval in date. Part of a series of linear features including [4116], [4118], [4130], [4136], [4138], [4140], [4142], [4144], [4146], [4148], [4173], [4181], [4189] and [4207]. Possibly horticultural.		Q
4191	4	Cut		Linear shaped feature of NW-SE orientation with rounded terminal SE end measuring 3.5m by 1.15m and 0.25m deep but full extent unknown as it runs outwith trench edge to NW. Break of slope at the top was sharp, the sides were steeply sloped, the break of slope at the base was gradual and the base was flat. Filled by (4196). Underlies Feature Group E.	Cut of linear feature. Possibly medieval or post-medieval in date. Part of a series of linear features including [1226], [1227], [1228], [1229], [1230] and [1231]. Possibly horticultural.	1328	
4192	4	Skeleton	Animal	Remains of animal skeleton. Very badly degraded bone which made the lifting as a complete skeleton impossible. The skeleton was orientated in a NE-SW direction with the head at the SW end. Full extent unknown as only partially survived. Buried with the legs tucked into its side and head extended straight out.	Animal burial surrounded by fill (4185) within cut [4102]. Identified as a horse.		
4193	4	Structure	Stone	Materials consisted of a mix of stone types. The stones were c.0.1m by 0.1m to c.0.5m by 0.2m in size. The stones were bonded with clay with about 4-5 courses. The structure formed an approximately linear shape in plan which sat against the SW edge of cut [4336] with the stones set directly in natural subsoil (4071). It ran parallel with [4279] which ran along the NE edge of the cut separated by possible steps [4194]. The structure was bonded with clay. The structure measured 3.4m long by 0.4m wide and had a	Wall structure which lined the SW side of a possible sunken chamber/cellar. Along with a similar wall, [4279] on the NE side, it partially lined a set of stone steps [4194] which descended from west to east onto a cobbled floor [4278]. Appears to have been truncated by large pit [4086] at SE end.		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
				depth of 1m at its eastern end but its true depth on its western end was partially obscured by the steps [4194]. It may have originally continued further to the SE but appears to have been truncated by large pit [4086].			
4194	4	Structure	Stone	Materials consisted of a mix of stone types. The majority of stones were c.0.4m by 0.5m to c.0.3m by 0.4m in size with possibly decorative stones at the top step measuring 0.1m by 0.1m in size. The makeup of the structures stonework was flattened, some being worn with use. The stones had no bonding being set directly into the natural subsoil (4071). The structure formed an approximately sub-rectangular shape in plan which descended in a series of steps downwards from NW to SE onto cobbled floor surface [4278] which sat at a depth of 1.7m. The individual steps measured 1m wide by 0.3-0.44m and 0.2-0.25m thick. The structure measured 1.5m long (NW-SE) and 1m wide, although widened slightly at the SE end to 1.34m. Sat within cut [4336] at the NW end.	Set of stone steps at NW end of cut [4336] which descended into a possible sunken chamber/cellar. The steps were lined on the SE side by wall [4193] and on the NE side by wall [4279].		
4195	4	Fill		Moderately compacted mid to dark brown silty sand with occasional small rounded stone and occasional to moderate charcoal inclusions. Extent 4m by 0.93m and 0.43m deep.	Fill of horticultural furrow [4189]		Q
4196	4	Fill		Moderately compacted mid to dark brown silty sand with occasional small rounded stone and occasional to moderate charcoal inclusions. Extent 3.6m by 1.03m and 0.24m deep.	Fill of horticultural furrow [4190]		Q
4197	4	Fill		Moderately compacted mid to dark brown silty sand with occasional small rounded stone and occasional to moderate charcoal inclusions. Extent 3.5m by 1.15m and 0.25m deep.	Fill of horticultural furrow [4191]		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
4198	4	Cut		Sub-rectangular shaped in plan. Rounded corners. Measured 3.54m by 3.1m by 1m deep. Break of slope at the top was gentle, the sides were steeply sloped, the break of slope at the base was gentle and the base was flat. NW-SE orientated. Filled by (4093), (4257) and contained remains of stone structure [4258]. Pit [4259] sat adjoining on NW side and contained the same fill as [4198] making their relationship unclear.	Cut of pit containing remains of stone structure [4258]. Possible robber cut made around structure which has destroyed original cut for structure.		
4199	-	-		Voided	Voided		
4200	-	-		Voided	Voided		
4201	4	Fill		Moderately compacted brown silty sand with very occasional (1-2%) stone and charcoal inclusions. Medieval pottery sherds recovered (Find Nos 396, 397 and 401). Extent 0.1m deep. Underlies (4202) and Overlies (4205).	Fill within pit [4086], in interior of stone lining [4204]		
4202	4	Fill		Moderately compacted brown silt/clay/sand with very infrequent inclusions of stone (2%) and coal (1%). Extent 3m by 2m by 0.1m deep. Overlies (4201).	Fill within pit [4086], in interior of stone lining [4204]		
4203	4	Fill		Firmly compacted dark brown/black clayey silt with infrequent charcoal inclusions. Extent 1.62m by 0.83m by 0.2m deep.	Fill of pit [4100].		
