

Boars Tye Barn, Silver End, Rivenhall, Essex.

Scribed and chiselled marking on tiebeams. For alignment and setting out of frame. to right is detail of how the chisel was used to accentuate the scribed horizontal and vertical lines. Hole shows start for non-pointed auger.

Tiebeam to principle rafter straight chiselled carpenters assembly marks. Here a mistake was made and one digit has been cut out.

Chiselled with gouge carpenters assembly marks to arch braces and storey posts.

Example of face mark to one of the tiebeams. This shows the fair face produced from hewing the timber and is used as the set-out face when marking out the frame. Were visible on some tiebeams and principle rafters.
