## 1. INTRODUCTION

### 1.1 General

1.1.1 This report presents the results of an archaeological excavation (Golf Area P (Houses)) undertaken by CFA Archaeology Ltd (CFA) at the location of the proposed gWest golf course, Blackford, Perthshire (NGR: NN 89961046 centred; Fig. 1). Ochil Developments (UK) Ltd commissioned the work.
1.1.2 A Written Scheme of Investigation (WSI) for the excavation was produced by CFA on behalf of Ochil Developments (UK Ltd). Perth and Kinross Heritage Trust (PKHT) agreed the WSI in advance.

### 1.2 Background

1.2.1 Prior to the excavation of Golf Area P , an archaeological evaluation was undertaken by CFA during September 2007 (O'Connell \& Gray 2008) in which four areas of prehistoric archaeological activity were discovered. After the initial trial trenching PKHT required a further topsoil strip amounting to $1899 \mathrm{~m}^{2}$ (Houses 2, $4,5 \& 6$ Area) and $908 \mathrm{~m}^{2}$ (House 3 Area).

## 2. WORKING METHODS

2.1 CFA Archaeology Ltd follows the Institute of Field Archaeologists' Code of Conduct, Standards and Guidance for Archaeological Excavations.
2.2. A $360^{\circ}$-tracked excavator, equipped with a smooth-bladed ditching bucket carried out the remsub-circular of topsoil under constant archaeological supervision
2.3 PKHT required $50 \%$ excavation of the archaeological features and $100 \%$ of roundhouses 3 and 5 and of any features containing artefacts or where a fuller understanding of features would require greater excavation. All features were cleaned and excavated by hand.
2.4 All excavation and on-site recording was carried out according to standard CFA procedures, principally by drawing, by photography and by completing standard CFA record forms. The limits of the excavation and the planning grid were surveyed using industry standard electronic surveying equipment.
2.5 Routine baulk samples were taken from features in order to be processed by wet sieving for the retrieval of environmental data, dateable material and artefacts. All artefacts retrieved were retained.

## 3. ARCHAEOLOGICAL RESULTS

### 3.1 General

3.1.1 Numbers in bold and parentheses refer to contexts, a full list of which is contained in Appendix 1.
3.1.2 This area contained five post-built roundhouses (Houses 2, 3, 4, 5 and 6) (Fig. 2) in close proximity to each other, and a suite of isolated archaeological features. Feature ( 005 ) was originally thought to be the heavily truncated remains of a roundhouse (House 1) which on subsequent excavation turned out to be a large pit. The houses are discussed individually from west to east, the sequence being House 4, 5, 2, 6 and then 3.

### 3.2 House 4

3.2.1 This house measured 10 m by 12 m . The outer wall of the house was defined by a partial ring groove on the north and north-east, which contained a series of postholes. Inside this was a concentric ring of postholes encircling a penannular ring-ditch with pits cut into its base. A possible partial inner ring of postholes was also present inside the ring-ditch. There were eight internal features including a central fire pit. All features within House 4 were sealed by a charcoal-rich deposit (010).
3.2.2 Ring Groove. The partially surviving ring groove (015) was present on the north and north-eastern side of the house and measured c. 0.3 m wide by 0.2 m deep. Within the ring groove were four postholes (119, 088, 092 and $\mathbf{0 1 3}$ ). These were of similar dimensions and form, ranging in size from 0.30 m diameter by 0.07 m deep to 0.40 m diameter by 0.10 m deep. The ring groove is interpreted as the foundation cut into which the non-load bearing curtain wall of the house would have been secured, with the four postholes being part of this construction.
3.2.3 Posthole Rings. An outer ring of 16 postholes ( $\mathbf{0 4 2}, \mathbf{0 9 8}, \mathbf{0 9 6}, \mathbf{1 0 0}, \mathbf{0 0 3}, \mathbf{1 2 1}, \mathbf{1 0 2}$, $\mathbf{1 0 6}, \mathbf{1 2 4}, \mathbf{1 1 1}, 113,115,248$ and $\mathbf{0 6 6}$ ) encircled the penannular ring-ditch ( $\mathbf{0 0 8}$ ). They were similar in form and ranged in size from 0.30 m diameter by 0.1 m deep to 0.3 m diameter by 0.28 m deep. The remains of a possible inner ring of postholes survived as an arc of four postholes $(\mathbf{1 3 2}, \mathbf{1 0 4}, \mathbf{1 3 0}$ and $\mathbf{3 2 1})$ which were found on the inner western edge of the ring-ditch and range in size from 0.30 m diameter by 0.1 m deep to 0.45 m by 0.50 m by 0.30 m deep. These postholes, outer and inner ring, are interpreted as the foundations for the load bearing posts supporting the ring beam onto which the pitched roof would have been fastened.
3.2.4 Penannular Ring-Ditch and Entrance. A penannular ring-ditch (008) which measured 2 m wide by 0.4 m deep was filled with two deposits. The lower fill of dark brown silt contained $\mathrm{c} .40 \%$ large stones ( $\mathbf{0 0 9 )}$, and the upper fill was a black charcoalrich material (010). The terminal ends of the ring-ditch are orientated to the northwest. The break in the ring-ditch may be a possible entrance, although there is no evident porch or entrance structure visible in plan. If this was the entrance it would be unusual, as all other roundhouses excavated at gWest have had entrances orientated to the south-east. Although there is no obvious entrance structure to the south-east, it is possible that as the penannular ring-ditch (008) was shallow at the south-east $(0.09 \mathrm{~m}$
deep) this would not have restricted access into the house, and the pit (036) may have been a foundation cut for an entrance post. Within the ring-ditch were eight pits (050, $\mathbf{0 5 5}, \mathbf{3 1 7}, \mathbf{3 1 9}, \mathbf{0 1 1}, \mathbf{0 5 8}, \mathbf{0 6 0}$ and $\mathbf{0 5 6}$ ) that ranged in size from 0.40 m by 0.30 m by 0.11 m deep to 1.10 m by 0.96 m by 0.09 m deep. These pits were cut into the subsoil (002) within the base of the ring-ditch and were sealed by the basal fill (010) within (008). There are a number of interpretations regarding the function of these internal ring-ditches, including; wear patterns from livestock, storage pits or a method to increase head room under the sloping eaves of the house (for discussions on this topic see Reynolds 1982, Kendrick 1995 and Pope 2007). Similar examples of ring-ditches with pits cut into them have been excavated at Douglasmuir (Kendrick 1995) where some of the pits were interpreted as structural and others where the function was undetermined.
3.2.5 Internal Features. The eight internal features (094, 136, 109, 117, 144, 134, 148 and 146) ranged in size from 0.11 m by 0.12 m by 0.07 m to 2.30 m by 1.70 m by 0.34 m deep. Pit (134) may have been a hearth because of the high quantity of charcoal within the fill (135) which also contained burnt bone, although there was no evidence of in situ burning in the subsoil (002). Features ( $\mathbf{1 4 8}$ and 146) are small stakeholes and maybe features related to the hearth architecture. The function of pits $(\mathbf{0 9 4}, \mathbf{1 3 6}$, $\mathbf{1 4 4}, 109)$ and (117) were not known.

### 3.3 House 5

3.3.1 This post-built house measured 9.5 m by 11 m . The features making up the house were heavily truncated which made the interpretation of these features difficult. The house was defined by a ring groove with an entrance orientated to the south-east. A partial ring of postholes was present as well as a partial ring-ditch and a number of internal features including a hearth.
3.3.2 Ring Groove and Entrance. The ring groove (192) was an intermittent feature, which was truncated on its north-eastern side. Its dimensions were c. 0.45 m diameter by 0.3 m deep. There was one posthole (195) within the ring groove which was interpreted as a foundation for one of the posts of the curtain wall. The entrance was present to the south-east and was defined by a pair of opposing postholes (153-265) cut at the terminal ends of the ring groove. The ring groove also widens at this point creating more space between the curtain wall and the posthole ring. The ring groove (192) cut a curvilinear feature (593) on its north-western side. The feature (593) was truncated and could only be seen in plan as a faint stain darker than the surrounding natural subsoil (002) and had a width of 0.30 m . Feature (593) did not show any spatial relationship in plan with other features that was indicative of structural remains, and the function of the feature remains undetermined.
3.3.3 Posthole Ring. The degree of horizontal truncation and the concentration of postholes in the south-western quadrant of the house (Fig. 2) make the structural ring of postholes for the house hard to define. It is possible that the following sequence of twelve postholes represents the posthole ring (379, 199, 151, 252, 201, 206, 204, 214, 228, 230, 224 and 222) which ranged in size from 0.34 m by 0.36 m by 0.08 m deep to 0.4 m by 0.75 m by 0.27 m .
3.3.4 Internal Features. There were 21 internal features (150, 165, 167, 164, 193, 234, 236, 238, 244, 242, 216, 220, 218, 226, 190, 232, 240, 157, 267, 256 and 254) ranging in size from 0.10 m diameter by 0.11 m deep to 0.94 m by 2.43 m by 0.26 m deep. There were three conjoining pits ( $\mathbf{1 5 0}, \mathbf{1 6 5}$ and $\mathbf{1 6 7}$ ) which measured 2.20 m by 1.00 m by 0.20 m deep, 1.50 m diameter by 0.24 m deep and 2.40 m by 1.00 m by 0.19 m , on the north-east side of the house. The pits formed a larger curvilinear feature similar in form to a ring-ditch. The majority of the internal features clustered on the western and southern side of the house, and showed no spatial pattern indicative of internal architecture. They varied in form, size and their fills. There was a large central pit (164), dimensions 1.2 m by 2 m by 0.26 m deep, which contained fragments of pottery, but no evidence as to its function.

### 3.4 House 2

3.4.1 This was a post-built house measuring c .7 m (east to west) by c .9 m (north to south). It had an outer and an inner posthole ring. The entrance was to the south-east and was framed by four large postholes probably representing the porch construction. There were internal features throughout and two possible partial ring-ditches, one on the west and the other on the east side of the house.
3.4.2 Posthole Rings and Entrance. Due to the concentration and number of internal features, it was difficult to determine which were the posthole foundations for the structural posts that would have held the ring beam upon which the pitched roof would have been fastened. The possible outer ring comprised thirteen postholes (405, 281, 277, 271, 269, 454, 365, 359, 384, 337, 339, 343 and 297) and ranged in size from 0.31 m diameter by 0.09 m deep to 0.87 m by 0.53 m by 0.30 m deep. The inner ring comprised thirteen postholes (421, 291, 383, 458, 456, 428, 432, 460, 357, 355, 430, 448, and 399) which ranged in size from 0.30 m diameter by 0.13 m deep to 0.63 m by 0.94 m by 0.2 m deep. The entrance faced the south-east and was defined by two pairs of opposing postholes representing a trapezoidal porch construction (405297 and 421-399). This would make the width of the entrance 3 m (between 421-399) narrowing to 1 m (between 405-297). A further two features ( $\mathbf{2 5 5}$ and 293) were also interpreted as part of the western side of the porch, although they did not have an opposed pair on the east side of the porch. A linear feature (394) linked posthole (421) and (399), and may represent some further architectural elaboration to the entrance. A shallow scoop (490) between postholes ( $\mathbf{4 0 5}$ and 297) is thought to be a result of wear created by movement into and out of the house.
3.4.3 Internal Features. There were twenty-eight internal features ranging in size from 0.16 m diameter by 0.06 m deep to 1.40 m by 3.00 m by 0.28 m . There were two large curvilinear pits ( $\mathbf{3 7 7}$ and 417). The western curvilinear ditch ( $\mathbf{3 7 7}$ ) measured c. 3.7 m by 1.2 m by 0.2 m deep and was filled with two deposits ( $\mathbf{3 7 8}$ and $\mathbf{4 6 4}$ ). The eastern curvilinear pit (417) measured c. 3.5 m by 1.3 m by 0.24 m deep and was filled with a single deposit (416). Both these pits contained pottery. The size and form of these pits is indicative of truncated ring-ditches which have been variously interpreted as storage pits or as a means of increasing vertical space under the eaves of the roof (for discussions on this topic see Reynolds 1982, Kendrick 1995 and Pope 2007). There were four postholes (418, 473, 475 and $\mathbf{4 5 2}$ ) cut into the bases of (377) and (417), the function of which could not be determined through excavation. There were nineteen features within the internal space of the house (353, 469, 467, 462, 465, 471, 450,

446, 444, 477, 426, 423, 479, 438, 436, 434, 401, 403 and 440). Feature (426) may be the truncated remains of the western ring-ditch (377). The remaining features also did not display any physical or spatial relationships with each other or other features which were indicative of their function.