4204	4	Structure	Stone	Stone lining in pit [4086]. Materials consisted of a mix of sub-rectangular and irregular blocks and stones. The stones were 0.6m by 0.2m to 0.25m by 0.2m in size. The structure was roughly faced within the interior. The stones were bonded with clay and were a maximum of about 9 courses, measuring approximately 1.57m deep. The entire structure formed a keyhole shape in plan with [4204] lining the main sub-rectangular shaped	Stone lining forming sub-rectangular chamber within pit [4086] with wood lining [4256] across the base and [4260]/[4255]/[4264] forming a descending stepped offshoot which may have acted as an access point.		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
				chamber. The interior of the chamber measured 1.94m (SW-NE) by 1.68m (SE-NW) in plan and the lining was approximately 0.2 to 0.3m wide. The base of the chamber had wooden lining [4256]. Behind the lining [4204], sat outer fill (4231) which may have acted as a packing deposit for the lining. The interior of the chamber was filled by (4201), (4202), (4205) and (4244).			
4205	4	Fill		Moderately compacted dark brown silt/clay/sand with very infrequent (2%) stone inclusions. Extent 0.95m deep. Overlies (4244).	Fill within pit [4086], in interior of stone lining [4204]		
4206	4	Fill		Loosely compacted mottled yellow sand with occasional (5-10%) organic inclusions. Extent 0.78m wide and 0.29m (max) deep. Underlies (4187).	Basal fill within interior of well structure [4186] at base of pit [4043].		
4207	4	Cut		Linear shaped in plan orientated NW-SE. Measured 3.9m (although ran outwith NW end of excavated area) by 0.89m and 0.3m deep. Break of slope at the top was unclear, the sides were steeply sloped/near vertical, the break of slope at the base was gradual and the base was flat. Rounded SE terminal end. Filled by (4209).	Cut of linear feature. Possibly medieval or post-medieval in date. Part of a series of linear features including [4116], [4118], [4130], [4136], [4138], [4140], [4142], [4144], [4146], [4148], [4173], [4181], [4189] and [4190]. Possibly horticultural.		Q

4225	4	Fill		Loose to firmly compacted dark brown/red sandy clay with no inclusions. Extent 0.2m wide and 1m deep. Fill lies between [4226] and [4082].	Outer fill of pit [4082] which lay behind stone well structure [4226] and likely acted as packing deposit for the stones.		
4226	4	Structure	Stone	Materials consisted of a mix of igneous, sandstone and sedimentary stones. The stones were 0.05m by 0.04m to 0.37m by 0.15m in size. The structure was both roughly and smoothly faced. The stones were bonded with clay/sand with about 10 courses. The structure formed a sub-circular shape in plan with a hollow centre. The overall measurements for the structure was 2.2m diameter and depth of 1-1.1m. It had an internal diameter of approximately 1.26m. Sat within pit [4082] with outer fill (4225) around the exterior, and interior filled by (4230) and (4250).	Well structure sat within pit [4062].		
4227	4	Fill		Very loosely compacted dark brown silty sand with sub-rounded stone inclusions. Extent 0.85m by 0.35m wide. Basal fill within cut [4229]. Underlies stone setting [4246].	Basal fill within possible posthole [4229]. Appears to have been used as packing for the stones [4246].		
4228	4	Structure	Stone	Two sub-angular stones sat adjacent but separate from each other, on the upper surface of cut [4229] - sandstone/sedimentary. The stones were 0.6m by 0.3m and 0.36m by 0.28m in size. The	Later stone packing/structure associated with bucket winch [4229].		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
				stones were not bonded. Overlies fill (4245).			
4229	4	Cut		Sub-circular shaped in plan. Measured 0.85m diameter by 0.35m deep. Break of slope at the top was gradual, the sides were moderate to steeply sloped, the break of slope at the base was gradual and the base was concave. Filled by (4227), (4245), [4228] and [4246].	Cut of possible posthole containing stone setting [4246]. Likely relates to nearby well [4082] and stone-lined pit [4086].		
4230	4	Fill		Firmly compacted dark brown clay with occasional angular stone inclusions. Extent 1.27m wide and 0.83m deep. Overlies (4250) and sits within interior of well [4226].	Upper fill within stone well structure [4226] which was within cut [4082].		
4231	4	Fill		Loosely compacted light brown sand with occasional stone and coal inclusions. Extent 1.55m deep. Sits behind stone lining [4204] and underlies surface [4255]/[4260]. Outer fill of (4086).	Outer fill of (4086) sitting under surface [4255]/[4260] and behind lining [4204]. Used as packing behind and under the stone structure.

4237	4	Fill		Loose to moderately compacted mid to dark brown sand with occasional small stone (shale) inclusions. Extent 0.3m by 0.22m by 0.13m deep.	Fill of possible posthole [4213]		
4238	4	Fill		Moderately compacted dark brown black silty clay with occasional small stone inclusions. Extent 0.21m diameter by 0.14m deep.	Fill of possible posthole [4169].		
4239	4	Fill		Loose to moderately compacted dark brown sand with occasional very small shale inclusions. Extent	Upper fill of pit [4215].		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
				1.06m wide by 0.62m by 0.3m deep. Overlies (4240).			
4240	4	Fill		Loose to moderately compacted mid brown sand with occasional very small shale inclusions. Extent 0.6m by 0.5m by 0.2m deep. Underlies (4239).	Basal fill of pit [4215].		
