

## Appendix 2

### Context Summary (SHLM11)

Context No.	Type		Description
100	Layer	Above (101)	Grey concrete (yard area).
101	Layer	Above (102), below (100)	Grey brown, gritty clay. Levelling for (100).
102	Layer/cut	Below (101), above (104), (105), (108)	General No assigned to 1960's drains and deposits.
103	Fill	Fill of pit [107]	Dark brown silty clay.
104	Structure	Above (108), below (102)	Irregular circle of limestone fragments set into clay. possible column pad?
105	Layer	Above (108), below (102), cut by [114]	Grey yellow compacted clay. Possible terracing deposit.
106	Fill	Fill of [111]	Brown gritty clay.
107	Cut	Contains (103), cuts (108) and (109)	Possible rectangular pit cut.
108	Structure	Above (109), below (104) and (105)	Rough hewn limestone blocks set into clay, possible consolidation layer for terrace.
109	Layer	Below (108)	Bedding layer of mottled orange brown clay for (108).
110	Fill	Fill of post hole [112]	Grey silty clay fill of post hole.
111	Cut	Filled by (106), cuts (107) and (108)	Irregular linear, possible robber trench.
112	Cut	Filled by (110), cuts (109)	Small irregular post hole.
113	Structure	Below (115), within [114]	Limestone wall.
114	Cut	Contains (115) and (113), cuts (105) and (116)	Foundation cut for wall (113).
115	Fill	Fill of [114]	Light brown silty clay with occasional small stones.
116	Layer	Cut by [114] and under (102)	Mid brown silt with frequent small limestone chippings. Possible working surface for wall (113).
