

**Boars Tye Barn, Silver End, Rivenhall, Essex.**

View towards the south east into the lean-to. Note heavy main framing timber to barn and large serpentine brace. Visible brick plinth of barn with top course of brick on edge as is remaining wall infill to lean-to.

View towards the north east clearly showing the unusual framing to the barn. High heavy section primary wall braces with a midrail into them two-thirds of way from sill to wallplate. Stud lengths vary as to position in barn, being unusually short above midrails in bays with primary braces..
