Executive Summary	-15
1. Introduction	-18
2. Aims and Objectives	-22
3. Project scope	-26
4. Methodology	33
5. Archaeological survey results	42
5.1 Introduction	42
5.2 Overdale Wyke	44
5.3 Saltburn and Hummersea	60
5.4 Greatham Creek	76
5.5 Crimdon Dene	94
5.6 Trow Point	106
5.7 Robert's Battery	120
5.8 Druridge Bay	137
5.9 Low Hauxley	151
5.10 Alnmouth	169
5.11 Amble hulks	184
5.12 Scremerston	193
5.13 Fenham	203
5.14 Nessend, Holy Island	215
5.15 Bamburgh Bowl hole	229
5.16 Northumberland Coast AONB survey	240
5.17 Summary and conclusions	273

6	Palaeoenvironmental survey and sampling	274
6.1	Introduction	274
6.2	Radio Carbon dating results	276
6.3	Hartlepool Bay	279
6.4	Crimdon Dene	283
6.5	Low Hauxley	286
7	Managing the resource	294
7.1	Introduction	294
7.2	Priority sites at ‘imminent risk’	302
7.3	Site assessments	302
7.4	Conclusions	338

List of Figures

1.1	Remains of Tudor period fort overlooking Holy Island harbour, with Lindisfarne castle in the background	19
1.2	Investigating a layer of inter-tidal peat at Low Hauxley, Northumberland	20
1.3	Remains of a chapel on St Cuthbert's Isle, seen eroding as a result of wave action.	21
3.1	North East Rapid Coastal Zone Assessment Phase 2 Survey Area	27
3.2	Graded extant earthwork remains of the buildings of a former medieval grange farm of Lindisfarne priory at Fenham looking south from the hamlet of Fenham	28
3.3	Crop marks visible on the ground revealing the trace of medieval broad ridge and furrow at Overdale Wyke, north Yorkshire, view looking West.	29
3.4	Unusual double pillbox on the shore at Goswick, survey by the Northumberland coast AONB survey, linked by underground access.	30
3.5	The Knights Hospitaller preceptory at Low Chibburn that was re-used as a WWII pillbox	31
3.6	Recording of a rock cut feature with the Magellan GPS equipment, possibly a fish trap or "hulley", on the foreshore at Hummersea, North Yorkshire	32
4.1	Utilising the Magellan CX mapping grade GPS at Skinnigrove.	35
4.2	Cleaning the buried organic land surface at Crimdon Dene, County Durham.	37
4.3	Investigating peat layers at Low Hauxley Northumberland	38
4.4	Undertaking sediment coring at Hartlepool Bay, Teeside.	39
5.1.1	Surveying earthworks of Second World War defences preserved above Skiningrove Harbour	42
5.2.1	Archaeology recorded at Overdale Wyke	345
5.2.2	Overdale Wyke Site	44
5.2.3	Overdale Wyke from the south showing the location of the cliff top enclosures	45
5.2.4	Overgrown Vegetation obscuring the location of the Overdale Wyke prehistoric enclosures.	46
5.2.5	Goldsbrough Roman signal station looking south	47
5.2.6	Medieval ridge and furrow visible as subtle crop marks on an otherwise even field surface.	48
5.2.7	Tunnel mouth at Kettleness end looking south	49
5.2.8	Pier base at Sandsend Beck looking south with an <i>in situ</i> WWII anti tank cube in the foreground.	50
5.2.9	part of possible winch system at Kettleness	51
5.2.10	Anti tank blocks in Sandsend beck beneath the remains of a former brick-built railway viaduct	52
5.2.11	Two views of Pillbox 515 showing how it has slumped further onto the beach at Sandsend in 4 months.	53
5.2.12	Previously unrecorded Vickers machine gun post at Sandsend.	54
5.2.13	The cliffs of Sandsend alum works showing the extent of inundation by the tide together with the direct and on going erosive effects of the sea.	55
5.2.14	A rapidly eroding Alum pier at Sandsend that is exposed to direct wave action.	56