### 3.5 House 6

3.5.1 This post-built house had a diameter of c. 5.5 m . It was heavily truncated making the interpretation of the structure difficult. It appears to have two posthole rings, with a partial ring-ditch on its eastern side replacing the corresponding section of inner posthole ring. A cluster of features to the south-east may be the remains of the porch structure and entrance. The features of House 6 were sealed by a deposit of charcoalrich black silt (594).
3.5.2 Posthole Rings and Entrance. The house has an inner and outer ring of postholes. The outer ring was possibly formed by c. thirteen postholes (559, 581, 579, 543, 573, 494, 561,547, 519, 504, 502, 488 and 509) and ranged in size from 0.20 m diameter by 0.08 m deep to 0.63 m by 0.94 m by 0.2 m deep. The inner ring comprised ten postholes (553, 507, 534, 536,538, 525,530,545,555,567 and 571) which ranged in size from 0.50 m diameter by 0.18 m deep to 0.45 m by 0.58 m by 0.28 m deep. These two rings of postholes are interpreted as the foundations for the structural posts upon which the ring beam would have been fixed in order to secure the pitched roof. There was a break in the posthole ring at the south-east that may represent the entrance to the house and a cluster of five pits that may represent the architecture of a porch and entrance (587, 577, 592, $\mathbf{5 8 9}$ and 585); these features ranged in size from 0.30 m by 0.28 m by 0.08 m deep to 0.50 m by 1.31 m by 0.15 m deep.
3.5.3 Internal Features. There were twelve internal features which ranged in size from 0.20 m by 0.25 m by 0.15 m deep to 3.5 m by 1 m by 0.15 m deep. Seven of these features were situated between the putative outer and inner posthole ring and displayed no physical evidence or spatial pattern indicative of their function (515, 527, 517, 532, 519 and 565), four were found within the internal space of the house ( $\mathbf{5 2 1}, 523,551$ and 557 ), with (521) cutting (523) and interpreted as a replacement post, and a large curvilinear pit (575) interpreted as a truncated ring-ditch similar to those found in Houses 2 and 5.
3.5.4 External Features within the Excavation Area of Houses 4, 5, 2 and 6 (Fig. 2). There were 77 external features across the site. They were classified into three groups;
I. Six large elongated pits $(\mathbf{0 0 5}, \mathbf{0 4 6}, \mathbf{0 8 6}, \mathbf{1 2 8}, 303$ and $\mathbf{4 8 6})$ which ranged in size from 1.12 m by 2.22 m by 0.20 m deep to 1.60 m by 5.54 m by 0.55 m . The function of these pits could not be determined through excavation. The proximity of the pits to Houses 4,5 and 2 is a possible indication that these features relate to household activities such as storage.
II. Circular and sub-circular pits. These seventy features make up the majority of the external features within the excavation area. They can be further classified into the following groupings:

- two south of House 4 (040 and 038);
- seventeen to the east of House $4(\mathbf{0 3 6}, \mathbf{0 3 4}, \mathbf{0 3 2}, \mathbf{0 2 1}, \mathbf{0 1 9}, \mathbf{0 2 3}, \mathbf{0 1 7}, \mathbf{0 2 8}, \mathbf{0 3 0}$, 161, 026, 171, 173, 175, 177, 179 and 181); six of these features, similar in size and form, were aligned in a straight line running north-west to south-east $(\mathbf{1 8 1}, \mathbf{1 7 9}, \mathbf{1 7 7}, \mathbf{1 7 5}, \mathbf{1 7 3}$, and 171). It is possible that they represent an external fence line or similar division between Houses 4 and 5;
- three to the south of House $5(\mathbf{1 5 5}, 138$ and $\mathbf{4 1 3})$;
- ten to the north of House $5(\mathbf{0 6 8}, \mathbf{0 8 0}, \mathbf{0 7 6}, \mathbf{0 7 8}, \mathbf{0 8 2}, \mathbf{0 7 4}, \mathbf{0 7 2}, \mathbf{0 8 4}, \mathbf{2 6 3}, \mathbf{2 6 1}$, 112, 381, 126 and 267);
- five to the south of House $2(409,388, \mathbf{3 8 6}, 392$ and $\mathbf{3 9 0})$;
- six to the west of House $2(\mathbf{2 8 1}, \mathbf{2 7 7}, \mathbf{2 7 5}, \mathbf{2 7 3}, 271$ and 269);
- fifteen to the north of House $2(\mathbf{2 8 5}, \mathbf{2 9 9}, \mathbf{3 0 1}, \mathbf{3 1 1}, \mathbf{3 1 3}, \mathbf{3 1 5}, \mathbf{3 6 5}, \mathbf{3 3 3}, \mathbf{3 4 5}$, 347, 454, 349, 351, 363, and 361);
- eight to the east of House 2 (442, 341, 331, 329, 327, 323, 307, 481 and 305);
- and four to the south of House $6(513,498,511$ and 500).
III. One curvilinear feature north of House 5 (593) which was cut by (192), making (192) a later feature
3.5.5 The spatial distribution of these features with the exception of the six features (181, 179, 177, 175, 173, and 171) discussed above, show no relationships indicative of structures.

### 3.6 House 3 (Fig. 3)

3.6.1 This house was heavily truncated, particularly on its northern side where features would have been lost due to erosion downslope, making the interpretation of the house difficult. There were at least two phases of features within this area. The earliest phase (Phase 1) is represented by a curvilinear cut present to the east, southeast and south-west (073 and 114). This feature was cut by two pits, (084) and (112). These two pits were interpreted as being part of a series of pits present on the west, south and east of the excavation area. This arc of pits represents Phase 2. There were also other probable architectural components within the excavation area:

## Phase 1

- Curvilinear cut (073 and 114) Phase 2
- Outer arc of pits

Unphased

- Outer ring groove
- Inner ring groove
- Posthole ring and entrance
- Features internal to the house
- Isolated features
3.6.2 The architectural components that can be assigned to the house structure with certainty are the posthole ring and entrance and features internal to the house. The relationships between the other architectural components and the house were not clear, but it is probable that either the outer or inner ring grooves were the remains of the foundations for a curtain wall, with the vestigial remains of two ring grooves
suggestive of a phase of re-building or repair (See Appendix 2 for House 3 Context Register).
3.6.3 Curvilinear Cut. The truncated intermittent remains of a curvilinear feature, present on the south-east and the west of House 3 ( 073 and 114), measured 0.2 m by 32.00 m (surviving length) by 0.10 m deep. There was one feature within the curvilinear feature (135) which was interpreted as a possible posthole. The curvilinear feature ( $\mathbf{0 7 3} / \mathbf{1 1 4}$ ) was cut by pits ( 112 and 084 ) making ( $073 / 114$ ) earlier than ( 112 and 084 ).
3.6.4 Outer Arc of Pits. A series of fifteen pits formed an arc on the south and south-west (071, 084, 137, 144, 132, 210, 228, 278, 226, 244, 112, 124, 122, 118 and 120) which ranged in size from 0.50 m by 0.40 m by 0.31 m deep to 1.80 m by 2.00 m by 0.4 m deep. Pit (144) contained Bronze Age prehistoric pottery and pit (228) was cut by a later feature (278). One pit (071) abutted the palisade and (084) and (112) cut the palisade, making these features later. If all these pits belonged to the same phase of construction, then by extension they must all have been later features than the curvilinear feature (073/114).
3.6.5 Outer Ring Groove. A possible ring groove was recorded situated between the outer arc of pits and the inner ring groove. The ring groove was represented by a segment of a curvilinear cut, and probable postholes following the same alignment. The outer ring groove was concentric to both the outer arc of pits and the posthole ring of House 3. The features were shallow as a result of heavy truncation, resulting in an intermittent feature present to the south and east. The outer ring groove was represented by an arc of seven features $(\mathbf{1 0 6}, \mathbf{1 1 0}, \mathbf{2 1 8}, \mathbf{0 2 7}, \mathbf{0 2 5}, \mathbf{0 3 3}$, and $\mathbf{0 3 1}$ ) which ranged in size from 0.50 m diameter by 0.14 m deep to 0.34 m by 0.30 m by 0.11 m deep. Six of these features were truncated pits that were aligned with a segment of a curvilinear cut (106). They were interpreted as truncated postholes cut into the ring groove (106) into which the posts for the non load-bearing curtain wall would have been secured.
3.6.6 Inner Ring Groove. The inner ring groove was represented by segments of linear features ( $\mathbf{0 8 9}, 204$ and 283 ) which measured 6 m by 0.2 m by 0.1 m deep, 1.3 m by 0.15 m by 0.1 m and 1.5 m by 0.1 m by 0.02 m deep respectively. There were nine probable postholes found in association with the inner ring groove (108, 110, 190, $\mathbf{1 9 2}, \mathbf{1 9 4}, \mathbf{0 1 9}, \mathbf{0 3 7}, \mathbf{0 3 5}$, and $\mathbf{0 3 9}$ ) ranging in size from 0.29 m by 0.31 m by 0.08 m deep to 0.40 m by 0.48 m by 0.15 m deep. These features were interpreted as the remains of postholes cut into the ring groove into which the posts for the non loadbearing curtain wall would have been secured.
3.6.7 Posthole Ring and Entrance. Eleven postholes make up the ring of postholes which were the foundations for the structural, load-bearing posts of the house $(\mathbf{0 0 3}, \mathbf{0 0 5}$, $007,017,148,051,059,061,100$ and 067 ) which ranged in size from 0.23 m by 0.24 m by 0.11 m deep to 0.80 m diameter by 0.39 m deep. The entrance to the house was not readily discernible from the plan (See Fig. 3). If, as with Houses 2 and 6 (this report), the entrance was orientated to the south-east then possible entrance structures may be represented by paired postholes (003-079 or 079-067).
3.6.8 House 3 Internal Features. There were twenty-three internal features (047, 049, $055,063,065,095,082,079,015,011,013,041,077,075,069,087,085,082,079$, 104, 091, 102, 003 and 098), which ranged in size from 0.20 m diameter by 0.10 m
deep to 4.5 m by 1.8 m by deep. Feature ( $\mathbf{( 0 8 5 )}$ ) contained prehistoric pottery, burnt bone and charcoal-rich deposits, and was interpreted as a possible hearth. Another large pit was found on the south-west side of the house (015). This pit was heavily truncated with its possible shallow remains extended to the west, which would then mirror the pit (053) in its position within the house. These pits were interpreted as the truncated remains of a ring-ditch. The other nineteen features were distributed across the internal space of the house. No spatial pattern could be seen in the plan of these features which was indicative of structures, although it is likely that they represent the foundations for internal divisions.
3.6.9 Isolated Features. There were nineteen isolated features (279, 196, 198, 206, 202, 188, 190, 231, 262, 152, 146, 240, 238, 242, 152, 043, 045, 246 and 248) that were bounded by the curvilinear cut $(\mathbf{0 7 3} / \mathbf{1 1 4})$ which ranged in size from 0.23 m by 0.30 m by 0.09 m deep to 1.00 m by 0.60 m by 0.08 m deep. The features do not show any spatial patterning indicative of structural components and there was no evidence from excavation as to the function of these features. There were thirty-four isolated features (281, 266, 268, 270, 176, 274, 186, 180, 182, 178, 162, 164, 256, 273, 126, 254, 168, 160, 170, 222, 220, 252, 214, 236, 150, 166, 172, 154, 156, 158, 184, 135, 142 and 139) ranging in size from 0.12 m diameter by 0.07 m deep to 1.57 m by 2.87 m by 0.20 m deep. The majority of these features were sub-circular pits, with the exception of ( $\mathbf{2 8 1}$ and 284) which are two segments of a linear feature. The function of these features could not be determined by excavation, and there is no spatial patterning in plan indicative of structures.

