Essex Historic Environment Record/Essex Archaeology And History Summary Sheet

Parish: Debden District: Uttlesford NGR: TL 55240 34653 Site Code: DNNH10 Type of Work: Historic Building Recording Site Director/Team: TE Watkin Date of Work: March 2010 Size of Area Investigated: 7.4 x 6 Metres Location of Finds/Curating Museum: N/A Funding source: Owner Further Seasons Anticipated?: No Related EHER No.s: None Final Report: Yes Periods Represented: 18-20 century SUMMARY OF FIELDWORK RESULTS: This building recording was initiated by the HEM team at ECC following planning approval to convert the Granary at Newhouse Farm into a studio. This application had been approved by Uttlesford District Council under ref: no: UTT/1587/09. This building is the last in the whole farm complex to be converted to other uses. The building is timber framed in pine softwood, most likely from the Debden Hall Estate, and is set onto pier walls accommodating the sloping nature of the site. These walls and the entry steps on the south side are all of brick construction. The timber-framed walls have a lower cladding of weatherboarding to three sides with render above and full render cover to the north elevation. The roof is half hipped of simple collar rafter form with no principle trusses and clad in plain clay tile. The softwood frame has used the timber to its maximum available section such that much bark surface exists. The arch braces to the two intermediate tiebeams are carefully made in oak and spike nailed to the tiebeams and posts. The flooring is softwood boarding as is the entrance door. The wooden platform entrance to this door is missing, Inside the building, its an inserted floor over one bay at the east end of the building. This is supported on five floor joists set from under the tiebeam to the east wall. Across these are set wide strips of boarding that has been inserted. Previous Summaries/Reports: None	Site name/Address: Newhouse Farm, Purton End, Debden, Saffron Walden, Essex. CB11 3JT