5.2.15	Features Identified by the survey of Overdale Wyke	58
5.3.1	Archaeology Recorded at Hummersea and Saltburn	346
5.3.2	Hummersea Site Location	60
5.3.3	Remains of alum house eroding out of the cliff at Hummersea.	60
5.3.4	View of Skinningrove harbour taken from the north.	61
5.3.5	Possible cliff top location of Roman signal station recorded by antiquarian excavation.	62
5.3.6	Fan house at Skinningrove ironstone mine	63
5.3.7	Remains of Hummersea alum works slumping and eroding	64
5.3.8	Archaeological remains of Saltburn alum works eroding.	65
5.3.9	Surveying structures eroding from the Alum works at Loftus	65
5.3.10	Extant remains of settling tanks	66
5.3.11	Extant remains of large rock-cut features on the foreshore at Hummersea.	67
5.3.12	One of the smaller rock cut post holes at Loftus	67
5.3.13	Surviving extent of stone alum pier at Loftus	68
5.3.14	Recording one of the numerous rutway between Saltburn and Skinningrove.	68
5.3.15	Slumped pillbox on the beach north of Skinningrove harbour.	69
5.3.16	The same slumped pillbox as above more exposed to wave action. This photograph was taken two months after fig 5.3.15 and demonstrates the changeable nature of the beach deposits and environmental conditions	69
5.3.17	A preserved weapons pit on the western end of Skinningrove pier.	70
5.3.18	Archaeological features recorded by NERCZA Phase 2at Skinningrove - Hummersea	73
5.3.19	Archaeological features recorded by NERCZA Phase 2at Saltburn - Skinningrove	74
5.4.1	Archaeology recorded at Greatham Creek	347
5.4.2	Greatham Creek: Site Location	76
5.4.3	Stanton type air raid shelter at Greatham Creek, part of former bombing decoy.	75
5.4.4	Generator house for bombing decoy with Stanton shelter in background.	77
5.4.5	Recording one of the Saltern mounds, modified in the cold war to house a Royal Observer Corps station.	78
5.4.6	Remnant of pre-reclamation landscape preserved to the west of North Gare.	79
5.4.7	Former railway embankment reused as a platform for a pillbox and section post.	80
5.4.8	Partially visible remains of Shipwreck (158) on the foreshore at North Gare.	80
5.4.9	Partly buried section post (145) showing their distinctive chevron shape in plan.	81
5.4.10	The remains of pillboxes used to reinforce the North Gare pier	82
5.4.11	remains of loop holes in concrete wall fragments from demolished pillbox	82
5.4.12	Fortlet 152 overlooking Greatham Creek made up of two large section posts.	83
5.4.13	Spigot mortar base 141 partially protruding from track edge.	84
5.4.14	Possible remains of demolished pillbox 142.	85
5.4.15	Recording remains of a surviving anti-glider trench 182.	86

5.4.16	Anti-tank blocks at North Gare.	87
5.4.17	Remains of barbed wire and picket wire at North Gare.	87
5.4.18	Remains of a WWI seaplane base (203) at North Gare.	88
5.4.19	Remains of sealed hatch into ROC Cold War monitoring post.	89
5.4.20	Archaeological sites recorded by NERCZA phase II at Greatham Creek / North Gare	91
5.4.21	Recorded archaeological features at the WW1 seaplane base found at North Gare	92
5.5.1	Archaeology recorded at Crimdon Dene	348
5.5.2	Crimdon Dene Site Location	94
5.5.3	Crimdon Dene in full flow in winter.	93
5.5.4	One of the large dunes to with the Dene in the foreground, showing the effects of ongoing erosion.	95
5.5.5	Investigating the landscape containing the flint scatter recorded by Raistrick and Coupland.	96
5.5.6	Uncovering the buried organic layer on the spur of land at Crimdon Dene.	97
5.5.7	Location of the “spur” of land described by Coupland which is thought to be the land on the right of the picture.	98
5.5.8	Location of the remains of heavily graded broad medieval ridge and furrow at Crimdon Dene Caravan park.	99
5.5.9	The Blackhall colliery site.	100
5.5.10	Anti-tank battery at Crimdon Dene, showing access on the roof.	101
5.5.11	Pillbox (82) built to defend the anti-tank battery (83).	101
5.5.12	One of the exposed pillboxes (106) on the beach at Crimdon Dene.	102
5.5.13	Anti tanks block utilised as a foundation for a modern bridge and Cache of anti tank cubes removed from their original location.	103
5.5.14	eroding unidentified military remains at Crimdon Dene	104
5.5.15	Archaeological features recorded at Crimdon Dene by NERCZA phase II	106
5.6.1	Archaeology recorded at Trow Point	349
5.6.2	Trow Point Site Location	108
5.6.3	The site of the experimental late Victorian “disappearing gun” on Trow point.	107
5.6.4	Truncated sub-circular earthwork, the only surviving candidate for a possible barrow on Trow point.	110
5.6.5	The Location of the disappearing gun at Trow Point.	111
5.6.6	Rock Cut steps at Trow Point.	112
5.6.7	The position and depth of one of the weapons pits with one of the WW2 gun positions visible in the foreground.	113
5.6.8	Recording one of the trenches on Trow Point	113
5.6.9	One of the two gun mountings 122 and 123 on Trow Point.	114
5.6.10	One of the eroding reinforced gun positions (129) overlooking the beach at Trow Point.	115
5.6.11	The gun position 139 on the beach having fallen from the top of the cliff on to the beach.	115
5.6.12	The surviving overgrown earthwork remains of Frenchman’s Battery south of the view looking north towards Trow Quarry	116
5.6.13	The cliff directly underneath the gun emplacement at Trow Point.	117
5.6.14	Archaeological features recorded by NERCZA Phase II at Trow Point	118
5.7.1	Archaeology recorded at Robert’s Battery	350