4241	4	Fill		Moderately compacted mixed brown/orange/beige silty sand with occasional charcoal inclusions. Extent 0.51m by 0.5m by 0.28m deep. Lies either side of post pipe (4242).	Fill of possible posthole [4076].		
4242	4	Fill		Moderate to firmly compacted dark brown silty sand with infrequent inclusions. Extent in section 0.15m by 0.43m deep. Surrounded by posthole fill (4241).	Possible post pipe within posthole [4076].		
4243	4	Structure	Stone	Line of stones forming an L-shape which sat 0.3m back from, and ran parallel to, the SW and SE sides of [4255]/[4260] in pit [4086]. Materials consisted of a mix of stones (igneous, sandstone and sedimentary) with no uniform size. The stones were 0.33m by 0.24m to 0.1m by 0.06m in size. The stones mainly had a rough finish with a few more rounded. The stones were bonded with clay with up to 3 courses. The structure was bonded with clay. The overall measurements for the structure was 2.74m NW-SE, 1.58m NE-SW and a depth range of 0.06-0.33m.	Additional wall structure associated with keyhole shaped structure in pit [4086]. Possibly acted as a revetment wall between structure and higher ground to the SW.		
4244	4	Fill		Moderately compacted dark brown silt/clay/sand with occasional stone, coal and charcoal inclusions. Extent 0.6m deep. Underlies (4205) and overlies [4256].	Fill within pit [4086], basal fill in interior of stone lining [4204] overlying wooden planking at base [4256].		
4245	4	Fill		Loosely compacted dark brown silty clay with no inclusions. Extent 0.85m in diameter and 0.35m deep. Underlies [4228] and overlies [4246].	Clay backfill within possible posthole [4229].

4246	4	Structure	Stone	Materials consisted of a mix of stones (igneous, sandstone and sedimentary). The stones were 0.36m by 0.19m to 0.12m by 0.1m in size. The stones mainly had a rough finish. The stones were bonded with clay with about 2 courses. The structure was sub-circular shaped in plan with a hollow centre. The structure was partially bonded with clay. The overall measurements for the structure was 0.62m by 0.57m and it had a depth of 0.27m. Sits within cut [4229]. Underlies (4245) and overlies (4227).	Stone lining/packing within possible posthole [4229].		
4247	-	-		Voided	Voided		
4248	4	Fill		Moderately compacted mid-dark brown silty sand with no inclusions. Extent 0.59m by 0.65m by 0.41m deep. Surrounds (4249) and fills [4168].	Fill of possible posthole [4168] which surrounds post pipe (4249).		
4249	4	Fill		Moderately compacted dark brown silty sand with no inclusions. Extent 0.17m wide and 0.49m deep. Surrounded by (4248).	Possible post pipe within posthole [4168].		
4250	4	Fill		Firmly compacted dark brown sandy clay with no inclusions. Extent 1.2m wide by 0.1m deep. Underlies (4230) and fills interior of well [4226] within pit [4082].	Initial silting up within the well [4226] in pit [4082].		
4251	4	Cut		Circular shaped in plan. Measured 0.15m diameter by 0.12m deep. Break of slope at the top was gentle, the sides were gently sloped, the break of slope at the base was gentle and the base was concave/rounded. Filled by (4152). Cut into spread (4112).	Cut of possible posthole. Does not appear to form part of a recognisable structure. Likely associated with [4252] which sits adjacent.		
4252	4	Cut		Circular shaped in plan. Measured 0.2m diameter by 0.25m deep. Break of slope at the top was sharp, the sides were steeply sloped, the break of slope at the base was gentle and the base was	Cut of possible posthole. Does not appear to form part of a recognisable structure. Likely associated with [4251] which sits		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
				concave/rounded. Filled by (4153). Cut into spread (4112).	adjacent.		
4253	4	Fill		Loosely compacted dark brown clayey silt. Extent 0.46m by 0.53m. Unknown depth as not excavated.	Fill of possible posthole [4114].		
4254	4	Fill		Moderately compacted dark brown sandy silt with lens of sand. Extent 3.7m by 3m by 1.37m deep. Underlies (4002) and overlies (4329).	Upper and main fill of pit [4154].		R
4255	4	Structure	Stone	Moderately compacted brown sand with very infrequent (1%) stone inclusions. Extent measures 2m by 0.8m by 0.26m deep. Overlies [4260] and appears to be lined by [4264] along SW side. Formed part of structure within pit [4086].	Formed the upper course of sub-rectangular offshoot within pit [4086], which appeared to form a set of descending stone steps into stone-lined chamber formed by [4204].		
4256	4	Structure	Timber	Materials consisted of a series of flat wooden planks. The planks were 2m by 0.1-0.12m to 0.1m by 0.03m in size. The planks were laid at the base of the main chamber in pit [4086] underlying structure [4204], running parallel to each other. The overall measurements for the extent of the structure was 1.88m NE-SW by 1.5m NW-SE. There were four remaining timbers within the base (with the rest presumably robbed out or decayed away). The timbers were orientated lengthways in a NE-SW direction. From the NW-SE the individual timbers measured 1.74m by 0.13m by 0.02m thick, 1.84m by 0.1m by 0.03m thick, 1.88m by 0.12m by 0.03m thick and 0.68m by 0.11m by 0.02m thick. The spacing between the timbers from NE-SW was 0.18m, 0.07m and 0.47m.	Wood lining at base of main chamber (sides lined by stone [4204]) in pit [4086]. May have originally been more extensive but has		
4257	4	Fill		Loosely compacted mottled (iron panning) yellow brown sand with no inclusions. Extent 3.1m by 1m	Basal fill within adjoining pits [4198] and [4259]. Overlies remains of		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
				by 0.5m deep. Overlies remains of structure [4258] and underlies (4093).	structure [4258].		
