

Appendix 2 – Context register

Context No.	Type	Description	Finds/ Sample
<b>Area 1</b>			
3000	Layer	Topsoil. Mid brown clay silt. Friable and compact. Moderate amounts of small flint fragments.	
3001	Layer	Subsoil. Mid brown clay silt. Firm and compact. Moderate amounts of small limestone fragments.	
3002	Layer	Natural substrate. Weathered red/orange clay with deposits of light brown sandy silt throughout. All features are cut into this layer.	
3003	Cut	Cut of pit. Irregular circle in plan, with vertical edges and a flat base. 1.5m in diameter and 0.23m deep.	
3004	Fill	Fill of [3003]. Mid brownish red silty sandy clay. Very friable. Frequent small and medium charcoal flecks, as well as occasional large brash stone.	
3005	Cut	Cut of posthole. Irregular circle in plan, vertical sides and a concave base. 0.34m in diameter and 0.2m deep.	
3006	Fill	Fill of posthole [3005]. Mid brownish red silty clay. Firm and compact. Frequent charcoal flecks and occasional flint.	Flint
3007	Cut	Small oval shaped pit. Located within roundhouse. Vertical edges and a flat base. 0.66m in length, 0.5m wide and 0.24m deep. Filled by (3008).	
3008	Fill	Fill of pit [3007]. Mid reddish brown clay silt. Firm and compact. Frequent charcoal flecks and occasional flint.	Flint
3009	Cut	Cut of posthole. Irregular circle in plan. Moderately steep edges into a flat base. Fairly shallow. 0.2m in diameter and 0.07m deep. Filled by (3010).	
3010	Fill	Fill of posthole [3009]. Mid red brown silty clay. Very firm and compact. Some charcoal flecks and occasional flint fragments.	
3011	Cut	Cut of linear terminus. Possible enclosure ditch. Located on W side of area 1. Moderately sloped edges and a flat base. Orientated approximately SW-NE, but was curving to the E. 0.6m wide and 0.18m deep. Filled by (3012). Same as [3107].	
3012	Fill	Fill of terminus [3011]. Mid yellowish brown clay, sandy, silt. Friable and quite fine. No inclusions.	
3013	Cut	Cut of posthole. Irregular circle in plan, with moderately steep edges and a flat base. 0.3m in diameter and 0.13m deep. Filled by (3014). Cuts posthole [3023]. This may be related to an earlier phase of structure on site, or it could just be repositioning.	
3014	Fill	Fill of posthole [3013]. Mid reddish brown clay silt. Firm and compact. Occasional charcoal flecks.	
3015	Cut	Cut of posthole. Circular in plan, with fairly steep sides into a concave base. Very shallow. 0.25m in diameter and 0.06m deep. Filled by (3016).	
3016	Fill	Fill of posthole [3015]. Mid greyish brown clay silt. Firm and compact. Some occasional charcoal flecks.	