5.7.2	Roberts Battery Site Location	120
5.7.3	The former Officers Quarters and Observation Post at Robert's Battery.	119
5.7.4	View south to St Mary's Island from the Observation Post surviving on top of Fort House	121
5.7.5	Earthwork remains of medieval ridge-and-furrow ploughing.	122
5.7.6	The WW1 water tower and store rooms underneath.	123
5.7.7	The defended latrine block (440) with blocked up loopholes now visible.	123
5.7.8	Exterior of Fort House looking north.	124
5.7.9	Internal features indicating the higher status of the Officer's Mess and a view of the main corridor.	124
5.7.10	The serving hatch, showing the thickness of the interior walls.	125
5.7.11	Wartime map visible inside a modern cupboard. The back wall is the original wall.	125
5.7.12	View north from the Observation Tower.	126
5.7.13	Hatch leading into basement level with concrete stairs.	126
5.7.14	The basement level.	127
5.7.15	Possible ventilation pipe 437 against the inside of the south wall.	127
5.7.16	The original plans and elevations of Fort House as held by the owner.	128
5.7.17	Eroding trench (444) on the cliff edge with Fort House in the background.	129
5.7.18	One of the three earthwork mounds surviving on the firing range.	129
5.7.19	The concrete bases of one of the removed radio masts.	130
5.7.20	Circular pillbox (505) on Sandy Island, partially buried in sand.	130
5.7.21	Circular pillbox (506) showing brick-blocked aperture.	131
5.7.22	Location of Robert's Battery collapsed structures and earthwork remains.	131
5.7.23	The eroding cliffs at Hartley with St Mary's Island and lighthouse in the background.	133
5.7.24	Archaeological features recorded at Robert's Battery	134
5.7.25	Archaeological features recorded at Seaton Sluice	135
5.8.1	Archaeology recorded at Druridge Bay (North)	351
5.8.1a	Archaeology recorded at Druridge Bay (South)	352
5.8.2	Druridge Bay Site Location	137
5.8.3	Druridge Bay viewed from Cresswell looking north towards Low Hauxley	136
5.8.4	The dune and till cliff at Low Hauxley.	138
5.8.5	Part of the original Preceptory at Low Chibburn, with Second World War alterations to windows.	139
5.8.6	One of post-medieval enclosures for a small house at Cresswell.	140
5.8.7	The later farmstead at Low Chibburn	140
5.8.9	A line of 13 anti-tank blocks exposed in the mouth of a small burn	141
5.8.10	One of the observation posts. Note the large blocked entrance and aperture at the front, distinguishing it from a pillbox.	142
5.8.11	Disguised pillbox located north of Blakemoor Farm.	142
5.8.12	Earthwork remains of military camp at Cresswell	143
5.8.13	Possible base for a range finder or searchlight	144
5.8.14	Part of the bombing range marker foundation (291)	144
5.8.15	Pillbox exposed in dune in central Druridge Bay.	145
5.8.16	Eroding military structure.	146

