<p><b>Description of works.</b></p> <p>Context One Archaeological Services Ltd (COAS) carried out archaeological monitoring and recording at Makurdi, Marldon Road, Ipplepen, Newton Abbot, Devon on behalf of Mrs A Guppy. The works was carried out as a condition of planning consent in mitigation of a development proposal to construct a side extension to the existing property. The work was advised by Stephen Reed on the basis that the development is located 'in an area of high archaeological potential just to the north of an area where geophysical survey and archaeological excavation has identified a concentration of prehistoric and Roman activity'.</p> <p>The first phase of archaeological work was a desk-based appraisal of archaeological and historical data recorded within a 500m radius of the Site. The data was assembled in a digitised pack and included map regression incorporating Tithe and Ordnance Survey maps.</p> <p>The property had been partly demolished prior to the start of groundworks (<b>Plate 1</b>). The construction work comprised the excavation of foundation trenches measuring 0.5m deep and 0.6m wide using a toothless bucket encompassing an area of c. 7.5m x 12.6m (<b>Figure 1, Plate 2</b>). Development excavations demonstrated a similar deposit sequence across the development site and two profiles were recorded (<b>Figure 1, Plates 3 and 4</b>). The stratigraphic sequence consisted of:</p> <p>0 – 0.25m Mid brown silty topsoil          0.25 – 0.5m Light brown silty clay subsoil          0.5m+ Shale and clay natural</p> <p>No visible features or deposits of archaeological interest were encountered during the monitoring programme and no finds were observed or collected.</p>		
<p><b>A plan as well as any other relevant drawings must be attached showing the location and extent of site, areas investigated and features exposed.</b></p>		
<b>Recorder:</b> Luke Jarvis and Tara Fairclough  <b>Context One Archaeological Services Ltd.</b>		<b>Date sent to HER:</b>