## Appendix 2 – Context register

3017	Cut	Cut of posthole. Circular in plan, moderately steep edges and a concave base. 0.22m in diameter and 0.3m deep. Filled by (3018).	
3018	Fill	Fill of posthole [3017]. Mid-dark red brown clay silt. Firm and compact. Occasional charcoal flecks.	
3019	Cut	Cut of posthole. Circular in plan. Moderately steep edges with a concave base. Shallow. 0.2m in diameter and 0.08m deep. Filled by (3020).	
3020	Fill	Fill of posthole [3019]. Mid red brown clay silt. Firm and compact. Occasional charcoal flecks.	
3021	Cut	Cut of posthole. Circular in plan with vertical edges and a flat base. 0.24m in diameter and 0.24m deep. Filled by (3022).	
3022	Fill	Fill of posthole [3021]. Mid red grey brown clay silt. Firm and compact. Infrequent charcoal flecks.	
3023	Cut	Cut of posthole. Circular in plan, but partially obscured by [3013], which cuts this feature. Moderately steep edges and a flat base. Edges and base are partially destroyed by [3013]. This may be related to an earlier phase of structure on site, or it could just be repositioning. 0.12m in diameter and 0.1m deep. Filled by (3024).	
3024	Fill	Fill of posthole [3023]. Light grey brown clay sandy silt. Compact but friable. No inclusions.	
3025	Cut	Cut of posthole. Circular in plan with near vertical edges and a flat base. 0.3m in diameter and 0.1m deep. Filled by (3026).	
3026	Fill	Fill of posthole [3025]. Mid red brown clay silt. Friable. Occasional charcoal flecks.	
3027	Cut	Cut of posthole. Irregular circle in plan, with steep sides and a concave base. 0.28m in diameter and 0.12m deep. Filled by (3028).	
3028	Fill	Fill of posthole [3027]. Mid yellow brown clay silt. Friable. Frequent charcoal flecks.	
3029	Cut	Cut of posthole. Circular in plan, with near vertical edges and a flat base. 0.38m in diameter and 0.22m deep. Filled by (3030).	
3030	Fill	Fill of posthole [3029]. Mid yellow brown clay silt. Friable. Frequent charcoal flecks.	
3031	Cut	Cut of posthole. Circular in plan, moderately steep sides that taper in towards the base, and a flat base. 0.24m in diameter and 0.13m deep. Filled by (3032).	
3032	Fill	Fill of posthole [3031]. Mid yellow brown clay silt. Friable. Frequent charcoal flecks.	
3033	Cut	Cut of posthole. Circular in plan, with near vertical edges and a flat base. Shallow. 0.26m in diameter and 0.08m deep. Filled by (3034).	
3034	Fill	Fill of posthole [3033]. Mid brown grey clay silt. Friable. Occasional charcoal flecks.	
3035	Cut	Cut of posthole. Circular in plan, with near vertical edges and a flat base. Shallow. 0.2m in diameter and 0.06m deep. Filled by (3036).	
3036	Fill	Fill of posthole [3035]. Mid - dark brown grey clay silt. Friable. Occasional charcoal flecks.	

## Appendix 2 – Context register

3037	Cut	Cut of posthole. Circular in plan, with near vertical edges and a flat base. 0.34m in diameter and 0.12m deep. Filled by (3038)	
3038	Fill	Fill of posthole [3037]. Mid brown grey clay silt. Firm and friable. Occasional charcoal flecks.	
3039	Cut	Cut of posthole. Circular in plan, with moderately sloped edges and a broad concave base. 0.3m in diameter and 0.12m deep. Filled by (3040).	
3040	Fill	Fill of posthole [3039]. Mid brown grey clay silt. Friable. Occasional charcoal flecks.	Pottery.
3041	Cut	Cut of large pit located near the centre of the roundhouse. Seems to cut an occupation layer (3104). Oval shaped in plan, with curved but steep edges and a fairly wide concave base. 1.6m long, 1.1m wide and 0.23m deep. Filled by (3042).	
3042	Fill	Filled of pit [3041]. Dark brown grey sandy silt. Friable, soft and fine grained. Rare charcoal flecks.	
3043	Cut	Cut of posthole. Circular in plan, with near vertical edges and a flat base. 0.26m in diameter and 0.13m deep. Filled by (3044).	
3044	Fill	Fill of posthole [3043]. Mid brown grey clay silt. Friable. Occasional charcoal flecks.	
3045	Cut	Cut of pit. Located in S end of area 1, on the outside of the roundhouse. Oval in plan, with uneven sloped edges and an undulating concave base. 1m long, 0.7m wide and 0.2m deep. Filled by (3046).	
3046	Fill	Fill of pit (3045). Dark greyish brown sandy silt. Friable and quite loose. Some rare charcoal flecks.	Daub.
3047	Cut	Cut of possible hearth in centre of roundhouse. Oval shaped in plan, with steep edges to a concave base. Surrounded by what seem to be internal postholes. Some may be for internal structural support, whilst other may be for smaller structures located within the roundhouse. 1.1m long, 0.66m wide and 0.42m deep. Filled by (3048).	
3048	Fill	Fill of possible hearth [3047]. Dark red clay, very firm and compact. Some of the clay, towards the top, is a lighter blue colour, which may not have been heat affected. Large stones are located towards the base of the fill. May be natural, or they may have been placed there intentionally.	
3049	Cut	Cut of posthole. Irregular circle in plan, with steep sides, that taper in, and a flat base. Very shallow. 0.2m in diameter and 0.06m deep.	
3050	Fill	Fill of posthole [3049]. Mid yellow brown clay silt. Friable. Occasional small charcoal flecks and flint fragments.	Flint
3051	Cut	Cut of posthole. Circular in plan, steep sides and a flat base. Shallow. 0.28m in diameter and 0.07m deep. Filled by (3052).	
3052	Fill	Fill of posthole [3051]. Mid yellow brown clay silt. Friable. Occasional charcoal flecks.	
3053	Cut	Cut of posthole. Irregular circle in plan, near vertical edges and a flat base. Shallow. 0.27m in diameter and 0.06m deep. Filled by (3054).	