### 3.7 Finds, Melanie Johnson

3.7.1 An assemblage of finds including pottery, bone, stone objects and cannel coal was recovered from the excavations. A full list by context is provided in Appendix 9.

House 2
3.7.2 Pieces of cannel coal were recovered from House 2 (contexts 417, 464 and 468); most of these constituted unworked pieces but three pieces from 417 were fragments of an unfinished object which was partly polished and had likely broken before it was completed.
3.7.3 A large assemblage ( 6189 g ) of Bronze Age prehistoric pottery was found. This includes rim and base sherds and a significant quantity was found in context 416 ( 3422 g of the total).
3.7.4 Two pieces of unworked quartz $(\mathbf{3 7 8}, \mathbf{4 8 7})$, a piece of grey flint $(\mathbf{4 6 8})$ and a possible pivot stone (416) were also recovered. A small quantity of burnt bone ( 5 g ) was found.

House 3
3.7.5 There was 1210 g of Bronze Age prehistoric pottery from contexts associated with this house, much of which was found during surface cleaning.
3.7.6 In addition, a small piece of vitrified material was found in (393) and a stone spindle whorl and a stone loom weight from surface cleaning.

## House 4

3.7.7 The only finds were 2184 g of Bronze Age prehistoric pottery from a variety of contexts and some pieces of unworked white quartz ( $\mathbf{1 6 3}$ and from cleaning). A small quantity of burnt bone ( 6 g ) was found.

House 5
3.7.8 A small assemblage was recovered, comprising a piece of bone from 215, a piece of flint, a possible hammerstone and pebbles/chips of unworked white quartz (all from 169), and 539 g of Bronze Age prehistoric pottery from contexts associated with the structure. A small quantity of burnt bone ( 2 g ) was found.

House 6
3.7.9 The only finds were 72 g of Bronze Age prehistoric pottery, which includes a base sherd, recovered from (508). A small quantity ( 21 g ) of burnt bone was found.

External features
3.7.10 Finds included 179g of prehistoric pottery from ( $\mathbf{0 8 6}$ and 413), some orange flint also from (086), and a broken probable loom weight from the palisade fill. A small quantity ( 12 g ) of burnt bone was found.

## 4. CONCLUSIONS AND RECOMMENDATIONS

4.1 Five post-built Bronze Age prehistoric roundhouses were excavated in this area, along with 117 external features including large elongated pits, circular and sub-circular pits and linear features.
4.2 House 4. This house, measuring 10 m by 12 m , was defined by a ring groove (015), which was interpreted as a foundation cut for the non load-bearing curtain wall. The structural load-bearing component of this house was a concentric outer ring and partial inner ring of postholes, into which the upright posts upon which the ring beam would be supported would have been secured, which in turn would support the pitched roof. The house had a penannular ring-ditch (008) with terminal ends to the north-west; it is not clear if this formed the house entrance. There are various interpretations for the function of these large internal pits including storage (for a fuller discussion Reynolds 1982, Kendrick 1995 and Pope 2007). There were ten other internal features including a central fire pit (134). All features within House 4 were sealed by a charcoal-rich deposit (010).
4.3 House 5. This was post-built house which measured 9.5 m by 11 m . It was defined by a ring groove (192) and partial ring of postholes. The ring groove was interpreted as the foundation for the curtain wall, and the postholes as foundations for the house's structural posts. There were 24 internal features which varied in size and form and expressed no spatial patterning indicative of internal architecture, although they are likely to be the vestigial remains of internal divisions and internal architectural details.
4.4 House 2. This was a post-built house measuring c. 7 m by 9 m . It had outer and inner structural posthole rings. The entrance was to the south-east and was framed by four large paired postholes (405-297 and 421-399) probably representing the porch construction. There were internal features throughout and two curvilinear ditches; one on the west (377) and the other on the east side of the house (417). The function of these internal curvilinear pits has been discussed elsewhere (see Para 4.3).
4.5 House 6 was a post-built house, diameter c. 5.5 m , with an internal curvilinear pit on its eastern side (see Para 4.3 for discussion on internal pits). It had a double ring of structural postholes which would have supported a ring beam, to which the pitched roof would have been fastened. It was heavily truncated making the identification of the entrance unclear. The posthole rings and internal features were sealed by a deposit of charcoal-rich black silt (594).
4.6 House 3. This area had two phases. Phase 1 is represented by the remains of a curvilinear feature. This feature was cut by two pits which were part of an outer arc of large pits, Phase 2. There were seven architectural components recognised during the excavation;

## Phase 1

- Curvilinear cut (073 and 114) Phase 2
- Outer arc of pits

Unphased

- Outer ring groove
- Inner ring groove
- Posthole ring and entrance
- Features internal to the house
- Isolated features
4.7 Of these seven components only two can be assigned to House 3 with certainty, the posthole ring and entrance and the features internal to the house. Although it is likely that the ring grooves represented a re-building or repair phases to the outer curtain wall of the house, there was no physical relationship between the ring grooves, the outer arc of pits and the house (represented by the posthole ring, entrance and internal features), that enabled an interpretation of the phasing between these components.
4.8 House 3 was a round post-built house, diameter c. 6 m . The house was defined by a single ring of posts. The entrance to the house could not be determined, but probably existed to the south-east of the house as it did with Houses 5, 2 and 6. There was a suite of features within the internal space of the house.
4.9 There were nineteen isolated features enclosed by the curvilinear feature ( $\mathbf{0 7 3} / \mathbf{1 4 4}$ ). There was no physical or spatial evidence as to their function.
4.10 There were 114 isolated features across the excavation area. There was no physical or spatial evidence as to their function.
4.11 A programme of post-excavation analyses and reporting will be required based on the results of this excavation. The project design and costing for this are supplied under separate cover.
4.12 The project archive, comprising all CFA record sheets, maps and reports, will be deposited with the National Monuments Record of Scotland (NMRS) and copies of reports will be lodged with Perth and Kinross Heritage Trust.

| 024 | House 4 | Cut of posthole | 0.25 |  | 0.2 | Loose greyish brown sandy silt, charcoal inclusions |
| 025 | House 4 | Packing stones in posthole [023] | 0.1 |  | 0.19 | Large packing stones, actual post probably removed, not burnt in-situ |
| 026 | House 4 | Cut of posthole | 0.7 |  | 0.28 | Circular posthole with steep sloping sides and V shaped base, several other small pits in close proximity |
| 027 | House 4 | Fill of posthole [026] |  |  |  | Loose dark brown sandy silt, modern pottery in top of fill |
| 028 | House 4 | Cut of posthole | 0.6 |  | 0.14 | Circular posthole with curved sides and flat base, part of a cluster of postholes near baulk at NE of house 4 |
| 029 | House 4 | Fill of posthole [028] |  |  |  | Loose greyish brown sandy silt, similar to other postholes in area |
| 030 | House 4 | Cut of posthole | 0.2 |  | 0.08 | Circular posthole with steep sides and concave base, possibly a stakehole, in close proximity to several large pits |
| 031 | House 4 | Fill of posthole [030] |  |  |  | Loose greyish brown sandy silt |
| 032 | House 4 | Cut of posthole | 0.5 |  | 0.14 | Circular posthole with sloping sides and concave base |
| 033 | House 4 | Fill of posthole [032] |  |  |  | Loose greyish brown sandy silt |
| 034 | House 4 | Cut of a posthole | 0.45 |  | 0.9 | Circular posthole with steeply sloping sides and flat base, NE of house 4 |
| 035 | House 4 | Fill of posthole [035] |  |  |  | Loose greyish-brown sandy silt, contained large stone |
| 036 | House 4 | Cut of small pit | 1.4 |  | 0.18 | Sub-circular feature with sloping sides and flat base with curved edges, just to the E of house 4, very close to the baulk and several small postholes |
| 037 | House 4 | Fill of pit [036] |  |  |  | Loose greyish brown sandy silt with large stones and charcoal, possible storage pit associated with house 4 ? |
| 038 | House 4 | Cut of small posthole | 0.33 |  | 0.04 | Circular posthole with sloped sides and flat base, to E of house, similar to postholes to N of house [030] [019] |
| 039 | House 4 | Fill of posthole [038] |  |  |  | Loose greyish brown sandy silt |
| 040 | House 4 | Cut of posthole | 0.63 |  | 0.12 | Circular posthole with gradually sloping sides and flat base |
| 041 | House 4 | Fill of posthole [040] | 0.63 |  | 0.12 | Loose greyish brown stony silt with several larger stones |
| 042 | House 4 | Cut of posthole | 0.5 |  | 0.1 | Circular posthole with gradually sloping sides and flat/irregular base to SE of house 4 |
| 043 | House 4 | Fill of posthole [042] |  |  |  | Loose light brown gravely silt |
| 044 | House 4 | Cut of posthole | 0.3 |  | 0.1 | Sub-circular posthole with flat base on S side of ring-ditch, very truncated |
| 045 | House 4 | Fill of posthole [044] |  |  |  | Loose dark brown grey silt |
| 046 | House 4 | Cut of ditch | 3.5 | 0.85 | 0.22 | Sub-circular feature with steep sloping sides and flat base, several post holes in close proximity which may have been supports |

| Context <br> No. | Feature | Context type | Width / Diam (m) | $\begin{aligned} & \text { Length } \\ & (\mathrm{m}) \end{aligned}$ | $\begin{aligned} & \text { Depth } \\ & \text { (m) } \end{aligned}$ | Description of Context |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 047 | House 4 | Fill of pit [046] |  |  |  | Loose greyish brown sandy silt with charcoal inclusions, possible storage pit related to house 4 |
| 048 | House 4 | Upper fill of ditch [008] |  |  |  | Same as [009], Loose mid dark grey sandy silt with $3-4 \%$ charcoal chunks and flecks, $1-2 \%$ small sub-rounded stones, fairly homogenous, probably post-abandonment infilling |
| 049 | House 4 | Lower basal fill of ditch (049) Slot 2 |  |  |  | Loose-firm mid-dark brown silt with $1 \%$ charcoal flecks, probably represent silting up of depression in ditch or a cut feature |
| 050 | House 4 | Cut for posthole | 0.4 | 0.3 | 0.11 | Sub-circular posthole with sloping sides and flat base, aligned S-N, within terminal end |
| 051 | House 4 | Fill of posthole [050] |  |  |  | Loose mid brownish grey silt with $1 \%$ charcoal patches and flecks and $2 \%$ small sub-rounded stones, same as upper layer of [008] |
| 052 | House 4 | Fill of pit [008] |  |  |  | Stones in lower fill (010) of ditch [008] |
| 053 | House 4 | Cut of ring-ditch, Slot 1 | 0.3 |  | 0.2 | Steep sided |
| 054 | House 4 | Secondary fill of [008] Slot 2 |  |  |  | Firm dark grey slightly clayey silt with $1-2 \%$ charcoal flecks and daub, probably destruction layer when house first collapsed in |
| 055 | House 4 | Cut for pit at terminal end of gully, Slot 2 | 0.6 | 0.4 | 0.1 | Sub-circular feature with sloping sides and flat base, aligned SW-NE |
| 056 | House 4 | Cut of pit, Slot 4 | 1.1 | 0.96 | 0.09 | Sub-circular feature with slightly sloping sides and flat base |
| 057 | House 4 | Fill of pit [056] |  |  |  | Loose, mid-dark brown and sandy with stones |
| 058 | House 4 | Cut of pit, Slot 4 | 0.44 | 0.76 | 0.25 | Irregular/ Sub-circular posthole with sloping sides and concave base |
| 059 | House 4 | Fill of posthole in Slot 4 |  |  |  | Loose, brown and sandy with 1 big stone |
| 060 | House 4 | Cut of posthole | 0.57 | 0.6 | 0.11 | Sub-circular/irregular feature with sloping sides and slightly concave base |
| 061 | House 4 | Fill of posthole |  |  |  | Fill of posthole [060] |
| 062 |  |  |  |  |  | UNASSIGNED |
| 063 |  |  |  |  |  | UNASSIGNED |
| 064 | House 4 | Fill of [008] |  |  |  | Continuation of (009) in Slot 4 |
| 065 | House 4 | Fill of [008] |  |  |  | Continuation of (010) in Slot 4 |
| 066 | House 4 | Cut of posthole | 0.3 |  | 0.28 | Circular posthole in Slot 1 with vertical sides and conical base |
| 067 | House 4 | Fill of posthole [066] |  |  |  | Loose dark brown grey silt |
| 068 | Isolated feature | Cut of a posthole | 0.27 |  | 0.06 | Circular posthole with sloping sides and concave base, heavily truncated |
| 069 | Isolated feature | Fill of posthole [068] |  |  |  | Loose dark brown gritty silt |
| 070 | Isolated feature | Cut of large isolated pit/ posthole | 0.5 |  | 0.22 | Circular feature with sloping sides and concave base |
| 071 | Isolated | Fill of pit/posthole |  |  |  | Moderately compacted mid brown silt |

