

PLATE I. *The Lambourn Long Barrow in August 1964 before commencement of excavation. Looking south-west along the mound which is crossed by the track in the foreground.*

PLATE II *Lambourn Long Barrow. Butt of tail end of north quarry ditch*

PLATE III *Prong of broken antler pick on the bottom of the north quarry ditch.*

PLATE IV *Lambourn Long Barrow. Sarsen boulders lying on the Neolithic land surface under the mound. The narrow one (top right of group of three) has fallen from a shallow stone hole.*

PLATE V *Lambourn Long Barrow. Sarsen boulder structure in the head of the mound. Those on the left have been disturbed by previous excavation, probably that of Martin Atkins in the 19th century.*

PLATE VI *Lambourn Long Barrow. Contracted burial among sarsen boulders in the head of the mound.*
