

Appendix 4: List of contexts

- 001: Mid brownish-grey, slightly silty, fine-sandy ploughsoil, containing frequent limestone fragments.
- 002: Limestone brash, becoming bedded towards the eastern edge of the field, and containing irregular patches of mid-brown clayey fine sand.
- 003: Mid greyish-brown clayey fine sand subsoil, present only at the east end of the field: possibly associated with an earlier house plot.