|  | feature |  |  |  |  | with occasional charcoal flecks |
| 072 | Isolated feature | Cut of posthole | 0.31 |  | 0.19 | Circular posthole with sloping sides and concave base, 1 of 5 (with [074] [078] [080] ) forming an arc- truncated remains of possible round house |
| 073 | Isolated feature | Fill of posthole [073] |  |  |  | Moderately compacted blackish brown sandy silt with occasional charcoal flecks and burnt bone |
| 074 | Isolated feature | Cut of pit | 0.58 |  | 0.06 | Circular feature with gently sloping sides and flat base aligned E-W |
| 075 | Isolated feature | Fill of pit [074] |  |  |  | Moderately compacted blackish brown sandy silt with occasional charcoal flecks |
| 076 | Isolated feature | Cut of posthole | 0.3 |  | 0.07 | Circular posthole with sloping sides and concave base, possibly very truncated remains of internal feature of round house |
| 077 | Isolated feature | Fill of posthole [076] |  |  |  | Moderately compacted mid brown silty sand with occasional charcoal flecks |
| 078 | Isolated feature | Cut of posthole | 0.23 |  | 0.1 | Circular posthole with concave sides and base |
| 079 | Isolated feature | Fill of posthole [078] |  |  |  | Moderately compacted mid brown silty sand with occasional charcoal flecks |
| 080 | Isolated feature | Cut of pit/posthole | 0.35 |  | 0.13 | Circular posthole with sloping sides and concave base |
| 081 | Isolated feature | Fill of pit/ posthole |  |  |  | Moderately compacted mid brown gravely silt with occasional charcoal flecks |
| 082 | Isolated feature | Cut of posthole | 0.26 |  | 0.08 | Ovoid posthole with concave sides and base |
| 083 | Isolated feature | Fill of posthole [082] |  |  |  | Moderately compacted blackish brown sandy silt with occasional charcoal flecks |
| 084 | Isolated feature | Cut of posthole | 0.4 |  | 0.09 | Circular posthole with sloping sides and flat base, internal feature of very truncated roundhouse |
| 085 | Isolated feature | Fill of posthole [084] |  |  |  | Moderately compacted mid brown sandy silt containing sandstone post pad |
| 086 | Isolated feature | Cut of ring-ditch | 1 | 2.81 | 0.11 | Rectilinear feature with gently sloping sides and flat base, ring-ditch of very truncated roundhouse |
| 087 | Isolated feature | Fill of ring-ditch [087] |  |  |  | Moderately compacted mid brown sandy silt with occasional charcoal fragments and burnt bone |
| 088 | House 4 | Cut of posthole | 0.3 | 0.4 | 0.2 | Sub-circular posthole with steep sides and conical base, a terminal end to $E$ of construction groove [015] |
| 089 | House 4 | Fill of posthole [088] |  |  |  | Firm-loose dark brown silt |
| 090 | House 4 | Cut of posthole | 0.4 |  | 0.1 | Round posthole with steep sides and concave base, part of series of small postholes linked by gully |
| 091 | House 4 | Fill of posthole [090] |  |  |  | Loose dark brown silt with possible packing stones |
| 092 | House 4 | Cut of posthole | 0.35 |  | 0.2 | Sub-circular posthole with steep sides and concave base |

| Context <br> No. | Feature | Context type | Width / Diam (m) | $\begin{aligned} & \text { Length } \\ & (\mathrm{m}) \end{aligned}$ | $\begin{aligned} & \text { Depth } \\ & \text { (m) } \end{aligned}$ | Description of Context |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 093 | House 4 | Fill of posthole [092] |  |  |  | Loose-firm dark brown silt |
| 094 | House 4 | Cut of posthole | 0.38 | 0.4 | 0.24 | Sub-circular posthole with steep sloping sides and flat base, aligned NW-SE, just inside gully [015] probably structural post for roof |
| 095 | House 4 | Fill of posthole [094] |  |  |  | Loose-firm mid greyish brown slightly sandy silt with $>1 \%$ angular and subangular stones and occasional flecks, fairly homogenous probably one rapid filling event |
| 096 | House 4 | Cut of posthole | 0.4 | 0.51 | 0.08 | Circular posthole with sloping sides and irregular/flat base |
| 097 | House 4 | Fill of posthole [096] |  |  |  | Loose greyish brown sandy silt |
| 098 | House 4 | Cut of posthole | 0.24 | 0.26 | 0.03 | Circular posthole with eroded sides and flat base, 1 of 5 similar postholes in close proximity forming small structure |
| 099 | House 4 | Fill of posthole [098] |  |  |  | Loose dark grey sandy silt |
| 100 | House 4 | Cut of posthole | 0.25 | 0.33 | 0.1 | Sub-circular posthole with steeply sloping sides and concave base |
| 101 | House 4 | Fill of posthole [100] |  |  |  | Loose greyish brown sandy silt |
| 102 | House 4 | Cut of posthole | 0.28 | 0.3 | 0.16 | Circular posthole with steep sides and concave base |
| 103 | House 4 | Fill of posthole [102] |  |  |  | Loose greyish brown sandy silt |
| 104 | House 4 | Cut of post hole | 0.3 | 0.3 | 0.3 | Round posthole with vertical sides and flat base, in Slot 3 on inner side of [008] |
| 105 | House 4 | Fill of posthole |  |  |  | Probably same as baulk fill 123( 010) in Slot 1 |
| 106 | House 4 | Cut of posthole | 0.35 | 0.4 | 0.2 | Circular posthole with steep sides and concave base |
| 107 |  |  |  |  |  | Fill of posthole [106], <324> |
| 108 |  |  |  |  |  | Packing stones in posthole [106] |
| 109 | House 4 | Cut of posthole | 0.56 | 0.57 | 0.32 | Posthole with steeply sloping sides and slightly concave base, adjacent to [111], possibly forming entrance way to ring-ditch house |
| 110 | House 4 | Fill of posthole |  |  |  | Loose grey and mottled black brown with $1 \%$ small to medium sub-rounded stones and charcoal flecks and burnt bone |
| 111 | House 4 | Cut of posthole | 0.3 | 0.33 | 0.19 | Sub-circular posthole with steep sloping vertical sides and flat base, probably forming entrance to ring-ditch house |
| 112 | House 4 | Fill of posthole [112] |  |  |  | Loosely compacted mid-dark grey brown slightly sandy silt, $<1 \%$ small sub-rounded stones and occasional flecks of charcoal |
| 113 | House 4 | Cut of a posthole | 0.3 |  | 0.1 | Circular posthole with steep sloping sides and flat base, forms arc with [094] and [115] |

| Context No. | Feature | Context type | Width / Diam (m) | $\begin{aligned} & \text { Length } \\ & (\mathrm{m}) \end{aligned}$ | $\begin{aligned} & \text { Depth } \\ & \text { (m) } \end{aligned}$ | Description of Context |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 114 | House 4 | Fill of posthole [113] |  |  |  | Loose mid-dark grey brown silt with $<1 \%$ small sub-rounded stones and charcoal flecks, may be in-situ burning or infilling with burnt material |
| 115 | House 4 | Cut of posthole | 0.38 |  | 0.27 | Circular posthole with steeply slopingvertical sides and flat base, 1 of arc of postholes |
| 116 | House 4 | Fill of posthole [115] |  |  |  | Loose-firm mid-dark greyish brown silt with $<1 \%$ small sub-angular and subrounded stones and $1 \%$ charcoal flecks |
| 117 | House 4 | Cut for possible feature | 0.5 | 0.57 | 0.04 | Sub-circular feature with slightly sloping sides and flat base, aligned NESW |
| 118 | House 4 | Fill of possible feature [117] |  |  |  | Loose mid dark grey brown/ mottled black brown slightly sandy silt with ,1\% charcoal flecks and small subrounded stones |
| 119 | House 4 | Cut of posthole | 0.3 |  | 0.07 | Sub-circular posthole with flat base, within gully cut [115] continues series of postholes |
| 120 | House 4 | Fill of posthole [119] |  |  |  | Firm mid brown silt |
| 121 | House 4 | Cut of posthole | 0.45 |  | 0.3 | Round posthole with vertical sides and flat base, cut into outer edge of gully |
| 122 | House 4 | Fill of posthole [121] |  |  |  | Same as (123) - (010) |
| 123 | House 4 | Fill of [008] |  |  |  | In Slot 3, same as (010) in Slot 1 |
| 124 | House 4 | Cut of posthole | 0.35 | 0.37 | 0.18 | Sub-circular posthole with sloping sides and flat/sloping base, at S edge of ring-ditch, just outside, possibly part of outer ring of posts holding up wall or earlier/ later phase |
| 125 | House 4 | Fill of posthole [124] |  |  |  | Loose mid grey brown sandy silt with $<1 \%$ charcoal flecks and $1-2 \%$ small sub-rounded stones |

