

Plate 1. Excavation of the late Devensian/early Holocene site at Three Ways Wharf, Uxbridge showing the distribution of bone and flint flakes sealed beneath the alluvium.

Plate 2. Timber structure of probable Bronze Age date within the alluvium in East London.

Plate 3. Tufa sequences on the valley margins at The Grove, Watford.

Plate 4. Tufa and peat sequences from valley bottom situations. **A:** The Grove, Watford and **B:** Buckland Churchyard, Dover.

Plate 5. Saxon mill at Ebbsfleet during excavation. The mill and associated water management structures had been buried by alluvium.