5.8.17	Druridge Bay looking south from Low Hauxley	147
5.8.18	Archaeological features recorded at the North end of Druridge Bay	148
5.8.19	Archaeological features recorded at southern end of Druridge Bay	149
5.9.1	Low Hauxley Site Location	152
5.9.2	The small cist containing a human cremation that also lay under Bonsall's Cairn 1.	154
5.9.3	Human footprints filled with sand and pebbles deeply impressed within the peat that survives as a thin layer within the inter-tidal zone.	156
5.9.4	Examples of some of the animal footprints that can be seen amongst the human footprints.	157
5.9.5	Location of the Tyne and Wear interventions at Low Hauxley	157
5.9.6	Mapping the visible peat at Low Hauxley	158
5.9.7	Recording the extent of sandstone wall (360)	159
5.9.8	One of the square rock cut features at Low Hauxley	160
5.9.9	Anti-tank blocks used as part of the outflow of the Bondicarr Burn.	161
5.9.10	A heavily eroded anti-tank block at Low Hauxley.	162
5.9.11	Section of picket wire found eroded onto the beach.	163
5.9.12	Archaeological features recorded at Low Hauxley	166
5.10.1	Archaeology recorded at Alnmouth	353
5.10.2	Alnmouth Site Location	168
5.10.3	Recording the location of one of the oyster beds	167
5.10.4	Modern cross on top of Church Hill, overlooking Alnmouth. In the foreground is the foundation of a former hexagonal pillbox.	169
5.10.5	The enclosure bank at Beacon Hill.	170
5.10.6	The termination of the boundary (218)	171
5.10.7	Remnant medieval ridge and furrow still clearly visible in a field behind the post-medieval wall.	172
5.10.8	The post medieval chapel at Church Hill.	173
5.10.9	The extant Oyster Beds	174
5.10.10	The chapel and hollow way viewed from the east	174
5.10.11	The dedication stone on Alnmouth gun battery	175
5.10.12	Alnmouth battery showing original features and later loop holes.	176
5.10.13	Former guano storage shed south of the River Aln.	176
5.10.14	A Second World War loophole placed in the wall of the post-medieval guano shed.	177
5.10.15	Fragmentary remains of a military building, possibly disguised, south of the River Aln.	178
5.10.16	Archaeological features recorded at Alnmouth	180
5.10.17	Archaeological features of the Alnmouth Oyster ponds	181
5.11.1	Archaeology recorded at Amble	354
5.11.2	Amble Site Location	183
5.11.3	One of the larger hulks visible at Amble	182
5.11.4	The rudder of vessel (352)	185
5.11.5	The hold of the largest vessel (352)	185
5.11.6	Examining the details of carvel built hulk (352)	186
5.11.7	Vessel 355 laying against the harbour wall (453)	187
5.11.8	One of the smaller, presumably later, fishing vessels	187
5.11.9	The hulks as they appear at low tide.	188
5.11.10	Archaeological features recorded surrounding the Amble hulks	190
5.12.1	Archaeology recorded at Scremerston	355
5.12.2	Scremerston Site Location	192

5.12.3	The field containing the crop marks of the Scremerston enclosure, demonstration proximity to railway cutting and coast .	191
5.12.4	The field containing the crop marks. No surface evidence of the enclosure was visible.	194
5.12.5	The former railway cutting, showing the modern route of the line behind the stone wall.	195
5.12.6	Kiln 458 on the cliff edge, is being eroded.	195
5.12.7	The Transmitter/Receiver block at the Scremerston radar station.	196
5.12.8	Gun battery 465 south of Scremerston	197
5.12.9	Eroding concrete structure built utilising concrete sandbags, possibly of Second World War date.	197
5.12.10	The foreshore and cliffs to the south of Scremerston	198
5.12.11	Archaeological features recorded at Scremerston North	199
5.12.12	Archaeological features recorded at Scremerston South	200
5.13.1	Fenham Site Location	202
5.13.2	One of the cliff face slumps below the Fenham enclosure	201
5.13.3	The field containing the crop marks of a enclosure at Fenham	203
5.13.4	The view from the centre of the enclosure looking south	204
5.13.5	View north from the enclosure at Fenham. Ranging pole marks the centre of the surviving remains.	205
5.13.6	The cliff faces below the enclosure. The ranging pole is roughly parallel to the centre of the enclosure.	205
5.13.7	The earthwork remains of the manor and grange at Fenham.	206
5.13.8	One of the two shooting butts on the foreshore.	207
5.13.9	The remains of a small quarry and associated kiln preserved as earthworks north of Fenham	207
5.13.10	Picket wire and barbed wire (not the fence in the foreground) exposed on the cliff edge at Fenham.	208
5.13.11	Anti-tank blocks at Fenham with a small brick built shooting butt or defensive wall clearly visible.	209
5.13.12	Row of anti-tank blocks north of Fenham	209
5.13.13	The anti glider poles on Goswick Sands and Fenham Flats	210
5.13.14	Archaeological features recorded by NERCZA Phase II at Fenham	212
5.14.1	Archaeology recorded at Nessend	356
5.14.2	Nessend Site Location	214
5.14.3	The earthwork and structural remains of the chapel on St Cuthbert's Isle	213
5.14.4	Part of the exposed area of the lithic scatter	216
5.14.5	One of the early medieval long houses at the Green Shiels settlement.	217
5.14.6	A stone hearth surviving in the centre of one of the long houses at Green Shiels.	217
5.14.7	The eroding section of the chapel (388) on St Cuthbert's Isle	218
5.14.8	The main standing remains of the chapel, with Lindisfarne Priory visible in the background.	219
5.14.9	The earthwork remains of a drain for the chapel and associated building.	219
5.14.10	Possible earthwork remains of a medieval or later longhouse.	220
5.14.11	The impressive Lime Kilns (403) below Lindisfarne Castle	221
5.14.12	The wooden and stone pier (398) south of Lindisfarne castle	221
5.14.13	The holloway (399) leading to pier (398)	222
5.14.14	Two lime kilns preserved within the quarry (410)	222