| 499 | House 6 | Fill of [498] |  |  |  | Loose light brown very sandy with small stones |
| 500 | House 6 | Cut of a posthole | 0.39 |  | 0.07 | Circular posthole with sloping sides and concave base |
| 501 | House 6 | Fill of [500] |  |  |  | Loose, light brown and sandy with small stones |
| 502 | House 6 | Cut of a posthole | 0.38 | 0.4 | 0.12 | Sub-circular posthole with sloping sides and slightly concave base, aligned $\mathrm{N}-\mathrm{S}$, forming part of outer wall of house |
| 503 | House 6 | Fill of [502] |  |  |  | Loose mid-orange brown grey sandy silt with 1-2\% gravel and small subrounded stones |
| 504 | House 6 | Cut of a posthole | 0.52 | 0.42 | 0.3 | Sub-Circular posthole with steep sloping/vertical sides and irregular base, aligned N-S, 1 of outer ring of posts |
| 505 | House 6 | Fill of [504] |  |  |  | Loose mid orange brown grey silt with $1 \%$ small sub-rounded stones, charcoal flecks and 1 or 2 large chunks ( $4-5 \mathrm{~cm}$ ), remains of packing material or backfilled material. |
| 506 | House 6 | Packing stones in [504] |  |  |  | Medium to large sub-angular cobbles, within fill and some in situ on edge (0.1-0.25) |
| 507 | House 6 | Cut of a large pit | 0.7 |  | 0.2 | Circular posthole with sloped sides and concave base |
| 508 | House 6 | Fill of [507] |  |  |  | Loose greyish brown sandy silt with charcoal, bone and pottery |
| 509 | House 6 | Cut of a posthole | 0.46 | 0.6 | 0.4 | Sub-circular posthole with steep sloping sides and concave base, part of a series of post hole |
| 510 | House 6 | Fill of [509] |  |  |  | Loose greyish brown sandy silt, very charcoal-rich, post possibly burnt insitu |
| 511 | House 6 | Cut of a posthole | 0.28 |  | 0.07 | Circular posthole with sloping sides and concave base |
| 512 | House 6 | Fill of [511] | 0.28 |  | 0.07 | Loose, light brown orange and sandy |
| 513 | House 6 | Cut of a posthole | 0.49 |  | 0.12 | Sub-circular posthole with slightly sloping sides and concave base, 1 of 4 postholes on E side of house |
| 514 | House 6 | Fill of [513] |  |  |  | Very loose, dark brown grey and sandy with stones |
| 515 | House 6 | Cut of a posthole | 0.45 | 0.4 | 0.15 | Circular posthole with sloped sides and concave base, possibly 1 of a series of posthole which circle the exterior of house |
| 516 | House 6 | Fill of [515] |  |  |  | Loose greyish brown sandy silt with possible packing stones |
| 517 | House 6 | Cut of a posthole | 0.22 | 0.25 | 0.2 | Sub-circular posthole with steep sloping sides and flat base, aligned EW, possible part of outer wall of structure |
| 518 | House 6 | Fill of [517] |  |  |  | Loose mid grey slightly sandy silt with $<1 \%$ charcoal and small sub-rounded |

| Context <br> No. | Feature | Context type | Width / Diam (m) | $\begin{aligned} & \text { Length } \\ & (\mathrm{m}) \end{aligned}$ | $\begin{aligned} & \text { Depth } \\ & (\mathrm{m}) \end{aligned}$ | Description of Context |

| 591 | House 6 | Overburden <br> overlying the <br> postholes [507] <br> [551] [534] [538] |  |  |  | Same as material within postholes. <br> Probably a single event which infilled <br> all post holes on SW side of house |
| 592 | House 6 | Cut of a posthole | 0.71 |  | 0.17 | Circular-linear cut of posthole with <br> sloping sides and irregular base, in a <br> line with [585] and [589] |
| 593 | Isolated <br> Feature | Curvilinear cut |  |  |  | Faint stain seen in the subsoil |
| 594 | House 2 | Deposit |  |  | 0.02 | Black, charcoal-rich deposit that sealed <br> the features of house 2 |

## APPENDIX 2: House 3 Context Register

| Context No. | Feature | Context type | Width / Diam (m) | $\begin{aligned} & \text { Length } \\ & (\mathrm{m}) \end{aligned}$ (m) | Depth (m) | Description of Context |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 003 | House 3 internal feature | Cut of posthole | 0.44 |  | 0.31 | Large posthole that would have held a structural timber. |
| 004 | House 3 internal feature | Fill of posthole [003] | 0.44 |  | 0.31 | Loose grey brown sandy silt with charcoal flecks and lumps and packing stones. |
| 005 | $\begin{aligned} & \text { House 3 } \\ & \text { internal } \\ & \text { feature } \end{aligned}$ | Cut of post hole | 0.80 |  | 0.39 | Circular post hole with steep sloping sides and concave base. Cut of a deep post hole on the southern part of house 3. Possibly part of a ringed ditch series. No evidence of remaining post though possible displaced packing stones. |
| 006 | House 3 internal feature | Fill of post hole [005] |  |  |  | Loose dark brown sandy silt with possible displaced packing stones, same as overburden spread (009). |
| 007 | House 3 internal feature | Cut of post hole | 0.45 | 0.45 | 0.30 | Sub-circular post hole with steep sloping sides and flat base. Probably forming circle of load-bearing posts for structure 3, along with [003] \& [005] at least. Post probably removed. |
| 008 | House 3 internal feature | Fill of post hole [007] |  |  |  | Loose mid-dark blackish grey slightly sandy silt with medium large sub rounded cobbles, possible packing stones and charcoal/organic burnt matter and redeposited natural. Fairly quick infilling |
| 009 | House 3 | Fill of [005] |  |  |  | Loose dark brown sandy silt with several large stones. |
| 010 | House 3 | Packing stone in post hole |  | $\begin{aligned} & 0.15- \\ & 0.20 \end{aligned}$ |  | At least 1 in-situ packing stone in post hole, 1 or 2 others look like could be stones in (008) that have tumbled in from edges. Sub-rounded cobbles |
| 011 | House 3 internal | Cut of post hole | 0.80 |  | 0.20 | Circularl post hole with steep sides and flat base. Forms the structural wall to |

| Context <br> No. | Feature | Context type | Width / <br> Diam (m) | $\begin{aligned} & \text { Length } \\ & (\mathrm{m}) \end{aligned}$ | $\begin{aligned} & \text { Depth } \\ & \text { (m) } \end{aligned}$ | Description of Context |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | feature |  |  |  |  | W of house |
| 012 | House 3 internal feature | Fill of post hole [011] |  | 0.80 | 0.20 | Loose dark brown/black silt with small stone and large pieces of pot. Single very waterlogged fill of post hole. |
| 013 | House 3 internal feature | Cut of post hole | 0.50 |  | 0.15 | Circular post hole with sloping sides and flat base. Possibly part of inner ring of house). |
| 014 | House 3 internal feature | Fill of post hole [013] |  |  |  | Loose dark brown/black silt. |
| 015 | House 3 internal feature | Cut of shallow pit | 1.20 | 2 | 0.14 | Sub circular pit with gently sloping sides and flat base. Probably the remains of internal ditch ring-ditch. |
| 016 | House 3 internal feature | Fill of pit [015] |  |  |  | Loose grey-brown sandy silt with occasional charcoal flecks, pebbles and stones |
| 017 | House 3 internal feature | Cut of post hole | 0.52 | 0.56 | 0.33 | Sub-circular posthole with sharp sloping sides and flat base with packing stones and some charcoals. Next to possible gully. |
| 018 | House 3 internal feature | Fill of post hole [017] |  |  |  | Loose, dark brown and sandy with charcoals and packing stones |
| 019 | House 3 internal feature | Cut of a post hole | 0.27 | 0.50 | 0.09 | Sub-circular post hole with sloping sides and flat base. |
| 020 | House 3 internal feature | Fill of post hole [019] |  |  |  | Loose brown sandy silt |
| 021 | House 3 | Cut of post hole | 0.28 | 0.34 | 0.10 | Sub-circular post hole with sloping sides and concave base. |
| 022 | House 3 | Fill of post hole [021] |  |  |  | Loose brown sandy silt |
| 023 | House 3 internal feature | Cut of post hole | 0.29 | 0.31 | 0.08 | Sub-circular post hole with sloping sides and concave base aligned E-W. Probably forming outer wall of house 3. Post probably removed prier to infilling. |
| 024 | House 3 internal feature | Fill of post hole [023] |  |  |  | Loose mid grey brown slightly sandy silt, $<1 \%$ charcoal flecks. |
| 025 | House 3 | Cut of post hole | 0.32 | 0.34 | 0.15 | Sub-circular post hole with sloping sides and concave base aligned E-W. Probably forming outer wall of house 3. Post removed and then infilled with homogenous material possibly natural silting in one event soon after post removed. |
| 026 | House 3 | Fill of post hole [025] |  |  |  | Loose mid grey brown slightly sandy silt with $<1 \%$ charcoal flecks. Fairly homogenous fill, probably natural silting |
| 027 | House 3 | Cut of post hole | 0.33 | 0.55 | 0.10 | Sub-circular post hole with sloping sides and flat base aligned NW-SE. Related to SW arc of posts forming cuter wall of house 3. If posthole, post appears to have been removed prior to |

| 030 |  | Unassigned |  |  |  |  |
| 031 | House 3 internal feature | Cut of post hole | 0.23 | 0.24 | 0.23 | Sub-circular post hole with sharp sloping sides and concave base with some stones inside. Close to stony Curvilinear feature or gully? |
| 032 | House 3 internal feature | Fill of post hole [031] |  |  |  | Loose brown sandy silt with stones. |
| 033 | $\begin{aligned} & \text { House 3 } \\ & \text { internal } \\ & \text { feature } \end{aligned}$ | Cut of post hole | 0.18 | 0.35 | 0.14 | Sub-circular post hole with sloping sides and concave base. |
| 034 | $\begin{aligned} & \begin{array}{l} \text { House 3 } \\ \text { internal } \\ \text { feature } \end{array} \\ & \hline \end{aligned}$ | Fill of post hole [033] |  |  |  | Loose brown sandy silt |
| 035 | $\begin{aligned} & \text { House 3 } \\ & \text { internal } \\ & \text { feature } \end{aligned}$ | Cut of post hole | 0.70 |  | 0.26 | Circular post hole with sloping sides and concave base. Possibly part of house construction. 1of 3 post holes in a line. |
| 036 | House 3 internal feature | Fill of post hole [035] |  |  |  | Loose brown sandy silt with big and small stones. |
| 037 | House 3 internal feature | Cut of post hole | 0.39 |  | 0.21 | Circular post hole with sloping sides and concave base. T1 of 3 posthole sin a line. |
| 038 | $\begin{aligned} & \text { House 3 } \\ & \text { internal } \\ & \text { feature } \end{aligned}$ | Fill of post hole [037] |  |  |  | Loose brown sandy silt with big and small stones. |
| 039 | $\begin{aligned} & \text { House 3 } \\ & \text { internal } \\ & \text { feature } \end{aligned}$ | Cut of post hole | 0.62 |  | 0.22 | Circular posthole with sloping sides and concave base. 1 of 3 postholes in a line. |
| 040 | $\begin{aligned} & \text { House 3 } \\ & \text { internal } \\ & \text { feature } \\ & \hline \end{aligned}$ | Fill of post hole [039] |  |  |  | Loose brown sandy silt with big and small stones. |
| 041 | $\begin{aligned} & \begin{array}{l} \text { House 3 } \\ \text { internal } \\ \text { feature } \end{array} \\ & \hline \end{aligned}$ | Cut of post hole | 0.30 | 0.48 | 0.15 | Irregular post hole with sloping sides and irregular base. |
| 042 | House 3 internal feature | Fill of post hole [041] | 0 |  |  | Loose brown sticky silt |
| 043 | $\begin{aligned} & \text { House 3 } \\ & \text { internal } \\ & \text { feature } \end{aligned}$ | Cut of post hole | 0.23 | 0.30 | 0.09 | Sub-circular post hole with sloping sides and almost flat base |
| 044 | $\begin{aligned} & \text { House 3 } \\ & \text { internal } \\ & \text { feature } \end{aligned}$ | Fill of post hole [043] |  |  |  | Loose brown sandy silt. |
| 045 | $\begin{aligned} & \begin{array}{l} \text { House 3 } \\ \text { internal } \\ \text { feature } \end{array} \\ & \hline \end{aligned}$ | Cut of post hole | 0.20 | 0.27 | 0.14 | Sub-circular post hole with sloping sides and irregular (concave) base. Next to [043] |
| 046 | House 3 internal feature | Fill of post hole [045] |  |  |  | Loose brown sandy silt. |