4258	4	Structure	Stone	Remains of stone structure within pit [4198]. Formed an L-shape against the SW and SE edges of the pit. Materials consisted of a stone rubble with an average size of 0.15m by 0.4m. The stones mainly had a rough finish with a few more rounded. Four courses high. Overall extent of 2.14m (SW-NE) by 1.81m (NW-SE), and up to 0.98m high. External face rests against edge of cut while internal face against fills of pit: (4093) and (4257).	Remains which may represent corner of a destroyed or robbed out structure.		
4259	4	Cut		Sub-rectangular shaped in plan. Measured 1.08m by 1.07m by 0.45m deep. Break of slope at the top was sharp, the sides were steeply sloped, the break of slope at the base was gradual and the base was flat. Filled by (4093) and (4257).	Cut of pit which sits adjoining pit [4198]. As the two pits have the same fills, the nature of their relationship is unclear, and they may have been contemporary.		
4260	4	Structure	Stone	Materials consisted of stone cobbles. The stones were 0.7m by 0.4m to 0.4m by 0.3m in size. The stones mainly had a rounded finish. The structure consisted of a series of descending steps with no discernible bonding between the stones. The structure measured 2m by 0.68m wide and 0.86m deep. Underlies [4255] and overlies (4231). Formed part of larger stone structure within pit [4086].	Formed the lower course of sub-rectangular offshoot within pit [4086], which appeared to form a set of descending stone steps into stone-lined chamber formed by [4204].		
4261	4	Cut		Full shape in plan not revealed, but likely oval or circular in shape. Measured 1.4m NE-SW and 1.36m deep. Break of slope at the top was gentle, the sides were gradually sloped, the break of slope at the base was gentle and the base was flat. Obscured by pit [4154] and spread (4276), but likely similar in shape and size to [4262] and	Cut of pit, likely had same function as adjacent pits [4154], [4262] and [4263]. As with these pits, may have originally also had a wood lining or barrel at centre, but has not survived/been removed.		R

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
				[4263]. Also appears to have been cut by [4154]. Filled by (4274) and (4273).			
4262	4	Cut		Circular shaped in plan. Measured 1.15m diameter and 1.2m deep. Break of slope at the top was sharp, the sides were sharply sloped/near vertical, the break of slope at the base was gradual and the base was flat. Sits adjacent to pits [4154] and [4261] and appears similar in shape and size to [4261] and [4263]. Appears to have cut [4263]. Filled by (4298), (4300), (4299), (4301), (4304), (4305), (4306), (4307), (4302), (4303) and remains of wood lining [4308].	Cut of pit with evidence of wood lining. Appears to have cut pit [4263]. Sits as part of a series of four large intercutting pits with [4154], [4261] and [4263] which appear likely to have had a similar function. It is possible that some of the pits may have been contemporary, or they may have been a series of replacements.		R
4263	4	Cut		Sub-circular shaped in plan. Measured 2.22m diameter and 1.22m deep. Break of slope at the top was gradual, the sides were gently sloped, the break of slope at the base was gradual and the base was flat. Sits adjacent to pits [4154], [4261] and [4262]. Appears to have been cut by [4262]. Filled by (4326), (4321), (4322), (4319), (4320), (4325), (4324), (4323) and wood lining [4312]/[4333].	Cut of pit with wood lining within its base. Appears to have been cut by pit [4262]. Sits as part of a series of four large intercutting pits with [4154], [4261] and [4262] which appear likely to have had a similar function. It is possible that some of the pits may have been contemporary, or they may have been a series of replacements.		R
4264	4	Structure	Stone	Materials consisted of stone rubble. The stones were 0.16m to 0.17m in size. The stones mainly had a rounded or squared finish. The structure consisted of a possible roughly made wall lining the SW edge of [4255]/4260] in pit [4086]. There was no discernible bonding between the stones.	Line of stones lining the SW edge of [4255]/[4260] in pit [4086].		
4265	4	Fill		Loosely compacted dark brown clayey silt with no inclusions. Extent 3.86m by 1.6m by 0.46m deep. Underlies (4267) and fills [4266].	Basal fill within pit [4266].		
4266	4	Cut		Curved/oval shaped in plan. Measured 3.86m long by 1.6m wide and 0.48m deep. Break of	Cut of large pit which truncates pit		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
				slope at the top was sharp, the sides were gently sloped, the break of slope at the base was gentle and the base was concave. Filled by (4265) and (4267). Truncates the top of [4268] leaving the base intact.	[4268].		
4267	4	Fill		Loosely compacted dark brown clayey silt with no inclusions. Extent 0.69m wide by 0.24m deep. Overlies (4265).	Upper fill or spread within large pit [4266].		
4268	4	Cut		Oval shaped in plan. Measured 1.5m by 1.2m and 0.4m deep. Break of slope at the top was moderate, the sides were moderately sloped, the break of slope at the base was gentle and the base was concave. Filled by (4269). Top of context is truncated by [4266].	Cut of pit, has been truncated by pit [4266] to the N.		