## Appendix 2 – Context register

3054	Fill	Fill of posthole [3053]. Mid red brown clay silt. Firm but friable. Occasional charcoal flecks.	
3055	Cut	Cut of posthole. Circular in plan, vertical edges and a flat base. 0.28m in diameter and 0.22m deep. Filled by (3056).	
3056	Fill	Fill of posthole [3055]. Mid red brown clay silt. Firm but friable. Occasional charcoal flecks.	
3057	Cut	Cut of posthole. In plan it looks as though it may actually be two postholes, however a distinction cannot be seen in plan or section. Irregular oval in shape, near vertical sides and a flat base. 0.28m in diameter and 0.22m deep. Filled by (3058).	
3058	Fill	Fill of posthole [3057]. Mid brown grey clay sandy silt. Friable. Some occasional charcoal flecks.	
3059	Cut	Cut of posthole. Circular in plan, steep edges and a flat base. 0.28m in diameter and 0.11m deep. Filled by (3060).	
3060	Fill	Fill of posthole [3059]. Mid brown grey clay sandy silt. Friable. Some occasional charcoal flecks.	
3061	Cut	Cut of pit located to the SE of area 1. On the outside of the roundhouse. Oval shaped in plan, very steep edges and a fairly flat base. Elongated E-W. 1.2m long, 0.6m wide and 0.22m deep. Filled by (3062).	
3062	Fill	Fill of pit [3061]. Dark grey clay silt. Friable and compact. Some occasional charcoal flecks.	
3063	Cut	Cut of posthole. Circular in plan, vertical edges and a concave base. 0.32m in diameter and 0.1m deep. Filled by (3064).	
3064	Fill	Fill of posthole [3063]. Mid brown grey clay silt. Friable but firm. Some occasional charcoal flecks.	
3065	Cut	Cut of posthole. Irregular circle, steep edges and a fairly flat base. Shallow. 0.4m in diameter and 0.1m deep. Filled by (3066).	
3066	Fill	Fill of posthole [3065]. Mid brown grey clay silt. Friable but firm. Some occasional charcoal flecks.	
3067	Cut	Cut of pit. Located within roundhouse. Irregular circle in plan, steep edges and a concave base. 0.6m in diameter and 0.12m deep. Filled by (3068).	
3068	Fill	Fill of pit [3067]. Mid brown grey clay silt. Friable but firm. Some occasional charcoal flecks.	
3069	Cut	Cut of posthole. Irregular circle in plan, steep edges and a concave base. 0.38m in diameter and 0.1m deep. Filled by (3070).	
3070	Fill	Fill of posthole [3069]. Mid brown grey clay silt. Friable but firm. Some occasional charcoal flecks and small stones.	
3071	Cut	Cut of posthole. Irregular circle in plan, steep edges and a flat base. 0.32m in diameter and 0.12m deep. Filled by (3072).	
3072	Fill	Fill of posthole [3071]. Mid yellow brown clay silt. Friable but firm. Some occasional charcoal flecks.	
3073	Cut	Cut of posthole. Circular in plan, vertical edges and a narrow concave base. 0.2m in diameter and 0.17m deep. Filled by (3074).	

