

Appendix 1: Photographs

Photo No.1 Location of the proposed new sports hall, at the southern end of the existing playing field. The location of the evaluation trench is marked out with the ranging poles.

Photo No.2 The evaluation trench excavated. The natural substrate was a mix of limestone brash and silty lenses. Scales: 1m. Looking northeast.

Photo No.3 The evaluation trench excavated. Scales: 1m. Looking west.

Photo No.4 Sample section through topsoil (101) and sub-soil (102) overlying the natural substrate (103). Scales: 0.5m and 1m. Looking north.
