PROBABLE ARCHAEOLOGY

- Positive anomaly / weak positive anomaly - probable cut feature of archaeological origin
- Negative anomaly / weak negative anomaly - probable bank or earthwork of archaeological origin

POSSIBLE ARCHAEOLOGY

- Positive anomaly / weak positive anomaly - possible cut feature of archaeological origin
- Negative anomaly / weak negative anomaly - possible bank or earthwork of archaeological origin

MEDIEVAL/POST-MEDIEVAL AGRICULTURE

- ▨ Widely spaced curving parallel linear anomalies - probably related to ridge-and-furrow
- ▨ Closely spaced parallel linear anomalies - probably related to agricultural activity such as ploughing
- ▨ Linear anomaly - probably related to a former field boundary not present on available mapping
- ▨ Linear anomaly - related to a former field boundary present on available mapping

OTHER ANOMALIES

- ▨ Linear anomaly - probably related to pipe, cable or other modern service
- ▨ Linear anomaly - possibly related to land drain
- ▨ Linear anomaly - related to former footpath present on available mapping
- ▨ Strong magnetic debris - related to former pond present on available mapping
- ▨ Magnetic disturbance associated with nearby metal object such as service or field boundary
- ▨ Strong magnetic debris - possible disturbed or made ground
- + Scattered magnetic debris
- + Area of amorphous magnetic variation - probable natural (e.g. geological or pedological) origin
- + Magnetic spike - probable ferrous object
