Clachan to Sloy 132kv overhead line

Walk-over survey

John Lewis – Scotia Archaeology

NN 1920 1326 to NN 3085 0918 A desk study and walk-over survey (the latter on 10th and 18th June 2010) were undertaken prior to the refurbishment of the power line from Clachan Power Station, along Glen Fyne and the W sides of Loch Sloy and the Inveruglas. Water as far as the Grid Sub-Station above Sloy Power Station. The remains of two previously unrecorded sites were encountered during this survey.

One side of an enclosure surrounded by a low wall/bank was found some 1.5km NE of Clachan Power Station. It measures approximately 80m NE/SW although its width is unknown; its E corner is at NN 20264 14223.

The scant remains of an old trackway, barely 1m wide, together with associated retaining walls were encountered on the W of the valley containing the Inveruglas Water, some 600m S of Sloy Dam at NN 29014 10453.