## Appendix 2 – Context register

3074	Fill	Fill of posthole [3073]. Mid grey friable sand silt. Soft.	
3075	Cut	Cut of posthole. Circular in plan, steep edges and a flat base. Shallow. 0.2m in diameter and 0.1m deep. Filled by (3076).	
3076	Fill	Fill of posthole [3075]. Mid grey silt. Friable.	
3077	Cut	Cut of pit located within roundhouse to the N of hearth [3047]. Oval shaped in plan, steep edges and a concave base. 0.26m wide and 0.12m deep.	
3078	Fill	Fill of pit [3077]. Mid brown grey sand silt. Quite friable. Occasional charcoal flecks and some large stones.	
3079	Cut	Cut of posthole. Irregular circle in plan, steep edges and a flat base. 0.16m in diameter and 0.09m deep.	
3080	Fill	Fill of posthole [3079]. Same as (3078).	
3081	Cut	Cut of posthole. Irregular circle in plan, steep edges and a flat base. 0.3m in diameter and 0.1m deep. Filled by (3082).	
3082	Fill	Fill of posthole [3081]. Same as (3078).	
3083	Cut	Cut of posthole, Irregular circle in plan, steep edges and a flat base. Base slopes slightly to the SE. 0.3m in diameter and 0.15m deep. Filled by (3084).	
3084	Fill	Fill of posthole [3083]. See (3078).	
3085	Cut	Cut of posthole, Irregular circle in plan, steep edges and a flat base. 0.2m in diameter and 0.14m deep. Filled by (3086)	
3086	Fill	Fill of posthole [3085] See (3078).	
3087	Cut	Cut of posthole, Irregular circle in plan, steep edges and a flat base. 0.38m in diameter and 0.13m deep. Filled by (3088).	
3088	Fill	Fill of posthole [3087] See (3078).	
3089	Cut	Cut of posthole, Irregular circle in plan, steep edges and a flat base. 0.18m in diameter and 0.12m deep. Filled by (3090).	
3090	Fill	Fill of posthole [3089] See (3078).	
3091	Cut	Cut of posthole, Irregular circle in plan, steep edges and a flat base. 0.3m in diameter and 0.1m deep. Filled by (3092).	
3092	Fill	Fill of posthole [3091] See (3078).	
3093	Cut	Cut of posthole, circular in plan, steep edges and a flat base. 0.28m in diameter and 0.14m deep. Filled by (3094).	
3094	Fill	Fill of posthole [3093]. Mid grey sandy silt. Occasional charcoal inclusions.	
3095	Cut	Cut of posthole. Oval in plan, steep edged and a concave base. 0.4m wide and 0.15m deep. Filled by (3096).	
3096	Fill	Fill of posthole [3095]. See (3094).	
3097	Cut	Cut of pit. Circular in plan, moderately steep edged and concave base. Cut by [3099]. 0.5m in diameter and 0.2m deep. Filled by (3098).	