5.14.15	The stone built fire step or loading bay and raised bank for the lime kilns.	223
5.14.16	The keep of the Tudor fort (396), overlooking the harbour	224
5.14.17	Partially upstanding gable end of Longhouse (409)	224
5.14.18	Archaeological features recorded by NERCZA Phase II on Holy Island	226
5.15.1	Archaeological features recorded by NERCZA Phase II at Bamburgh	357
5.15.2	Bamburgh Castle viewed from the village, looking east	228
5.15.3	Bamburgh Site Location	227
5.15.4	The beach and dunes with Bamburgh Castle in the background, looking south.	229
5.15.5	One of the possible burial mounds at the Bowl Hole.	230
5.15.6	A hexagonal pillbox in the dunes at Bamburgh.	231
5.15.7	The front aperture of one of the pillboxes.	232
5.15.8	The rear entrance of the same pillbox.	232
5.15.9	The front of the 6 inch gun emplacement (370)	233
5.15.10	The same emplacement looking head on at the gun aperture.	233
5.15.11	The concrete mounting for a 6 inch gun which would have been overlain by a metal mounting for the gun to swivel on.	234
5.15.12	One of the brick lined trenches (376) found around Bamburgh.	235
5.15.13	Anti-tank blocks painted as dice to the north of Bamburgh Castle.	235
5.15.14	Anti-tank blocks exposed on the beach at Bamburgh.	237
5.16.1	Pillbox constructed of concrete sandbags south of Dunstan Steads.	239
5.16.2	Extent of survey within the Northumberland coast area of outstanding natural beauty showing key locations marked in the text	240
5.16.3	Pillbox located in dunes at Dunstanburgh	242
5.16.4	Pillbox constructed of concrete sandbags south of Dunstan Steads	243
5.16.5	Distribution of surviving pillboxes within the Northumberland Coast Area of Outstanding natural beauty showing key locations marked in the text	244
5.16.6	Schematic plans of pillbox types found in Northumberland	245
5.16.7	Weapons pit preserved as an earthwork, directly south of Dunstanburgh castle.	246
5.16.8	Recording a Second World War Fire Trench, preserved as an earthwork north of Dunstanburgh Castle	247
5.16.9	Distribution of surviving weapons pits and trenches within the Northumberland coast area of outstanding natural beauty showing key locations marked in the text	248
5.16.10	Distribution of surviving anti-tank blocks within the Northumberland coast area of outstanding natural beauty showing key locations marked in the text	250
5.16.11	Anti-tank blocks on the beach directly north of the mouth of the River Coquet.	251
5.16.12	Coastal battery gun emplacement covering the potential landing beach at Goswick (463).	252
5.16.13	Budle battery (500), clearly demonstrating scale of construction.	253
5.16.14	Machine gun emplacement exposed in dunes south of Beadnell.	253
5.16.15	Surviving buildings at Craster Radar Station, later used to house Prisoners of War.	254
5.16.16	Plan and elevations of Craster coast defence/ chain home low transmitter/ receiver block	255
5.16.17	The surviving remains of the former runway at RAF Boulmer looking	256

