KEY

PROBABLE ARCHAEOLOGY

Positive anomaly / weak positive anomaly - probable cut feature of archaeological origin

Negative anomaly / weak negative anomaly - probable bank or earthwork of archaeological origin

Widely spaced curving parallel linear anomalies - probably related to ridge-and-furrow

Linear anomaly - related to former field boundary present on available historic mapping, pre-1900

Scattered magnetic debris - former field boundary present on available historic mapping, pre 1900

Linear anomaly - probable former field boundary not present on available historic mapping

POSSIBLE ARCHAEOLOGY

Positive anomaly / weak positive anomaly - possible cut feature of archaeological origin

Negative anomaly / weak negative anomaly - possible bank or earthwork of archaeological origin

OTHER ANOMALIES

Closely spaced parallel linear anomalies - probably related to agricultural activity such as ploughing

Linear anomaly - probably related to pipe, cable or other modern service

Linear anomaly - possibly related to land drain

Magnetic disturbance associated with nearby metal object such as service or field boundary

Strong magnetic debris - possible disturbed or made ground

Linear anomaly related to modern trackway visible on aerial photographs

Strong magnetic debris - former pond visible on available historic maps, pre-1900

Scattered magnetic debris - possibly related to 'green waste' or former soil storage

Scattered magnetic debris

Area of amorphous magnetic variation - probable natural (e.g. geological or pedological) origin

Magnetic spike - probable ferrous object
