Auchineden Hydro

Walk-over survey

John Lewis – Scotia Archaeology

NS 5040 7841 to NS 5151 7888 A walk-over survey was carried out on 22 September 2014 along the route of a proposed new hydro-electric scheme on the Auldmurroch Burn, near Blanefield (DES ?). Unfortunately, bracken covered much of the ground at that time and the route was re-surveyed on 23 January 2016 when vegetation was low. Nothing of archaeological significance was encountered on either occasion.