## Appendix 2 – Context register

3098	Fill	Fill of pit [3097]. Dark grey sandy clay. Friable. Occasional charcoal flecks.	
3099	Cut	Cut of pit. Oval shaped in plan, steep edges and concave base. 1.4m long, 0.6m wide and 0.3m deep. Cuts [3097].	
3100	Fill	Fill of pit [3099]. Similar to (3098), however it was slightly lighter.	Pottery
3101	Spread	Dark grey clay silt spread to the S of the roundhouse. Friable and soft. Contains charcoal. Possible rubbish dump. 3.75m in diameter and 0.12m deep.	Flint and pottery
3102	Cut	Cut of pit. Located inside of roundhouse. Oval in plan, steep edges and a narrow concave base. 0.25m wide and 0.13m deep. Filled by (3103).	
3103	Fill	Fill of pit [3102]. Mid grey clay silt. Fairly friable. Some occasional charcoal inclusions.	
3104	Layer	Occupation layer located to the N of the hearth [3047]. Dark grey silt with frequent charcoal flecks. Quite friable and soft. Not within any cut, rather spread within the central roundhouse area. 0.06m deep. Cut by pit [3041].	
3105	Cut	Cut of pit. Circular in plan, gradually sloped edges and a wide concave base. 2m in diameter and 0.16m deep. Filled by (3106).	
3106	Fill	Fill of pit [3105]. Mid brown silt clay. Friable. Large stone inclusions.	Pottery.
3107	Cut	Cut of linear, possibly enclosure ditch. E-W orientation. Varying sides, steep on south side, more gradual on the north. Irregular concave base. 0.64m wide and 0.16m deep. Same as [3011]. Filled by (3108).	
3108	Fill	Fill of linear [3107]. Mid brown clay silt with rare charcoal flecks.	Flint
<b>Area 2</b>			
2000	Layer	Topsoil. Mid brown clay silt. Friable and compact. Moderate amounts of small flint fragments.	
2001	Layer	Subsoil. Mid brown clay silt. Firm and compact. Moderate amounts of small limestone fragments.	
2002	Layer	Natural substrate. Weathered limestone with some deposits of light brown sandy silt throughout. All features are cut into this layer.	
2003	Cut	Cut of enclosure ditch; SW terminus on W side of area 2. Same as [2005], [2033] and [2035]. Quite steep and irregular edges with a concave base. Excavated length is 2.78m, width is 1.6m and depth is 0.24m. Filled by (2004).	
2004	Fill	Fill of [2003]. Mid reddish brown silty clay. Quite compact. Contains charcoal flecks and some fragments of limestone. Same dimensions as [2003].	
2005	Cut	Cut of enclosure ditch. Same as [2003],[2033] and [2035] Filled by (2006).	
2006	Fill	Fill of [2005]. See (2004) for description.	
2007	Cut	Cut of pit. Irregular circle in plan, with moderately steep sloping sides and a wide concave base. . Diameter is 2.7m and depth is 0.34m. Filled by	

## Appendix 2 – Context register

		(2008).	
2008	Fill	Fill of pit [2007]. Mid yellow brown silty clay. Compact. Occasional small charcoal flecks and large angular brash stones, with frequent small angular brash stones.	
2009	Cut	Cut of posthole. Circular in plan, with steep edges and a flat base. 0.38m in diameter and 0.07m in depth. Part of a group of four postholes that seem to be part of a structure. Filled by (2010).	
2010	Fill	Fill of posthole [2009]. Mid brownish yellow silty clay. Moderately compact. Some occasional small stones.	
2011	Cut	Cut of posthole. Circular in plan, with steep edges and a concave base. 0.22m in diameter and 0.1m in depth. Part of a group of four postholes that seem to be part of a structure. Filled by (2012).	
2012	Fill	Fill of posthole [2011]. Mid brownish yellow silty clay. Moderately compact. Occasional small to medium sized angular stones.	
2013	Cut	Cut of posthole. Circular in plan, with steep edges and a concave base. 0.44m in diameter and 0.1m in depth. Part of a group of four postholes that seem to be part of a structure. Filled by (2014).	
2014	Fill	Fill of posthole [2013]. Mid brownish yellow silty clay. Moderately compact. Some occasional small stones.	
2015	Cut	Cut of posthole. Majority of posthole had been machined out, so very shallow. Circular in plan, with concave base. 0.35m in diameter and 0.02m in depth. Part of a group of four postholes that seem to be part of a structure. Filled by (2016).	
2016	Fill	Fill of posthole [2015]. Mid brownish yellow silty clay. Moderately compact. Very little remaining, so no obvious inclusions.	
2017	Cut	Cut of pit. Irregular circle in plan, with moderately steep sides and a slightly concave base.	
2018	Fill	Fill of pit [2017]. Mid brownish red silty clay. Soft with occasional charcoal flecks.	
2019	Cut	Cut of linear feature. Terminus. E-W orientation. Gentle sloping sides and a concave base. Located at S end of area 2, just S of [2037] and N of [2039]. 1.5m in length, 0.6m wide and 0.18m deep. Filled by (2020).	
2020	Fill	Fill of linear terminus [2019]. Mid brownish red silty clay. Soft. Lots of inclusions: occasional charcoal flecks, occasional small brash stone and occasional large brash stone.	Pottery.
2021	Cut	Cut of pit. Irregular circle in plan, steep sides and a flat base. 1.04m in diameter and 0.33m deep. Filled by (2022).	
2022	Fill	Fill of pit [2021]. Mid brownish red silty clay. Soft. Lots of inclusions: occasional charcoal flecks, occasional medium stones and occasional oyster shell.	
2023	Cut	Cut of pit. Sub rounded, steep irregular edges and a flat base. Diffuse edge, possible suggesting it is naturally occurring. Filled by (2024).	
2024	Fill	Fill of pit [2023]. . Mid brown silty clay. Firm and	