| Context No. | Feature | Context type | Width / Diam (m) | Length (m) | Depth (m) | Description of Context |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 047 | House 3 | Cut of post hole | 0.28 | 0.30 | 0.05 | Sub-circular post hole with sloping sides and concave base. Next to [049] |
| 048 | House 3 | Fill of post hole [047] |  |  |  | Loose brown sandy silt with charcoals. |
| 049 | House 3 | Cut of post hole | 0.37 | 0.42 | 0.08 | Sub-circular posthole with sloping sides and slightly concave base. |
| 050 | House 3 | Fill of post hole [049] |  |  |  | Loose brown sticky silt with charcoals |
| 051 | House 3 internal feature | Cut of post hole | 0.40 | 0.46 | 0.30 | Sub-circular post hole with sloping sides and concave base. Next to [043] and [045] |
| 052 | House 3 internal feature | Fill of post hole [051] |  |  |  | Loose brown sandy silt with lots of big stones |
| 053 | House 3 internal feature | Cut of ring-ditch | 2.00 | 5.00 | $\begin{aligned} & 0.25- \\ & 0.30 \end{aligned}$ | Curvilinear ring-ditch with steep shallow sides and flat base. |
| 054 | House 3 internal feature | Fill of ring-ditch |  |  |  | Firm dark brown black silt |
| 055 | House 3 internal feature | Cut of post hole | 0.38 | 0.42 | 0.20 | Sub-circular posthole with sloping sides and flat base. Next to [045] and [043] |
| 056 | House 3 internal feature | Fill of post hole [055] |  |  |  | Loose brown sandy silt with charcoals. |
| 059 | House 3 | Cut of post hole | 0.48 | 0.60 | 0.25 | Sub-circular posthole with irregular/concave base and sloping sides. Beneath spread (054) of pit [053], Slot 1 north. Very near post hole's [061] + [065], also in Slot 1. Possible support posts for a small structure. |
| 060 | House 3 | Fill of post hole [059] |  |  |  | Loose grayish brown sandy silt with possible packing stones |
| 061 | House 3 | Cut of post hole | 0.23 | 0.24 | 0.11 | Sub-circular posthole with sloping sides and concave base. Beneath fill of [053] Slot 1, north. |
| 062 | House 3 | Fill of post hole [061] |  |  |  | Loose light brown sandy silt |
| 063 | House 3 internal feature | Cut of post hole | 0.30 |  | 0.20 | Circular post hole cut in to side of ringditch. Sealed by (054) |
| 064 | House 3 internal feature | Fill of post hole [063] |  |  |  | Loose dark grey-brown silt. |
| 065 | House 3 internal feature | Cut of post hole | 0.65 | 0.82 | 0.16 | Sub-circularl post hole with sloping sides and irregular base. In pit [053] Slot 1 , seemingly at the terminal. |
| 066 | House 3 internal feature | Fill of post hole [065] |  |  |  | Loose grayish brown sandy silt |
| 067 | House 3 | Cut of post hole | 0.23 | 0.24 | 0.17 | Sub-circular post hole with sloping sides and concave base Possibly part of construction of house 3 . |
| 068 | House 3 | Fill of post hole $[067]$ |  |  |  | Loose dark brown sandy silt with large packing stones (081). |

| Context No. | Feature | Context type | Width / Diam (m) | $\begin{aligned} & \text { Length } \\ & (\mathrm{m}) \end{aligned}$ | $\begin{aligned} & \text { Depth } \\ & (\mathrm{m}) \end{aligned}$ | Description of Context |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 069 | House 3 | cut of post hole | 0.40 |  | 0.28 | Sub-circular post hole, Shallow on N and sleep on S sides with Irregular base. One of inner ring of house. |
| 070 | House 3 | Fill of post hole [069] | 0.40 |  | 0.28 | Loose dark grey silt. |
| 071 | Curviline ar feature | Cut of possible pit | 1.00 |  | 0.4 | Circular pit with steep sides and slightly concave base with sloping sides towards the base. Appears to be abutting the Curvilinear featured enclosure |
| 072 | Curviline ar feature | Fill of possible pit [071] |  |  |  | Loose mid brown sandy silt with subrounded and sub-angular pebbles and stones with a red hue with occasional charcoal flecks and possible packing stones. Probably rapid infilling event. |
| 073 | Curviline ar feature | Cut of Curvilinear feature- western section. |  |  |  | Linear Curvilinear feature with slightly curved sides and U - shaped base. Aligned N-S. |
| 074 | Curviline ar feature | Fill of Curvilinear featured enclosure [073] |  |  |  | Loose mid brown sandy silt with subrounded and sub-angular stones and pebbles with hue and root intrusion |
| 075 | House 3 internal feature | Cut of posthole | 0.3 | 0.27 | 0.25 | Sub-circular posthole with steep sides and concave base. Part of inner ring of postholes |
| 076 | House 3 internal feature | Fill of posthole [075] |  |  |  | Loose dark grey silt. |
| 077 | House 3 internal feature | Cut of posthole | 0.2 |  | 0.15 | Circular posthole with steep sides and conical base, Part of inner ring |
| 078 | House 3 internal feature | Fill of posthole |  |  |  | Loose dark grey-brown silt |
| 079 | $\begin{aligned} & \text { House 3 } \\ & \text { internal } \\ & \text { feature } \end{aligned}$ | Cut of pit | 0.2 | 0.86 | 0.05 | Linear pit with flat sides and base, possibly part of house construction |
| 080 | House 3 internal feature | Fill of pit [079] |  |  |  | Loose brown sand with charcoals |
| 081 |  | Packing stones |  |  |  | Packing stones in posthole [067] c. 7cm diam. |
| 082 | $\begin{aligned} & \hline \begin{array}{l} \text { House 3 } \\ \text { internal } \\ \text { feature } \end{array} \\ & \hline \end{aligned}$ | Cut of pit | 0.2 | 0.93 | 0.07 | Linear pit with flat sides and flat base, next to [079] |
| 083 | House 3 internal feature | Fill of pit |  |  |  | Loose, brown and sandy with some charcoal |
| 084 | Curviline ar feature | Cut of pit |  |  |  | Sub-circular pit with sloping sides and concave base, aligned E-W, Cuts the Curvilinear featured enclosure [073] |
| 085 | House 3 internal feature | Cut of pit | 1 | 2.6 | 0.24 | Sub-circular pit with steep sloping sides and flat base, circled by several stakeholes and postholes |
| 086 | House 3 internal feature | Fill of pit [085] |  |  |  | Loose dark brown sandy silt with bone, pot, charcoal and large stones |

| 196 | Internal feature | Cut of pit | 0.7 | 0.9 | 0.13 | Sub-circular pit with gentle slope and flat base, cut by [198] |
| 197 | Internal feature | Fill of pit [196] |  |  |  | Loose light brown sand/ stony silt |
| 198 | Internal feature | Cut of linear feature | 0.4 | 1.6 | 0.1 | Linear feature with curved sides and flat base, cuts [196] |
| 199 | Internal feature | Fill of linear feature [198] |  |  |  | Loose light brown sandy silt |
| 200 | Curviline ar feature | Cut of pit/ posthole | 0.6-0.7 |  | 0.25 | Sub-circular feature with perceptible side and flat base. Abuts inside of Curvilinear featured enclosure [114] |
| 201 | Curviline ar feature | Fill of pit/posthole $[200]$ |  |  |  | Loose mid- brown sandy silt, very homogenous fill makes it difficult to see if cuts Curvilinear featured enclosure |
| 202 | Internal feature | Cut of pit | 1 | 0.55-60 | 0.08 | Sub-circular pit with slightly sloping sides and flat base |
| 203 | Internal feature | Fill of pit [202] |  |  |  | Loose brown and sandy with charcoals and pottery |
| 204 | Inner ring groove | Inner ring groove | 0.15 | 1.3 | 0.1 | Curvilinear sloping sides and concave base, terminates in posthole [192] with 3 postholes |
| 205 | $\begin{aligned} & \text { House 3 } \\ & \text { internal } \\ & \text { feature } \end{aligned}$ | Fill of drip gully |  |  |  | Loose dark brown sandy silt with charcoal |
| 206 | Internal feature | Cut of posthole | 0.46 | 0.56 | 0.3 | Sub-circular posthole with sloping sides and concave base |
| 207 | Internal feature | Fill of posthole [206] |  |  |  | Mid-loose dark brown and sandy |
| 208 | External feature | Cut of posthole | 0.4 | 0.42 | 0.12 | Sub-circular posthole with slightly sloping sides and slightly concave base |
| 209 | External feature | Fill of posthole [208] |  |  |  | Loose, brown sand with some charcoals |
| 210 | Internal feature | Cut of pit | 1.05 | 1.87 | 0.13 | Sub-sub-circular pit with sloping sides and flat/irregular base, aligned NNESSW |
| 211 | Internal feature | Fill of pit |  |  |  | Loose mid-dark grey brown silt with $<1 \%$ charcoal flecks and $2 \%$ smallmedium sub-rounded- sub-angular stones and flecks of redeposited natural, not homogenous colour, possibly intentionally backfilled/ dumped material. |

| $\begin{aligned} & \hline \text { Context } \\ & \text { No. } \end{aligned}$ | Feature | Context type | Width / <br> Diam (m) | Length (m) | Depth (m) | Description of Context |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 212 | External feature | Cut of posthole | 0.25 | 0.28 | 0.15 | Sub-circular posthole with sloping sides and concave base |
| 213 | External feature | Fill of posthole [212] |  |  |  | Loose, brown and sandy |
| 214 | External feature | Cut of pit | 1.57 | 2.87 | 0.2 | Curvilinear pit with sloping sides and irregular base, aligned E-W. |
| 215 | External feature | Fill of pit [214] |  |  |  | Loose light brown sandy silt with $1 \%$ charcoal flecks and medium- large subrounded cobbles. Fairly homogenous and poorly sorted. Stones possibly from stone built super structure. Infilled after 2 associated features filled and not in use |
| 216 | External feature | Cut of posthole | 0.25 | 0.27 | 0.23 | Sub-circular posthole with sloping sides and concave base |
| 217 | External feature | Fill of posthole [216] |  |  |  | Loose, brown and sandy |
| 218 | House 3 internal feature | Cut of posthole | 0.35 | 0.4 | 0.15 | Sub-circular posthole with sloping sides and flat base. Disturbed on Se edge possible where post removed |
| 219 | House 3 internal feature | Fill of posthole [218] |  |  |  | Loose mid- dark grey brown silt with $<1 \%$ charcoal flecks and small subrounded stones, possible single infilling event |
| 220 | External feature | Cut of posthole | 0.22 | 0.25 | 0.08 | Sub-circular posthole with sloping sides and concave base, aligned E-W. Just on N edge of pit [214], probably some kind of wooden structure above pit. |
| 221 | External feature | Fill of posthole [220] |  |  |  | Loose light brown sandy silt |
| 222 | External feature | Cut of posthole | 1.1 |  | 0.12 | Circular posthole with sloping sides and fairly flat base, at terminal end of pit, 1 of several postholes or stakeholes that encircle [214] |
| 223 | External feature | Fill of posthole [222] |  |  |  | Loose light brown sandy silt with some charcoal flecks |
| 224 |  | Unassigned |  |  |  |  |
| 225 |  | Unassigned |  |  |  |  |
| 226 | Internal feature | Cut of a pit | 0.9 |  | 0.18 | Circular pit with sloping sides and flat base |
| 227 | House 3 internal feature | Fill of pit |  |  |  | Loose grey brown silty sandy with occasional charcoal flecks, pottery and packing stones |
| 228 | Internal feature | Cut of a pit | 0.56 | 1.3 | 0.38 | Rectilinear pit with sloping sides and concave base, aligned NW-SE, associated with [278] |
| 229 | Internal feature | Upper fill of pit [228] and posthole $[278]$ |  |  |  | Loose grey brown silty sand with occasional charcoal flecks and pot |
| 230 | Internal feature | Primary fill of pit $[228]$ and posthole $[278]$ |  |  |  | Loose orange brown sand with occasional flecks and pot, possibly redeposited natural |