4269	4	Fill		Loosely compacted dark brown clayey silt with no inclusions. Extent 1.5m by 1.2m and 0.4m deep. Top of context is truncated by pit [4266].	Fill within large pit [4268].		
4270	4	Cut		Sub-circular shaped in plan. Measured 0.77m by 0.72m by 0.2m deep. Break of slope at the top was moderate, the sides were steeply sloped, the break of slope at the base was gentle and the base was concave. Filled by (4061) and cuts into buried soil (4002).	Cut of pit.		
4271	4	Fill		Loose to moderately compacted mottled pale grey brown sandy silt with occasional medium sized stone inclusions. Extent 2.5m by 1.3m by 0.1-0.2m deep. Overlies (4272).	Upper fill of large pit [4103].		
4272	4	Fill		Moderately compacted grey black silty clay with frequent charcoal inclusions. Extent 1.6m by 0.15m deep. Underlies (4271) and fills [4103].	Lower fill of large pit [4103].		
4273	4	Fill		Loosely compacted light orange/red sand with lenses of light grey sand and re-deposited natural;	Upper fill within large pit [4261].		R

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
				no inclusions. Extent 1.54m by 0.52m deep.			
4274	4	Fill		Loosely compacted light grey/brown sandy silt with lenses of darker brown sand and clayey silt. Very infrequent sub-rounded stone inclusions. Extent measured 1.14m by 1.02m deep.	Lower fill within large pit [4261].		R
4275	4	Deposit		Firmly compacted pale brown silty sand with no inclusions. Extent 0.9m NE-SW by 0.3m thick. Seems to be cut by pits [4261] and [4154]. There is also a possibility that the deposit lay within pit cut [4261], with (4275) possibly representing a double pit or even a separate original cut, whose true shape will never be known, due to truncation by pits [4261] and [4154].	Deposit of sand lying between pits [4154] and [4261]. It is not clear if it is natural leaching or an anthropic layer. It may also represent an earlier cut, the full shape of which will never be known as it would have been destroyed by the two later pits. If it does, it may also show that at one point the two pits on this side sat open at the same time.		
4276	4	Deposit		Firmly compacted mixed lens of mid to dark brown silty sand and yellow sand with no inclusions. Extent 1.8m NE-SW by 1.6m NW-SE by 0.2m deep. Underlies (4002) and overlies pit [4261] and SW end of pit [4154].	Spread which overlies pit [4261] and SW end of pit [4154]. The lensing within the layer may suggest a gradual build up over time, possibly indicating a trample layer. Possible that if it is a trample layer, it came about during the backfilling of the pits.		
4277	4	Deposit		Very firmly compacted mixed pale brown and patches of pale yellow silty sand with no inclusions. Extent 1.3m NE-SW by 0.36m deep. Possible cut by [4261] though may also have been within that cut, or represent an earlier cut.	Deposit of silty sand which was either cut by pit [4261] or within it. It is possible that is natural leaching and not anthropic.		
4278	4	Structure	Stone	Materials consisted of a mix of stone types. The stones were c.0.3m by 0.4m to c.0.2m by 0.2m in size. The stones were both rounded and flattened. The stones were bonded with clay with one	Cobbled floor surface which lay at the base of pit [4336] at its SE end. Likely originally extended further to the SE but appeared to have been		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
				course or layer. The structure formed an approximate sub-rectangular shape in plan. The structure was bonded with clay. The structure measured 2m by 1.2m by 0.1-0.16m thick. Underlies (4062) at base of cut [4336].	truncated by large pit [4086].		
4279	4	Structure	Stone	Materials consisted of a mix of stone types. The stones were c.0.4m by 0.3m to c.0.2m by 0.2m in size. The stones were bonded with clay with about 3 courses. The structure formed an approximately linear shape in plan lining the NE edge of cut [4336] with the stones set directly in natural subsoil (4071). It ran parallel with [4193] which ran along the SW edge of the cut separated by possible steps [4194]. The lining probably originally ran as long as structure [4193], and possibly beyond to the SE, so as to enclose the cobbled surface [4278]. The structure was bonded with clay. The structure measured 2m long by 0.4m wide and had a depth range of 0.4 to 0.6m.	Wall structure which lined the NE side of a possible sunken chamber/cellar in pit [4336]. Along with a similar wall, [4193] on the northern side, it partially lined a set of stone steps [4194] which descended from NW to SE onto a cobbled floor [4278].		
4280	4	Cut		Oval shaped in plan. Measured 1.8m by 1.18 - 1.2m by 0.31m deep. Break of slope at the top was sharp, the sides were steeply sloped, the break of slope at the base was gradual and the base was concave with a possible shallow step or ledge in the W side. Filled by (4161).	Cut of large pit, sits within concentration of similar features.		
4281	-	-		Voided - duplicate	Voided		
4282	-	-		Voided	Voided		
4283	-	-		Voided	Voided		
4284	4	Fill		Firmly compacted grey silty clay with frequent charcoal inclusions. There were also lens of mid grey/light black sandy silt within the fill. Extent 1.21m by 1.12m by 0.8m deep.	Fill of pit [4106].		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
4285	4	Fill		Loosely compacted dark grey silty sand with very infrequent (0.1-1%) small stone inclusions. Extent 1.32m by 1.28m by 0.16m deep. Truncated by postholes [4170] and [4171].	Fill of pit [4172].		