	north-west from the road.	
5.16.18	Plan of the Developments of RAF Boulmer and its Environs	257
5.16.19	Air Raid Shelter (629) in the churchyard at Boulmer. The sunken entrances are still visible at both ends.	258
5.16.20	Stanton air raid shelter in garden of the Old Rectory, Howick.	259
5.16.21	Destroyed pillbox (672) in the dunes between Seahouses and Bamburgh.	260
5.16.22	Concrete of Second World War date eroding out of the cliff base on the beach near Boulmer.	260
5.16.23	Probable pillbox eroded onto the beach near Seahouses; there are many such examples along this stretch of coast.	261
5.16.24	Evidence of the former minefield between Dunstanburgh and Beadnell. This is one of several craters created by the removal of the mines	262
5.16.25	Concrete base for winding gear for the quarry 2km to the south.	263
5.16.26	The track for the quarry leading to the winding gear base at Budle	264
5.16.27	Distribution of all surviving sites within the Northumberland coast area of outstanding natural beauty showing key locations marked in the text	265
5.16.28	Distribution of previously recorded site within the Northumberland coast area of outstanding natural beauty showing key locations marked in the text	266
5.16.29	SMP2 projected loss for AONB (North)	267
5.16.30	SMP2 projected loss for AONB (South)	268
5.16.31	Distribution of all surviving remains within the Northumberland coast area of outstanding natural beauty showing key locations marked in the text	269
5.16.32	Extent of survey within the Northumberland coast AONB	270
5.17.1	The Whitburn fish trap as seen on the ground from the west.	271
5.17.2	Second World War pillbox at the First World War seaplane base at North Gare, Teesside.	272
5.17.3	The quarry at Loftus Alum works, North Yorkshire, viewed from above.	273
6.1	Band of exposed peat exposed in the cliff face at Low Hauxley	274
6.2	Excavation and recording of a test pit at Crimdon Dene, County Durham.	275
6.3	Low Hauxley and Hartlepool Bay radio carbon results	278
6.4	Crimdon Dene radio carbon results	279
6.5	Small bay east of Victoria Harbour, where samples were collected	279
6.6	Location of samples recovered from Hartlepool	282
6.7	Crimdon Dene viewed looking south	283
6.8	Location of samples collected from Crimdon Dene	285
6.9	Cliff face at north end of Druridge Bay from which sample were collected.	286
6.10	Area of shell midden at Low Hauxley	287
6.11	Location of samples collected at Low Hauxley	291
7.1	Location of previous excavation at Low Hauxley eroding from the cliff	303
7.2	Location of samples at Low Hauxley	305
7.3	The briefly exposed footprints at Low Hauxley	306
7.4	Actively eroding remains at St Cuthbert's Isle, Northumberland	308
7.5	Location of St Cuthbert's Isle, Northumberland	309
7.6	Erosion of the late prehistoric enclosure at Fenham, Northumberland	310

7.7	Location of the late prehistoric enclosure at Fenham, Northumberland	312
7.8	Gun emplacement at Budle Bay, Northumberland	313
7.9	Features surrounding the gun emplacement at Budle Bay Northumberland	315
7.10	Trow Point viewed from the West	316
7.11	Location of archaeological features at Trow Point	317
7.12	Three of the Amble hulks, located in the River Coquet	319
7.13	Location of the Amble hulks	320
7.14	Location of the Scremerston late prehistoric enclosure, viewed from the North	322
7.15	The location of the late prehistoric enclosure at Scremerston	324
7.16	Second world war gun emplacement at Scremerston	325
7.17	Location of archaeological features surrounding the gun emplacement at Scremerston	327
7.18	Budle bay fish traps viewed from the south	328
7.19	Slipway of First World War seaplane base at North Gare	329
7.20	Location of First World War seaplane base at North Gare	331
7.21	Location of Robert's Battery looking south	332
7.22	Location of archaeological features surrounding Robert's Battery	333
7.23	Area of exposed clay containing lithic material at Nessend, Holy Island	335
7.24	Location of Nessend lithic scatter	336
7.25	Rapid recording of an eroding pillbox at Warkworth Northumberland	338

List of tables

4.1	Example of completed data table attached to each recorded feature	48
5.2	North East Shoreline Management Plan 2 policies for Management Areas 21 and 22 (Sandsend to Kettleness)	69