| Context No. | Feature | Context type | Width / Diam (m) | Length (m) | Depth (m) | Description of Context |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 231 | External feature | Cut of posthole | 0.42 |  | 0.15 | Circular posthole with vertical sides and flat base |
| 232 | External feature | Fill of posthole [231] |  |  |  | Loose mid-dark grey brown silt with charcoal and $1 \%$ small sub-rounded stones, quite homogenous, post probably removed - natural silting or backfilled |
| 233 | External feature | Possible packing stones |  |  |  | Medium sub-rounded stones |
| 234 | Internal feature | Cut of posthole | 0.25 | 0.28 | 0.14 | Sub-circular posthole with sloping sides and slightly concave base |
| 235 | Internal feature | Fill of posthole [234] |  |  |  | Loose brown and sandy |
| 236 | External feature | Cut of stakehole | 0.12 |  | 0.07 | Circular stakehole with steep sloping sides and concave base. Possibly part of enclosing structure for pit [214] |
| 237 | External feature | Fill of stakehole [236] |  |  |  | Loose dark brown sandy silt, different to [215] so possibly earlier infilling event |
| 238 | Internal feature | Cut of posthole | 0.3 | 0.32 | 0.11 | Sub-circular posthole with sloping sides and concave base |
| 239 | Internal feature | Fill of posthole [238] |  |  |  | Loose, dark brown and sandy |
| 240 | Internal feature | Cut of posthole | 0.31 | 0.47 | 0.16 | Sub-circular posthole with sloping sides and slightly concave base, cut by [238] |
| 241 | Internal feature | Fill of posthole [240] |  |  |  | Loose light brown and sandy |
| 242 | Internal feature | Cut of posthole | 0.38 | 0.4 | 0.15 | Circular posthole with sloping sides and concave base |
| 243 | Internal feature | Fill of posthole [242] |  |  |  | Firmly compacted light brown silt |
| 244 | Internal feature | Cut of posthole | 0.41 | 0.4 | 0.18 | Sub-circular posthole with sloping sides and concave base, cuts or is cut by [246] |
| 245 | Internal feature | Fill of posthole |  |  |  | Loose dark brown sand with stone inclusions |
| 246 | Internal feature | Cut of posthole | 0.41 | 0.75 | 0.16 | Sub-circular posthole with sloping sides and concave base |
| 247 | Internal feature | Fill of posthole [246] |  |  |  | Loose dark brown and sandy with stones |
| 248 | Internal feature | Cut of posthole | 0.4 | 0.6 | 0.16 | Sub-circular posthole with sloping sides and concave base, associated with [244] and [246], possibly part of Curvilinear feature |
| 249 | Internal feature | Fill of posthole [248] | 0.4 | 0.6 | 0.16 | Loose dark brown and sandy with a few stones |
| 250 | Internal feature | Cut of posthole | 0.68 | 0.7 | 0.365 | Circular posthole with sloping sides and concave base, associated with [244], [246] and [248], possibly part of Curvilinear feature |
| 251 | Internal feature | Fill of posthole [250] |  |  |  | Loose, dark brown and sandy |

| Context <br> No. | Feature | Context type | Width / <br> Diam (m) | $\begin{aligned} & \text { Length } \\ & (\mathrm{m}) \end{aligned}$ | $\begin{aligned} & \text { Depth } \\ & (\mathrm{m}) \end{aligned}$ | Description of Context |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 252 | Internal feature | Cut of posthole | 0.35 | 0.4 | 0.11 | Sub-circular posthole with sloping sides and flat base, aligned NE-SW, on SW edge of pit [214] |
| 253 | Internal feature | Fill of posthole [252] |  |  |  | Loose dark brown sandy silt, different infilling event than (215) and (221) |
| 254 | External feature | Cut of posthole | 0.48 |  | 0.1 | Circular posthole with sloping sides and flat base |
| 255` | External feature | Fill of posthole [254] |  |  |  | Loose dark brown sandy silt with $<1 \%$ small sub-rounded stones, fairly homogenous, probably single natural silting but quite dark so possibly topsoil backfill |
| 256 | External feature | Cut of pit/posthole | 0.4 | 0.44 | 0.05 | Sub-circular pit/posthole with sloping sides and flat base, aligned NE-SW |
| 257 | External feature | Fill of pit/posthole [256] |  |  |  | Loose light brown silt with $<1 \%$ charcoal flecks and small sub-rounded stones and pot. Homogenous fill probably due to natural silting. |
| 258 | External feature | Cut of possible pit | 0.9 | 1.05 | 0.19 | Sub-circular feature with sloping sides and slightly concave base |
| 259 | External feature | Fill of possible pit |  |  |  | Loose, dark brown and sandy |
| 260 | External feature | Cut of posthole | 0.2 | 0.25 | 0.1 | Sub-circular posthole with sloping sides and slightly concave base. Aligned N-S |
| 261 | External feature | Fill of posthole $[260]$ |  |  |  | Loose light brown silt with $<1 \%$ charcoal flecks and small sub-rounded stones |
| 262 | External feature | Cut of posthole | 0.6 | 0.72 | 0.16 | Sub-circular posthole with slightly sloping sides and slightly concave base |
| 263 | External feature | Fill of posthole [262] |  |  |  | Loose dark brown and sandy with some stones |
| 264 | External feature | Cut of posthole | 0.55 | 0.6 | 0.12 | Sub-circular posthole with sloping sides and slightly concave base |
| 265 | External feature | Fill of posthole [264] |  |  |  | loose dark brown and sandy |
| 266 | External feature | Cut of pit | 0.32 | 0.64 | 0.12 | Sub-sub-circular pit with sloping sides and sloping-concave base, aligned N-S. Disturbed by burrows |
| 267 | External feature | Fill of pit [266] |  |  |  | Loose light-mid peachy grey brown silt with $<1 \%$ charcoal and small subrounded stones. Quite mixed and mottled with some bioturbation |
| 268 | External feature | Cut of posthole | 0.26 | 0.33 | 0.11 | Sub-circular posthole with sloping sides and concave base, aligned ESEWNW |
| 269 | External feature | Fill of posthole [268] |  |  |  | Loose light-mid brown silt with $<1 \%$ small sub-rounded stones and charcoal flecks |
| 270 | External feature | Cut of posthole | 0.35 | 0.4 | 0.13 | Sub-circular posthole and sloping sides with concave base, aligned NNE-SSW, adjacent to [268] |
| 271 | External feature | Fill of posthole [271 |  |  |  | Loose mid-brown silt with $<1 \%$ charcoal and small-medium subrounded stones |
| Context No. | Feature | Context type | Width / <br> Diam (m) | $\begin{aligned} & \text { Length } \\ & (\mathrm{m}) \end{aligned}$ | $\begin{aligned} & \text { Depth } \\ & (\mathrm{m}) \end{aligned}$ | Description of Context |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 272 |  |  |  |  |  | UNASSIGNED |
| 273 |  |  |  |  |  | UNASSIGNED |
| 274 | External feature | Cut of pit | 0.65 | 0.87 | 0.1 | Sub-sub-circular pit with sloping sides and flat base, aligned NW-SE |
| 275 | External feature | Fill of pit [274] |  |  |  | Loose mid-brown silt with large cobbles on surface but all loose and mottled on surface- machine disturbance |
| 276 | External feature | Cut of posthole | 0.30 | 0.34 | 0.22 | Sub-circular posthole with vertical sides and concave |
| 277 | Internal feature | Fill of posthole [276] |  |  |  | Loose mid-brown silt with $<1 \%$ charcoal flecks and small sub-rounded stones, homogenous fill, probably natural silting after post removed, subcircular |
| 278 | $\begin{array}{\|l} \begin{array}{l} \text { Outer } \\ \text { ring of } \\ \text { pits } \end{array} \\ \hline \end{array}$ | Cut of posthole | 0.50 | 0.40 | 0.31 | Sub-circular posthole with sloping sides and concave base |
| 279 | Internal feature | Cut of pit | 0.80 | 0.90 | 0.30 | Sub-circular pit aligned N-S. Probably associated with arc of pits [071] to [120] |
| 280 | Internal feature | Fill of [279] |  |  |  | unknown |
| 281 | External feature | Cut of linear feature | 0.15 | 4.0 |  | Unexcavated truncated linear feature outside Curvilinear feature [073]. Unclear of function. |
| 282 | External feature | Fill of [281] |  |  |  | Loose mid grey brown silt |
| 283 | Ring groove | Cut of inner ring groove | 0.10 | 1.5 | 0.02 | Small section of possible ring groove |
| 284 | External feature | Linear feature |  |  |  | Same as [281] |

## APPENDIX 7: Samples Register Houses 2, 4, 5 and 6

| Sample no. | Context and description |
| :--- | :--- |
| 290 | (006), main fill of pit [005] SW quadrant |
| 291 | $(006)$, main fill of pit [005] NE quadrant |
| 292 | (047), fill of linear feature [046] NW quadrant |
| 293 | (047), fill of linear feature [046] SE quadrant |
| 294 | (033), fill of posthole [032] |
| 295 | $(048)$, charcoal sample from upper fill of ditch, House 4 Slot 4 |
| 296 | $(018)$, fill of post hole [017] |
| 297 | $(016)$ fill of a gully [015], |
| 298 | $(024)$, fill of post hole [023] |
| 299 | $(027)$, fill of post hole [026] |
| 300 | $(029)$, fill of post hole [028] |
| 301 | (037), fill of pit [036] |
| 302 | (041), fill of posthole [040] |
| 303 | (043), fill of post hole [042] |
| 304 | (049), fill of pit [055] in House 4, Slot 2 |
| 305 | (048), upper fill of ditch, House 4 Slot 2 |
| 306 | (051), fill of posthole [050], House 4 Slot 2 |
| 307 | (054), secondary fill of ditch, House 4 Slot 2 |
| 308 | (057), fill of pit [056], House 4 |

| Sample no. | Context and description |
| :---: | :---: |
| 309 | (059), fill of pit [058], House 4 |
| 310 | (061), fill of pit [060], House 4 |
| 311 | (063), fill of pit [062], House 4 |
| 312 | (067), fill of posthole [066] |
| 313 | (095), fill of posthole [094] |
| 314 | (045), fill of posthole [044] |
| 315 | (097), fill of posthole [096] |
| 316 | (093), fill of posthole [092] |
| 317 | (091), fill of posthole [090] |
| 318 | (089), fill of posthole [088] |
| 319 | (099), fill of possible base of post hole [098] |
| 320 | (101), fill of posthole [100] |
| 321 | (004), fill of posthole [003] |
| 322 | (103), fill of posthole [102] |
| 323 | (105), fill of posthole [104] |
| 324 | (107), fill of posthole [106] |
| 325 | (110), fill of posthole [109] |
| 326 | (110) burnt bone in the fill |
| 327 | (114), fill of posthole [113] |
| 328 | (116), fill of posthole [115] |
| 329 | (075), fill of posthole [074] |
| 330 | (077), fill of posthole [076] |
| 331 | (087), fill of truncated ring-ditch |
| 332 | (131), fill of posthole [130] |
| 333 | (139), fill of posthole [138] |
| 334 | (133), fill of posthole [132] |
| 335 | (135), NE quadrant of pit [134] |
| 336 | (135), SW quadrant of pit [134] |
| 337 | (129), burnt bone |
| 338 | (064), upper fill [008], House 4 Slot 4 |
| 339 | (065), lower fill of [008], House 4 Slot 4 |
| 340 | (147), fill of posthole [146] |
| 341 | (058/059) Palisade OSL, 1 tin |
| 342 | (158), fill of posthole [157] |
| 343 | (160), fill of posthole [159] |
| 344 | (154), fill of posthole [153] |
| 345 | (127), fill of posthole [126] |
| 346 | (129), fill of pit [128] |
| 347 | (169), lower fill of pit 164 (cut by a burrow) |
| 348 | (174), fill of posthole [173], house 5 |
| 349 | (177), fill of posthole [176], house 5 |
| 350 | (169), fill of [164], charcoal and burnt bone |
| 351 | (169), burnt bone pieces |
| 352 | (183), charcoal sample from NW quadrant of [164] |
| 353 | (185), fill of [150], House 5 |
| 354 | (186) block fill in (185), house 5 |
| 355 | Bone of (166), House 5 Slot 5 |
| 356 | Bone of (185) House 5 Slot 1 |
| 357 | Charcoal of (186), House 5 Slot 1 |
| 358 | $(166,169)$, fill of ditch Slot 1 |
| 359 | (191), lower fill of pit [190] |
| 360 | (163), upper fill of pit [164] |
| 361 | (183), secondary fill of pit [164] |
| 362 | (166), fill of ditch House 5 Slot 3 |
| 363 | (185), fill of ditch House 5 Slot 3 |
| 364 | (200), fill of post hole House 5 Slot 3 |
| 365 | (205), fill of post hole [204] |