4286	4	Fill		Moderately compacted dark grey sandy silt with very infrequent (<1%) small stones. Extent 0.4m by 0.38m by 0.17m deep.	Fill within posthole [4171].		
4287	4	Fill		Moderately compacted dark brown sand with no inclusions. Extent 1.8m by 0.98m by 0.61m deep.	Fill of pit [4288].		
4288	4	Cut		Sub-rectangular shaped in plan. Measured 1.8m by 0.98m by 0.61m deep. Break of slope at the top was sharp, the sides were steeply sloped, the break of slope at the base was gradual to sharp and the base was concave. Orientated in an E-W direction. Filled by (4287). Underlies Feature Group E.	Cut of large sub-rectangular pit. Truncates pit [4289].	1332	
4289	4	Cut		Sub-rectangular shaped in plan. Measured 2.2m N-S, 1.6m E-W and 0.37m deep. Break of slope at the top was sharp, the sides were steeply sloped, the break of slope at the base was sharp and the base was irregular/flat. Orientated in an N-S direction. Filled by (4328). Has been truncated by [4288] at SE end and has possible postholes [4291] and [4293] present in base. Unclear if these are contemporary, or later cuts prior to deposition of (4328) or whether they are earlier features cut by [4289]. Underlies Feature Group E.	Cut of large sub-rectangular pit. Truncated by pit [4288] at the SE end and has two possible postholes [4291] and [4293] in base.	1333	
4290	4	Fill		Moderately compacted brown sand with no inclusions. Extent 0.24m diameter by 0.07m deep. Located within base of cut [4289]. Underlies fill (4328) of pit [4289].	Fill of possible posthole [4291].		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
4291	4	Cut		Circular shaped in plan. Measured 0.24m diameter by 0.07m deep. Break of slope at the top was sharp, the sides were steeply sloped, the break of slope at the base was sharp and the base was flat. Sits within base of cut [4289]. Filled by (4290). Underlies fill (4328) of pit [4289].	Cut of possible posthole within base of pit [4289].	1334	
4292	4	Fill		Moderately compacted brown sand with no inclusions. Extent 0.42m wide by 0.33m deep.	Fill of possible posthole [4293].		
4293	4	Cut		Circular shaped in plan. Measured 0.42m in diameter by 0.33m deep. Break of slope at the top was sharp, the sides were steeply sloped, the break of slope at the base was sharp and the base was concave. Filled by (4292). Underlies fill (4328) of pit [4289].	Cut of possible posthole within base of pit [4289].	1335	
4294	4	Fill		Moderately compacted dark brown sand with no inclusions. Extent 0.41m deep. Surrounded by fill (4313).	Possible post pipe within posthole [4295].		
4295	4	Cut		Circular shaped in plan. Measured 0.46m diameter by 0.41m deep. Break of slope at the top was sharp, the sides were steeply sloped, the break of slope at the base was sharp and the base was flat. Filled by (4294) and (4313). Underlies Feature Group E.	Cut of possible posthole, sits within concentration of similar features.	1336	
4296	4	Deposit		Ring of moderately compacted yellow brown sand with small stone inclusions which appeared to be a deposit of decayed wood. Covered an area measuring 0.3m in diameter although ring itself was only 40mm thick. Measured 0.1m deep. Underlies Feature Group E and overlies the natural subsoil (1002).	A ring of decayed wood sitting on surface of natural subsoil (4071).	1337	
4297	4	Cut		Firmly compacted dark brown sandy silt with occasional charcoal inclusions. Measured 0.94m	Fill of pit [4107].		S

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
				by 0.48m in extent. Similar to (4150) and (4331).			
