

## Appendix 1: Colour Plates

**Plate 1 (right):** General shot of the site, looking west-north-west from the eastern side of the field, showing the groundworks in progress.

**Plate 2 (right):** The topsoil strip in progress, looking north-east along the pipeline course from near the beginning of the groundworks. This section of the pipe-trench may have run along the course of a redundant field boundary.

**Plate 3 (right):** The topsoil strip running across the corner of the field, near the house plot, looking east. The banksman is standing on limestone brash; the fill of a solution feature, with dark striations caused by modern ploughing, can be seen closer to the camera.