| Sample no. | Context and description |
| :---: | :---: |
| 366 | (207), fill of post hole [206] |
| 367 | (185) charcoal sample |
| 368 | (170) charcoal sample |
| 369 | (217), f ill of post hole [216] |
| 370 | (221), fill of stake hole [220] |
| 371 | (227), fill of pit [226] |
| 372 | (229), fill of post hole [228] |
| 373 | (231), fill of post hole [230] |
| 374 | (233), fill of post hole [232] |
| 375 | (235), fill of stake hole [234] |
| 376 | (243), fill of post hole/pit |
| 377 | (245), fill of post hole/pit |
| 378 | (247), packing fill of post hole |
| 379 | (249), fill of post hole [248] |
| 380 | (192), fill of palisade Slot |
| 381 | (152), fill of post hole [151] |
| 382 | (266), fill of post hole |
| 383 | (268), fill of post hole |
| 384 | (264), fill of pit [263] |
| 385 | (272), fill of pit [271] |
| 386 | (272), fill of pit [277] |
| 387 | (304), fill of pit [303] SW Quad |
| 388 | (304), 3 bags of pottery from of pit [303] SW Quad |
| 389 | (304), fill of pit [303] SW Quad |
| 390 | (304), fill of pit [303] NE Quad |
| 391 | (304), pottery in NE Quad |
| 392 | (304), fill of pit [303] NW Quad |
| 393 | (304), pottery in NW quad |
| 394 | (292), fill of post hole [291] |
| 395 | (312), fill of post hole [311] |
| 396 | (314), fill of post hole [313] |
| 397 | (009/010), fill of ring-ditch House 4: 3x Kubiena tins for thin section |
| 398 | (354), fill of pit [353] |
| 399 | (354), pottery from pit [353] |
| 400 | (362), fill of [361] |
| 401 | (364), fill of [363] |
| 402 | (366), fill of [365] |
| 403 | (378), fill of ring-ditch House 2 |
| 404 | (304), pottery from baulk |
| 405 | (386), modern pot in post hole |
| 406 | (378) pottery |
| 407 | (378) burnt bone |
| 408 | (395), fill of beam Slot [394] House 2 Slot 4 |
| 409 | (378), fill of ring-ditch House 2 Slot 3 |
| 410 | (398), fill of post hole House 2 Slot 4 |
| 411 | (400), fill of post hole House 2 Slot 4 |
| 412 | (402), fill of post hole House 2 Slot 4 |
| 413 | (404), fill of post hole House 2 Slot 4 |
| 414 | (416), pottery in Slot 5 House 2 |
| 415 | (416), burnt bone |
| 416 | (416), charcoal |
| 417 | (416), unknown material |
| 418 | (416), fill in Slot 5 House 2 |
| 419 | (005), cut of pit: OSL dates |
| 420 | (382), fill of post hole [381] |
| 421 | (419), fill of post hole [418] |
| 422 | (422), fill of pit [421] |

| Sample no. | Context and description |
| :---: | :---: |
| 423 | (009/010), fill of Slot 1 House 4: phosphate analysis |
| 424 | (406), fill of pit Slot 3 |
| 425 | (427), fill of possible pit SW terminal end |
| 426 | (435), fill of linear feature |
| 427 | (437), fill of pit [436] |
| 428 | (439), fill of post hole [438] |
| 429 | (441), fill of post hole [440] |
| 430 | (416), House 2, Slot 6 |
| 431 | [417], pottery House 2 Slot 6 |
| 432 | [417], burnt bone House 2 Slot 6 |
| 433 | (416), fill of Slot 6, House 2 |
| 434 | (431), fill of post hole [430], House 2 Slot 6 |
| 435 | (429), fill of pit [428] House 2 |
| 436 | (433), fill of pit [432] |
| 437 | (445), fill of pit [444] House 2 inner post hole |
| 438 | (449), fill of post hole [448] House 2 Slot 6 |
| 439 | (418), charcoal sample dry sieve only |
| 440 | (453), fill of post hole |
| 441 | (461), fill of post hole [460] House 2 Slot 7 |
| 442 | (463), fill of post hole [462] House 2 Slot 7 |
| 443 | (416), fill of [417] House 2 Slot 7 |
| 444 | (416), charcoal, House 2 Slot 7 |
| 445 | (378), 2x Kubiena Tins from NW facing section House 2 Slot 2 |
| 446 | (378/464), 3x Kubiena Tins from NW facing section House 2 Slot 1 |
| 447 | (378), upper fill of House 2 Slot 1 |
| 448 | (466), fill of post hole [465] House 2 Slot 7 |
| 449 | (378), charcoal-rich sample from baulk of feature [377] |
| 450 | (416), charcoal |
| 451 | (464), lower fill of [377] House 2 Slot 1 |
| 452 | (424), fill of post hole [423] |
| 453 | (472), fill of post hole [471] |
| 454 | (470), fill of post hole [469] |
| 455 | (468), fill of post hole [467] |
| 456 | (480), fill of post hole [479] |
| 457 | (478), fill of post hole [477] |
| 458 | (482), fill of post hole [481] House 2 |
| 459 | (485), fill of post hole [484] House 2 |
| 460 | (487), fill of small pit House 2 |
| 461 | (489), fill of post hole [488] House 6 |
| 462 | (491), fill of post hole House 6 |
| 463 | (495), fill of post hole [494] House 6 |
| 464 | (497), fill of post hole [496] House 6 |
| 465 | (499), fill of post hole [498] House 6 |
| 466 | (501), fill of post hole [500] House 6 |
| 467 | (503), fill of post hole [502] House 6 |
| 468 | (505), fill of post hole [504] House 6 |
| 469 | (508), fill of large pit [507] House 6 |
| 470 | (510), fill of post hole [509] House 6 |
| 471 | (514), fill of post hole [513] House 6 |
| 472 | (512), fill of post hole [511] House 6 |
| 473 | (516), fill of post hole [515] House 6 |
| 474 | (518), fill of post hole [517] House 6 |
| 475 | (505), charcoal sample |
| 476 | (520), fill of pit [519] |
| 477 | (528), fill of post hole [527] |
| 478 | (522), fill of posthole 521, baulk |
| 479 | (524), fill of posthole [523] |

| Sample no. | Context and description |
| :--- | :--- |
| 480 | (526), fill of posthole, baulk |
| 481 | (531), fill of posthole [530] |
| 482 | (533), fill of pit [532] |
| 483 | (508), NW quad of (505) |
| 484 | (541), fill of pit [540] |
| 485 | (544), fill of pit [543], baulk |
| 486 | (546), fill of posthole[545] |
| 487 | (548), Fill of posthole [547] |
| 488 | (550), fill of pit [549] |
| 489 | (554), fill of posthole [553] |
| 490 | (556), fill of posthole [555] |
| 491 | (558), fill of posthole [557] |
| 492 | (560), fill of posthole [559] |
| 493 | (566), fill of posthole [565] |
| 494 | (568), fill of posthole [567] |
| 495 | (572), fill of posthole [571] |
| 496 | (539), fill of posthole [538], baulk |
| 497 | (547), fill of posthole [573], charcoal flecks, baulk |
| 498 | (576), fill of pit [575], Slot 1, SW quad |
| 499 | (576), fill of pit [575], Slot 2 NE quad |
| 500 | (580), fill of posthole [581] |
| 501 | (582), fill of posthole [581] |
| 502 | (588), fill of pit [587], east of house 6 |
| 503 | (584), fill of posthole [582], east of house 6 |
| 504 | (590), fill of posthole [589], east of house 6 |

## APPENDIX 8: Sample Register House 3

| Sample no. | Context | Description |
| :--- | :--- | :--- |
| 505 | 008 | Fill of post hole [007], charcoal flecks |
| 506 | 006 | Fill of post hole [005] |
| 507 | 018 | Fill of post hole [017] |
| 508 | 013 | Fill of post hole [011] |
| 509 | 014 | Fill of post hole [012] |
| 510 | 016 | Fill of [015] |
| 511 | 042 | Fill of [041] |
| 512 | 048 | Fill of [047] |
| 513 | 050 | Fill of [049] |
| 514 | 004 | Fill of post hole [003] |
| 515 | 052 | Fill of post hole [051] |
| 516 | 056 | Fill of [055] |
| 517 | 046 | Fill of post hole [045] |
| 518 | 044 | Fill of post hole [043] |
| 519 | 054 | Fill of post hole(?), house 3, Slot 3 |
| 520 | 060 | Fill of post hole [053], Slot 1 |
| 521 | 054 | Fill of [053] house 3, Slot 1 |
| 522 | 076 | Fill of post hole |
| 523 | 070 | Fill of post hole |
| 524 | 015 | Fill of pit |
| 525 |  | NOT USED |
| 526 | 072 | Fill a possible post hole |
| 527 | 080 | Fill of pit [079] |
| 528 | 083 | Fill of pit |
| 530 | 086 | Fill of pit [085] |
| 531 | 092 | Fill of [091] |
| 532 | 074 | Fill of [073], palisaded enclosure |
|  |  |  |

| Sample no. | Context | Description |
| :--- | :--- | :--- |
| 533 | 097 | Fill of [084], pit |
| 534 | 123 | Fill of [122], charcoal, pot |
| 535 | 133 | Fill of pit [132] |
| 536 | 145 | Fill of pit |
| 537 | 140 | Fill of [139] |
| 538 | 141 | Lower fill of [139], charcoal-rich |
| 539 | 113 | Fill of [112], charcoal-rich |
| 540 | 151 | Fill of [150] |
| 541 | 167 | Fill of [166] |
| 542 | 177 | Fill of pit |
| 543 | 159 | Fill of pit |
| 544 | 163 | Fill of pit |
| 545 |  | NOT USED |
| 546 | 187 | Fill of pit |
| 547 | 197 | Fill of pit, baulk |
| 548 | 201 | Fill of posthole/pit [200] |
| 549 | 203 | Fill of pit [202] |
| 550 | 209 | Fill of posthole [208] |
| 551 | 215 | Fill of [214], baulk |
| 552 | 232 | Fill of posthole [231], baulk, charcoal |
| 553 | 245 | Fill of posthole [244] |
| 554 | 247 | Fill of posthole [246] |
| 555 | 249 | Fill of posthole [248] |
| 556 | 251 | Fill of posthole [250] |
| 557 | 255 | Fill of posthole |
| 558 | 227 | Fill of pit [226] |
| 559 | 229 | Fill of pit [228] |
| 560 | 230 | Primary fill of pit [228] |
| 561 | 257 | Fill of posthole/pit, baulk, charcoal |
|  |  |  |

## APPENDIX 9: Finds Catalogue

| House | Context | Wt (g) | Material | Description |
| :--- | :--- | :--- | :--- | :--- |