4298	4	Fill		Moderately compacted mixed mid brown to mid orange brown silty sand with occasional charcoal inclusions. Extent measured 1.15m in diameter and 0.45m deep. Overlies (4299), (4300), (4301) and (4303).	Upper fill of pit [4262].		R
4299	4	Fill		Moderately compacted mid to dark brown silty sand with occasional charcoal inclusions. Extent 0.65m SW-NE by 0.12m thick. Underlies (4298) and overlies (4300) and (4301).	Fill within pit [4262].		R
4300	4	Fill		Moderately compacted mixed grey brown to light orange silty sand with no inclusions. Extent approximately 0.7m SW-NE and 0.31m thick. Underlies (4298) and (4299), unclear relationship with (4308) and overlies (4304).	Fill within pit [4262].		R
4301	4	Fill		Moderately compacted mid brown orange silty sand with no inclusions. Extent 1.1m wide by 0.21m deep. Underlies (4298) and (4299), and overlies (4302) and (4307).	Fill within pit [4262].		R
4302	4	Fill		Loosely compacted mottled brown/light brown/mid brown silty sand with no inclusions. Extent 0.45m SW-NE by 0.12m deep. Underlies (4301) and overlies (4307).	Fill within pit [4262].		R
4303	4	Fill		Loosely compacted brown silty sand with no inclusions. Extent 0.25m wide by 0.45m deep. Underlies (4298), unclear relationship with (4308).	Fill within pit [4262].		R
4304	4	Fill		Moderately compacted mixed mid grey brown/orange silty sand with occasional charcoal inclusions. Extent 0.6m SW-NE and 0.24m thick. Underlies (4300), unclear relationship with (4308) and overlies (4305).	Fill within pit [4262]. Possible packing for wooden lining [4308].		R

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
4305	4	Fill		Loosely compacted light brown to grey sandy silt with very infrequent inclusions of angular stone. Extent 0.9m wide by 0.25m deep. Underlies (4304) and [4308], and overlies (4306).	Lower fill within pit [4262].		R
4306	4	Fill		Loosely compacted light grey/orange sandy silt with infrequent inclusions of rounded stone. Extent 1.1m by 0.35m deep. Underlies (4305), [4308] and unclear relationship with (4303).	Lower fill within pit [4262].		R
4307	4	Fill		Loosely compacted dark brown to dark grey sandy silt with occasional charcoal inclusions. Extent 1.13m SW-NE, and 0.18m thick. Underlies (4302) and (4301). Overlies (4308).	Fill within pit [4262]. Overlies/fills wooden lining (4308).		R
4308	4	Structure	Timber	Thin lens of loosely compacted black silt with no inclusions visible in section outlining the base and two sides of a lining. Lens itself is approximately 0.01-0.02m thick. Full extent measures 1.1m N-E by 0.5m deep. Underlies (4307). Overlies (4305) and (4306).	Remains of wood lining within pit [4262]. Some collapse on SW side.		R
4309	4	Fill		Loosely compacted dark grey silty sand with very infrequent (1-5%) small stone inclusions. Extent in [4170] - 0.4m diameter and 0.25m deep. Extent in [4310] - 0.62m by 0.42m by 0.3m deep. Fills both [4170] and [4310].	Fill within possible postholes [4170] and [4310].		
4310	4	Cut		Circular shaped in plan. Measured 0.62m by 0.42m by 0.3m deep. Break of slope at the top was sharp, the sides were steeply sloped, the break of slope at the base was sharp and the base was flat. Filled by (4309).	Cut of possible posthole, sits within concentration of similar features.		
4311	4	Fill		Loosely compacted mid to dark brown silty sand with frequent charcoal inclusions. Extent 2.7m by 0.26m by 0.18m deep.	Fill of linear feature [4166].		T

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
4312	4	Structure	Timber	Material consisted of split wooden planking. The planks measured 0.2m by 0.3m by 0.01-0.02m thick. No obvious tool marks could be identified on the initial excavation and recovery of the planks. Planks were located within the base of pit [4263]. The overall measurement of the base lining was 0.3m (although only half excavated) by 1.34m. The SW side lining was 0.9m high and 0.02m thick. There were six remaining timbers within the base (with the rest presumably robbed out or decayed away) which were orientated lengthways in a NNW-SSE direction. These timbers were 0.1-0.2m wide and 0.01-0.02m thick. There was little spacing between the timbers with them being laid alongside each other.	Wooden lining within the base and SW side of pit [4263]. The wood lining on the NE side of the pit [4333] appears to relate to the same feature. Possibly represents a barrel which sat at the centre of the pit.		R
4313	4	Fill		Moderately compacted light brown sand with no inclusions. Extent 0.42m deep. Surrounds possible post pipe (4294) and fills [4295].	Fill within possible posthole [4295].		
4314	4	Fill		Moderately compacted very dark brown sandy silt with occasional charcoal fleck inclusions. Extent 2.1m by 1.35m by 0.3m deep. Overlies (4316) which fills possible posthole [4315] in the base of [4217].	Fill of large pit [4217].		
4315	4	Cut		Circular shaped in plan. Measured 0.5m diameter and 0.2m deep. Break of slope at the top was sharp, the sides were steeply sloped, the break of slope at the base was gentle and the base was shallow concave. Filled by (4316). Underlies fill (4314) of pit [4217].	Cut of posthole within the base of larger pit [4217].	1338	
4316	4	Fill		Moderately compacted very dark brown sandy silt with charcoal inclusions. Extent 0.2m thick.	Fill of possible posthole [4316].		
4317	4	Fill		Loose to moderately compacted mid to dark brown silty sand with frequent charcoal inclusions.	Fill of linear feature [4167].		T

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
				Extent 2.63m by 0.33m by 0.18m deep.			
4318	4	Fill		Moderately compacted mixed dark brown to light brown/beige sand with no inclusions. Extent 0.35m by 0.34m by 0.21m deep.	Fill of possible posthole [4158].		