## Appendix 2 – Context register

		compact. Occasional charcoal fragments.	
2025	Cut	Area of burnt stone. Possible cut of hearth. Irregular circle in plan, shallow edges and a concave base. 0.5m in diameter and 0.1m deep. Filled by (2026).	
2026	Fill	Fill of hearth [2025]. Dark brown – black silty clay. Firm, Frequent charcoal fragments and heated limestone (less than 2cm). The burnt matrix lies beneath the heated limestone.	
2027	Cut	Cut of small posthole/stakehole. Circular in plan, shallow edges and a flat base. 0.2m in diameter and 0.1m in depth. Filled by (2028). Aligned with two other postholes; [2041] and [2029], on an E-W orientation to form a possible structure. Located just N of hearth [2025].	
2028	Fill	Fill of [2027]. Dark brown silty clay. Firm. No inclusions.	
2029	Cut	Cut of posthole. Irregular circle in plan, shallow edges and a flat base. 0.5m in diameter and 0.07m deep. Aligned with two other postholes; [2041] and [2027], on an E-W orientation to form a possible structure. Located just N of hearth [2025]. Filled by (2030).	
2030	Fill	Fill of [2029]. Dark brown silty clay. Firm.	Pottery.
2031	Cut	Cut of posthole. Irregular circle, steep (vertical) edges and a flat base. 0.18m in diameter and 0.07m deep.	
2032	Fill	Fill of [2031]. Mid brownish yellow silty clay. Friable. Occasional small charcoal flecks and small brash stone.	
2033	Cut	Cut of enclosure ditch. Same as [2003], [2005] and [2035]. Filled by (2034).	
2034	Fill	Fill of [2033]. See (2004) for description.	Pottery.
2035	Cut	Cut of enclosure ditch; terminus on E side of area 2. Same as [2003], [2005] and [2033]. Filled by (2036).	
2036	Fill	Fill of [2035]. See (2004) for description.	
2037	Cut	Cut of linear terminus located at S end of area 2. Just N of linear terminus [2019] and [2039]. On an E-W orientation. Steep edges and a fairly flat base. 1.36m in length, 0.52m wide and 0.1m deep. Filled by (2038).	
2038	Fill	Fill of [2037]. Mixed mid greyish brown – black silty clay. Moderately compact. Some charcoal inclusions and a high frequency of angular and sub-angular stones.	
2039	Cut	Cut of linear terminus. Located at S end of area 2, to the S of [2019] and [2037]. 1m wide and 0.1m deep. Filled by (2040).	
2040	Fill	Fill of linear terminus [2039]. Mid brownish red silty clay. Soft. Lots of inclusions: occasional charcoal flecks, occasional small brash stone and occasional large brash stone.	
2041	Cut	Cut of posthole. Irregular circle in plan, shallow edges and a flat base. 0.5m in diameter and 0.1m deep. Aligned with two other postholes; [2027] and [2029], on an E-W orientation to form a possible structure. Located just N of hearth [2025]. Filled by (2042).	
2042	Fill	Fill of [2041]. Mid grey brown silty clay. Firm.	

## Appendix 2 – Context register

		Occasional small limestone fragments.
