KEY

PROBABLE ARCHAEOLOGY

- ▬ Positive anomaly / weak positive anomaly - probable cut feature of archaeological origin
- ▬ Negative anomaly / weak negative anomaly - probable bank or earthwork of archaeological origin
- ▬ Linear anomaly - probably related to a former field boundary visible on historic mapping from 1888-1913
- ▬ Widely spaced curving parallel linear anomalies - probably related to ridge-and-furrow

POSSIBLE ARCHAEOLOGY

- ▬ Positive anomaly / weak positive anomaly - possible cut feature of archaeological origin
- ▬ Negative anomaly / weak negative anomaly - possible bank or earthwork of archaeological origin
- ▬ Moderate strength discrete anomaly - possible thermoremanent feature

OTHER ANOMALIES

- ▬ Closely spaced parallel linear anomalies - probably related to agricultural activity such as ploughing
- ▬ Linear anomaly - probably related to pipe, cable or other modern service
- ▬ Linear anomaly - possibly related to land drain
- Magnetic disturbance associated with nearby metal object such as service or field boundary
- Strong magnetic debris - possible disturbed or made ground
- + Scattered magnetic debris
- Area of amorphous magnetic variation - probable natural (e.g. geological or pedological) origin
- + Magnetic spike - probable ferrous object