4319	4	Fill		Loosely compacted light brown/yellow silty sand. Extent 1.8m by 0.35m deep. Overlies (4320). Truncated by pit [4262] on its SW side.	Upper fill of pit [4263].		R
4320	4	Fill		Moderately compacted light to mid brown silty sand with no inclusions. Extent 1.8m by 0.4m deep. Underlies (4319) and overlies (4321). Unclear relationship with [4333]. Truncated by pit [4262] on its SW side.	Fill within pit [4263].		R
4321	4	Fill		Loose to moderately compacted mid brown silty sand with no inclusions. Extent 0.5m by 0.2m deep. Underlies (4320) and overlies (4322). Unclear relationship with [4333]. Truncated by pit [4262] on its SW side.	Fill within pit [4263].		R
4322	4	Fill		Loosely compacted light brown silty sand with no inclusions. Extent 0.43m by 0.5m deep. Underlies (4321). Unclear relationship with [4333]. Truncated by pit [4262] on its SW side.	Lower fill within pit [4263].		R
4323	4	Fill		Moderately compacted mid brown/light brown orange silty sand with no inclusions. Extent 1m by 0.4m deep. Underlies (4320) and overlies (4324). Upper fill within interior of [4312]/[4333].	Fill within pit [4263].		R
4324	4	Fill		Moderately compacted dark brown silty sand (with pockets of clay) with one large stone at its base and charcoal inclusions. 1m wide by 0.2m thick. Underlies (4323) and overlies (4325) and (4326). Sits within interior of [4312]/[4333].	Fill within pit [4263].		R

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
4325	4	Fill		Moderately compacted mid grey brown silty sand with small stone and charcoal inclusions. Extent 0.7m by 0.2m deep. Underlies (4324) and overlies (4326). Unclear relationship with [4333].	Fill within pit [4263].		R
4326	4	Fill		Firmly compacted mid orange brown silt with no inclusions. Extent 0.75m by 0.05m thick. Underlies (4324) (4325) and overlies wood lining [4312].	Fill within pit [4263].		R
4327	4	Fill		Moderate to firmly compacted dark brown /beige silty sand with no inclusions. Extent 0.34m by 0.31m by 0.21m deep.	Fill of possible posthole [4165].		
4328	4	Fill		Moderately compacted brown sand with occasional stone inclusions. Extent 0.37m deep. Overlies (4290) and (4292).	Fill within pit [4289].		
4329	4	Fill		Firmly compacted dark grey brown silt/sand/clay with occasional small stone, charcoal and decayed wood inclusions. Extent 1.6m by 0.2m thick. Underlies (4254) and overlies wood lining [4330].	Fill within pit [4154].		R
4330	4	Structure	Timber	Fragmentary wood lining - two planks surviving. One plank horizontally lined the NE side and the other the SW side of a sub-rectangular area at base of [4154] which measured 1.2m NE-SW by 0.8m NW-SE. Planks were orientated NW-SE. Only partially exposed as continued further to SE into unexcavated half of pit. The NE plank measured 0.14m deep, 0.03m wide and 0.1m long (as exposed). The SW plank measured 0.2m deep, 0.03m wide and 0.3m long (as exposed). There was no lining along base. Underlies (4329).	Wood lining at base of pit [4154]. Likely originally extended higher but was removed/has not survived.		R
4331	4	Fill		Firmly compacted dark brown sandy silt with occasional small charcoal inclusions. Extent	Fill of pit [4108].		S

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
				0.76m by 0.44m. Underlies (4002). Similar to (4297) and (4150).			
4332	4	Fill		Moderately compacted yellow brown sand with no inclusions. Extent 0.94m deep. Fill present at SE end of pit [4336] which overlies (4062).	Re-deposited natural subsoil which has been used to backfill SE end of pit [4336]. Cut by pit [4086].		
4333	4	Structure	Timber	Wood vertical/side lining within pit [4263] on NE side. Dimensions only observable within the section face. Lower vertical part was 0.28m high. Upper slanted (slanted towards the SW) was 0.74m long. Thickness of the timber was 0.01-0.02m.	Wooden planking used for lining the NE side of pit [4263] similar to other wooden planking [4312] lining the base and SW side. Possibly represents a barrel which would have sat within centre of pit.		R
4334	4	Fill		Loose to moderately compacted dark brown silty sand. Measured 0.36m by 0.42m in extent. Unknown depth as not excavated. Similar to (4335), (4152) and (4153).	Fill of possible posthole [4110].		
4335	4	Fill		Loose to moderately compacted dark brown silty sand. Measured 0.36m by 0.42m in extent. Unknown depth as not excavated. Similar to (4334), (4152) and (4153).	Fill of possible posthole [4111].		
4336	4	Cut		Irregular oblong shaped in plan orientated NW-SE. Along the NW edge the top break of slope was gentle with gently sloping side and gentle bottom break of slope. The NE and SW edges had a sharp top break of slope and near vertical sides with a sharp bottom break of slope. The SE edge had been truncated by pit [4086]. The base was flat across lowest level at SE end, but then stepped upwards at NW end. Measured 4.6m long and 2.3m wide with a depth of approximately 0.45m at the NW end getting deeper to the SE with a maximum depth of 1.8m. The cut contained stone lining [4193]/[4279] against the SW and NE edges respectively, cobbled floor [4278] at the SE	Large oblong shaped cut which appeared to have been stone lined with steps [4194] and lining [4193]/[4279] forming an entrance at the NW end into a deeper section with cobbled floor [4278] at the SE end. Later cuts and disturbance appeared to have seen some robbing of the stones from the lining of the entrance and large pit [4086] appeared to have removed any lining or continuation of its SE end. It is possible that originally the cut would have		

Context No.	Area/Trench	Type	Type Detail	Description	Interpretation	Context No. in DSR (if different)	Feature Group
				end and possible steps [4194] at the NW end. The stones had been set directly into the surrounding natural subsoil (4071) without any outer packing deposit. Overlying these stones were fills (4062) and (4332). The cut appeared to have been truncated by later cuts [4051] and [4049] at the NW end, and by large pit [4086] at the SE end.	extended further to the SE with more stone lining, possibly it may have been an earlier version of [4086].
