Kilmichael Glassary parish

Braevallich Hydro-electric Scheme

Watching brief

John Lewis – Scotia Archaeology

NM 95447 06858; NM 95485 06927 to NM 95490 06939; NM 95488 07047 Watching briefs were maintained on 12 July 2011 during excavation at three sections of a pipe trench for a new hydro-electric scheme to the S of Braevallich on the S shore of Loch Awe. At NM 95447 06858 the trench cut through a drystone dyke, probably dating to the 19th century, and a nearby earth bank that seemed to be upcast from an adjacent ditch. Between NM 95485 06927 and NM 95490 06939 the trench cut through a section of rig and furrow which was very shallow in profile. At NM 95488 07047 it ran through an earth and stone boundary of possible pre-Improvement age.
